Return to an Order of the House of the 14th May, 1913, for a copy of all reports, correspondence and other documents on file in the Department of Railways and Canals, relating in any way to a suggested survey and construction of a line of railways from Country Harbour, Guysborough County, N.S., to Cape George, N.S., or any other point in Antigonish County. Presented January 22, 1914.—*Mr. Chisholm (Antigonish)*.
Not printed.
- 86^a. Return to an Order of the House of the 29th January, 1912, for a copy of all letters, written to the Right Honourable the Prime Minister, the Honourable the Minister of Railways and Canals, or any other member of the Government since October 10, 1911, by S. R. Griffin, Goldboro, N.S., John S. Wells, White Head, N.S., and G. A. R. Rowlings, Sydney, N.S., relating to the construction of a branch line of the Intercolonial Railway into the County of Guysboro, N.S., also of the replies to the same. Presented January 22, 1914.—*Mr. Sinclair*.....*Not printed.*
87. Return to an Order of the House of the 27th January, 1913, for a copy of the contract entered into by C. R. Scoles, New Carlisle, Quebec, with the Department of Railways and Canals for the completion of the Atlantic and Lake Superior Railway between Caplin and Paspebiac, and of the report of the engineers on such work, of details of payments, and of all documents bearing on such matter. Presented January 22, 1914.—*Mr. Marcil*.....*Not printed.*
88. Return to an Order of the House of the 21st May, 1913, for a copy of all documents, correspondence, reports and inquiries, relating to an accident which occurred at Trois Pistoles, Intercolonial Railway on 10th September, 1912, respecting the death of Arsène Ouellet, and the wounds inflicted on Joseph Gagnon, at the time that these two men were struck by train No. 150 on the above date. Presented January 22, 1914.—*Mr. Boulay*.....*Not printed.*
89. Annual Return respecting Trade Unions under Chapter 125, R.S.C., 1906. Presented by Hon. Mr. Coderre, January 22, 1914.....*Not printed.*
90. Return to an Order of the House of the 29th January, 1913, for a return showing:—
1. What purchases of land have been made by the Dominion of Canada since Confederation?
 2. The amount of money paid for same?
 3. The approximate area of land so purchased?
 4. In what provinces the said land is now situated?
 5. The approximate area in each province?
 6. The acreage of school lands set aside by the Government for the Provinces of Manitoba, Saskatchewan and Alberta?
 7. The present approximate value of the said school lands so set aside in each of the said Provinces?
 8. The number of acres of the said school lands already sold in each of the said Provinces, and the proceeds of such sales, deducting expenses?
 9. The acreage of lands set apart at any time by the Government as an endowment to any university, the name of the university, and the Province in which the lands are situated?
 10. The number of acres of swamp lands transferred to the Province of Manitoba under the provisions of Chapter 50 of the Acts of 1885 and amendments thereto?
 11. The gross amount of cash allowance made at any time by the Federal Government to each or any Province of Canada, to assist in the construction of necessary public buildings?
 12. The approximate value of the railway, public works and other assets of each of the Provinces of Canada, taken over by the Federal Government at the time that each Province entered the union?
 13. The annual compensation made to the Province of Manitoba, Saskatchewan and Alberta, by reason of the fact that they are deprived of the public lands as a source of revenue?
 14. The debt allowance to any time placed to the credit of each of the Provinces of Canada by the Federal Government. Presented January 22, 1914.—*Mr. Sinclair*.
Not printed.

Printed for distribution and sessional papers.
- 118a. Memorandum on behalf of Nova Scotia, New Brunswick and Prince Edward Island, claiming the right to have their original representation in the House of Commons restored. Presented by Hon. Mr. Foster, February 10, 1914.
Printed for distribution and sessional papers.
119. Copy of the proceedings and resolutions adopted at the last Interprovincial Conference. Presented by Hon. Mr. Foster, February 10, 1914.
Printed for distribution and sessional papers.
- 119a. Minutes of the Proceedings in Conference of the representatives of the Provinces, October, 1913. Presented by Hon. Mr. Borden, March 11, 1914.....*Not printed.*
120. Return to an Order of the House of the 2nd June, 1913, for a copy of the application of Pacifique Leroux for damages sustained by removal of a bridge on the Soulanges Canal, and of all reports and correspondence on the same. Presented February 12, 1914.—*Sir Wilfrid Laurier**Not printed.*
121. Return to an Order of the House of the 20th January, 1913, for a copy of all plans, proposals, diagrams, specifications, reports, surveys, requests, correspondence, letters, telegrams and of all other communications and documents in possession of the Department of Railways and Canals, relating or in any wise appertaining to the proposed steam ferry service for all seasons of the year between the mainland of New Brunswick, or of Nova Scotia, and Prince Edward Island, whereby a connection could be made between the Intercolonial Railway and the Prince Edward Island Railway, by the transfer of railway cars over and across the waters of the Straits of Northumberland by means of said proposed ferry, together with a statement of all estimates and figures as to the total cost of the installation of such ferry, and the items of said estimate or estimates in detail. Presented February 12, 1914.—*Mr. Emmerson*.....*Not printed.*
- 121a. Return to an Order of the House of the 11th December, 1912, for a copy of all letters, telegrams and other documents relative to the establishment of a car ferry between Prince Edward Island and the mainland, of the report or reports of any engineers or experts in regard to the said proposal, and of their estimates of the cost thereof, the advertisement calling for tenders therefor, and a copy of any plans, conditions or proposed specifications therefor, or in regard thereto, and of any tenders received in response to said advertisement, of the reports, if any, of any officials in regard thereto, and of all data in possession of the Department in respect of said project. Presented February 12, 1914.—*Mr. Macdonald*.....*Not printed.*
122. Return to an Order of the House of the 2nd February, 1914, for a return showing the total amount of liability in the form of temporary loans on the last day of each month during the period between the 1st day of May, 1913, and December 31, 1913, together with, in each case, the rate of interest paid upon said amounts during the same periods. Presented February 12, 1914.—*Mr. Maclean (Halifax)*.....*Not printed.*
123. Report of the Royal Commission appointed to investigate the construction of the National Transcontinental Railway, together with the evidence taken and exhibits filed before the said commission. Presented by Hon. Mr. Cochrane, February 12, 1914.
Printed for distribution and sessional papers.
- 123a. Return to an Order of the House of the 23rd February, 1914, for a copy of the assignment by M. P. and J. T. Davis in September, 1909, of contracts numbers 16 and 17 on the National Transcontinental Railway to O'Brien, Fowler and McDougall, and of the Transcontinental Commissioner's approval thereof, in the said month of September, 1909. Presented March 4, 1914.—*Mr. Graham*.....*Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

- 123b.** Return to an Order of the House of the 18th February, 1914, for a copy of the contract with Mr. Joseph Gosselin for the locomotive and car shops at St. Malo, and of all telegrams, letters and correspondence between the Department and Mr. W. J. Press, mechanical engineer, or the chief engineer, with regard to change of the price of 85 cents per cubic yard for common excavation to the price of \$2.30 per cubic yard for frozen earth. Presented March 11, 1914.—*Mr. Graham*.....*Not printed.*
- 123c.** Return to an Address to His Royal Highness the Governor General of the 16th February, 1914, for a copy of all papers in any way relating to the tender, original contract, and amended contract of Mr. Joseph Gosselin for the locomotive and car shops at St. Malo, Quebec, together with a copy of the advertisements for tenders, the specifications, the contract, the amended contract, reports of engineers, recommendations to Council, Orders in Council, letters, telegrams, minutes or reports of interviews, and of all other documents referring in any way to the said contract or the amendment thereof. Presented March 11, 1914.—*Mr. Graham*.....*Not printed.*
- 123d.** Return to an Address to His Royal Highness the Governor General of the 23rd February, 1914, for a copy of all correspondence in connection with the appointment of Messrs. Lynch-Staunton and Gutelius as commissioners to investigate the cost of construction of the Eastern division of the National Transcontinental Railway, and also of the Order in Council appointing them. Presented March 12, 1914.—*Mr. Graham*.....*Not printed.*
- 123e.** Return to an Order of the House of the 23rd February, 1914, for a copy of the report of Geo. S. Hodgins, of New York, regarding the Transcona shops of the Transcontinental Railway, dated June 10, 1912. Presented March 19, 1914.—*Mr. Graham*.....*Not printed.*
- 123f.** Return to an Order of the House of the 23rd March, 1914, for a copy of all plans and profiles designed by the engineers, in connection with the intended construction of the Transcontinental Railway from a point called Ste. Claire, County of Dorchester, between the twentieth and thirtieth miles, east of the Quebec Bridge, going through the parishes of St. Malachie, Standon, Cranbourne, Ste. Germaine and Ste. Justine, passing through the townships of Panet, Rolette and Valois, towards Ste. Perpetue, on the 105th mile east of the Quebec bridge, and of all the information and reports on the nature of land, timber and minerals of the places through which the engineers have been, showing also how much the railway would have cost per mile had it been built in that part of the country. Presented April 7, 1914.—*Mr. Sevigny*.....*Not printed.*
- 123g.** Return to an Order of the House of the 23rd March, 1914, for a copy of all correspondence, messages, petitions, and other documents in connection with the choice of a site intended for the construction of a station at the village of St. Eleuthere, on the National Transcontinental Railway. Presented April 15, 1914.—*Mr. Lapointe (Kamouraska)*.....*Not printed.*
- 123h.** Return to an Order of the House for a return showing.—
1. What kind of coaling plants have been provided on the National Transcontinental Railway?
 2. How many have been provided?
 3. Where they have been constructed?
 4. If any tenders were called for them?
 5. The name and address of the lowest tenderer.
 6. From whom they were obtained and at what price? Presented April 15, 1914.—*Mr. Macdonald*.....*Not printed.*
- 124.** Return to an Address to His Royal Highness the Governor General, of the 2nd February, 1914, for a copy of all decisions of the Board of Railway Commissioners made on or after the 10th of October, 1911, on which appeals have been taken to the Governor in Council, and of all decisions given by the Governor in Council on such appeals. Presented February 13, 1914.—*Mr. Sinclair*.....*Not printed.*
- 125.** Return to an Order of the House of the 2nd February, 1914, for a copy of all rules and regulations made and passed by the Board, with the approval of the Minister, under the provisions of the Intercolonial and Prince Edward Island Railways Employees' Provident Fund Act, pursuant to section eight of said Act. Presented February 13, 1914.—*Mr. Emmerson*.....*Not printed.*
- 125a.** Return to an Order of the House of the 2nd February, 1914, for a return showing in detail the transactions and proceedings of the so-called Provident Fund Board from the 1st day of January, A.D., 1912, to date, with the names of applicants and their addresses and the nature of their employment, for retirement under the provisions of The Intercolonial and Prince Edward Island Railways Employees' Provident Fund Act, and a statement of the names so retired during that period, showing the amount of their respective retiring allowances, their respective terms of service, their respective ages, and the total of the fixed yearly charges upon the said fund made thereby; together

CONTENTS OF VOLUME 28—Continued.

with a copy of all correspondence, letters, documents and other communications relating to such applications and retirements on file in the Railway Department either at Moncton or at Ottawa, and of all correspondence, letters, petitions or other communications addressed to and received by the Minister of Railways and Canals, the Department, or any official thereof, or any member of the Government from any member of Parliament, or other person charged with the responsibility of directing Government or railway patronage, or from any person or persons, club or association assuming to advise or direct with respect to any such patronage, and of all replies made to any such letters, petitions or other communications. Presented March 3, 1914.—*Mr. Emmerson**Not printed.*

- 126.** Return to an Order of the House of the 2nd February, 1914, for a return showing the amounts of receipts and expenditures on the Intercolonial Railway during the months of April, May and June, of 1913, respectively, giving separately the revenue from passenger trains, freight traffic, mails and express and miscellaneous revenue, respectively, with the total thereof during that period; also the same information respecting the corresponding months of 1912, with the total thereof for that period. Also a statement showing the working expenses or expenditure during months of April, May and June of 1913, respectively, giving separately the working expenses or expenditure on maintenance of way and structures, maintenance of equipment, traffic expenses, transportation expenses and general expenses; with the total thereof during that period; and also the same information respecting the corresponding months of 1912, with the total thereof for the same period; also a statement showing the cost of transporting freight per ton mile during the period named in the years 1912 and 1913. Presented February 13, 1914.—*Mr. Emmerson*.....*Not printed.*
- 126a.** Return to an Order of the House of the 4th March, 1914, for a return showing the total revenue of the Intercolonial Railway during the fiscal year 1912-1913, and the revenue from Campbellton and all stations east of Campbellton, and from those west thereof as far as Halifax, on the main line, including the branches east of Campbellton, Prince Edward Island Railway excluded. Presented March 17, 1914.—*Mr. Boulay*.
Not printed.
- 126b.** Return to an Order of the House of the 2nd February, 1914, for a return showing the total earnings of the Intercolonial Railway on Division 3 in connection with passenger traffic for the calendar years 1910, 1911, 1912 and 1913 respectively and the monthly passenger traffic earnings for each of the said years; the total expenses or expenditures connected with the said passenger traffic on said division during the said years respectively; together with a statement showing the monthly passenger traffic expenses or expenditures connected with said passenger traffic for each of the months during the said years; and showing, in addition, the loss and surplus for each of said years and the months thereof respectively, in connection with the passenger traffic on said division 3 between St. John and Halifax; also a statement of the revenue and expenditures on the transactions connected with said passenger traffic over said division during the months of December, 1913, and January, 1914, separately; and also a statement showing the gross passenger earnings for December, 1912, and January, 1914, respectively, and the gross expenditures with the passenger traffic for the said months respectively; together with a copy of all reports, returns, letters and correspondence relating to the earnings, expenditures or losses or surpluses on said division either in connection with freight or passenger traffic. Presented April 7, 1914.—*Mr. Emmerson*....*Not printed.*
- 127.** Return to an Order of the House of the 2nd February, 1914, for a return showing the names of the employees of all kinds on the Soudages Canal in the section extending from the foot of the canal to the first bridge; with the functions of each of them, the salary thereto attached and the date of their hiring during the season of navigation. Presented February 13, 1914.—*Mr. Boyer*.....*Not printed.*
- 128.** Return to an Order of the House of the 3rd February, 1914, for a return showing:—
1. The names of all persons from whom land or property has been expropriated for right of way and station purposes in connection with the Dartmouth to Dean Settlement Branch of the Intercolonial Railway of Canada.
 2. The quantity of land or property so expropriated.
 3. The amount paid or offered to such person or persons for such land or property, in cases where payment or an offer has been made. Presented February 13, 1914.—*Mr. Maclean (Halifax)**Not printed.*
- 129.** Copy of the International Convention for the safety of human life at sea. Presented by Hon. Mr. Hazen, February 16, 1914.....*Printed for distribution and sessional papers.*
- 129a.** Return to an Address to His Royal Highness the Governor General of the 2nd February, 1914, for a copy of all correspondence with the Imperial authorities, or any commercial bodies, on the subject of Safety of Life at Sea; and of the Order in Council appointing representatives of Canada on the International Conference on Safety of Life at Sea. Presented February 20, 1914.—*Sir Wilfrid Laurier*.....*Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

130. Return to an Order of the House of the 9th February, 1914, for a copy of all accounts, bills, receipts and vouchers in connection with the services of N. W. White, during 1912 and 1913, as commissioner to inquire into Indian lands in the Province of British Columbia. Presented February 17, 1914.—*Mr. Maclean (Halifax)*.....*Not printed.*
131. Return to an Order of the House of the 2nd February, 1914, for a copy of all documents whatsoever relating to the investigation of a claim of Jean Ross or Joseph Ross, of Anqui, County of Rimouski, Province of Quebec, against the Intercolonial Railway, following an accident to a horse, which occurred on the 10th of December, 1906. Presented February 17, 1914.—*Mr. Boulay*.....*Not printed.*
132. Copy of the Order in Council appointing a commission to investigate the cost of living. Presented February 17, 1914.—*Sir Wilfrid Laurier*.....*Not printed.*
133. Statement of the population of Canada and its Provinces and Territories in the years 1871, 1881, 1891, 1901 and 1911, according to the census returns. Presented by Hon. Mr. Borden, February 17, 1914.....*Not printed.*
134. Return to an Order of the House of the 9th February, 1914, for a copy of all protests, if any, by the Grand Trunk Pacific Railway Company, against changes in grades of the National Transcontinental Railway from Winnipeg eastward, and terminal facilities at Quebec; of all subsequent approvals of such changes, if any, by the Grand Trunk Pacific Railway Company, and of all correspondence on the above subject. Presented February 18, 1914.—*Sir W. Laurier*.....*Not printed.*
135. Copy of Second Interim Report of the Royal Commission on the natural resources, trade and legislation of certain portions of His Majesty's Dominions, together with the Minutes of Evidence taken in Australia and New Zealand in 1913, in connection therewith. Presented by Hon. Mr. Foster, February 18, 1914.....*Not printed.*

137. Return to an Order of the Senate dated 27th January, 1914, for a copy of the Annual Report made by the Salisbury and Albert Railway Company to the Railway Department.—(*Senate*)*Not printed.*
138. Return to an Order of the House of the 9th February, 1914, for a copy of all correspondence and documents in reference to the matter submitted to Sir William Whyte by the Government, the Transcontinental Commission or the commission appointed to investigate the construction of the National Transcontinental Railway, between the Government or any member or official thereof, and any official of the Grand Trunk Pacific Railway Company; and also of all correspondence between any member or official of either the above named commissions and the Justice Department, concerning the said matter. Presented February 19, 1914.—*Mr. Graham*.....*Not printed.*
139. Return to an Order of the House of the 16th February, 1914, for a return showing the names, salaries and grades of the private secretaries of the members of the Liberal Government on October, 1911; the names of the private secretaries employed from time to time by the members of the present Government, and the salary and grade of each. Presented February 19, 1914.—*Mr. Murphy*.....*Not printed.*
140. Return to an Order of the House of the 9th February, 1914, for a return showing how many woollen industries are operated in the country; where situated, in which province, and in what city, town or village; the number of hands employed in each, and the output for each during 1913. Presented February 19, 1914.—*Mr. Verville*.
Not printed.
141. Return to an Order of the House of the 2nd February, 1914, for a return showing the number, location, and mileage of rural mail routes established in Bonaventure County from October, 1911, to date, if any; together with a copy of all applications, memorials, reports and correspondence generally on this matter. Presented February 23, 1914.—*Mr. Marcil (Bonaventure)**Not printed.*
- 141a. Return to an Order of the House of the 2nd February, 1914, for a return showing a tabulated statement of the number of rural mail delivery routes opened since 1911, including the number of boxes used; also the new mail delivery contracts necessitated by the establishment of said routes in each county, not already moved for. Presented February 23, 1914.—*Mr. Lemieux*.....*Not printed.*
- 141b. Return to an Order of the House of the 19th February, 1914, for a return showing the number of rural mail delivery routes which have been established in Nova Scotia, and their names; and if any of the routes are provided with a daily service. Presented March 2, 1914.—*Mr. Sinclair*.....*Not printed.*

CONTENTS OF VOLUME 28—Continued.

- 141c.** Return to an Order of the House of the 18th February, 1914, for a copy of all documents, petitions, letters, telegrams, &c., exchanged between any one and the Post Office Department, in connection with the establishing of a rural mail service in the Parish of Ste. Marguerite de Blairfindie, County of St. Johns and Iberville, and of all documents, letters and telegrams, &c., relating to the contracts for the conveyance of rural mail in said parish. Presented April 29, 1914.—*Mr. Demers*.....*Not printed.*
- 141d.** Return to an Order of the House of the 20th April, 1914, for a return showing:—
 1. Whether the rural postal delivery service has been started in the County of Quebec? If so, when and in what parishes of said county?
 2. Whether public tenders have been advertised for such service? If so, when, how many were received and from whom, the amount of each tender, and what tender was accepted?
 3. The price of the accepted tender, the name of the tenderer, the condition or conditions of payment, and the length of the contract. Presented April 30, 1914.—*Mr. Lachance**Not printed.*
- 141e.** Return to an Order of the House of the 6th April, 1914, for a copy of all letters, petitions and documents relative to the establishment of a rural mail delivery route from New Glasgow through Mount William, Granton and Abercrombie, County of Pictou. Presented May 8, 1914.—*Mr. Macdonald**Not printed.*
- 141f.** Return to an Order of the House of the 4th March, 1914, for a copy of all correspondence, telegrams, petition, recommendation and other documents relating to the establishment of the rural mail service in the parish of St. Theodore d'Acton. Presented May 16, 1914.—*Mr. Maréchal (Bonaventure)**Not printed.*
- 141 (g).** Return to an Order of the House of the 11th February, 1914, for a copy of all petitions, letters, telegrams and other papers relative to the establishment of rural mail delivery routes in the County of Pictou since January 1, 1912, together with the number of said routes, the carriers on each route, the tenders received in each case for the service, a copy of the correspondence in relation to said tenders and their acceptance, and the post offices closed or to be closed as the result of the establishment of said routes. Presented June 12, 1914.—*Mr. Macdonald*.....*Not printed.*
- 142.** Return to an Order of the House of the 2nd February, 1914, for a return showing what new post offices have been established in the County of L'Islet since 1911; the names of the officer in charge of each of them; the revenue brought; the expenses incurred by these offices, including the salary and fees of the postmaster and charges for the conveyance of the mails; if these officers have been asked for by petitions of the interested ratepayers, and if so, by whom; the quantity of letters and other postal matters that have passed through each of these offices since they have been established. Presented February 23, 1914.—*Mr. Lapointe (Kamowaska)*.....*Not printed.*
- 142a.** Return to an Order of the House of the 30th March, 1914, for a copy of all documents, papers, petitions, correspondence, reports, &c., in connection with the opening of a post office under the name of Giasson in the parish of St. Aubert, County of L'Islet. Presented April 22, 1914.—*Mr. Lapointe (Kamowaska)*.....*Not printed.*
- 143.** Return to an Order of the House of the 2nd February, 1914, for a return showing the names and addresses, with rank or occupation, of all persons who accompanied the Minister of Militia and Defence to the Old country and Europe during the summer of 1913, and whose expenses were paid wholly or in part by the Dominion Government, or who were paid salary or allowance during such time, with the amount paid to each person. Presented February 23, 1914.—*Mr. Carvell*.....*Not printed.*
- 144.** Return to an Order of the House of the 11th February, 1914, for a copy of all correspondence, telegrams and other papers to be found in the Department of the Naval Service in connection with the death and burial, at Montreal, of Joseph LeBlanc, a sailor on D.G.S. *Canada*. - 146.** Return to an Order of the House of the 9th April, 1913, for a copy of all correspondence, telegrams, petitions, affidavits, certificates, reports, complaints and other documents, relating to the resignation of Mr. M. C. Blais, recruiting officer of the Department of Marine and Fisheries from the Government shipyards at St. Joseph de Sorel, and to the appointment of Mr. F. P. Vanasse to this office. Presented February 23, 1914.—*Mr. Cardin**Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

147. Return to an Order of the House of the 9th February, 1914, for a copy of all correspondence, letters, telegrams, and other documents relating to industrial disputes during the year 1913, between the operators and employees of any of the companies operating coal mines on Vancouver Island, and disturbances arising out of the same; and of any correspondence, either before or since the year 1913, with respect to any of the said disputes. And in particular of all correspondence, letters, telegrams, and other documents to or from the Prime Minister, the Honourable the Minister of Labour or any of the officers of the Department of Labour, respecting attempts at conciliation in connection with these disputes, and to or from the Honourable the Minister of Militia, or any officers of the Department of Militia and the Honourable the Minister of Justice, or any officers of the Department of Justice, respecting the calling out and services of the militia in connection with said disputes; and a statement of the arrests made and of convictions, if any, for infringement of the laws. Also a copy of the evidence taken and reports of investigations made by the Honourable the Minister of Labour, Mr. Samuel Price, Commissioner appointed by the Department of Labour, and of the Deputy Minister of Labour; together with a detailed statement of the expenses of all such investigations and expenses otherwise incurred by any of the Departments of the Government in consequence of said disputes or difficulties arising out of same. Presented February 23, 1914.—*Sir W. Lawrier*.....*Not printed.*
- 147a. Return to an Address to His Royal Highness the Governor General of the 2nd February, 1914, for a copy of all correspondence, letters, telegrams and reports that have been exchanged between the Government and the strikers and operators of coal mines in British Columbia since the beginning of the strike until the present; also a copy of all Orders in Council in connection with said strike. Presented February 23, 1914.—*Mr. Verville**Not printed.*
- 147b. Supplementary Return to an Order of the House of the 9th February, 1914, for a copy of all correspondence, letters, telegrams, and other documents relating to industrial disputes during the year 1913, between the operators and employees of any of the companies operating coal mines on Vancouver Island, and disturbances arising out of the same; and of any correspondence, either before or since the year 1913 with respect to any of the said disputes. And in particular of all correspondence, letters, telegrams, and other documents to or from the Prime Minister, the Honourable the Minister of Labour or any of the officers of the Department of Labour, respecting attempts at conciliation in connection with these disputes, and to or from the Honourable the Minister of Militia, or any officers of the Department of Militia and the Honourable the Minister of Justice, or any officers of the Department of Justice, respecting the calling out and services of the militia in connection with said disputes; and a statement of the arrests made and of convictions if any, for infringement of the laws. Also a copy of the evidence taken and reports of investigations made by the Honourable the Minister of Labour, Mr. Samuel Price, Commissioner appointed by the Department of Labour, and of the Deputy Minister of Labour; together with a detailed statement of the expenses of all such investigations and expenses otherwise incurred by any of the Departments of the Government in consequence of said disputes or difficulties arising out of same. Presented February 24, 1914.—*Sir Wilfrid Lawrier*.....*Not printed.*
148. Regulations, approved by Order in Council, dated the 19th day of January, 1914, for the disposal of petroleum and natural gas rights, the property of the Crown in Manitoba, Saskatchewan, Alberta, the Northwest Territories, the Yukon Territory, the Railway Belt in the Province of British Columbia, and within the tract containing three and one-half (3½) million acres of land acquired by the Dominion Government from the Province of British Columbia, and referred to in subsection (b) of section 3 of the Dominion Lands Act. Presented by Hon. Mr. Roche, February 23, 1914. *Not printed.*
149. Regulations in regard to grazing leases of vacant Dominion lands, &c. Presented by Hon. Mr. Roche, February 23, 1914.....*Not printed.*
150. Return to an Order of the House of the 9th February, 1914, for a return showing the amounts in detail paid to Ward Fisher, of Shelburne, N.S., fishery inspector, for the years 1912 and 1913 for salary, office expenses, travelling expenses, and all other expenses. Presented February 24, 1914.—*Mr. Maclean (Halifax)*.....*Not printed.*
151. Return to an Order of the House of the 2nd February, 1914, for a copy of the report of operations at the fishery hatchery at Port Daniel West, for the year 1913. Presented February 24, 1914.—*Mr. Marcell (Bonaventure)**Not printed.*
152. Return to an Order of the House of the 18th February, 1914, for a copy of all correspondence, investigations or other documents respecting the loss of a horse killed on the Intercolonial, on the 10th of September last, the property of Johnny Roy, of Amqui. Presented February 24, 1914.—*Mr. Boulay*.....*Not printed.*

CONTENTS OF VOLUME 28—Continued.

153. Return to an Order of the House of the 16th February, 1914, for a return showing the increase in freight rates on live-stock, including horses, carried over the Intercolonial Railway, by the tariff effective May 1, 1913, as compared with the tariff effective April 15, 1909, for the following distances, respectively:—

Over	5 and not over	10 miles.
" 10	"	15 "
" 15	"	20 "
" 20	"	25 "
" 25	"	30 "
" 30	"	40 "
" 40	"	50 "
" 50	"	60 "
" 60	"	70 "
" 70	"	80 "
" 80	"	90 "
" 90	"	100 "
" 100	"	110 "
" 110	"	120 "
" 120	"	130 "
" 130	"	140 "
" 140	"	150 "
" 150	"	160 "

Presented February 24, 1914.—*Mr. Kyle*.....Not printed.

154. Return to an Order of the House of the 9th February, 1914, for a copy of all correspondence, letters, telegrams, and other documents relative to the report and recommendations of the Board appointed under the Combines Investigation Act to investigate the methods adopted by the United Shoe Machinery Company. Presented February 24, 1914.—*Sir Wilfrid Laurier*.....Not printed.
155. Return to an Address to His Royal Highness the Governor General of the 2nd February, 1914, for a copy of memorandum of agreement between the Canadian Government railways and the Canadian Pacific Railway Company, covering the transportation of freight and passengers between Halifax and St. John over the Intercolonial Railway, in connection with the Canadian Pacific and Allan Line Steamships, carrying British mails, making Halifax the terminal port; also of all agreements, Orders in Council, petitions, memorials, regulations or orders of the Department of Railways and Canals, or of any officer or officers of the Intercolonial Railway; of letters or other correspondence, interviews with the Prime Minister and other member or members of the Government, and representations to the Prime Minister, or other member or members of the Government, in any manner relating to the said memorandum of agreement; and of all telegrams and letters received by the Government, or any member thereof, or sent by them, either in reply or otherwise; also of all letters, telegrams, representations or other documents relating to the said agreement or in any way connected therewith, received by F. P. Gutelius, the General Manager of the Intercolonial Railway, from the Canadian Pacific Railway, or from any corporation, persons or body, or sent by him, in reply thereto or otherwise, to the said Canadian Pacific Railway or to any other corporation, body or person. Presented February 24, 1914.—*Mr. Emmerson*.....Not printed.
156. Return to an Address to His Royal Highness the Governor General of the 9th February, 1914, for a copy of all Orders in Council since the 1st of June last in any way altering the rates of duties existing under the Customs Act. Presented February 24, 1914.—*Sir Wilfrid Laurier*.....Not printed.
157. Correspondence, statements, &c., in respect to certain proposed advances to the Harbour Commissioners of Montreal, for expenditure during the years 1914, 1915, 1916 and 1917. Presented by Hon. Mr. Hazen, February 27, 1914.....Not printed.
158. Memorandum of proposed harbour improvements to be made by the Harbour Commissioners of Quebec during 1914, out of certain proposed advances to be made to the said commission. Presented by Hon. Mr. Hazen, February 27, 1914.....Not printed.
159. Return to an Order of the House of the 2nd February, 1914, for a copy of all papers, correspondence, telegrams, &c., between the Department of Trade and Commerce and any person or persons, companies or corporations, in the years 1912 and 1913, respecting a steamship service between St. John, N.E., and Bear River, N.S., and intermediate points, and the matter of the payment of a subsidy therefor. Presented March 2, 1914.—*Mr. Maclean (Halifax)*.....Not printed.
160. Return to an Order of the House of the 2nd February, 1914, for a copy of the reports made by the proprietors of the steamer *Canada*, on which the subsidy was paid to them for the season of 1913, for the service between Campbellton, N.B., and Gaspé, Que.; together with a copy of all complaints regarding the said service and of the correspondence, reports, and documents in the possession of the Department of Trade and Commerce in that connection in the said year. Presented March 2, 1914.—*Mr. Marcell (Bonaventure)*.....Not printed.

CONTENTS OF VOLUME 23—*Continued.*

161. Return to an Order of the House of the 4th February, 1914, for a return showing what sum or sums of money, if any, have been expended by the Government since the 21st of September, 1911, in the County of Wright, Quebec, and how such money has been expended. Presented March 2, 1914.—*Mr. Devlin*.....*Not printed.*
162. Return to an Order of the House of the 26th February, 1914, for a return showing:—
 1. How many temporary clerks were employed in the Library of Parliament during the Sessions of 1911-1912 and 1912-1913, their names and the salary paid to each for such service, and the total so paid?
 2. How many temporary clerks are at present so employed, their names and salaries respectively?
 3. If any temporary clerks were employed in said library, during the Session of 1910-1911; if so, how many?
 4. What was the then number of permanent clerks in the library, and the present number of temporary clerks employed in said library?
 5. Why temporary clerks are employed in said library in positions superior to and at higher pay than that paid to permanent clerks? Presented March 3, 1914.—*Mr. Turgeon**Not printed.*
163. Return to an Address to His Royal Highness the Governor General of the 2nd February, 1914, for a copy of all correspondence, telegrams, memoranda, Orders in Council, instructions to officers, regulations and other papers and documents relating to a change in the regulations governing the fishing of salmon in the St. John River, above tidal water. Presented March 3, 1914.—*Mr. Sinclair*.....*Not printed.*
164. Return to an Order of the House of the 2nd February, 1914, for a copy of all letters, telegrams and correspondence in any way relating to the appointment of men in any way connected with the salmon fishing pond at Margaree during the year 1913. Presented March 3, 1914.—*Mr. Chisholm (Inverness)**Not printed.*
165. Return to an Order of the House of the 2nd February, 1914, for a copy of all tenders received in 1912 for the construction of a breakwater at Green Point, Gloucester County, N.B., and of all correspondence, letters and telegrams showing why the contract was not awarded to lowest tenderer. Presented March 3, 1914.—*Mr. Turgeon*..*Not printed.*
166. Return to an Order of the House of the 2nd February, 1914, for a copy of all correspondence, letters, telegrams, &c., touching in any way the work done on Lingan Beach, South Cape Breton, under Superintendent H. D. McLean. Presented March 3, 1914.—*Mr. Carroll**Not printed.*
167. Return to an Order of the House of the 2nd February, 1914, for a copy of all papers, advertisements, tenders, bids, contracts, reports, vouchers, accounts, receipts, correspondence, &c., in connection with a wharf recently constructed at Gold River, Lunenburg County, N.S. Presented March 3, 1914.—*Mr. Maclean (Halifax)*.....*Not printed.*
168. Return to an Address to His Royal Highness the Governor General, of the 9th February, 1914, for a copy of all documents, Orders in Council, correspondence, telegrams, tenders, accounts, vouchers, part, &c., in connection with the construction of a bridge or work between the mainland and an island, known as Boutillier's island, at South West Cove, Lunenburg County, N.S. Presented March 3, 1914.—*Mr. Maclean (Halifax)*..*Not printed.*
169. Return to an Order of the House of the 9th February, 1914, for a copy of all advertisements, tenders, contracts, documents, letters and correspondence relating to the supply of coal for the Government public buildings at Lunenburg, N.S. Presented March 3, 1914.—*Mr. Macdonald**Not printed.*
170. Return to an Order of the House of the 2nd February, 1914, for a comparative statement of the quantity of cubic yards of dredging done by the *Kestigouche*, or dredge No. 3, on the outside bar of Bathurst Harbour, during the seasons of 1910, 1911, 1912 and 1913. Presented March 3, 1914.—*Mr. Turgeon*.....*Not printed.*
- 170a. Return to an Order of the House of the 2nd February, 1914, for a copy of all tenders received for the dredging in Bathurst Harbour, and of the contract awarded. Presented March 3, 1914.—*Mr. Turgeon*.....*Not printed.*
- 170b. Return to an Order of the House of the 2nd February, 1914, for a copy of all correspondence, letters and telegrams relating to the deposit of sand and mud dumped into the southwestern channel by the contractors of dredging in Bathurst Harbour. Presented March 3, 1914.—*Mr. Turgeon*.....*Not printed.*
171. Return to an Address to His Royal Highness the Governor General of the 9th February, 1914, for a copy of all correspondence, telegrams, petitions and memorials received by the Right Honourable R. L. Borden, Premier of Canada, or the Minister of Railways and Canals, from J. A. Gillies, Esq., Sydney, N.S., or from any resident of the County of Richmond, N.S., relative to the purchasing of the Cape Breton Railway by the Government and the building of a line of railway from St. Peters to Sydney and Louisburg, and of replies thereto. Presented March 3, 1914.—*Mr. Kyte*.....*Not printed.*

CONTENTS OF VOLUME 28—Continued.

172. Return to an Order of the House of the 2nd February, 1914, for a return showing:—
 1. The names of all proprietors from whom land and property have been expropriated for the purpose of the Halifax Ocean Terminals between Three Mile House and the proposed site of the railway and shipping terminals?
 2. The price or amount of damages paid therefor, or the amount offered and accepted in the case of each proprietor?
 3. The amount offered or tendered each proprietor for damages and which has not been accepted.
 4. The quantity of land and nature of property so expropriated from each proprietor. Presented March 3, 1914.—*Mr. Maclean (Halifax)*.....*Not printed.*
- 172a. Return to an Order of the House of the 2nd February, 1914, for a copy of all advertisements, tenders, papers, documents, letters and correspondence relating to the construction of the railway from Three Mile House at Bedford Basin to Halifax Harbour, and also to the piers or wharfs and sea walls in connection with the proposed Halifax Ocean Terminals. Presented March 16, 1914.—*Mr. Maclean (Halifax)*.....*Not printed.*
173. Return to an Order of the House of the 2nd February, 1914, for a copy of all agreements, correspondence, papers and documents referring to any arrangement made between the Intercolonial Railway of Canada and the Canadian Pacific Railway in the year 1913, relating to the hauling of Canadian Pacific Railway freight and passenger trains between St. John and Halifax, connecting with any transatlantic steamship lines at Halifax, during the winter season of 1913-14. Presented March 4, 1914.—*Mr. Maclean (Halifax)*.....*Not printed.*
174. Return to an Order of the House of the 20th January, 1913, for a copy of all recommendations, correspondence, letters, telegrams and reports now on file in the Department of Justice, relating to the vacancy in the office of deputy warden of the Dorchester penitentiary, and the appointment of a successor to Mr. A. B. Pipes, who was promoted from the position of deputy warden of Dorchester penitentiary to that of warden. Presented March 4, 1914.—*Mr. Emmerson*.....*Not printed.*
175. Correspondence between the City of Ottawa and the Government, on the subject of a pure water supply for the city and Government buildings. Presented by Hon. Mr. Borden, March 4, 1914.....*Not printed.*
176. Return to an Order of the House of the 2nd February, 1914, for a copy of all letters, correspondence, telegrams and all other documents between the Department of Railways and Canals and Archer, Macdonald, E. Montpetit, C. A. Harwood, and A. Marceau, local engineer, St. Amour, Superintendent of the Canal of Soulanges, L. A. Sauvé, and others, respecting the tearing down of several houses and dependencies erected on the Government grounds at Pointe Cascades, the property of the said L. A. Sauvé. Presented March 5, 1914.—*Mr. Boyer*.....*Not printed.*
177. Return to an Order of the House of the 23rd February, 1914, for a copy of all agreements between the Transcontinental Railway Commission and the Canadian Northern Railway for the use of the line of the said company by the trains of the Transcontinental Railway from Cap Rouge to the shops at St. Malo. Presented March 5, 1914.—*Sir Wilfrid Laurier*.....*Not printed.*
178. Return to an Order of the House of the 23rd February, 1914, for a copy of all correspondence between the Minister of Railways or the Transcontinental Railway Commission and the Quebec Harbour Commission, with regard to the construction by the said Harbour Commission of a line of railway to connect the said Transcontinental Railway from Champlain Market with the proposed Union Station at the Palais, and of all contracts by the said Harbour Commission towards that end. Presented March 5, 1914.—*Sir Wilfrid Laurier*.....*Not printed.*
179. Return to an Order of the House of the 9th February, 1914, for a copy of all advertisements, tenders, contracts and correspondence in connection with the proposed New London Branch of the Prince Edward Island Railway. Presented March 5, 1914.—*Mr. Graham*.....*Not printed.*
180. Return to an Order of the House of the 4th February, 1914, for a return showing the total amount of available cash on deposit to the credit of the Government of Canada on the last day of each month between April 1, 1913, and December 31, 1913. Presented March 5, 1914.—*Mr. Maclean (Halifax)*.....*Not printed.*
181. Return to an Order of the House of the 4th February, 1914, for a return showing the following particulars respectively, of all loans placed or extended by the Government of Canada, upon the London market during the calendar years 1912 and 1913: Loan, date and copy of prospectus; price in prospectus and price realized; date on which loan matures; rate per cent; total issue; amount realized; charges including discount for immediate payments, &c.; net amount of cash realized; and the annual effective rate of interest per unit. Presented March 5, 1914.—*Mr. Maclean (Halifax)*....*Not printed.*

CONTENTS OF VOLUME 28—Continued.

182. Return to an Order of the House of the 9th February, 1914, for a return showing the number of farm labourers and public servants respectively, placed by the Government employment agents during the years 1912 and 1913; also the counties where placed and amount of bonus paid. Presented March 6, 1914.—*Mr. Sutherland*. *Not printed.*
183. Return to an Order of the House of the 26th February, 1914, for a return showing:—
 1. What chartered banks in Canada have gone into liquidation since Confederation, and at what date in each case;
 2. The loss in each case to the depositors, the note holders and the stockholders respectively;
 3. What relief, if any, was given in each case by the Government to any of the parties suffering loss. Presented March 6, 1914.—*Mr. Neely*. *Not printed.*
184. Return to an Order of the House of the 11th February, 1914, for a return showing the number of binders, reapers, mowers, ploughs, seeders, and cultivators exported from and imported to Canada, with their value respectively, in each of the years 1910, 1911, 1912 and 1913. Presented March 6, 1914.—*Mr. Neely*. *Not printed.*
185. Return to an Order of the House of the 23rd February, 1914, for a return showing the number of cattle exported from Canada to the United States in the months of October, November and December, 1913, and January, 1914, and for the corresponding months in 1912 and 1913. Presented March 6, 1914.—*Mr. Maclean (Halifax)*. *Not printed.*
186. Return to an Order of the House of the 23rd February, 1914, for a return showing the quantities and varieties of fish exported from Canada to the United States in the months of October, November and December, 1913, and January, 1914, and for the corresponding months in 1912 and 1913. Presented March 6, 1914.—*Mr. Maclean (Halifax)*. *Not printed.*
187. Return to an Order of the House of the 26th February, 1914, for a return showing:—
 1. Who were, from incorporation, and who are, the officers and directors of the Grand Trunk Pacific Railway Company;
 2. The amount of capital stock of said company, the amount paid up, and who are the holders of such paid up stock, and the amount held, and still held, by each;
 3. If this company, or a subsidiary company, has contracted to build any portion of the National Transcontinental Railway; and, if so, the total amount of their contracts for such work;
 4. What portion of such contracts or work was sublet, and on such sublet contracts what profit was made by the said company. Presented March 6, 1914.—*Mr. Middlebro*. *Not printed.*
188. Report of the Board of Inquiry appointed to investigate and verify the claims of applicants for Fenian Raid Volunteer Bounty in the Province of Nova Scotia. Presented by Hon. Mr. Hughes, March 9, 1914. *Not printed.*
- 188a. List of applicants, in Nova Scotia, for the Fenian Raid Volunteer Bounty whose claims have been approved.—List of Fenian Raid Volunteer Bounty applicants, in Nova Scotia, received to December 31, 1913, but not yet considered. Presented by Hon. Mr. Hughes, March 9, 1914. *Not printed.*
189. Return to an Order of the House of the 12th February, 1914, for a return showing what was the local minimum rate of freight on small parcels on the Intercolonial Railway prior to October 10, 1911, and also the present rate on the same. Presented March 9, 1914.—*Mr. Sinclair*. *Not printed.*
190. Return to an Order of the House for a copy of all correspondence, reports, evidence taken, and of all other papers in the possession of the Minister of Railways and Canals, relating to the investigation recently held by Mr. Ferguson, M.L.A., concerning the affairs of the Trent Valley Canal. Presented March 9, 1914.—*Mr. Burnham*. *Report only printed for distribution and sessional papers.*
191. Return to an Order of the House of the 16th February, 1914, for a copy of all papers necessary to convey full information as to the charter, outfit and instructions of the *Karluk* and auxiliary vessels; the names, rank, pay and terms of engagement of their officers and crews; and of all communications received from Mr. V. Steffansson, or any other person who has received such a communication, written after the expedition sailed for the Arctic Ocean. Presented March 10, 1914.—*Mr. Oliver*. *Not printed.*
192. Return to an Order of the House of the 2nd February, 1914, for a return showing the number of towns in the Province of Ontario which have a population larger than the town of Chesley, South Riding of Bruce, which was 1,734, according to the last census; also the number of such towns served by letter boxes on the street. Presented March 10, 1914.—*Mr. McCrancy*. *Not printed.*
193. Return to an Order of the House of the 2nd February, 1914, for a return showing the names of the promoters of the National Drop Forge Company, Limited, and the powers asked by and given to said company by letters patent. Presented March 10, 1914.—*Mr. Lemieux*. *Not printed.*

CONTENTS OF VOLUME 28—Continued.

194. Return to an Order of the House of the 2nd February, 1914, for a return showing the names of the promoters of the Canadian Contracting Company, and the powers asked by and given to said company by letters patent. Presented March 10, 1914.—*Mr. Lemieux**Not printed.*
195. Return to an Order of the House of the 4th February, 1914, for a copy of all papers, letters, telegrams, reports, inquiries and documents or other communications had with any of the Departments of the Government, particularly with the Interior, Customs and Marine and Fisheries Departments, relating to Gustavas A. Colpitts, a Canadian citizen returning as a passenger on the Royal Mail Steamship *Empress of Britain*, in September, 1911, who alleged that he was not allowed by officers of the Government to disembark at Rimouski from said steamship. Also a copy of all letters, correspondence or other communications received by any members of the Government, particularly by the Minister of Marine and Fisheries, and by any Department of the Government, from the said Gustavas A. Colpitts, who was at the time a student at Mount Allison University, Sackville, New Brunswick, and of all letters or other communications sent in reply thereto. Presented March 10, 1914.—*Mr. Emmerson**Not printed.*
196. Number of Chinamen entering Canada during years 1911-12-13, &c.—(*Senate*).
Not printed.
197. Return to an Order of the House of the 23rd February, 1914, for a copy of all letters, papers, plans, correspondence, memoranda and other documents relative to the shortening of distances on the Intercolonial Railway between Pictou and Port Mulgrave, and to the construction of a new bridge at Pictou in connection therewith. Presented March 12, 1914.—*Mr. Macdonald**Not printed.*
198. Return to an Order of the House of the 23rd February, 1914, for a copy of all letters, telegrams, correspondence, leases and other documents relating to the cutting of lumber by Mr. B. F. Smith from the so-called Tobique Indian reserve, in the Province of New Brunswick, and of all recommendations with reference thereto, made by the Indian agent for that portion of the Province, or any other official of the Department in the said Province; together with a statement of the lumber cut by said Smith from said reserve, with the rates of stumpage charged and amounts paid since January 1, 1912. Presented March 12, 1914.—*Mr. Carvell**Not printed.*
- 198a. Return to an Order of the House of the 23rd February, 1914, for a copy of all correspondence, letters, telegrams, memorials, petitions, &c., relating to the sale or transfer of the Indian reserve at Sydney, N.S., and the removal of the Indians therefrom. Presented March 17, 1914.—*Mr. Kytic**Not printed.*
- 198b. Return to an Order of the House of the 23rd March, 1914, for a copy of all the instructions issued to C. P. Fullerton and Fawcett Taylor, or either of them, in reference to the St. Peter's Indian reserve. Presented April 8, 1914.—*Mr. Oliver**Not printed.*
199. Return to an Order of the House of the 11th February, 1914, for a copy of all correspondence, letters, telegrams and other documents relative to the purchase for the Intercolonial Railway of a quantity of coal in the United States, within the past few months. Presented March 12, 1914.—*Mr. Macdonald**Not printed.*
- 199a. Return to an Order of the House of the 2nd February, 1914, for a return showing:—
1. When the Intercolonial Railway and the Prince Edward Island Railway last called for tenders for its coal supply, and when the tenders were returnable?
2. The number of tenders received, the names of the tenderers, and their respective prices?
3. The date of the last contract or contracts for coal for the Intercolonial Railway, and who was the contractor or contractors respectively?
4. The names of the successful tenderers, as the result of the last call for tenders, and their prices respectively?
5. The amount in tons of the contract made with each, and at what prices per ton respectively?
6. If any coal was purchased for the Government system of railways in the United States since March 31, 1913? If so, by whom, from whom, and through whom it was purchased, and at what price, the cost per ton delivered, inclusive of commissions to the railways. Presented March 18, 1914.—*Mr. Emmerson**Not printed.*
- 199b. Return to an Order of the House for a return showing whether the Government has purchased any coal, freight or passenger cars during the past six months for the Intercolonial Railway; if so, from whom and in what quantity; the price paid in each case; if any tenders were called for the same; who the tenderers were and the amount of each tender. Presented April 6, 1914.—*Mr. Macdonald**Not printed.*
200. Return to an Order of the House of the 4th March, 1914, for a return showing the freight rates on flour, hay, oats, lumber and firewood per 100 lbs. or per ton, between Bathurst, N.B., and Nepisiguit Junction, Red Pine, Bartibogue, Beaver Brook, and between Bathurst, Berresford, Petit Rocher and Belledune, before the changes made in August, 1913, and the freight rates on the same articles, between the same points, under the new schedule of rates. Presented March 16, 1914.—*Mr. Turgeon**Not printed.*

CONTENTS OF VOLUME 28—Continued.

 1. How much was spent upon Hall's Harbour wharf, Kings County, N.S., in 1913?
 2. The name of the commissioner or foreman, by whom he was recommended, and his remuneration?
 3. How much lumber was used upon the said wharf during 1913, from whom the same was purchased, and the price paid for the various forms thereof. Presented April 30, 1914.—*Mr. Maclean (Halifax)*.*Not printed.*
- 231t.** Return to an Order of the House of the 16th February, 1914, for a copy of the pay-list, including the names and residences, of all those who have worked at the wharf of L'Île Verte, County of Témiscouata; the number of days of employment of each of them; the amount received by each of them; who has or have signed the receipt or receipts for said amounts, in connection with the works which have been going on during the summer of 1912 and during the summer of 1913. Presented April 30, 1914.—*Mr. Gauvreau*.*Not printed.*
- 231u.** Return to an Order of the House of the 16th February, 1914, for a copy of the pay-list, including the names and residences, of the men who have worked on the wharf to the west of Rivière-Verte, Témiscouata; the number of days' work of each of them; the amount of money received by each of them; who has or have signed the receipt or receipts for said amounts on said pay-list or otherwise, the whole for: (1o) 1912; (2o) 1913. Presented May 4, 1914.—*Mr. Gauvreau*.*Not printed.*
- 231v.** Further Supplementary Return to an Order of the House of the 9th March, 1914, for a copy of all correspondence letters, telegrams, notes, requests, &c., addressed to the Department or the Minister of Public Works, directly or indirectly, in connection with the work necessary for the completion of the wharf at Sainte Croix, County of Lotbinière, since the 21st of September, 1911, to date. Presented May 4, 1914.—*Mr. Fortier*.*Not printed.*
- 231w.** Return to an Order of the House of the 30th March, 1914, for a copy of all letters and telegrams addressed by G. A. R. Rowlings and J. S. Wells to the Department of Public Works, or the Minister, since October 1, 1911, relating to the construction of a public wharf at Cole Harbour, Guysborough County, N.S., and of all replies thereto. Presented May 12, 1914.—*Mr. Sinclair*.*Not printed.*
- 231x.** Return to an Order of the House of the 16th February, 1914, for a copy of all letters, telegrams and correspondence of all kinds in any way relating to repairs required on the pier at Margaree Harbour, Inverness County, received in 1912-1913 and 1913-1914. Presented May 12, 1914.—*Mr. Chisholm (Inverness)*.*Not printed.*
- 231y.** Return to an Order of the House of the 27th April, 1914, for a copy of all correspondence, pay-rolls, accounts, receipts, vouchers and papers relating to the construction of Feltzen South wharf, Lunenburg County, N.S. Presented May 16, 1914.—*Mr. Maclean (Halifax)*.*Not printed.*
- 231z.** Return to an Order of the House of the 2nd February, 1914, for a copy of all papers, correspondence, telegrams, letters, pay-rolls, accounts and vouchers in any way referring to the expenditure of money by this Government for the building and repair of the public wharf at Port Hood. Presented May 16, 1914.—*Mr. Chisholm (Inverness)*.*Not printed.*
- 231 (2a).** Return to an Order of the House of the 4th May, 1914, for a copy of all correspondence, telegrams, complaints, pay-rolls, vouchers and all other documents in any way connected with the expenditure of \$500 during the year 1913 on Finlay Point wharf, Inverness County. Presented May 16, 1914.—*Mr. Chisholm (Inverness)*.*Not printed.*
- 231 (2b).** Return to an Order of the House of the 6th April, 1914, for a copy of all correspondence, letters, telegrams, petitions and recommendations relating to the wharf at Arichat, N.S., to be used by SS. *Magdalin*. Presented May 29, 1914.—*Mr. Kyte*.*Not printed.*
- 231 (2c).** Return to an Order of the House of the 9th March, 1914, for a return showing:—
 1. How much money was spent upon Kingsport Pier, Kings County, N.S., during the year 1913?
 2. The name of the foreman or commissioner, by whom he was recommended, and the remuneration paid him?
 3. How much lumber was purchased and used for said pier, from whom it was purchased, and the particulars of the prices paid therefor?
 4. What was done with the lumber or piling taken out of said pier, and if the same was sold, to whom and at what price? Presented May 29, 1914.—*Mr. Maclean (Halifax)*.*Not printed.*

CONTENTS OF VOLUME 28—Continued.

- 231** (2*d*). Return to an Order of the House of the 27th April, 1914, for a copy of all correspondence, pay-rolls, accounts, receipts, vouchers and papers relating to the construction of Kraut Point wharf, Lunenburg County, N.S. Presented June 12, 1914.—*Mr. Maclean (Halifax)**Not printed.*
- 232.** Return to an Order of the House of the 4th March, 1914, for a return showing:—
 1. How much money has been expended in public works in the Counties of Rimouski and Gaspé, respectively, since October 11, 1911.
 2. How much of the money so expended was provided for in the estimates of 1911-1912?
 3. What amount was expended on the works for which money was not included in the estimates of 1911-1912? Presented April 2, 1914.—*Mr. Marcil (Bonaventure)*.
Not printed.
- 232*a*.** Return to an Order of the House of the 23rd February, 1914, for a return showing how much money has been expended on public works in Antigonish County since October 11, 1911.
 2. How much of the amount so expended was provided in the estimates for 1911-1912?
 3. What amount, not included in the estimates for 1911-1912, was expended on public works in said county? Presented April 2, 1914.—*Mr. Chisholm (Antigonish)*.
- 232*b*.** Return to an Order of the House of the 9th February, 1914, for a copy of all papers, reports, documents, correspondence, plans, &c., in reference to a proposed Government public building at Bear River, N.S., and the purchase of a site for the same. Presented April 2, 1914.—*Mr. Maclean (Halifax)**Not printed.*
- 232*c*.** Return to an Order of the House of the 9th April, 1913, for a copy of all charges, correspondence, pay-rolls, telegrams and other documents relating in any way to the expenditure of money on the harbour improvements at Mabou Harbour by the Department of Public Works, during the years 1911-12, 1912-13. Presented April 2, 1914.—*Mr. Chisholm (Inverness)**Not printed.*
- 232*d*.** Return to an Order of the House of the 28th May, 1913, was issued to the proper officer for a copy of the specifications and tenders for materials to be used in connection with the proposed dry dock at Lauzon, Quebec. Presented April 2, 1914.—*Mr. Lemieux*.
Not printed.
- 232*e*.** Return to an Order of the House of the 3rd March, 1913, for a copy of all documents, letters, reports of engineers and statements of detailed expenditure in connection with dredging at Bonaventure River, Quebec. Presented April 2, 1914.—*Mr. Marcil (Bonaventure)**Not printed.*
- 232*f*.** Return to an Order of the House of the 3rd March, 1913, for a copy of all petitions, correspondence, reports or other papers or documents in the Department of Public Works relating to the building of a breakwater at Goultman's Point, Half Island Cove, Guysboro' County, N.S. Presented April 2, 1914.—*Mr. Sinclair**Not printed.*
- 232*g*.** Return to an Order of the House of the 16th February, 1914, for a copy of all letters, telegrams, correspondence and documents of all kinds in any way relating to a lighthouse to be built at Red Cape, Margaree Harbour, Inverness County. Presented April 7, 1914.—*Mr. Chisholm (Inverness)**Not printed.*
- 232*h*.** Return to an Order of the House of the 2nd February, 1914, for a copy of all papers, documents, telegrams, correspondence, &c., in reference to the purchase of a site in Saskatoon for a post office building. Presented April 16, 1914.—*Mr. McCrancy*.
Not printed.
- 232*i*.** Return to an Order of the House of the 9th February, 1914, for a copy of all correspondence, reports, petitions and documents exchanged by and with the Department of Public Works since the 1st of September, 1911, to date, with the reasons why the construction of the public building, authorized in the town of St. Lin Des Laurentides, County of L'Assomption, as per the estimates of 1911-1912, has not been proceeded with. Presented April 17, 1914.—*Mr. Scymin**Not printed.*
- 232*j*.** Return to an Order of the House of the 2nd February, 1914, for all correspondence, reports and documents exchanged by and with the Department of Public Works from October, 1911, to date, regarding the non-erection of the public building authorized to be erected at New Carlisle, the county seat of Bonaventure County, in the estimates of 1911-1912. Presented April 17, 1914.—*Mr. Marcil (Bonaventure)**Not printed.*
- 232*k*.** Return to an Order of the House of the 2nd February, 1914, for a return showing the names of all persons who worked on Lingan Bar, South Cape Breton, under Superintendent H. D. McLean, the wages paid to each per diem, the amount paid each or payable to each, and showing generally how the amount voted for such work was expended, and the amount received by H. D. McLean in connection with said work. Presented April 17, 1914.—*Mr. Carroll**Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

- 232^l.** Return to an Order of the House of the 2nd February, 1914, for a copy of all papers, advertisements, tenders, contracts, papers, telegrams, correspondence, returns, reports, accounts, vouchers, receipts, &c., in connection with any dredging performed by the Nova Scotia Dredging Company, or any other company, corporation or individuals, at Jeddore, Halifax County, N.S., in the years 1912 and 1913. Return to an Order of the House of the 2nd February, 1914, for a copy of all correspondence, papers, documents, contracts, &c., between the Government of Canada and any company, firm or individuals from May 1, 1913, to December 1, 1913, referring to the establishment of a subsidized steamship service between Canada and the British West Indies. Presented May 27, 1914.—*Mr. Maclean (Halifax)*..... *Not printed.*
287. Return to an Order of the House of the 4th May, 1914, for a copy of all papers, letters, telegrams, accounts and receipts concerning advances made to the Montagnais Band of Indians through the agency of Seven Islands, Québec. Presented May 29, 1914.—*Mr. Lemieux* *Not printed.*
288. Return to an Order of the House of the 11th May, 1914, for a copy of all papers, letters, telegrams, accounts and receipts, concerning advances or payments made by the Government to Newton Wesley Rowell, K.C., for legal services in connection with the Oko Indian litigation. Presented May 29, 1914.—*Mr. Sharpe (Ontario)*..... *Not printed.*
- 288^a. Return to an Order of the House of the 6th May, 1914, for a return showing:—
1. Whether the Government paid Newton Wesley Rowell, K.C., any sums of money for legal services during the past fifteen years?
 2. If so, the amounts and when?
 3. Whether the Government paid the firm of which Mr. Rowell is the senior partner any sums of money for legal services?
 4. If so, the amounts and in what years? Presented May 29, 1914.—*Mr. Sharpe (Ontario)* *Not printed.*
289. Return to an Order of the House of the 20th April, 1914, for a return showing:—
1. The date of the incorporation of the Canadian National Bureau of Breeding, Limited, with the names, addresses and occupations of the charter members of said Company.
 2. The amount of capital of the Company and the number of shares into which it is divided.
 3. The number of shares taken from the commencement of the Company up to the date of the return.
 4. The amount of calls made on each share, the total amount of calls received, the total amount of calls unpaid, and the total number of shares forfeited.
 5. The names, addresses and occupations of the persons who have ceased to be members within the twelve months next preceding, and the number of shares held by each of them.
 6. The amount of money paid to said Company by the Government in each year since incorporation. Presented May 29, 1914.—*Mr. Sutherland*..... *Not printed.*
290. Return to an Order of the House of the 9th February, 1914, for a copy of all reports made by the inspectors of agents for placing farm labourers and domestic servants in Canada during the calendar years 1912 and 1913. Presented May 29, 1914.—*Mr. Sutherland*.
..... *Not printed.*
291. Return to an Order of the House of the 2nd March, 1914, for a return showing all the buildings, houses, offices and immovables, occupied by the Federal Government in Montreal, for the use of the various Departments and services of each branch of the administration, together with the following information in each case; for what Department and for what service; where situated, street and number thereof; whether Government property or under lease; in the latter case, the length of lease, the rent per annum and also the other charges that may be imposed upon the Government. Presented June 1, 1914.—*Mr. Wilson (Laval)* *Not printed.*

CONTENTS OF VOLUME 28—*Continued.*

292. Return to an Order of the House of the 4th May, 1914, for a copy of all correspondence exchanged by and with the Department of Public Works or the Post Office Department, relating to an application or applications for a post office building at the town of Melville, Province of Saskatchewan. Presented June 4, 1914.—*Mr. MacNutt.*
Not printed.
293. Memorandum, correspondence, estimates of cost, &c., in connection with the construction of the Grand Trunk Pacific Railway—Mountain Section. Presented by Hon. Mr. Borden, June 4, 1914.....*Not printed.*
294. Return to an Order of the House of the 4th February, 1914, for a return showing the names and addresses of the people with whom pure bred animals have been placed by the Department of Agriculture, the breed in each case, and the conditions on which these animals were placed. Presented June 5, 1914.—*Mr. Kay.*.....*Not printed.*
295. Return to an Order of the House of the 30th March, 1914, for a copy of all correspondence, telegrams, instructions, accounts, vouchers and other papers and documents relating to the purchase of live stock in the Maritime Provinces by one Howard Corning of Yarmouth, N.S., during the period of his employment; also a copy of the appointment of the said Howard Corning and of all correspondence, complaints and other documents relating to the dismissal of the said Howard Corning, if he has been dismissed or retired from the service, together with a copy of all recommendations, correspondence and other papers relating to the appointment of the said Howard Corning's successor. Presented June 5, 1914.—*Mr. Sinclair**Not printed.*
296. Return to an Order of the House of the 19th March, 1914, for a return showing:—
1. How many pure bred stallions and bulls have been purchased by the Department of Agriculture for the use of settlers in the Provinces of Manitoba, Saskatchewan and Alberta since the first of January, 1912, to date?
2. Where these animals were purchased, and from whom; and also the price paid for them respectively. Presented June 5, 1914.—*Mr. Douglas.*.....*Not printed.*
297. Return to an Order of the House of the 9th February, 1914, for a copy of all correspondence, including letters, telegrams and accounts, regarding the purchase and disposal during year 1913, of all horses, cattle, sheep and swine for the Department of Agriculture, Province of Quebec for Experimental Farms, or for the improvement of stock, together with a return showing the commission and fees paid, and to whom paid, for and on account of said purchases. Presented June 8, 1914.—*Mr. Robb.*.....*Not printed.*
298. Return to an Address to His Royal Highness the Governor General of the 9th February, 1914, for a copy of all arrangements made between the Government and the various Provinces under the Agricultural Instruction Act. Presented June 10, 1914.—*Sir Wilfrid Laurier**Not printed.*
299. Partial Return to an Address to His Royal Highness the Governor General of the 4th March, 1914, for a copy of all correspondence, telegrams, petitions, Orders in Council, and other papers and documents, relating to subventions or assistance given, or to be given, by the Department of Marine and Fisheries or the Department of Agriculture to firms or joint stock companies, or persons operating cold storage plants for the preservation of fish products in Nova Scotia during the years 1908, 1909, 1910, 1911, 1912 and 1913, excluding such correspondence, &c., as relates to companies known as Fishermen's Bait Association. Presented June 10, 1914.—*Mr. Sinclair.*.....*Not printed.*
300. Copy of Order in Council No. P.C. 1386, of the 29th May, 1914, concerning the regulations governing the Radiotelegraph administration. Presented by Hon. Mr. Hazen, June 11, 1914*Not printed.*
- 300a. Copy of regulations governing Radiotelegraphy promulgated under section 11, Radiotelegraph Act, 1913. Presented by Hon. Mr. Hazen, June 11, 1914.....*Not printed.*
301. Return to an Order of the House of the 27th April, 1914, for a copy of all letters, tenders, telegrams, plans, specifications and other documents in regard to the construction of the new ice breaker by the Canadian Vickers Company of Montreal. Presented June 11, 1914.—*Mr. Macdonald**Not printed.*
302. Return to an Address to His Royal Highness the Governor General of the 16th March, 1914, for a copy of all petitions, letters, affidavits, telegrams and documents to and by the Department of Justice, or any other Department of Government, on behalf of or in reference to Wm. J. Kelley, a prisoner in the United States federal prison at Atlanta, Ga., and of all the letters, telegrams and other memoranda between the Department of Justice, or any other Department of the Government, and the British Ambassador at Washington, or the Government of the United States, regarding the imprisonment and proposed liberation of the said Wm. J. Kelley. Presented June 12, 1914.—*Mr. Carvell.*
Not printed.

To Field Marshal, His Royal Highness Prince Arthur William Patrick Albert, Duke of Connaught and of Strathearn, K.C., K.T., K.P., etc., etc., etc., Governor General and Commander in Chief of the Dominion of Canada.

MAY IT PLEASE YOUR ROYAL HIGHNESS:

The undersigned has the honour to lay before Your Royal Highness the report of the Progress of Stream Measurements for the year 1913.

Respectfully submitted,

(Signed) W. J. ROCHE,
Minister of the Interior,

OTTAWA, July 27, 1914.

DEPARTMENT OF THE INTERIOR,

OTTAWA, July 27, 1914.

The Honourable W. J. Roche, M.D.,
Minister of the Interior.

SIR:—

I have the honour to submit the report of Stream Measurements for the year 1913, and to recommend that it be published as the fifth of a series of progress reports.

I have the honour to be, Sir,
Your obedient servant,

W. W. CORY,
Deputy Minister of the Interior.

LETTERS OF TRANSMITTAL

4 GEORGE V.

SESSIONAL PAPER No. 25c

A. 1914

DEPARTMENT OF THE INTERIOR,
Irrigation Branch.

OTTAWA, July 27, 1914.

W. W. CORY, Esq., C.M.G.,
Deputy Minister of the Interior.

SIR:—

I submit herewith the report of Stream Measurements for the year 1913, submitted by F. H. Peters C. E., Commissioner of Irrigation, and would recommend that it be published.

Respectfully submitted,

E. F. Drake,
Superintendent of Irrigation.

DEPARTMENT OF THE INTERIOR,
IRRIGATION OFFICE,
CALGARY, ALBERTA., June 30, 1914.

E. F. DRAKE, Esq.,
Superintendent of Irrigation,
Department of the Interior,
Ottawa, Canada.

SIR:—

I have the honour to transmit herewith the manuscript of the Report of the Progress of Stream Measurements for the calendar year 1913. This report has been prepared, under my direction, by P. M. Sauder, M. Can. Sec. C. E., Chief Hydrographer, G. H. Whyte, and G. R. Elliott, B. A. Sc.

I beg to recommend that it be published as the fifth of the series of Reports of Progress of Stream Measurements.

I have the honour to be, Sir,
Your obedient servant,
F. H. PETERS,
Commissioner of Irrigation.

DEPARTMENT OF THE INTERIOR,
IRRIGATION OFFICE,
CALGARY, ALBERTA, JUNE 29, 1914

F. H. PETERS, Esq., M. CAN. SOC. C. E.,
Commissioner of Irrigation,
Department of the Interior,
Calgary Alberta.

SIR:—

I beg to submit herewith the manuscript of the Report of Progress of Stream Measurements for the calendar year 1913.

Owing to the fact that much of my time has been taken by other duties, most of the work of preparing this report has fallen to my assistants, G. H. Whyte, and G. R. Elliott, B.A. Sc. The report gives a brief outline of the methods of obtaining and compiling the data contained therein, but owing to the want of space and time, many of the details had to be omitted. There is given in tabulated form all the records of stream flow during 1913.

I beg to recommend that this report be published as the fifth of the series of Reports of Progress of Stream Measurements.

I have the honour to be, Sir,
Your obedient servant,
P. M. SAUDER,
Chief Hydrographer.

REPORT

OF

PROGRESS OF STREAM MEASUREMENTS FOR THE CALENDAR YEAR 1913.

By P. M. SAUDER, G. H. WHYTE and G. R. ELLIOTT.

INTRODUCTION

SCOPE OF WORK

The chief features of the stream measurement work are the collection of data relating to the flow of surface waters and a study of the conditions affecting this flow. Information is also collected concerning river profiles, the duration and magnitude of floods, irrigation, water-power, storage, seepage, etc., which may be of use in hydrographic studies.

This information is obtained by a series of observation at regular gauging stations which are established at suitable points. The selection of sites for these gauging stations and their maintenance depend largely upon the physical features and needs of the locality. If water is to be used for irrigation purposes the summer flow receives special attention; where it is required for power purposes it becomes necessary to determine the minimum flow; if water is to be stored, information is obtained regarding the maximum flow. In all cases the duration of the different stages of the streams is recorded. Throughout the country gauging stations are maintained for general statistical purposes, to show the conditions existing through long periods. They are also used as primary stations, and their records in connection with short series of measurements will serve as basis for estimating the flow at other points in the drainage basin.

During the open water season of 1913, records were taken at one hundred and forty-six (146) regular gauging stations on various streams in Alberta and Saskatchewan and at seventeen (17) regular gauging stations on irrigation ditches. Winter records, which are so valuable for power investigations and municipal water supplies, are receiving special attention and records are now being secured on almost all the important streams in these two provinces, during the entire year.

ORGANIZATION.

The methods of carrying on the investigations were similar to those of previous years. Local residents were engaged to observe the gauge height at regular stations. These observations were recorded in a book supplied by the department, and at the end of each week the observer copied the week's records on a postal card which was sent to the chief hydrographer by the first convenient mail. The district hydrographers made regular visits to the gauging stations, usually once in every three weeks. On these visits they examined the observers' records, made discharge measurements and collected such information and data as would be of use in making estimates of the daily flow at the station. The results of the gaugings were transmitted by a postal card to the chief hydrographer. In the office these reports of the gauge height observers and the hydrographers were copied from the postal cards to regular forms and filed. At the close of the open season, some of the hydrographers returned to the office and assisted in the final computations and estimates of run-off. Gauge height-area, gauge height-mean velocity, and gauge height-discharge curves were plotted and rating tables constructed. Tables of discharge measurements, daily gauge height and discharge, and monthly discharge were also compiled. These records have been re-copied and are embodied in this, the Fifth Annual Report of Progress of Stream Measurements.

The organization also was very similar to that of previous years, except that owing to the fact that the Chief Hydrographer spent the most of his time on administrative work, and the office work had very materially increased, it was found necessary to increase the office staff to include two assistant engineers. The regular staff for the past year, therefore, included thirteen assistant engineers, a recorder, a computer, and a clerk. Similarly to previous years, the territory, which includes almost all the accessible portions of Alberta and Saskatchewan, was divided, for administrative purposes, into ten districts, viz.: Banff, Calgary, Macleod, Cardston, Milk River, Western Cypress Hills, Eastern Cypress Hills, Saskatoon,

Edmonton and Athabasca. In each district there was one hydrographer, who while in the field, employed temporary assistance, and was equipped with the necessary gauging and surveying instruments. In Banff, Calgary, Macleod, Saskatoon, Edmonton, and Athabasca districts, the hydrographers travelled by train and hired livery, and stopped at hotels and stopping houses; while in the other districts they were supplied with a team, light waggon, and light camping outfit. The thirteenth engineer was employed at rating meters and other extra work.

The number of gauging stations maintained during the winter months was much less than during the summer, and by re-arranging the district six engineers were able to do all the field work during the winter. The other seven engineers together with an extra temporary employee have compiled the records for the annual report. At the request of the Water Powers Branch, and the City of Prince Albert, a special study of the winter flow of the North Saskatchewan River at Prince Albert, was commenced in December last, and an extra assistant engineer was employed for this work.

BANFF DISTRICT.

This district included the following regular gauging stations:

Stream	Location	Date established
Bath Creek.....	N.E. 32-28-16-5	April 9, 1913
Bow River.....	S.E. 28-28-16-5a	July 18, 1910
Bow River.....	S.E. 35-25-12-5	May 25, 1909
Bow River.....	N.W. 32-24-8-5	Mar. 10, 1912
Cascade River.....	S.E. 19-26-11-5	August 16, 1911
Forty-mile Creek.....	S.W. 2-26-12-5	July 31, 1912
Ghost River.....	N.E. 23-26-6-5	Aug. 17, 1911
Jumpingpound Creek.....	S.E. 30-24-4-5	May 7, 1908
Kananaskis River.....	S.W. 34-24-8-5b	Aug. 31, 1911
Louise Creek.....	N.E. 20-28-16-5	July 5, 1913
Pipestone River.....	S.W. 27-28-16-5	Aug. 31, 1911
Spray River.....	N.W. 25-25-12-5	July 15, 1910

In a few cases the conditions have been so unfavourable that gauge readings could not be obtained all winter, but in almost every case discharge measurements have been made regularly at intervals of about two weeks during the whole year at all the above stations excepting those on Bath and Louise Creeks, which were established during the current year, and Jumpingpound Creek which was not maintained during the winter months.

Miscellaneous gaugings were made of Beapre Creek (N.E. 15-26-5-5), Big Hill Creek (S.W. 10-26-4-5), Bow River (S.W. 32-26-14-5), Grand Valley Creek (S.W. 24-26-5-5), Healy Creek (S.W. 29-25-12-5), Horse Creek (N.E. 8-26-4-5), Spencer Creek (S.E. 18-26-5-5), Spray River (at Spray Lakes) and Vermillion Creek (S.W. 32-26-14-5).

The records at the two new gauging stations on Bath and Louise Creeks will give some valuable data regarding the run-off from the snow clad regions, as a large portion of the drainage areas above these stations is always covered with snow and ice.

The Calgary Power and Transmission Company have recently completed their new power plant at Kananaskis Falls, and now have a total capacity of 41,000 horsepower (25,000 at the Horseshoe plant and 18,000 at the Kananaskis plant), when there is sufficient water available. The operation of the storage reservoirs in connection with these plants affects the natural flow slightly of Bow River below Cascades River, and backwater from the dam at Kananaskis Falls made it necessary to move the gauging station on Kananaskis River further upstream.

Surveys by the Water Powers Branch indicate that the most favourable undeveloped storage on the head-waters of Bow River is at Spray Lakes and for the purposes of making a comparison of the flow of Spray River at the lakes and at the mouth, a gauging was made at the outlet of the lakes. The one isolated gauging does not, however, give very valuable information and as soon as possible a gauge will be established and gaugings made regularly.

H. C. Ritchie, A. M. Can. Soc. C. E., was in charge of the field work in this district and the final computations were made by G. R. Elliott.

a.—This station was originally located on N.E. 23-23-16-5 but was moved to its present position on August 31, 1911.

b.—This station was originally located on N.W. 33-24-8-5 but was moved to its present position on May 13, 1913.

CALGARY DISTRICT.

This district included the following regular gauging stations:

Stream	Location	Date established
Bow River.....	S.E. 2-21-19-4a	Aug. 20, 1909
Bow River.....	N.E. 32-21-25-4b	Sept., 1909
Boxelder Creek.....	N.E. 2-12-30-3	May 24, 1910
Bullshead Creek.....	S.E. 16-12-5-4	July 26, 1909
Findlay & McDougal Ditch.....	S.W. 31-18-29-4	June 17, 1911
Fish Creek.....	S.W. 26-22-3-5	May 13, 1907
Highwood River.....	S.E. 20-18-2-5	July 27, 1912
Highwood River.....	N.W. 6-19-28-4	May 28, 1908
Highwood River.....	N.W. 17-20-28-4	Oct. 3, 1911
Little Bow Ditch.....	S.W. 6-19-28-4	Aug. 1, 1910
Mackay Creek.....	N.W. 26-11-1-4	July 29, 1909
Pekisko Creek.....	N.W. 8-17-2-5	Oct. 6, 1911
Ross Creek.....	N.W. 31-11-2-4	July 28, 1909
Sevenpersons River.....	N.E. 30-12-5-4	April 27, 1910
Sheep River.....	N.W. 22-20-29-4	May 25, 1908
N.B. Sheep River.....	S.W. 12-21-3-5	May 22, 1908
S.B. Sheep River.....	S.W. 17-20-2-5	May 23, 1908
South Saskatchewan River.....	N.W. 31-12-5-4	May 31, 1911
Stimson Creek.....	N.W. 2-17-2-5c	Oct. 6, 1911

It will be noted that this district did not include the Bow and Elbow Rivers at Calgary, but included instead several streams at, and east of Medicine Hat. Owing to the difficulty and cost of securing records on Berry and Blood Indian Creeks, the regular gauging stations on these two streams have been abandoned until the district is more accessible, and no gaugings were made of these at all during 1913. The lower station on Bow River had to be moved because of backwater from the Canadian Pacific Railway Company's dam. It is now located below the dam. The other gauging station in this district on Bow River was not satisfactory in its original location and had not been used for over two years. The Southern Alberta Land Company re-established it in its present position and we are co-operating with them in collecting the records.

Miscellaneous gaugings were made of the North and South Branches of Fish Creek near Priddis, Lineham's spillway at High River, Pine Creek near De Winton, Tongueflag Creek near High River and several springs.

The Dams of the Southern Alberta Land Company near Namaka and the Canadian Pacific Railway Company near Bassano are now practically completed and some water will probably be diverted at each of these points during 1914. Arrangements are therefore being made for securing records of the flow in the canals during 1914.

The only gauging stations in the above list that were maintained during the winter were those on Highwood River at High River and the South Saskatchewan River at Medicine Hat, the former being included in the Edmonton and the latter in the Macleod district during the winter months.

F. R. Steinberger, B.E., was in charge of the field work in this district during the open water period, and the final computations were made by G. R. Elliott and E. J. Switzer.

MACLEOD DISTRICT.

This district included the following regular gauging stations:

Stream	Location	Date Established
Belly River	N.W. 1-9-22-4	Aug. 31, 1911
Canyon Creek.....	N.E. 14-6-2-5	July 6, 1910
Cow Creek.....	N.E. 14-8-2-5	May 26, 1910
Crowsnest River.....	S.W. 12-8-5-5	July 28, 1910
Crowsnest River.....	N.E. 36-7-4-5	July 28, 1910
Crowsnest River.....	N.E. 26-7-2-5	Sept. 7, 1907
McGillivray Creek.....	S.E. 7-8-4-5	July 23, 1913
Mill Creek.....	S.W. 18-6-1-5	July 7, 1910
Mosquito Creek	N.E. 30-16-28-4	Aug. 1, 1908
Muddypound Creek.....	S.W. 27-11-28-4	July 27, 1908

a.—This station was originally located on Sec. 13-21-19-4, but was moved to its present position in May, 1913.

b.—This station was originally located on Sec. 31-21-25-4, but was moved to its present position in May, 1913.

c.—This station was originally located on the S.E. 14-17-2-5, but was moved to its present position on July 4,

Stream	Location	Date Established
Nanton Creek.....	S.E. 19-16-28-4a	Aug. 3, 1908
Oldman River.....	N.E. 34-7-1-5	Sept. 15, 1908
Oldman River.....	N.W. 10-9-26-4	July 12, 1910
Pincher Creek.....	S.W. 23-6-30-4	Aug. 13, 1906
Southfork River.....	S.W. 2-7-1-5	Aug. 5, 1909
St. Mary River.....	N.E. 26-7-22-4	Oct. 13, 1911
Todd Creek.....	S.W. 19-8-1-5	Aug. 3, 1909
Trout Creek.....	S.E. 33-11-28-4	July 7, 1911
Willow Creek.....	S.E. 26-9-26-4	July 1, 1909

Miscellaneous gaugings were made of Allison Creek (S.W. 11-8-5-5), Bellevue Creek (N.E. 29-7-3-5), Connelly Creek (S.E. 36-7-2-5), Dago Creek (S.W. 19-13-2-5), Drum Creek (N.E. 18-7-3-5), Ernest Creek (N.E. 26-10-3-5), Fortier Springs (S.E. 17-7-1-5), Gold Creek (S.E. 30-7-3-5), Jim Creek (N.E. 6-15-1-5), Lyon Creek (Near Blairmore), Nez-Perce' Creek (S.E. 17-8-4-5), Playle Creek (S.W. 32-11-1-5), Summit Creek (S.W. 12-8-6-5), Willow Creek (near Claresholm), York Creek (N.W. 34-7-4-5) and several other spring creeks.

As this district has been organized for several years and there have been no extensive developments of the water resources, no changes of any account were made during the past year. Records of the flow of Oldman River have however become very valuable in connection with the investigation of the proposed scheme to irrigate a large tract of land lying between Little Bow River and Oldman River.

Winter records were taken of Belly River, Crowsnest River (three stations), McGillivray Creek (December only), Oldman River (two stations), Southfork River, St. Mary River and Summit Creek (miscellaneous); Belly and St. Mary Rivers being included in the Cardston district during the winter months.

H. O. Brown, B. A. Sc. was in charge of the field work in this district until early in May when he was transferred to other work and Roundell Palmer was placed in charge for the balance of the year. The final computations were made by H. O. Brown, E. J. Switzer and G. R. Elliott.

CARDSTON DISTRICT.

This district included the following regular gauging stations:

Stream	Location	Date Established
Belly River.....	N.E. 5-2-28-4	Nov. 1, 1911
Belly River.....	S.E. 21-6-25-4	May 27, 1919
Boundary Creek.....	N.W. 20-1-26-4	June 18, 1913
Can. Pac. Ry. Co. Canal.....	S.E. 21-2-24-4	July 26, 1910
Christianson Ditch.....	S.E. 12-3-28-4	Sept. 14, 1911
Crooked Creek.....	S.W. 22-2-29-4	Sept. 15, 1909
Fidler Ditch.....	S.E. 19-1-26-4	Sept. 13, 1911
Lee Creek.....	N.W. 10-3-25-4	June 28, 1909
Lee Creek.....	S.E. 27-2-26-4	May 5, 1913
Mami Creek.....	S.E. 19-2-27-4	Aug. 13, 1909
N.B. Milk River.....	N.E. 11-1-23-4b	July 21, 1909
N.B. Milk River.....	N.E. 18-2-20-4	July 17, 1909
N. B. Milk River.....	(S.W. 29-37 N-9 W.P.M.) (Montana, U. S. A.)	Apr. 23, 1913
Rolph Creek.....	S.E. 21-2-24-4	May 17, 1911
St. Mary River.....	N.W. 25-1-25-4	By A.R. I. Co In 1905
Waterton River.....	N.E. 8-2-29-4	Aug. 26, 1908

In 1912 an arrangement was made with the United States Geological Survey by which regular gauging stations on St. Mary and Milk Rivers would be maintained jointly, each bearing half the cost of construction and maintenance. The upper stations on St. Mary River and the North Branch of Milk River were therefore re-located at better sites and a new station was established on the South Branch of Milk River in the State of Montana. These stations were equipped with automatic recording gauges early in 1913, which have been used since then.

Miscellaneous gaugings were made of Blackfoot Creek (near Standoff), Blakiston Brook (N.E. 30-1-29-4), Boundary Creek (N.E. 27-1-26-4), Cottonwood Creek (S.W. 21-2-29-4), Drywood River (N.W. 18-4-29-4), Foothill Creek (near Twin Butte P. O.), Oil Creek (S.W. 23-1-30-4), Pine Creek (N.W. 21-3-29-4), and St. Mary River (S.W. 11-3-25-4).

a.—This station was originally located on N.W. 20-16-23-4, but was moved to its present location Sept. 1913.
b.—This station was originally located on N.E. 13-1-23-4, but was moved to its present position on May 1, 1913.

SESSIONAL PAPER No. 25c

Winter records were taken of Belly River, Lee Creek, North Branch of Milk River, St. Mary River, and Waterton River; The station on Belly River at Standoff being included in the Macleod district during the winter months.

V. Meek, B. Se., was in charge of the field work in this district from January 1st to January 26th, G. F. Deas from January 27th to April 29th, F. R. Burfield, A.M.I.C.E., from April 30th to September 13th, L. Danielson from September 15th to November 17th, and J. E. Degnan for the balance of the year. The final computations for the annual report were made by L. Danielsens, E. J. Switzer and G. H. Whyte.

MILK RIVER DISTRICT.

This district included the following regular gauging stations:

Stream	Location	Date Established
Deer Creek Cattle Co's Ditch.....	S.W. 36-1-12-4	April 27, 1912
Hooper and Huckvale's Ditch.....	S.W. 27-4-6-4	May 2, 1912
Manyberries Creek.....	S.W. 27-4-6-4a	June 17, 1910
Milk River.....	N.E. 21-2-16-4	May 18, 1909
Milk River.....	S.W. 35-1-13-4	Aug. 2, 1909
Milk River.....	S.W. 21-2-8-4	Aug. 5, 1909
Milk River.....	N.E. 6-37 N-9 E.P.M., Montana, U. S. A.b	Aug. 7, 1909
N.B. Milk River.....	S.W. 19-2-18-4	July 15, 1909
S.B. Milk River.....	N.W. 31-1-18-4	July 14, 1909

It was impossible to secure an observer for the gauge on the North Branch of Milk River on the S.W. $\frac{1}{4}$ Sec. 19, Tp. 2, Rge. 18, W. 4th Mer., but discharge measurements were made at every opportunity.

The gauging station in the State of Montana is maintained jointly with the United States Geological Survey. It was equipped with an automatic gauge early in the summer of 1913.

Miscellaneous gaugings were made of Beargulch Creek (Sec. 19-2-9-4), Canal Creek (Sec. 6-4-6-4), Deadhorse Coulee (Sec. 4-2-11-4), Deer Creek (N.E. 26. S.W. 36 and S.W. 15-1-12-4), Halfbreed Creek (Sec. 28-2-10-4), Kennedy Creek (Sec. 3-1-5-4), Ketchum Creek (Sec. 16-4-6-4), Mackie Creek (Sec. 19-2-18-4), Miners Coulee (Sec. 11-2-11-4), and Police Coulee (Sec. 35-1-13-4).

Winter records were taken only at the regular gauging station on Milk River on the N.E. $\frac{1}{4}$ Sec. 21, Tp. 2, Rge. 16, W. 4th Mer., which was included in the Cardston district during the winter months.

J. E. Degnan was in charge of the field work in this district, and R. J. Srigley made the final computations for the annual report.

WESTERN CYPRESS HILLS.

This district included the following regular gauging stations:

Stream	Location	Date Established
Battle Creek.....	N.E. 33-5-29-3	June 3, 1909
Battle Creek.....	N.W. 33-5-27-3c	July 5, 1910
Battle Creek.....	N.E. 3-3-27-3	May 11, 1910
Bullshead Creek.....	N.W. 15-9-5-4	Oct. 9, 1911
Cheesman Ditch.....	S.W. 12-8-29-3	June 24, 1911
Gaff Ditch.....	S.W. 25-5-29-3	July 11, 1911
Gap Creek.....	S.E. 4-10-27-3	April 25, 1909
Gap Creek.....	N.E. 31-11-26-3	May 3, 1910
Grosventre Creek.....	S.E. 27-9-4-4	Oct. 10, 1911
Lindner Ditch.....	N.W. 10-6-29-3	July 26, 1910
Lodge Creek.....	N.W. 10-6-3-4	July 22, 1909
Lodge Creek.....	N.E. 36-3-1-4	Aug. 31, 1912
Lodge Creek.....	S.E. 12-1-29-3	Aug. 13, 1909
E.B. Lodge Creek.....	S.E. 1-7-3-4	Oct. 17, 1911
E.B. Mackay Creek.....	N.W. 36-10-1-4	Oct. 13, 1911
W.B. Mackay Creek.....	N.E. 27-10-1-4d	Oct. 12, 1911
Maple Creek.....	N.E. 16-11-26-3	May 9, 1908

a.—This station was originally located on S.E. 3-5-6-4, but was moved to its present position on May 2, 1912.

b.—This station was originally located on S.E. 3-1-5-4, but was moved to its present position in the spring of 1913

c.—This station was originally located on the S.W. 2-6-28-3, but was moved to its present position on May 29,

1912.
d.—This station was originally located on the S.W. 23-10-2-4, but was moved to its present position on September 20, 1912.

Stream	Location	Date Established
Maple Creek.....	S.E. 28-11-26-3	May 4, 1910
McShane Creek.....	S.W. 3-10-27-3	April 23, 1909
Middle Creek.....	S.W. 35-5-1-4	June 21, 1910
Middle Creek.....	S.W. 30-5-29-3	July 20, 1909
Middle Creek.....	N.W. 4-2-29-3	June 13, 1910
Oxarart Creek.....	N.E. 20-6-27-3	June 15, 1909
Ross Creek.....	N.W. 24-9-3-4	Oct. 11, 1911
Sixmile Creek.....	S.W. 6-7-28-3a	July 22, 1909
Spangler Ditch.....	S.W. 6-7-28-3	July 10, 1911
Stirling and Nash Ditch.....	S.E. 22-3-27-3	July 11, 1911
Tenmile Creek.....	S.E. 4-6-29-3	July 21, 1909
White Ditch.....	S.W. 1-9-27-3	June 15, 1911
Sage Creek.....	N.E. 9-1-2-4	Aug. 10, 1909

Miscellaneous gaugings were made of Anderson Ditch (S.W. 23-6-3-4), Cypress Creek (S.W. 17-9-27-3), Fourmile Creek (S.E. 11-8-29-3), Maple Creek (N.W. 23-14-26-3), Marshall and Gaff Ditch (N.E. 33-5-29-3), Middle Creek, Mink Creek (S.E. 31-7-29-3), Mitchell Ditch (N.E. 23-14-26-3) Starks and Burton Ditch (S.E. 17-11-5-4), Stoney Creek (N.E. 30-11-1-4), Whitemud Coulee (S.W. 26-7-29-3) and several spring and small creeks.

The station on Lodge Creek near the International boundary was equipped with a cable, ear, measuring line and stay line. Gaugings can now be made at all stages of the stream.

During the year several private irrigation ditches were completed and the area in this district under irrigation is being gradually increased. An extensive survey for the purpose of locating reservoir sites and determining the irrigable areas under them was made under the direction of the Commissioner of Irrigation during 1913. The results of the Survey which are of considerable interest will be found in his report on "Irrigation and Irrigation Surveys" for 1913.

During 1913, a part of the Weyburn-Lethbridge Branch of the Canadian Pacific Railway was graded through this district. It will soon be completed and in operation, which will make this district much more accessible and give its development quite an impetus.

No winter records were taken in this district during 1913.

H. D. St. A. Smith, Grad. R.M.C., was in charge of the field work in this district during 1913, and also made the final computations for the annual report.

EASTERN CYPRESS HILLS.

This district included the following regular gauging stations:

Stream	Location	Date Established
Bear Creek.....	S.E. 18-11-23-3	June 22, 1908
E.B. Bear Creek.....	S.E. 21-10-23-3	Aug. 18, 1909
W.B. Bear Creek.....	S.W. 32-10-23-3	Sept. 16, 1909
Belanger Creek.....	S.W. 18-7-25-3	June 12, 1909
Belanger Creek.....	S.W. 30-6-25-3	Mar. 31, 1912
Bone Creek.....	N.W. 34-8-22-3	July 2, 1908
Bridge Creek.....	S.E. 33-10-22-3	April 8, 1911
Bridge Creek.....	N.E. 11-11-22-3	July 29, 1909
Davis Creek.....	N.E. 29-6-25-3	May 24, 1909
Fairwell Creek.....	N.W. 30-6-24-3	June 10, 1909
Frenchman River.....	N.W. 16-6-24-3	July 10, 1912
Frenchman River.....	N.E. 23-6-23-3	July 9, 1912
Frenchman River.....	N.E. 31-6-21-3	July 31, 1908
N.B. Frenchman River.....	N.E. 16-7-22-3	July 25, 1908
Hay Creek.....	S.W. 29-10-25-3	July 4, 1910
Hay Creek.....	N.E. 30-10-25-3	April 22, 1909
Jones Creek.....	S.E. 20-8-20-3	May 15, 1912
Lonepine Creek.....	N.W. 27-7-26-4	July 17, 1909
Morrison Ditch.....	S.W. 26-6-21-3	Aug. 22, 1911
Piapot Creek.....	N.E. 18-11-24-3b	June 17, 1908
Pollock Ditch.....	N.W. 22-7-21-3	Aug. 10, 1911
Rose Creek.....	N.E. 26-7-22-3	May 1, 1911
Skull Creek.....	N.E. 29-10-22-3	April 8, 1911
Skull Creek.....	N.W. 10-11-22-3	June 29, 1908

a.—This station was originally located on the N.W. 29-7-28-3, but was moved to its present position on July 4, 1911.

b.—This station was originally located on the S.W. 17-11-24-3, but was moved to its present position on May 13, 1909.

SESSIONAL PAPER No. 25c

Stream	Location	Date Established
Strong and Day's Ditch.....	N.E. 25-6-22-3a	July 31, 1908
Sueker Creek.....	N.W. 24-6-26-3	May 26, 1909
Swiftcurrent Creek.....	S.W. 22-7-21-3	May 18, 1909
Swiftcurrent Creek.....	S.E. 18-10-19-3	June 15, 1910
Swiftcurrent Creek.....	S.W. 17-10-19-3	May 27, 1910

Miscellaneous gaugings were made of Barroby Ditch (S.E. 33-6-23-3), Bates Ditch (S.E. 7-6-16-3), E.B. Bear Creek (N.E. 29-10-23-3), W.B. Bear Creek (N.E. 29-10-23-3), Blacktail Creek (N.E. 30-6-23-3), Bone Creek (N.E. 10-11-20-3), Calf Creek (Sec. 4-8-22-3), Concrete Coulee (Sec. 2-7-21-3), Cross Ditch N.W. 15-7-22-3, Doyle Coulee (S.E. 17-7-22-3), Dry Coulee (N.W. 16-6-24-3), Frenchman River (Sec. 21-5-17-3), Jones Coulee (N.E. 5 & S.W. 8-8-20-3), Mule Creek (S.E. 34-5-17-3), Petrified Coulee (N.E. 7-4-27-3) Rocky Creek (S.E. 6-8-27-3, Saunders Springs (S.E. 20-10-25-3), and several other springs and small creeks.

Artificial controls were constructed on Skull and Piapot Creeks and proved very satisfactory, and on two very small streams, Rose and Lonepine Creeks, weirs were constructed and also proved very satisfactory. The beds of these streams had always been very unstable and made it difficult to make accurate estimates of the daily discharge. It is proposed to construct weirs or artificial controls at several other stations which have been shifting.

During the year several private irrigation ditches were completed and the area in this district under irrigation is also being gradually increased.

The Weyburn-Lethbridge Branch of the Canadian Pacific Railway is graded through this district and will soon be completed and in operation. This will very materially assist in the development of the district.

No winter records were taken in this district during 1913.

E. W. W. Hughes was in charge of the field work in this district and also made the final computations for the annual report.

SASKATOON DISTRICT.

This district included the following regular gauging stations:—

Stream	Location	Date Established
Battle River.....	S.E. 19-43-16-3	June 17, 1911
Bridge Creek.....	S.E. 23-13-19-3	Mar. 29, 1911
Long Creek.....	S.E. 10-2-8-2	June 22, 1911
Moose Mountain Creek.....	N.E. 15-3-2-2	Sept. 4, 1913
Moosejaw Creek.....	N.E. 24-11-19-2	June 21, 1911
do.....	N.W. 16-16-26-2	April 7, 1910
Qu'Appelle River.....	N.W. 33-19-21-2	May 12, 1911
North Saskatchewan River.....	N.E. 29-43-16-3	May 16, 1911
South Saskatchewan River.....	River Lot No. 76) Prince Albert)	Oct. 2, 1911
do.....	S.W. 28-36-5-3	May 27, 1911
Souris River.....	N.E. 11-2-8-2	June 23, 1911
do.....	N.E. 36-2-1-2	June 26, 1911
do.....	S.W. 6-4-26-1	July 20, 1911
Swiftcurrent Creek.....	S.W. 30-15-13-3	April 30, 1910
do.....	N.W. 18-15-13-3	May 5, 1913

Miscellaneous gaugings were made of Moosejaw Creek (N.E. 14-15-25-2), Morrison Creek (N.W. 7-8-2-2), Souris River (S.W. 15-2-8-2), Swiftcurrent Creek (S.W. 12 & S.E. 24-15-14-3, and S.W. 19-15-13-3), and Thunder Creek (at Moose Jaw).

During 1913, the City of Swift Current built a dam in Swiftcurrent Creek to store water for domestic purposes during the winter when the flow in the creek is very small and insufficient, and the City of Moose Jaw completed a dam in Moosejaw Creek to store water for fire protection purposes.

As intimated elsewhere, a special study of the winter flow of the North Saskatchewan River at Prince Albert was commenced in December and an extra assistant engineer was engaged for the work. Three careful gaugings were made each week and the gauge was read three times each day. This will not only give very accurate records of the discharge of the river but the results should also furnish some valuable data for research purposes.

Winter records were taken at all of the regular gaugings stations in this district, except on Bridge Creek, Long Creek, Moose Mountain Creek, the upper station on Moosejaw Creek and the two lower stations on Souris River.

O. H. Hoover, B.A.Sc., was in charge of the field work in this district and also made the final computations for the annual report. W. H. Storey was placed in charge of the special work at Prince Albert.

a.—This station was originally located on Sec. 36-6-22-3, but was moved to its present position on April 17, 1911.

EDMONTON DISTRICT.

This district included the following regular gauging stations:—

Stream	Location	Date Established
Athabasca River.....	S.E. 20-66-22-4	Feb. 23, 1913
Battle River.....	S.W. 4-43-25-4	May 7, 1913
Bow River.....	N.E. 15-24-1-5	Nov. 25, 1910
Can. Pac. Ry. Co's Canal.....	N.E. 21-23-29-4a	May 18, 1911
Elbow River.....	S.W. 14-24-1-5b	May 8, 1908
Nose Creek.....	N.W. 13-24-1-5	April 24, 1911
North Saskatchewan River.....	N.E. 21-39-7-5	June 2, 1913
do do.....	N.W. 33-52-24-4	May 14, 1911
Red Deer River.....	S.E. 20-38-27-4	Dec. 2, 1911
Sturgeon River.....	Bet. River Lots 27 & 52 St. Albert Settlement.	April 23, 1913
do.....	N.W. 28-55-22-4	Dec. 30, 1913

There was no apparatus at the gauging station on Athabasca River for making gaugings during open water and discharge measurements were therefore made only during the winter months. A cable has however since been installed and continuous records will be secured in future.

The new gauging station on the North Saskatchewan River is at Rocky Mountain House, and owing to the poor train service very few gaugings were made. A gauging station was also started on the Clearwater River, at the same place, but was not finished for use in 1913.

A Gurley Self Recording Water Stage Register was installed at the gauging station on Bow River in November, 1913.

Miscellaneous gaugings were made of Blindman River (N.W. 15-39-27-4), Pigeon Creek (at outlet of Pigeon Lake), and Red Deer River (N.E. 6-36-28-4).

Winter records were taken at all of the regular gauging stations in this district, except those on Battle River, Can. Pac. Ry. Co's Canal, and Nose Creek.

While there has been very little water power developed in this district, several concerns have made plans and will probably commence construction in the near future.

F. R. Burfield, A.M.I.C.E., was in charge of the field work in this district from January 1st to February 7th, V. Meek, B.Sc., from February 8th to May 12th, J. S. Wright, Grad. R.M.C., from May 13th to June 19th, H. B. R. Thompson, from June 26th to July 14th, and P. H. Daniels, B.S., from July 15th to the end of the year. The final computations for the annual report were made by E. J. Switzer and G. H. Whyte.

ATHABASCA DISTRICT.

This district included the following regular gauging stations:—

Stream	Location	Date Established
Athabasca River.....	N.W. 15-45-1-6	Mar. 4, 1913
Lobstick River.....	N.E. 30-53-7-5	July 11, 1913
Miette River.....	S.W. 9-45-1-6	Aug. 23, 1913
Rocky River.....	N.W. 13-48-28-5	July 3, 1913

Miscellaneous gaugings were made of Athabasca River (N.E. 5-51-25-5 and S.E. 20-66-22-4), Edson River (S.E. 16-54-16-5), Embarras River (S.W. 5-52-18-5), Fiddle Creek (near Miette Hot Springs), Macleod River (N.W. 3-54-16-5 and N.W. 5-52-18-5), Maligne River (near Jasper), Pembina River (S.W. 20-53-7-5), Prairie Creek (N.E. 5-51-25-5), Snaring River (N.W. 33-46-1-6), Sundance Creek (N.W. 4-53-18-5), Stoney River (near Jasper House) and Wolf Creek (S.W. 3-54-16-5).

This district, it will be observed, is a new one, and was until June 1913, a part of the Edmonton district. Considerable reconnaissance was done, but because observers were not available only a few regular stations were established. Several more regular stations will however be established during 1914. There are quite a number of every good sites for developing water power and winter records are therefore of especial value and are receiving particular attention.

G. J. Smith, B.A., was in charge of the field work in this district during 1913 and has written a very interesting report of the district and the work done by him, which is attached to this report as an appendix. G. H. Whyte made the final computations for the annual report.

a.—This station was originally located on N.E. 36-23-1-5, but was moved to its present position in April, 1913.

b.—This station was originally located on the S.E. 15-24-1-5, but was moved to its present position in November 1911.

SESSIONAL PAPER No. 25c

CURRENT METER RATING STATION.

The rating station was kept in operation from early in May until early in November. During this period all the current meters used in the field during 1913 were rated at least once and most of them were rated twice.

In all fifty-six current meters were rated, thirty-seven for this branch, eight for the Manitoba Hydrographic Survey, six for the British Columbia Hydrographic Survey, two for the British Columbia Dept. of Lands, two for the Canadian Pacific Railway Company and one for Anderson and Warden, Consulting Engineers, at Vancouver, B.C. Each meter was rated in the condition in which it was returned from the field, and again after being cleaned, adjusted and fitted with a new bearing. A rating table was prepared on tracing linen for each rating of each current meter. Blue prints of these were sent out with the meters and the originals were filed in the office for future reference.

The recording apparatus on the rating car was improved early in the season so that now the exact time and distance of the run for an exact number of revolutions of the meter can be recorded. This simplifies the work and the results are more accurate.

BENCH-MARKS.

When the stream measurement work was first started, the gauges were usually referred to bench marks on wooden stakes or stumps of trees. These were easily shifted or destroyed and were not satisfactory. In 1911, an iron bench-mark was adopted by this branch and now almost all the gauges are either referred to bench-marks on concrete piers or other permanent structures, or to one of these iron bench-marks. Whenever an opportunity is afforded these are tied to the Canadian Pacific Railway or Dominion Government levels, to determine their elevation above sea level, and they are therefore also a convenient reference for local levelling operations.

Description of the iron bench-marks are given in the Report of the Progress of Stream Measurements for 1911 and 1912.

OFFICE WORK.

As above intimated the reports of the gauge height observers and the hydrographers are transmitted to the office by postal cards. These are copied to office forms and filed in a cabinet, which is carefully indexed and where they can be referred to at any time without trouble. As the engineers complete their computations, the results are entered on convenient forms and filed in the same cabinet.

A cabinet made up of four styles of drawers is used for filing the records. The top section is used for filing the gauge height books of the observers and the current meter note books of the hydrographers. The gauge height books are filed alphabetically according to the names of the gauging stations while the current meter note books are filed alphabetically, according to the names of the hydrographers. The next section contains the postal cards sent in by the observers and the hydrographers. Both of these are filed alphabetically, according to the names of the gauging stations. The third section is made up of map drawers and contains the gauge height-area, gauge height-mean velocity and gauge height-discharge curves, and plotted cross-sections which are filed alphabetically, according to the names of the gauging stations. The same section contains the maps showing the outlines of the drainage basins, filed numerically according to the number of the sectional sheet. The rating curves for the current meters are also filed in this section numerically, according to the office numbers of the meters. The bottom section of the cabinet consists of letter size pockets, alphabetically arranged for each gauging station. The tables of gauge heights, discharge measurements, daily gauge height and discharge, monthly discharge, a description of the station, and memos of any changes are filed in these pockets. The different rating tables for each meter are also filed numerically in this section and another drawer contains the monthly reports of the meteorological service.

The copying and filing of the reports of the gauge height observers and the hydrographers is entrusted to the office recorder. While doing this he must carefully examine all records to see that there are no errors, and where there are doubtful or impossible records it is his duty to have the data corrected or ascertain the cause of the unusual condition. He also makes out the pay list for the observers and conducts the correspondence relating to the records.

All computations are checked before being used or published. For this reason, as far as possible, men with some technical education, or students in science, are engaged as helpers. The gaugings are computed by the helper and his work is checked by the hydrographer. In some instances where there is a great deal of driving and camping out, the hydrographer cannot secure a helper who can compute discharges, and in that case he computes the discharges himself and his computations are checked in the office.

Gaugings of the flow under ice are usually made by using the multiple point method, and vertical velocity curves have to be plotted to determine the mean velocity in the vertical.

The computation by this method is long and tedious and cannot be done by the hydrographer in the field. There are therefore a great many computations to be made in the office and the services of a computer are required.

During the year 1913, G. H. Nettleton filled the position of office recorder and J. B. Gray that of office computer.

When the stream measurement work was first started there was a slight tendency to make a big showing in the field work and to overlook the office work. Usually the district hydrographers are young and somewhat inexperienced engineers and do not always realize the importance of some of the details of the work. All the reports and field books should therefore be thoroughly checked as they are received and the results should be plotted on the gauge height-area, gauge height-mean velocity, and gauge height-discharge curves as soon as received in the office. Discrepancies in the records are then discovered at an early date, and the office is able to keep a better check on the results, and direct the work more intelligently. The Chief Hydrographer now spends the greater portion of his time on irrigation work and can only exercise a very general supervision over the stream measurement work. The staff was therefore strengthened early in 1913, by the appointment of two assistants to the Chief Hydrographer, who in addition to performing the duties of office engineers, act also as field inspectors. By constantly checking up the field and office work the assistants are bringing it up to a higher degree of accuracy.

G. H. Whyte was appointed First Assistant to the Chief Hydrographer on January 1st, 1913, and G. R. Elliott, B.A.Sc., was appointed Second Assistant to the Chief Hydrographer on April 1st, 1913.

CONVENTIONS AND CONFERENCES.

In August P. M. Sauder and G. H. Whyte attended a convention of the Western Canada Irrigation Association at Lethbridge, Alberta. As usual the convention was well attended and the papers and addresses were very interesting and instructive. At the close of the convention the delegates were shown over some irrigated farms in the vicinity of Lethbridge.

In January 1914, G. H. Whyte attended a conference of the Western District Engineers of the Water Resources Branch of the United States Geological Survey, as representative of this office. It was held in the district office of the survey in Boise, Idaho, and was attended by N. C. Grover, Chief Hydrographer of the U. S. Geological Survey, most of the District Engineers of the Water Resources Branch in the Western States, a number of Assistant Engineers, two representatives from the U. S. Reclamation Service, and three representatives from Canada. The other Canadian representatives were R. G. Swan, Chief Engineer, British Columbia Hydrographic Survey, Vancouver, B.C., and C. E. Richardson, District Engineer, British Columbia Hydrographic Survey, Nelson, B.C. While papers were not assigned to the Canadian representatives, they took part in the discussions and were given the same consideration as the District Engineers of the Water Resources Branch, and the conference was always glad to hear how the work is done in Canada. M. Whyte considers himself very fortunate in having had the opportunity to attend this conference, and recommends that representatives be sent to all such conferences that invitations are received for. His report of the conference was submitted some time ago, but as it deals more particularly with details of engineering and administrative work, it is not attached for publication.

On February 20th and 21st, advantage was taken of the fact that nearly all the engineers of this branch employed on stream measurement were in headquarters to hold a conference. All the hydrographers were able to attend but F. R. Steinberger and W. H. Storey. The papers were quite satisfactory and showed that the engineers are taking a keen interest in their work. Many important points were brought out in the papers and discussions.

It is hoped that another conference will be held next winter and that other branches of the government and other organizations doing stream measurement work will be invited to send representatives.

FUTURE WORK.

The appropriation for stream measurements for the fiscal year 1914-1915 is larger than that of previous years and the work is therefore being extended.

A special effort was made this year to get records of the early spring run-off in the Cypress Hills and Milk River districts. To do this two hydrographers were sent out into each of these districts early in March. Owing to the fact that there was a comparatively small fall of snow during the past winter, the run-off was, it is believed, somewhat below the average but the records will nevertheless be quite valuable.

Records of the flow of Milk River and almost all its important tributaries have been taken near the international boundary for several years, but very few records have been taken of Frenchman River and its tributaries near where it crosses the international boundary, and a hydrographer has therefore been placed in the field to secure complete records of these and other streams crossing the international boundary east of Frenchman River during the present year.

SESSIONAL PAPER No. 25c

Several additional regular gauging stations will be established in Northern Alberta at an early date, and as soon as they can be reached at a reasonable expense records will be taken on all the important streams in Northern Alberta.

In 1913, investigations of the absorption and seepage losses in canals were commenced on the canals of the Canadian Pacific Railway Company near Calgary and Lethbridge. This work will be continued and given special attention during 1914.

It is also proposed to maintain several additional regular gauging stations during the coming winter.

DEFINITIONS.

The volume of water flowing in a stream is known as run-off or discharge. In expressing it various units are used, depending upon the kind of work for which the data is needed. Those used in this report are "second-feet," "acre-feet," "run-off per square mile" and "run-off in depth in inches" and may be defined as follows:

"Second-foot" is an abbreviation for cubic foot per second and is the body of water flowing in a stream one foot wide and one foot deep at the rate of one foot per second.

The "acre-foot" is the unit capacity used in connection with storage for irrigation work and is equivalent to 43,560 cubic feet. It is the quantity required to cover an acre to a depth of one foot.

The expression "second-feet per square mile" means the average number of cubic feet of water flowing each second from every square mile of drainage area on the assumption that the run-off is uniformly distributed.

"Depth in inches" means the depth of water in inches that would have covered the drainage area, uniformly distributed, if all the water could have accumulated on the surface. This quantity is used for comparing run-off with rain-fall, which quantity is usually given in depth in inches.

It should be noticed that "acre-feet" and "depth in inches" represent the actual quantities of water which are produced during the periods in question, while "second-feet," on the contrary, is merely a rate of flow per second.

EXPLANATION AND USE OF TABLES.

The data obtained and the estimates made therefrom have been compiled in tabulated form and for each regular gauging station are given, as far as available, the following data:—

1. Description of station.
2. List of discharge measurements.
3. Table of daily gauge heights and discharges
4. Table of monthly discharges and run-off.

The description of stations gives such general information about the locality and equipment as would enable the reader to find and use the station. It also gives, as far as possible complete history of all the changes that have occurred since the station was established and that might affect the records in any way.

The list of discharge measurements gives the results of all the discharge measurements that have been made at or in the vicinity of the gauging station or have been used in completing the records for the gauging station. It gives the date on which the measurement was made, the name of the hydrographer, the width and area of cross-section, the mean velocity of the current, the gauge height and the discharge in second feet.

The table of daily gauge heights and discharges given in this report is a combination of two tables kept in the office of the survey, namely the table of daily gauge heights and the station rating table. The table of daily gauge heights gives the daily fluctuations of the surface of the water above the zero of the gauge, as reported by the observer. During high water, two observations of the gauge were made at some stations and the gauge height given in the table is the mean of the observation for the day. The discharge measurements and gauge heights are the base data from which the other tables are computed. The table of daily discharges is the discharge in second-feet, corresponding to the stage of the stream, as given by the station rating table.

In the table of monthly discharge the column headed "MAXIMUM" gives the mean flow for the day when the mean gauge height was highest. As the gauge is the mean for the day, there might have been short periods when the water and the corresponding discharge were greater than given in this column. Likewise, in the column "MINIMUM" the quantity given is the mean flow for the day when the mean gauge height was lowest. The column headed "MEAN" is the average flow for each second during the month. The computations for the quantities in the remaining columns have been based upon this mean. The drainage area for each gauging station was marked off on the sectional maps of the Department and the area taken off with a planimeter. In many districts, information regarding topographical features is very incomplete and the computed areas are only approximate. As the surveys of the Department are extended and completed these computations will be checked and, if necessary, corrected.

CONVENIENT EQUIVALENTS.

The following is a list of convenient equivalents for use in hydraulic computations:—

- 1 cubic foot equals 6.23 British Imperial gallons.
- 1 cubic foot equals 7.48 United States gallons.
- 1 acre equals 43,560 square feet; equals 4,840 square yards.
- 1 acre-foot equals 43,560 cubic feet.
- 1 acre-foot equals 271,472 British Imperial gallons.
- 1 acre-foot equals 325,850 United States gallons.
- 1 inch deep on 1 square mile equals 2,323,200 cubic feet.
- 1 inch deep on 1 square mile equals 0.0737 second-feet per year.
- 1 second-foot equals 6.23 British Imperial gallons per second; equals 373.8 gallons per minute; equals 538,272 gallons for one day.
- 1 second-foot equals 7.48 United States gallons per second; equals 448.8 gallons per minute; equals 646,272 gallons for one day.
- 1 second-foot equals about 1 acre-inch per hour.
- 1 second-foot for one day equals 1.983 acre-feet.
- 1 second-foot for one 28-day month equals 55.54 acre-feet.
- 1 second-foot for one 29-day month equals 57.52 acre-feet.
- 1 second-foot for one 30-day month equals 59.50 acre-feet.
- 1 second-foot for one 31-day month equals 61.49 acre-feet.
- 1 second-foot for 153 days equals 303.47 acre-feet.
- 1 second-foot for one year equals 724 acre-feet.
- 1 second-foot for one 28-day month covers 1 square mile 1.041 inches deep.
- 1 second-foot for one 29-day month covers 1 square mile 1.079 inches deep.
- 1 second-foot for one 30-day month covers 1 square mile 1.116 inches deep.
- 1 second-foot for one 31-day month covers 1 square mile 1.153 inches deep.
- 1 second-foot for 153 days covers 150 acres 24,278 inches or 2.023 feet deep.
- 1 second-foot for one year covers 1 square mile 13,572 inches or 1.131 feet deep
- 100 British Imperial gallons per minute equals 0.268 second-feet.
- 100 United States gallons per minute equals 0.223 second-feet.
- 1,000,000 British Imperial gallons per day equals 1.86 second-feet.
- 1,000,000 United States gallons per day equals 1.55 second-feet.
- 1,000,000 British Imperial gallons equals 3.68 acre-feet.
- 1,000,000 United States gallons equals 3.07 acre-feet.
- 1,000,000 cubic feet equals 22.95 acre-feet.
- 1 foot per second equals 0.682 miles per hour.
- 1 cubic foot of water weights 62.5 pounds.
- 1 horse-power equals 550 foot-pounds per second.
- 1 horse-power equals 746 watts.
- 1 horse-power equals 1 second-foot falling 8.80 feet.
- 1 $\frac{1}{3}$ horse power equals 1 kilowatt.

To calculate water power quickly: $\frac{\text{sec. ft.} \times \text{fall in feet}}{11} = \text{net horsepower on water wheel, realizing 80 per cent of the theoretical power.}$

To find the number of acre-feet required for a certain acreage under the prescribed duty of water of one hundred and fifty acres for each cubic foot of water per second flowing continuously during the irrigation season (153 days), multiply the acreage by 2.02314.

1 British Columbia miners' inch equals 1.68 cubic feet per minute or 1 second-foot approximately equals 35.7 British Columbia miners' inches.

METHODS OF MEASURING STREAM FLOW.

There are three distinct methods of determining the surface flow of streams: (1) by measurements of slope and cross-section and the use of Chezy's and Kutter's formulæ; (2) by means of weirs, which include any device or structure that by measuring the depth on a crest or sill of known length and form, the flow of water may be determined; (3) by measuring the velocity of the current and the cross-section. The third method is the one most commonly used by this survey. The second is used when the flow is too small to be accurately determined by the third, while the first is only used in making estimates of the discharge of a stream when the only data available are the cross-section and slope.

SLOPE METHOD OF DETERMINING DISCHARGE.—The slope of a stream, or rather of a section of a stream, is the difference in elevation between the upper and lower ends of the section, commonly called the fall, divided by the distance or the length of the section. Slope sections vary in length from two or three hundred feet to several hundred feet, depending largely upon the nature of the stream.

It is difficult to ascertain accurately the slope of the water surface in a stream, since in nearly all streams there are pulsations in the water, causing the surface to rise and fall locally. In most streams the slope of the bottom is far from uniform, and the flow of water in any given section is more or less influenced by the flow in the adjacent section, above or below. For this reason it is a good plan to consider a number of adjacent sections, comprising a considerable length of the stream in one computation, being careful to take into account the diversity of cross-section at various places in the length.

In determining the slope of the surface of a stream, levels are taken of the water surface at each end of the slope section, and referred to some datum or bench mark. A good plan is to set firmly a stout wooden stake below the water surface at each end of the slope section, and then to drive a nail into the top of each stake, so that the nail-head will exactly coincide with the water surface. The difference in elevation between the two nail-heads, divided by the distance between the stakes, will give the slope.

The wetted perimeter is that portion of a stream channel that is in contact with the water. The form or outline of the wetted perimeter of a stream has an important influence upon the velocity of the current. It is usually determined graphically from the plotted cross-section or may be measured by means of a flexible tape or chain after the flood has subsided.

The hydraulic radius, which is sometimes called the mean radius of the channel below the water surface is found by dividing the area of the cross-section (in sq. ft.) by the length of the wetted perimeter (in feet).

The Chezy formula, which is the fundamental formula for stream discharge, is:

$$Q = A V$$

in which Q = the discharge of the stream in sec. ft.
 A = the area of the cross-section in sq. feet.
 V = the mean velocity of flow, in ft. per sec.

In applying this formula to the determination of stream discharge, the mean velocity of a stream is considered a function of the slope and of the wetted perimeter of the stream. This may be expressed by formula as follows

$$V = C \sqrt{r s}$$

in which r = the hydraulic radius of the channel.
 s = the surface slope.

and C is a variable coefficient, depending upon the nature of the channel.

In determining the value of C for any given case it is customary to make use of Kutter's formula, which is:—

$$C = \frac{.00251 + \frac{1.811}{n}}{1 + \left\{ 41.6 + \frac{.00251}{s} \right\} \sqrt{\frac{n}{r}}}$$

In this formula r and s have the same significance as in the Chezy formula and the new factor n is called the coefficient of roughness. It is a variable coefficient, and its value is dependent upon the size, shape, slope and degree of roughness of the channel. Tables of values of n are given in various text books, but it is difficult to choose the correct value. It is therefore advisable whenever possible to compute the value of n from a measured discharge. As the slope method of determining discharge is seldom employed except to estimate flood discharge, a current meter measurement is very often made at the slope section, during low water. Having determined the mean velocity, slope and hydraulic radius at the time of the metering, the value of C may be found from the formula $V = C \sqrt{r s}$ or $C = \frac{V}{\sqrt{r s}}$ Trautwine's Pocket Book for Civil Engineers and other texts contain tables giving the value of n for different values of r , s , and c . From these tables we can interpolate the proper value of n for a particular section of the stream, at low water stage. In most cases this value of n is applicable to high water and flood conditions of the stream also and is used with values of r and s for the high water or flood cross-section to determine the value of C at the higher stage. Having determined the value of C the computation of the discharge is simple.

The results obtained by the slope method are in general only roughly approximate, owing to the difficulty in obtaining accurate data and the uncertainty of the value of n to be used.

WEIR METHOD OF DETERMINING DISCHARGE.—As yet few permanent weirs have been constructed by this survey, but many regular weir measurements are made on small streams by means of a temporary weir. The weir used consists of a wooden base of 2-inch plank, to which is bolted a rectangular notch of three-eighths inch steel with bevelled edges.

In making a measurement by means of a temporary weir, the following directions should be followed as far as possible. The weir should be placed perpendicular and at right angles to the bed of the stream with the crest level. The discharge should be free in so much as the

nappe should have sufficient fall to allow air to have free circulation underneath it, and the head or depth on the crest should not exceed one-third of the length. The channel of approach should be several times as wide as the opening and the depth of water in the bay or pond should be at least twice the head on the weir, so as to eliminate velocity of approach and cross-currents. In choosing a site for a weir, a point should be chosen that will fulfil the above conditions and give a good sized bay or pond.

To set up a temporary weir, a dam of sods and earth is thrown across the stream, the weir is set in place and the sods are tramped firmly around it to stop all leakage. On a stream with a sandy bed, sods or clay must be placed on the bottom for a few feet upstream to form a mattress to prevent the undermining of the dam.

After the bay has filled up, the head of the water is observed by taking the difference in elevation of the crest of the weir and the elevation of the water surface in the bay at a distance of 4 to 10 feet from the weir, with an engineer's level. Two common methods of getting the elevation of the water surface are (1) hold the levelling rod on a stone or other solid body under water and subtract the depth of water on the rod from the sight on the rod; (2) drive a pin divided into tenths of feet into the bed of the stream so that an even tenth is level with the surface of the water, then hold the levelling rod on the top of the pin and add the length of pin above the water to the sight on the rod.

When the head of water has been determined the discharge is computed by using one of the standard formulæ which will suit the case. Tables giving the discharges for different heads and lengths of crests are published in many engineering texts.

The formula used by this survey for rectangular sharp-crested weirs is:

$$Q = 3.33 (L - .2H) H^{3/2}$$

being a modification of Francis' formula, to allow for end contractions and elimination of velocity of approach.

in which Q = discharge in sec. ft.; L = length of crest in feet; H = head in feet.

Measurements by means of temporary weirs should be made some distance above or below the gauge. If they are made close to a gauge, the gauge must be read before the weir is placed in the stream and the pond must be allowed to run off after the weir is removed before the gauge is re-read.

VELOCITY METHOD OF DETERMINING DISCHARGE.—There are two methods of determining the velocity of flow of a stream, namely, direct and indirect. In the direct method by which the velocity is determined by means of floats, the liability of error is large, and the results far from satisfactory. This method is seldom used except for very rough estimates or when a current meter cannot be used. There are three common kinds of floats, viz: surface, sub-surface and tube or rod floats. In each the procedure is the same. A straight piece of channel is selected for the run and two cross-sections are taken at some convenient distance apart, usually from 100 to 200 feet. They are then divided into strips by means of a tagged wire. The velocity in each strip is then measured by noting the time taken by the float in traversing the run or distance between the two cross-sections. As the time and distance are both known the velocity can easily be computed. The velocity, whether measured by surface, subsurface or tube floats, must be multiplied by a coefficient less than unity to reduce to the mean velocity before being used to compute the discharge.

The indirect or current meter method is the most reliable and most widely used method of determining the velocity of the flow of a stream. The meter used by this survey is the Price Patent, manufactured by W. & L. E. Gurley, Troy, N. Y. It consists of six cups attached to a vertical shaft which revolves on a conical hardened steel point when immersed in moving water. The number of revolutions is indicated electrically. The rating or relation between the velocity of the moving water and the revolutions of the wheel is determined for each meter by drawing it through still water for a given distance at different speeds and noting the number of revolutions for each run. From this data a rating table is prepared which gives the velocity per second of moving water for any number of revolutions in a given time interval.

In making a measurement with a current meter, a number of points, called measuring points, are measured off above and in the plane of the measuring section, at which observations of depth and velocity are taken. These points are spaced equally for those parts of the section where the flow is uniform and smooth, but should be spaced unequally for other parts according to the discretion and judgment of the engineer. In general, the points should not be spaced farther apart than 5 per cent. of the distance between piers, nor farther apart than the approximate mean depth of the section at the time of measurement.

The measuring points divide the total cross-section into elementary strips at each end of which observations of depth and velocity are made. The discharge of any elementary strip is the product of the average of the depths at the ends, the width of the strip, and the average of the mean velocities at the two ends of the strip. The sum of the discharges of the elementary strips is the total discharge of the stream.

The accuracy of a discharge measurement taken at a velocity area station is dependent on two factors, the accuracy with which the area of the cross-section and the mean velocity of the flow normal to that section are measured. The greatest, and the most common errors in measurements of discharge are caused by erroneous soundings. Errors in soundings by weight and line are due to the weight being carried down-stream, or, sometimes, to the bowing of the line. Both these causes make the soundings too great. Errors in soundings with rods are due

to the rod not being perpendicular, to the water rising on the rod, and to the rod sinking in the bed. In order to verify the accuracy of soundings made at medium or high stages, they should be compared with those at low water. The mean velocity is also very difficult to measure accurately, because it is constantly changing. It varies not only from the surface to the bottom but from one bank of the stream to the other, making it necessary to measure it at a number of points.

METHODS OF DETERMINING MEAN VELOCITY.

There are a number of different methods of determining the mean velocity at the ends of these strips, or, as it is commonly called, the mean velocity in a vertical, namely, multiple-point, single-point, and integration. These three principal multiple-point methods in general use are the vertical velocity-curve, three-point and two-point method.

VERTICAL VELOCITY CURVE METHOD OF DETERMINING MEAN VELOCITY.— In his method the centre of the meter is held as close to the surface of the water as is possible, being careful to keep it out of reach of all surface disturbances, and then at a number of different depths throughout the vertical. The velocity at each position of the meter is recorded. These observations are then plotted with velocities in feet per second as abscissae and their corresponding depths in feet as ordinates and a mean curve is drawn through the points. The mean velocity for the vertical is obtained by dividing the area bounded by the curve and its axis by the depth. In the absence of a planimeter for measuring the area, the depth is divided into 5 to 10 equal parts, and the velocities of the center ordinates of these parts are noted. The mean of these velocities will very closely approximate the mean in the vertical.

It is often more convenient, when the depth is a number of feet and a fraction, as 7.4, to divide the depth into 7 parts of a foot width, and a part of 0.4 foot width. Then the velocity to enter for the narrow part is 0.4 of the velocity at the centre of it.

The vertical velocity curve is useful in studying the manner in which velocities occur in a vertical. From a study of a number of these curves the other shorter methods of determining mean velocity are deduced. On account of the length of time taken to complete a measurement, this method is not used in general routine measurements, except during the winter, for a change of stage is almost sure to occur during a measurement on a large stream which counterbalances the increased accuracy. For this reason its use is limited to the determination of the coefficient to be used in the reduction of values obtained by other methods of measuring velocity to the true value, to the measurement of velocities under new and unusual conditions of flow, and for measurements under ice.

THREE-POINT METHOD OF DETERMINING MEAN VELOCITY.— This method gives the greatest accuracy outside of the vertical velocity curve and is the method most commonly used by this survey during the open season. The meter is held at 0.2, 0.6 and 0.8 depth. The mean velocity is then obtained by dividing by 4 the sum of the velocities at 0.2 and 0.8 depth plus twice the velocity at 0.6 depth. It is the best method to use during low water or in wide shallow streams having a rough bed where the thread of mean velocity varies considerably from the 0.6 depth.

TWO-POINT METHOD OF DETERMINING MEAN VELOCITY.— In studying the vertical curves made at a number of different points and under varied conditions, it has been found that the mean of the velocities occurring at 0.2 and 0.8 depth gives very nearly the mean velocity in the vertical. Use is made of this fact in the two-point method of determining mean velocity, the meter being held at 0.2 and 0.8 depth in the vertical. This method has been found more accurate than the single point method and the time required for a metering is not very much greater. This method has been found to give, also, a very close approximate to the mean velocity in measurements of ice-covered streams, although these flow under very different conditions from those of open water.

SINGLE-POINT METHOD OF DETERMINING MEAN VELOCITY.— Experiments made under most favourable conditions and extending over a long period have established the point of mean velocity in a vertical at 0.6 of the depth. Therefore the error resulting from the use of the 0.6 depth as the depth of mean velocity is very small though in some few cases a study of the vertical velocity curve will show the need of a coefficient to reduce the observed velocities to the mean. The variation of the coefficient from unity in individual cases is, however, greater than in the two or three point method and the general results are not as satisfactory. For that reason this method is not employed very extensively by the survey.

In the other principal single-point method the meter is held near the surface, at from 0.5 to 1 foot below the surface, care being taken to sink the instrument below the influence of wind or waves. The resulting velocities must be multiplied by a coefficient to reduce them to mean velocities. This coefficient as found by a large number of experiments, varies from 0.78 to 0.98, depending upon the depth and speed of the stream. The deeper the stream and the greater the velocity, the larger the coefficient. In flood work coefficients varying from 0.90 to 0.95 should be used. This method is only used when the current is too strong to permit the sinking of the meter to any great depth below the surface of the water. It is often employed at times of flood, or when a stream is carrying a lot of drift wood or ice.

INTEGRATION METHOD OF DETERMINING MEAN VELOCITY.—This method of determining the mean velocity in a vertical consists in moving the meter at a slow uniform speed from the bed of the stream to the surface and return in a vertical direction, the time and revolutions being observed. In travelling through all parts of the vertical the meter is acted upon by each and every thread of velocity from the bed to the surface of the stream, and the resulting observations determine the mean in that vertical.

This method is very useful in checking the results of other methods. It is, however, seldom used by this survey as the Price meter is not suited to observations by this method, since the vertical motion of the meter causes the wheel to revolve.

GAUGING STATIONS.

The first step is to select a suitable locality for a gauging station. Although apparently simple, this is really a difficult task. Not only must the water be moving in nearly straight lines over a solid bed and between well defined banks, but the place must be accessible at moderate cost and there must be living near a competent person who can be engaged to serve as observer. Permanent gauging stations should only be selected after a very thorough reconnaissance. In the irrigation districts and in more thickly populated districts there is more or less diversion of water. This is apt to complicate matters for the hydrographer, for a gauging station above all works may not include all the tributaries of the stream and it is often necessary to establish gauging stations at several points along the streams, and on tributaries, canals, and pipe lines in order to obtain complete information regarding the water supply in a particular stream.

There are three classes of gauging stations, namely, wading, bridge and cable stations. The wading station can of course only be used in the case of small streams having a maximum depth at its highest stage of 3 feet or less. The equipment for a wading station is small, consisting usually of a plain staff gauge, graduated to feet and hundredths, and fixed vertically to one of the banks of the stream. For convenience a measuring line, usually a wire with tags, may be fixed permanently at this section. When taking the reading, the hydrographer should stand below and to one side of the meter so as to not cause eddies in the water.

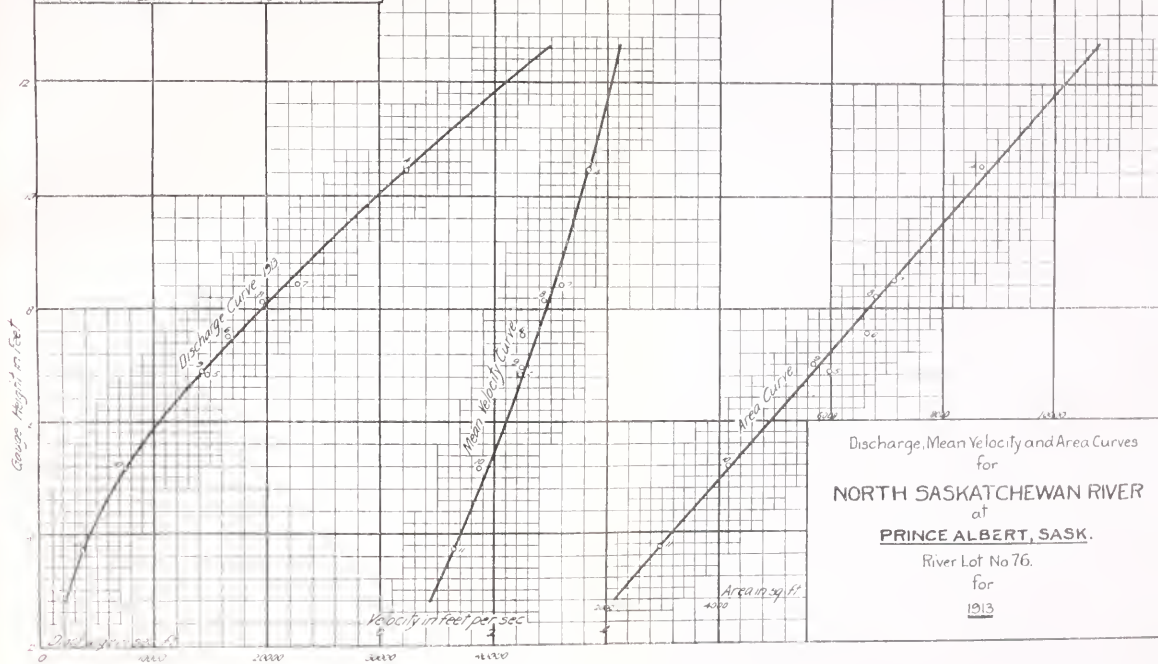

Bridge stations, because of their permanency and the freedom of movement allowed the hydrographer, are much preferred. Very often, however, more particularly in swift currents, the piers materially affect the accuracy of the results. When the gauge cannot be attached to a pier, it is often attached horizontally to the guard-rail or floor of the bridge, and the height of the stream is found by lowering a weight by a chain over a pulley. It is indicated by a marker on the chain. Distances of three, five or ten feet, according to the size of the stream are marked on the lower chord of the down stream side of the bridge, to serve as a measuring line.

Frequently it is impossible to establish a permanent gauging station at a bridge. In that case the wire cable of a ferry can be utilized, or, if that is not available, a permanent wire cable is stretched across the river. For spans of average length a galvanized wire cable three-fourths of an inch in diameter is safe. It is supported at each bank by means of high struts or by passing it through the crotch of a tree. The cable is run into the ground and anchored securely to a "dead man" buried at least six feet below the surface, or, if convenient, it is anchored to the lower part of the trunk of a tree. A turnbuckle is inserted in the cable between the strut and anchorage to permit tightening the cable when it begins to sag. A permanent measuring line, usually a wire, with tags 5 or 10 feet apart, is stretched across the stream just above the cable. A cage large enough to carry two men and instruments is constructed and suspended from the cable by means of cast iron pulleys. The cage is moved from point to point by hand. A stay line, usually quarter-inch guy wire, is stretched across the stream about thirty to forty feet upstream from the cable, and securely fastened. By passing a sash cord through a pulley hung on this stay line the current meter is prevented from being carried down stream.

LOW VELOCITY LIMITATIONS.

Owing to the presence of a slight amount of friction in the current meter, a certain definite velocity is required to make the wheel revolve, *i.e.*, to overcome the frictional resistance of the wheel. For this reason the meter is unsuitable for the measurement of low velocities, approaching this value. This velocity, which is required to overcome friction, and which is obtained from the meter rating curve, is called the velocity of no flow for the particular meter referred to. It varies in different types of meters, and also slightly in meters of the same type, according to the time the meter is in use, but very seldom exceeds 0.2 foot per second in any meter. From a number of observations the low velocity limit, below which values of velocity are unreliable, is found to be 0.5 foot per second. In many cases at low stages the gauging station on a stream becomes unsuitable for a discharge measurement owing to the mean velocity in the section falling below the safe limit. In such instances where it is possible to wade the stream a suitable gauging section may be located within a reasonable distance of the regular station and the discharge measurements made at this point. When

at
PRINCE ALBERT, SASK.

River Lot No 76.

for

1913

a gauging is made at a cross-section other than the regular station, sufficient soundings should be made at the latter at the time of the gauging to develop the cross-section and compute the area. The measurement is thus referred to the regular gauging station and the mean velocity and area at the regular section is reported and used in the office computations.

OFFICE COMPUTATIONS.

RATING CURVES AND TABLES.—When a series of discharge measurements has been made at a gauging station a rating curve is constructed for that station, showing graphically the discharge corresponding to any stage of the stream within the limits covered by the gaugings. This curve, as it is usually drawn, has as abscissae, the discharges in second-feet and as ordinates, the corresponding gauge heights at which the discharges were made. A smooth curve is drawn through the resulting set of points and from this curve the discharges at any stage within the limits of the curve are taken. Some measurements may be more reliable than others, owing to more or less favourable conditions at different times of gauging, or to other causes. In order to obtain the weight of the different measurements, curves with area and mean velocity, as abscissae, and gauge heights as ordinates, are also drawn. From a study of these curves any discrepancies in a measurement, either in its area or mean velocity, may be detected. Should it be necessary to extend the rating curve beyond the limits of actual discharge measurements the area and mean velocity curves may be constructed to the stages for which the discharge curve is desired and the latter found by taking the product of the two curves. The discharge curve under natural conditions of flow is always convex to the gauge height axis. The area curve is either a straight line or is convex to the gauge height axis, except in the case of overhanging banks when it becomes concave to the axis. The mean velocity curve is always concave to the gauge height axis, except in cases where standing water occurs below the stage of no-flow. In this case the curve will assume a reverse form, starting from the gauge height of zero flow with a curve convex to the gauge height axis and gradually reversing to a curve concave to this axis. In plotting all three curves the horizontal and vertical scales should be chosen that the curves may be used within the limits of accuracy for the work, and in their critical position will make, as nearly as possible, angles of 45 degrees with each axis.

The rating curve being constructed it becomes necessary to prepare a station rating table, giving the discharge at any stage of the stream within the limits of the daily gauge height observations on record. From this rating table the daily discharges corresponding to the daily gauge heights are read and tabulated. The rating table is constructed for tenths, half-tenths, or hundredths of feet, according to the readings of the gauge to which it is to be applied. The discharges for this table are read directly from the rating curve and are then adjusted so that the differences for successive stages shall be either constant or gradually increasing, but never decreasing, unless the station is affected by backwater.

DAILY DISCHARGE, MONTHLY MEAN, AND RUN-OFF.—The rating table being made to cover the range of daily gauge height observations, the next procedure in the computations is to make out a table of daily discharges from this rating table. The daily gauge heights are copied as they were sent in by the observer and opposite each the corresponding discharge is filled in from the rating table. The monthly discharge is found by totalling the daily discharges for the month in question, and the monthly mean is obtained by dividing this total by the number of days in the month.

The run-off is computed with two different sets of units, depending upon the kind of work for which the data is intended, as follows: (1) Run-off in inches is the depth to which a plane surface equal in extent to the drainage area would be covered if all the water flowing from it in a given time were conserved and uniformly distributed thereon; it is used for comparing run-off with rain-fall, which is usually expressed in depth in inches. The monthly mean run-off in second-feet is divided by the area of the drainage basin in square miles to find the monthly mean run-off per square mile. This result, reduced to run-off in depth in inches for the monthly period, is in the form required.

(2) The run-off in acre-feet is the form of most use in connection with storage. An acre-foot is equivalent to 43,560 cubic feet, and is the quantity of water required to cover an acre to the depth of one foot. The monthly mean run-off in second-feet is used for the computation of run-off in acre-feet. The monthly mean is reduced to cubic feet per month and this quantity divided by 43,560 gives the run-off in acre-feet.

The run-off of the stream being computed both in depth in inches and in acre-feet for each month, the run-off for the period, during which observations of run-off were made, is found by the summation of the amounts of run-off for the several months making up this period.

CHANGING CONDITIONS OF CHANNEL.—On streams such as Milk River, whose bed is in a constant state of motion, measurements of discharge should be made every few days, otherwise considerable data relating to changes cannot be obtained. For discharges on days other than those on which measurements are taken, the interpolation method is used. The two methods of interpolation in general use are the Stout and Bolster methods.

The Stout method deals with the correction of the gauge heights. A curve is drawn, using the difference between the actual gauge heights at the time of measurement and the gauge height corresponding to the measured discharge as ordinates and the corresponding days of the month as abscissae. From an irregular curve drawn through these points corrections for gauge heights can be made for days on which there was no discharge measurement. When the discharge is greater than that given by the curve the correction is positive and vice-versa. Each daily gauge height is corrected by the amount shown on the correction curve, and the corresponding discharge taken from an approximate rating curve for the station.

The Bolster method deals more particularly with the modification of the discharge. Results of discharge measurements covering a whole year or season are plotted, and though considerably scattered, will define one or more regular curves, called standard curves, the number and position of each indicating the radical changes. Where the river bed changes from day to day, the position of the standard curve also varies and must pass through the points indicating the different days. The points indicating two successive measurements are joined by a line, which for short distances on the cross-section paper is a straight line and otherwise a curve. This line is divided into a number of equal parts, each indicating an intervening day, the assumption being that as the change during this period is gradual the daily rating must pass through each point or day, as represented by the divisions. A simple and convenient way of making these interpolations and moving the daily rating curve is to make a tracing of the standard curve with a vertical line of reference. By keeping the lines of reference coincident this curve can be shifted into any desired position and the discharge read for any gauge height.

WINTER RECORDS.

FORMATION OF ICE AND ICE CONDITIONS.—Perhaps the greatest difficulties in stream measurements are met with in the early part of the winter, just as the streams are commencing to freeze up. Especially is this true in the swift running streams in or near the mountains. Needle and anchor ice often form in large quantities in rapids and flowing in masses with the water make gaugings very difficult and unreliable. Even after a permanent ice cover is obtained at the gauging station this ice will, in some cases, obstruct the channel below the station and cause "backwater".

A further difficulty is that the surface ice usually forms along the edges of the stream for some time before forming in the centre of the channel. At first this may be broken away if the stream is small and open water measurements made, but later it is necessary to take some observations through holes in the ice along the edge. As the streams get farther away from the mountains their velocity decreases, and fewer rapids occur along their course. There is then less trouble with needle and anchor ice, and a permanent ice cover forms much more quickly.

In many cases the section used during the summer is very unsuitable for making measurements during the winter. It may be. (a) too wide and shallow or flowing in two channels during the winter, due to low water; (b) partially open due to swift running water or warm water running in; (c) affected by needle and anchor ice either by flowing in the water, or causing backwater; (d) located where the snow drifts over the ice to a great depth; (e) that it is likely to have a rough ice cover or pile up with ice, due to swift water and a rough bed; (f) that there is a tendency for ice jams to occur, with consequent backwater, etc.

It is therefore often necessary to choose a new section for winter observations. This should be done before freeze-up, for then the width, depth, uniformity of flow and conditions above and below can be easily noted. The most suitable stations for winter measurements are those which have a long stretch of very smooth, sluggish water above, and a rapid fall below.

DISCHARGE MEASUREMENTS.—In winter as in summer, the daily discharges of a stream are computed from frequent discharge measurements, and daily gauge height observations. The discharge measurements are made through holes in the ice from five to ten or even twenty feet apart, depending upon the size of the stream, and large enough to allow the current meter to pass through freely. The gaugings are made in the same manner as at open sections except that the depth of the stream is taken as the distance from the bottom of the ice to the bed of the stream. The soundings, however, are always referred to the surface of the water in the holes, the distance from the surface of the water to the bottom of the ice being measured and subtracted from the soundings to obtain the depth.

The vertical velocity curve method is usually used for the determination of the mean velocity in the vertical. A curve is plotted for each vertical, and the mean velocity is determined in the usual manner. These curves vary greatly as to form for different kinds and conditions of channel.

The typical curve, however, differs from that obtained from an open water observation in that it is drawn back more at the surface, owing no doubt to greater friction between the ice and the water as compared with the water and the atmosphere. As a result there are two points in the vertical at which the thread of mean velocity occurs under an ice cover. These points are near 0.2 and 0.8 of the total depth below the bottom of the ice, and the mean of the

of the velocities at these two depths will give fairly accurate results, but when close estimates of the discharges are required, and the conditions are not very favourable, the vertical velocity method should be used.

It is found that when all the holes are opened on a small swift stream, there are sometimes vertical pulsations of the water in the holes, which affect the velocity readings. This can usually be avoided by only opening one hole at a time, and filling it in again with ice and snow as soon as the observation is finished. It can also be overcome by inserting a thin sheet of galvanized tin or iron at the bottom of the hole, after the meter has been lowered into the water. The meter should always be held near the upstream side of the hole.

In using the meter care must be taken to keep it under the water as much as possible to prevent ice from forming around the bearings. It is a good plan to clean and oil the meter indoors before starting out to make a gauging.

GAUGES AND GAUGE OBSERVATIONS.—The gauge is usually read once each day, the observer noting the elevation of the water as it rises in a hole cut through the ice, the height of the top of the ice, the thickness of the ice, presence of needle or slush ice, snow on top of ice, ice jams, and any sudden changes in temperature. To do this the observers are provided with an ice chisel for chopping holes, and an L — shaped ice scale to measure the thickness of the ice.

A difficulty which arises, in obtaining the thickness of the ice is that in a hole kept open for some time the ice wears away around the bottom of the hole, and may make it necessary to cut a new hole nearby, or to enlarge the original.

Any form of gauge may be used, but the chain gauge is the most satisfactory as the staff gauge, being frozen to the ice, heaves with it, and also in cutting away the ice from around it the figures are effaced. The automatic gauge gives trouble with the well freezing over.

ESTIMATES OF DAILY DISCHARGE.—While the run-off, particularly during the winter months, does not vary directly in accordance with the precipitation, the rate at which it reaches the streams is of course, dependent almost entirely upon the climatic conditions. The climate in the mountains is subject to great extremes but during the winter almost the entire precipitation is in the form of snow.

There is therefore very little surface run-off and the flow of the streams comes almost entirely from the glaciers, ground waters and lake storage, and except for the losses due to freezing and the slight increases, due to the melting of snow and ice by chinooks (warm winds), the flow in the streams would remain constant or would change gradually.

There are, however, certain local conditions in Western Canada which make it exceptionally difficult to make estimates of the daily discharge during the winter. The gauge height in many cases fluctuates very much, and often sudden rises or drops occur. These rises are often explained by the fact that during very cold spells a great deal of slush, frazil, and anchor ice is formed and chokes up the channel, thus raising the surface of the water, when it reality the discharge is decreasing. Then, again, a chinook causes a sudden rise in temperature and the discharge is often increased while at the same time the gauge height gradually lowers, evidently because the warmer weather and water have melted out a lot of the ice from the channel and given it a greater carrying capacity.

In order to make reliable estimates of the daily discharge, gaugings must be made at short intervals and the weather conditions and temperatures in the whole of the drainage area above the station must be very carefully studied.

W. G. Hoyt, District Engineer, Water Resources Branch, U. S. Geological Survey, has made an exhaustive study of methods for estimating the flow when streams are frozen. The various methods described by him in an article in "Engineering News" on April 10, 1913, and Water-Supply Paper 337, published by the United States Geological Survey, in 1913, and modifications of them are used. The graphic method of interpolation has been found to be generally applicable, but as the precipitation during the winter months has so little effect upon the run-off during that period, it is seldom plotted on the sheets. It is also considered that the extremes and ranges of temperatures are better guides for interpolation than the mean temperatures and the minimum and maximum temperatures are both plotted and given due consideration rather than the mean temperatures.

The weather conditions and temperatures at the gauging station are not always typical for the whole drainage basin above and care must therefore be taken to have the meteorological observations made at some other place, or if necessary, at two or more places. Of course, care must be taken to study all the possible conditions which may affect the estimates.

Plate 4 shows typical conditions and illustrates the graphic method of interpolating the daily discharges.

RATING CURRENT METERS.

Each meter is rated before being used, in order to determine the relation between the revolutions of the wheel and the velocity of the water. The meter is driven at a uniform rate of speed through still water for a given distance, and the number of revolutions of the wheel and the time are recorded. From this data the number of revolutions per second and the corresponding velocity per second are computed. Tests are made for speeds varying from the slowest which will cause the wheel to revolve to several feet per second. The results of these runs, when plotted with revolutions per second as abscissae, and velocity in feet per second as ordinates, locate points that define the meter rating-curve, which for all meters is practically a straight line. From this curve a meter rating table is prepared. Theoretically, the rating for all meters of the same make and type should be the same, but as a result of slight variations in construction and in the bearing of the wheel on the axis at different velocities, the ratings differ.

After a meter has been in use for some time the cups may have received small injuries, or the bearing of the wheel on the axis may have changed owing to unavoidable rough usage. These changes will affect the running of the meter and change its rating. As a consequence each meter is re-rated at regular intervals and a new rating curve and table prepared.

Descriptions of the rating station, discussions of the methods employed, and the results of ratings, are given in the Reports of Progress of Stream Measurements for the years 1911 and 1912.

OBSERVATIONS OF GAUGE HEIGHTS ON SPRAY RIVER NEAR BONFIF
WITH CORRESPONDING MAXIMUM AND MINIMUM TEMPERATURE AND
THE ESTIMATED DAILY DISCHARGES FOR THE WINTER 1912-1913

The circles on the discharge curve indicate actual discharge measurements. Note the rise in gauge height in January and February when the temperature was lowest and the discharge measurements showed that the flow was decreasing.

ATHABASCA RIVER DRAINAGE BASIN.

General Description.

Athabasca River rises on the eastern slope of Rocky Mountains and flows in a northeasterly direction for about one thousand miles, eventually emptying into Lake Athabasca.

The Athabasca basin forms the most southerly portion of the great Mackenzie system and the portion dealt with in this report comprises only the headwaters.

Rising in country very similar to the watershed of the other streams of importance in Alberta, it flows out of the mountains and then through foothill country. From the foothills to the lake the basin consists of stretches of muskeg and uplands, well timbered with spruce and pine.

The general character of the basin is such that the winter precipitation or snowcover is conserved to a great extent and floods in the early spring are not usual. However in June, July and August rains and warm winds cause the upper parts of the system to discharge large quantities of the snow water from the higher peaks and glaciers and when rains of any magnitude occur the invariable result is a flood. The muskeg country is a great source of storage but, when its capacity is reached, it accelerates rather than retards the run-off.

The main transcontinental lines of the Grand Trunk Pacific and the Canadian Northern Railways cross the upper portion of this drainage basin, and transportation is now a much easier problem than in the past.

Many valuable deposits of coal, limestone and other minerals are found in this basin, and, on account of these as well as the many power possibilities and stretches of timber and pulpwood, it is expected that this country will develop very much during the next few years.

During 1913, a few stations were established in this basin and a regular hydrographer employed who made a number of miscellaneous measurements. As the country is settled, more stations will be established where necessary and much better records obtained.

A very full description of this drainage basin is attached as an appendix to this report

MIETTE RIVER NEAR JASPER.

This station was established August 23, 1913, by G. J. Smith. It is located on the S.W. $\frac{1}{4}$ Sec. 9, Tp. 45, Rge. 1, W. 6th, Mer., at the second traffic bridge about 2 $\frac{1}{2}$ miles southwest of Jasper, and about one mile upstream from the mouth of the river.

The gauge, which is a plain staff graduated to feet and hundredths, is attached to the downstream face of the left pier. The zero of the gauge (elev. 88.45) is referred to a spike head (assumed elev. 100.00) located on the top of the left abutment on the downstream side.

The channel is straight for 150 feet above and 100 feet below the station. Both banks are high, well wooded, and not liable to overflow. The bed of the stream is gravel and sand but is not liable to shift. The current is swift.

Measurements are made with a meter and weights from the downstream side of the bridge, which is a three span timber structure. The initial point for soundings is the bench mark referred to.

During 1913, no observations of gauge height were obtained.

ATHABASCA RIVER AT JASPER.

This station was established March 4, 1913, by V. Meek. It is located on the N. W. $\frac{1}{4}$ Sec. 15, Tp. 45, Rge. 1, W. 6th Mer., and is one half mile east of the Grand Trunk Pacific Station and about three-fourths of a mile below the mouth of the Miette River.

The gauge, which is a plain staff graduated to feet and hundredths, is placed at the left bank about 200 feet downstream from the cable. The zero of the gauge, (elev. 83.81) is referred to a permanent iron bench mark (assumed elev. 100.00) located 20 feet upstream from the gauge.

The channel is straight for about 800 feet above and below the station. The left bank is high and will not overflow, while the right is low and liable to overflow. A small channel some 70 yards from the main stream on the right side has to be measured during high water. The bed of the stream is of gravel which shifts slightly during flood stages. At low water the channel is broken into two channels by gravel bars. The current is fairly swift.

Discharge measurements are made from the cable and ear. The initial point for soundings is the cable frame on the left bank. Distances are marked on the cable every ten feet. The small channel on the right side is measured by wading.

During 1913 the gauge was read once daily for various periods by Lawrence MacDonald, H. A. Nutting and George Thompson.

ROCKY RIVER NEAR HAWES.

This station was established July 3rd, 1913, by G. J. Smith. It is located on the N.W. $\frac{1}{4}$ Sec. 13, Tp. 4S, Rge. 2S, W. 5th Mer., about three-fourths of a mile east of Hawes Station on the Grand Trunk Pacific Railway and about 300 yards from the point where the Rocky enters the Athabasca River.

The gauge, which is a plain staff graduated to feet and hundredths, is attached to the cribbing of the bridge on the right bank. The zero of the rod, (elev. 90.91) is referred to a bench mark (assumed elev. 100.00) located on the downstream side of the right abutment of the bridge and marked B.M. with blue paint.

The channel is straight for 150 feet above and 200 feet below the station. Both banks are low above and below the bridge but the protecting wall above and below the bridge will keep the stream from overflowing at the station. The bed of the stream is of gravel and will shift at flood stages. The bridge pier divides the channel into two sections at high stages. The current is swift.

Measurements are made from the downstream side of the railway bridge. The initial point for soundings is the stream face of the right abutment and is marked on the bridge floor with an arrow and I. P. in blue paint.

During 1913, the gauge rod was read twice each day by H. G. Barden.

SESSIONAL PAPER No. 25c

LOBSTICK RIVER NEAR ENTWISTLE.

This station was established on July 11, 1913, by G. J. Smith. It is located on a wooden bridge on the N.E. $\frac{1}{4}$ Sec. 30, Tp. 53, Rge. 7, W. 5th Mer., about 1 mile upstream from where this river empties into the Pembina river, and about $2\frac{1}{2}$ miles northwest of the village of Entwistle.

The gauge, which is a plain staff graduated to feet and hundredths, is attached to the right bank 40 feet downstream from the bridge. The zero of the gauge (elev. 96.17) is referred to a bench mark (assumed elev. 100.00); the bench mark is a nail head on top of the 6th log below the bridge floor, on the right side of the first pier, 28.5 feet from the I.P. and on the downstream side of the bridge.

The channel is straight for 100 feet above and 200 feet below the station. Both banks are high and wooded, and will not overflow. The bed of the stream is composed of rocks and gravel and is liable to shift. The current is swift.

Discharge measurements are made from the downstream side of the bridge, with current meter, rods and stay wire. The initial point for soundings is an arrow head marked I.P. cut in the woodwork of the right abutment on the downstream side of the bridge.

During 1913, the gauge was read by C. R. McKillop.

ATHABASCA RIVER AT ATHABASCA.

This station was established February 27, 1913, by V. Meek. It is located on the S.E. $\frac{1}{4}$ Sec. 20, Tp. 66, Rge. 22, W. 4th Mer., in the town of Athabasca.

The gauge, which is a plain staff divided to feet and half-tenths, is attached to a pier a little above the ferry cable and about 50 feet from the left bank.

Measurements of the winter discharge were obtained at this station and the Public Works of Canada obtained gauge heights. It is expected that full data on this station will be obtained next year which will be published in the report for 1914.

NORTH SASKATCHEWAN DRAINAGE BASIN.

General Description.

The North Saskatchewan River draws its principal water supply from the eastern slope of the Rocky mountains. The basin is bounded on the south by those of the Red Deer and South Saskatchewan Rivers and on the north by those of the Athabasca and Churchill Rivers. The general trend of the stream from its source to where it joins the South Saskatchewan, a few miles below the City of Prince Albert, and forms the Saskatchewan River, is easterly.

The basin of the river easily divides itself into five parts or divisions, each of which requires a separate description to enable one to understand clearly the conditions of run-off.

The first or upper section consists of the eastern slope of the Rocky mountains. While this part of the basin is not the greatest in area it supplies the greater part of the run-off. In glaciers and the perpetual snows of the higher peaks, innumerable small streams rise, which form the main stream and its larger tributaries. These streams have well defined rocky valleys and considerable fall. The upper regions of this section are not well wooded and allow of a rapid run-off of melting snows or rains.

East of this first section is a division which consists of the foothills which are for the most part well covered with forest and vegetable growth and forms probably the largest in area of the five sections. Here also is a very large source of supply for the stream but due to its cover it is a more regulated supply than the first section. In this section the main stream is joined by the Clearwater and Brazeau Rivers, two of the most important tributaries of the whole river basin. The streams in this section flow through deep valleys with fairly permanent beds and medium slopes.

From a little west of the City of Edmonton to the mouth of the Vermilion River the country is of a parklike nature with large stretches of prairie. This section is small in area and has not a very large run-off. The principal tributaries are the Sturgeon and Vermilion Rivers, the first of which drains in from the wooded country of the north, the latter from the prairie sections of the south. The main stream is in a well defined valley with large flats along its course and a more or less permanent bed with a small slope.

Below the third section to a little above the City of Prince Albert is a division which has little drainage into the river. It consists of prairie uplands for the most part, with small patches of timber to the north. The stream widens out into shallow reaches full of shifting sand bars and has very little slope. The valley while still well defined is also much wider. In this section the main stream is fed by the Battle River, which heads in Battle Lake, and flows eastward through park land and prairie sections south of the main river until it empties into it at the town of Battleford.

The last division is one in which the river with a greater slope and more permanent bed narrows considerably, as does also the valley. The run-off in this division is mostly from the north, which consists of well wooded country drained by a number of small streams.

SESSIONAL PAPER No. 25c

During 1913, stations were established on the Sturgeon River at St. Albert and on the Battle River at Ponoka, and cables, were erected on the main river and on the Clearwater River near Rocky Mountain House; the latter will enable us to obtain records at these points during 1914.

A description of flood conditions in this basin may be found on pages 30 and 31 in the Report of the Progress of Stream Measurements for 1912.

NORTH SASKATCHEWAN RIVER AT PRINCE ALBERT.

This station was established October 2, 1911, by J. C. Keith. It is located at the Canadian Northern Railway and traffic bridge in the city of Prince Albert on river lot No.76 Prince Albert Settlement.

The gauge is of the standard chain type reading to feet and hundredths. The zero of the gauge (elev. 1456.097) is referred to a permanent Public Works Department of Canada bench mark (assumed elev. 1489.202 Public Works Department = elev. 1403.502 above mean sea level, Topographical Surveys Branch 1913.) located on the top of the right abutment on its downstream side and marked "P.W.D.B.M. 176". The gauge is situated in the second span from the right bank on the downstream side of the railway bridge; the length of chain from the bottom of the weight to the marked is 40.41 feet.

The channel is straight for about 1000 feet above and 800 feet below the station. Both banks are high and will not overflow in ordinary floods. The bed is composed of coarse gravel and boulders with a silting of sand near the piers.

Discharge measurements are made from the downstream side of the bridge, which is a seven-span steel swing structure on cement piers and abutments. The initial point for soundings is 25 feet north of the iron post at the end of the handrail of the bridge on the downstream side, and is suitable marked on the guard rail of the bridge.

During 1913, the gauge was read by W. Moodie, J. A. Fox, and W. H. Storey.

Owing to a request by the City of Prince Albert and the Water Powers Branch of this department, a resident hydrographer was employed to make measurement three times a week through the winter season of 1913-1914; therefore the estimates for the period December 8th to 31st are of a high degree of accuracy.

NORTH SASKATCHEWAN RIVER AT BATTLEFORD.

This station was established May 16, 1911, by H. R. Carscallen. It is located at the traffic bridge in the town of Battleford, on the N.E. $\frac{1}{4}$ Sec. 29. and the S. W. $\frac{1}{4}$ Sec. 33, Tp. 43, Rge. 16, W. 3rd Mer. A large island in the river at this point divides the stream into two channels and the river is spanned by two steel bridges, one over each channel. The bridge over the north channel is a five-span steel structure on cement piers and abutments; the south bridge is a three-span steel structure on cement piers and abutments. The two channels necessitate the existence of two gauges, one in each channel.

The gauge in the north channel is of the standard chain type, located on the floor of the bridge at the centre of the left span. The zero of the gauge (elev. 81.90) is referred to a bench mark (elev. 95.26) on the downstream side of the left abutment, marked D.I.; this is referred to a permanent iron bench mark (assumed elev. 100.00) used for the south channel.

The gauge in the south channel is of the standard chain type located on the floor of the bridge at the centre of the right span. The zero of the gauge (elev. 81.16) is referred to a permanent iron bench mark (assumed elev. 100.00, located on the right bank 200 feet south-east of the right abutment.

The north channel is straight for about 1500 feet above and 1200 feet below the station. The right bank is high, gravelly and free from brush. The left bank is comparatively low, wooded and will overflow at high stages. The bed of the stream is very sandy and shifts continually. Numerous sand bars appear in the channel at low stages of the stream.

The south channel is straight for about 1500 feet above and 600 feet below the station. The left bank is comparatively low, wooded and will overflow at high stages. The right bank is higher, wooded and not liable to overflow. The bed of the stream is composed of sand and gravel and will shift.

Discharge measurements are made from the downstream side of the bridges. The initial point for soundings for each channel is the north end of the handrail on the downstream side of the bridge and distances are marked every ten feet on the handrail.

During 1913 gauge height observations were made by H. W. Fisher.

DISCHARGE MEASUREMENTS of North Channel of North Saskatchewan River, at Battleford, in 1913.

a The drainage area of this stream cannot be obtained with any degree of accuracy and in any case would be misleading so no computations involving the same have been made.

NORTH SASKATCHEWAN RIVER AT EDMONTON.

This station is located at the low-level traffic and railway bridge in the city of Edmonton, on the N.W. $\frac{1}{4}$ of Sec. 33, Tp. 52, Rge. 24, West of the 4th meridian.

There are two plain staff gauges at the station, a low level one reading from zero to ten feet and a high level one reading from ten to thirty-four feet. The high level gauge is spiked perpendicularly to a high timber pier a short distance above the mill of the Edmonton Lumber Company. The low level gauge is attached to a pier about 75 feet above the other and some 200 feet from the right bank. Both gauges are graduated to feet and tenths and are about 300 yards downstream from the bridge. The zero of the gauges (elevation 1991.085) is referred to a permanent iron bench mark (elevation 2025.04) located under the stay line to the stack of the mill and about 50 feet from the high level gauge. This bench mark is referred to the Department of Public Works bench mark on the left abutment of the bridge, which is elevation 2025.00 feet above sea level.

The channel is straight for about 700 feet above and 200 feet below the station. Both banks are high, of an earth formation and sparsely covered with brush. The bed of the stream is composed of sand and gravel and is liable to shift slightly. The stream is divided into four channels by the three bridge piers.

Discharge measurements are made from the downstream side of the bridge. The initial point for soundings is the stream face of the left or north abutment. Distances are marked on the handrail of the bridge.

The bridge is a four span steel structure supported by concrete piers and abutments. Between the right pier and the shore and extending for some distance above and below the bridge, there is a row of timber piers with a long string of booms attached to them. This boom is for the purpose of conducting logs to the Edmonton Lumber Company's mill, a short distance below the bridge. The boom is sometimes full of logs and at such times it becomes very hard to obtain velocity observations in this span.

This station was first used by this survey during 1911 and the gauge height observations were supplied by the Edmonton Lumber Company. Mr. Schneider made the observations for the Company during 1913.

DISCHARGE MEASUREMENTS of North Saskatchewan River at Edmonton, in 1913.

NORTH SASKATCHEWAN RIVER NEAR ROCKY MOUNTAIN HOUSE.

This station was established June 2, 1913, by G. H. Whyte. It is located on the N. E. $\frac{1}{4}$ Sec. 21, Tp. 39, Rge. 7, W. 5th Mer., and about one mile from the village of Rocky Mountain House.

The gauge, which is an inclined staff reading to feet and tenths, is located on the left bank of the river some 60 feet above the ferry cable and about 1,000 feet below the railway bridge. The zero of the gauge (elev. 3103.39) is referred to a stump (assumed elev. 3127.74 "Public Works of Canada") located on the left bank in front of the ferry cable-tower.

In October 1913, a cable station was constructed about 500 feet below the gauge which will enable the survey to make regular gaugings at this point throughout the year and it is expected that the daily discharges for 1913 will be computed and included in the 1914 report.

The gauge was read until November by D. Hayes and after that date by W. Austin.

MEAN DAILY GAUGE HEIGHT, in feet, of North Saskatchewan River, near Rocky Mountain House, for 1913.

BATTLE RIVER AT BATTLEFORD.

This station was established on June 17, 1911, by H. R. Carseallen. It is located at the traffic bridge in the town of Battleford on the S.E. $\frac{1}{4}$ Sec. 19, Tp. 43, Rge. 16, W. 3rd Mer.

The gauge, which is of the standard chain type, is located level with the floor of the bridge at chainage 45. The zero of the gauge (elev. 72.53) is referred to a bench mark (assumed elev. 100.00), situated on the top of the left abutment on the outer downstream corner.

The channel is straight for 300 yards above and half a mile below the station. Both banks are fairly high and clean. The bed of the stream is composed of sand which shifts considerably. Backwater from floods on the North Saskatchewan, into which this stream empties some three miles below the station, gives trouble in computing accurate discharges.

Discharge measurements are made with a current meter from the bridge which is a three-span steel structure. The initial point for sounding is the inner face of the left abutment. Distances are marked on the handrail on the downstream side of the bridge.

During 1913, Mr. C. J. Johnson of the Indian Agency staff took the observations.

SESSIONAL PAPER No. 25c

BATTLE RIVER AT PONOKA.

This station was established May 7, 1913, by V. Meek. It is located in the village of Ponoka, at the steel traffic bridge 300 yards southeast of the C.P.R. depot, in the S.W. $\frac{1}{4}$ Sec. 4, Tp. 25, Rge. 43, West of the 4th Mer.

The gauge, which is a plain staff graduated to feet and hundredths, is situated at the left bank 30 feet upstream from the bridge. It is referred to the top of a spike in a pile on the upstream side of the left abutment (elev. 11.69 above the zero of the gauge.)

The channel is straight for 100 feet above and 50 feet below the station. Both banks are clay and covered with brush and are not likely to overflow. The bed of the stream is sandy.

Measurements are made from the downstream side of the bridge. The initial point for soundings is the inner face of the left abutment. Distances are marked every five feet on the handrail.

During 1913 the gauge was read by G. R. Edwards.

STURGEON RIVER NEAR FORT SASKATCHEWAN.

This station was established December 30, 1913, by P. H. Daniels. It is located on the N.W. ¼ Sec. 28, Tp. 55, Rge. 22, W. of the 4th Mer., on the Traffic bridge about five miles north of Fort Saskatchewan and about one and a half miles from the mouth of the river.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a pile near the right bank about 20 feet from the initial point. The zero of the gauge (elev. 87.52) is referred to a bench mark (assumed elev. 100.00), located on the top of the downstream side of the left abutment.

The channel is straight for 200 feet above and 100 feet below the station. Both banks are low but not liable to overflow. The bed of the stream is sandy with a gravel control about 100 feet below which should be fairly permanent. The current is moderate.

Measurements are made from the downstream side of the steel traffic bridge with meter and weights. The initial point for soundings is the stream face of the right abutment.

It was not possible to obtain an observer during 1913 and therefore discharge measurements only were made.

STURGEON RIVER AT ST. ALBERT.

This station was established on April 23, 1913, by V. Meek. It is located between river lots 27 and 52 in St. Albert Settlement, Alberta, at the highway bridge crossing the Sturgeon River in the village of St. Albert.

The gauge, which is a plain staff graduated to feet and hundredths is fastened to a pile in the bed of the stream 20 feet above the bridge. The zero of the gauge (elev. 90.23) is referred to a bench mark (assumed elev. 100.00), located on the cement sill of the east basement window of the St. Albert Hotel and marked "B.M., D.I." and broad arrow, in white paint.

The channel is straight for 500 feet above and below the station. Both banks are fairly high, clean and not liable to overflow. The bed of the stream is sandy, with considerable growth of vegetation which usually causes a change of control during the summer. The current is rather sluggish.

Discharge measurements are made from the downstream side of the steel traffic bridge. The initial point for soundings is a zero marked on the handrail of the bridge; the chainage is marked on the rail every five feet.

During 1913, the gauge was read daily by Lawrence Farrell and later by Chas. Pelletier.

SOUTH SASKATCHEWAN RIVER DRAINAGE BASIN.

General Description.

The upper portion of this drainage basin will be dealt in the descriptions of the drainage basins of Bow, Little Bow, Oldman, Waterton, Belly and St. Mary Rivers. These streams are all conjoined at a point known as the Grand Forks, to form the South Saskatchewan River. From the Grand Forks the river flows in a north and easterly direction to its junction with the North Saskatchewan River a short distance east of the city of Prince Albert. From this point onward the stream takes the name of the Saskatchewan River.

After the confluence of the Bow and Belly Rivers the stream receives comparatively little drainage, the principal tributaries being the Red Deer River, draining that portion of the basin between the North and the South Saskatchewan River, and Sevenpersons River and Swiftcurrent creek emptying into the main stream from the south. Descriptions of the drainage basins of all these streams are given elsewhere in this report.

The drainage basin of this stream is quite similar to that of all such streams which have their source in the mountains and flow across the prairies. The upper part of the basin has considerable fall, with rock and gravel formation and a good growth of timber. In contrast to this the prairie section of the basin is sparsely wooded, except along the banks of the stream, and the rock formation changes to earth; also the stream is more apt to change its channel, especially in times of flood. The high water occurs in the hot months of summer and is caused by the melting of the snow fields in the mountains. The low water occurs in the winter months when there is no melting snow to augment the stream flow.

In addition to the gauging stations on the tributaries, which are taken up in detail elsewhere in this report, there were two stations established on the main stream during the season of 1911, and daily gauge height observations and discharge measurements have since been taken at regular intervals. These stations are located at the cities of Medicine Hat and Saskatoon.

Up to the present the chief value of this stream has been as a source of municipal water supply. There are no irrigation schemes or water power developments on the main stream.

The cities of Medicine Hat and Saskatoon derive their water supply from this stream. The South Saskatchewan is also being considered as a possible source of supply for the cities of Moose Jaw and Regina. In this connection surveys were carried out during 1913 by this Department and also by the Provincial Government.

SOUTH SASKATCHEWAN RIVER AT SASKATOON.

This station was established May 27, 1911, by H. R. Carscallen. It is located at the Canadian Northern Railway bridge in the city of Saskatoon, on the S.W. $\frac{1}{4}$ Sec. 28, Tp. 36 Rge. 5, W. 3rd Mer.

The gauge, which is of the standard chain type, is placed on the downstream side of the bridge at chainage 190. The length of chain from the bottom of the weight to the marker is 44.26 feet. The zero of the gauge (elev. 1528.59) is referred to a bench mark (elev. 1553.35), on the side of the downstream end of the left abutment. The latter elevation is referred to a waterworks bench mark (elev. 1571.31) of the City of Saskatoon, located on the top of a hydrant situated approximately 300 feet northeast of the left abutment.

The channel is straight for about 500 feet above and 800 feet below the station. Both banks are high and sandy. The right bank is covered with a dense growth of trees and brush above and below the station. The left bank is clear of brush. The bed of the stream is sandy and shifts.

Discharge measurements are made from the bridge, which is a six-span timber structure supported by cement piers and abutments. The remains of the piers of a former bridge affect velocity observations in their vicinity. Distances are marked on the handrail on the downstream side of the bridge. The face of the left abutment is the initial point for sounding.

During 1913, the gauge was read by James White.

NOTE.— The drainage area for this station would be misleading hence no computations involving the area are made.

SOUTH SASKATCHEWAN RIVER AT MEDICINE HAT.

This station was established May 31, 1911, by H. R. Carscallen. It is located at the traffic bridge in the city of Medicine Hat on the N.W. $\frac{1}{4}$ Sec. 31, Tp. 12, Rge. 5, W. 4th Mer. The bridge is a five-span structure supported by concrete abutments and piers.

On September 27, 1913, a chain gauge was installed on the traffic bridge crossing this river. The gauge box is fixed to the sidewalk of the downstream side of the bridge, and is situated at the middle of the second span from the right bank. The zero of the gauge (elev. 79.78) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the right bank at the Canadian Pacific Railway bridge, 500 feet upstream. The length of gauge chain from marker to bottom of weight is 40.85 feet.

The channel is straight for about 600 yards above and below the station. The current is moderate and uniform, except in the vicinity of the piers. At these points eddies, and in some cases stretches of backwater, occur, making it difficult to obtain the mean velocity. The banks are high and sandy and clear of undergrowth. The bed is composed of sand and gravel and is liable to shift at high stages of the stream.

Open water measurements are made from the traffic bridge. The initial point for soundings is the stream face of the left or west abutment and is suitably marked on the handrail.

During 1913, the gauge was read by B. H. Solomon, George J. Kroft, E. G. Hitchins and James Mowat.

RED DEER RIVER DRAINAGE BASIN.

General Description.

Red Deer River rises in the Sawback Range of the Rockies in the Northern portion of the Rocky Mountain Park, near the boundary between the Provinces of Alberta and British Columbia. It flows eastward for about 40 miles, then northeastward for 70 or 80 miles to a point near Red Deer, Alberta. From here the river flows in a southeasterly and easterly direction to its junction with the South Saskatchewan River just east of the Fourth Meridian, in Tp. 22, Rge. 28, W. 3rd Mer. It has a length of approximately 400 miles.

The valley of the Red Deer is wide and deep, the banks being very rough and cut up with a large number of deep coulees, draining into the river. Near its source the basin is well timbered and a good growth of timber is found along its banks for some distance out into the prairie. Seams of coal, well suited for domestic use, are found in the valley and form the principal source of fuel supply for the settlers along the stream in the prairie section.

The river carries a considerable supply of water at all times of the year, but the volume is subject to sudden variations, due to the melting of snow in the mountains and to heavy summer rains.

Of the tributaries of the Red Deer, the most important are Panther River, near its head, Little Red Deer, entering in Tp. 36, Rge. 1, W. 5th Mer., and Rosebud River, emptying into it in Tp. 28, Rge. 19, W. 4th Mer. In addition, there are innumerable small streams draining into the main river in the western portion of the basin. From the mouth of the Rosebud River eastward there is very little drainage into the river.

Very little water is taken from the Red Deer and its branches for irrigation purposes. There are only a few small schemes on some of the smaller tributaries. The land along the valley, though lacking moisture, is extremely fertile, and with the help of irrigation much of it might be cultivated and fine crops produced. The irrigation of the bench land from the river would be difficult on account of the small fall in the river, the depth of the valley, and the rolling nature of the lands in the drainage basin.

Very little hydrographic work has been done in this basin as yet. A gauging station was established on the Red Deer River near Innisfail, in 1910, but an observer could not be secured and only periodic discharge measurements have been secured at this station. In the Fall of 1911, another gauging station was established at the town of Red Deer, and continuous records have been obtained since then.

Of the tributaries of Red Deer River, Berry and Blood Indian Creeks are the only ones that have been given any attention. These small creeks, which drain into the river in the prairie section, have a few small irrigation rights registered against them and gauging stations were established on them in 1911, but owing to the high cost of obtaining data they were abandoned in 1913.

RED DEER RIVER AT RED DEER.

This station was established December 2, 1911, by J. E. Degnan. It is located at the traffic bridge in the town of Red Deer, on the S.E. $\frac{1}{4}$ Sec. 20, Tp. 38, Rge. 27, W. 4th Mer.

The gauge, which is of the standard chain type, is fixed to the floor of the bridge at a point about the middle of the north span, on the upstream side of the bridge. The length of the chain from the bottom of the weight to the marker is 29.52 feet. The zero of the gauge (elev. 84.40) is referred to two bench marks on the northwest face of the north abutment at assumed elevations 100.00 and 95.00.

The stream flows in one channel at all stages. This channel is straight for about 600 feet above and 1,300 feet below the gauge. At very high stages the river may overflow the right bank, but not the left, as it is high and steep. The bed of the stream is composed of gravel, but it is firm and not liable to shift.

Discharge measurements are made from the downstream side of the bridge during the open season. The initial point for soundings is a point near the north end of the bridge and is marked on the handrail of the bridge.

During 1913, the gauge was read by C. H. Snell.

BERRY CREEK AT FORSTER'S RANCHE.

This station was established on May 30, 1911, by R. T. Sailman. It is located on the N.W. $\frac{1}{4}$ Sec. 21, Tp. 23, Rge. 13, W. 4th Mer., about ten miles east of the village of Hutton.

Owing to the excessive cost of obtaining discharge measurements this station was abandoned in 1913.

BLOOD INDIAN CREEK AT HALLAM'S RANCHE.

This station was established on June 26, 1911, by R. T. Sailman. It is located on the S.W. $\frac{1}{4}$ Sec. 10, Tp. 23, Rge. 8, W. 4th Mer. about one and one-half miles above J. R. Hallam's house and 800 feet downstream from his irrigation dam.

Owing to the excessive cost of obtaining discharge measurements this station was abandoned in 1913.

BOW RIVER DRAINAGE BASIN.

General Description.

Bow river rises in lakes Bow and Hector, which are situated in the Rocky Mountains Park, north of the main line of the Canadian Pacific Railway and just east of the Great Divide, and whose elevations are 6,420 and 5,694 feet, respectively, above mean sea level. It flows in a south and easterly direction to the city of Calgary, where it takes a big bend to the south, and then continues in a south and easterly direction to its junction with Belly River at the Grand Forks. Below this point the united stream is known as the South Saskatchewan River.

Bow River has a large number of tributaries in the western portion of its course. Of these, the principal are Cascade and Ghost Rivers draining the northern portion of the basin, and Spray, Kananaskis, Elbow, Sheep, and Highwood Rivers draining the southern portion. Below the mouth of Highwood River very little draining reaches Bow River, and in consequence it depends for its supply almost wholly upon the run-off from the mountains and foothills. As a result, Bow River possesses a normally steady flow throughout the year, but is subject to sudden freshets caused by melting snow and heavy rains in the mountains. The minimum flow occurs in the frozen season, when there is little run-off from the snow fields in the western part of the drainage basin.

The valley of the Bow is deep and well defined throughout its course. In the mountain section it is comparatively narrow and very heavily timbered, while the bed is stony and the banks high and rocky. The nature of the valley changes gradually until, when it reaches the prairie, it is wide, of a clay formation, and devoid of trees, the bed consisting for the most part of gravel. The water is clear and pure.

A large quantity of water is diverted from the Bow River for irrigation purposes. The two chief users are the Department of Natural Resources, Canadian Pacific Railway Company and the Southern Alberta Land Company.

The Department of Natural Resources diverts water at two points, one just east of the City of Calgary and the other three miles southwest of Bassano. The first system has been in operation for several years and distributes water over the Western section of the Irrigation block which extends east as far as Gleichen. The works at Bassano comprise a very large

SESSIONAL PAPER No. 25c

earth fill dam and concrete spillway, which were completed in 1913. This system is to serve the Eastern section of the Irrigation block, which extends east from Bassano. In all, it is proposed to irrigate about 1,000,000 acres of land.

The Southern Alberta Land Company have a dam and reservoir near Namaka. These works were practically completed in 1913. It is proposed to irrigate by this system about 300, 00 acres.

There are many favourable sites for power development on the Bow River but only one company has up to the present developed power. The Calgary Power Company has two plants; one is at Kananaskis Falls at the junction of the Kananaskis and Bow Rivers and two miles east of Kananaskis station; the other is at Horseshoe Falls one mile below. The latter plant has been in operation for some years, and has a capacity of 19,500 horse power. The dam at Kananaskis Falls was completed in 1913 and this plant has a rated capacity of 11,600 horse power. All the power developed is used by the City of Calgary.

The City of Calgary takes its domestic water supply from Elbow River. The intake is about twelve miles southwest of Calgary, above which point the course of the river is through a wild and unset led country, where there is no possibility of human contamination.

The run-off in this drainage basin for 1913 was slightly above the average. No floods occurred during the year. The highest stage on the Bow River at Calgary was in June.

A full description of flood conditions during previous years in the Bow basin may be found on pages 65 and 66 of the Report of Progress of Stream Measurements for 1912.

BATH CREEK NEAR LAGGAN.

This station was established April 9, 1913, by H. C. Ritchie. It is located on the N.E. $\frac{1}{4}$ Sec. 32, Tp. 28, Rge. 16, W. 5th Mer., on the main line of the Canadian Pacific Railway, one mile west of Laggan station.

The gauge, which is a plain staff graduated to feet an hundredths, is fixed to the downstream end of the right abutment of the steel railway bridge. The zero of the gauge (elev. 89.59) is referred to the downstream corner of the right concrete abutment (assumed elev. 100.00).

The channel is straight for 135 feet above and 110 feet below the station. The left bank is low, sandy and liable to overflow. The right bank is high, rocky, wooded and not liable to overflow. The bed is of clean coarse gravel and is not liable to shift.

Discharge measurements are made 200 feet above the gauge with a current meter by wading. The initial point for soundings is a stake driven into the right bank.

The gauge was read by J. Dickson from May 25th to September 20th. During the remainder of the year there was no observer available.

Measurements made on this stream previous to April 9 will be found under miscellaneous measurements.

BOW RIVER AT LAGGAN.

This station was established on July 18, 1910, by J. C. Keith. It was at first located at an old traffic bridge on the N.E. $\frac{1}{4}$ Sec. 28, Tp. 28, Rge. 16, W. 5th Mer., about one third of a mile west of Laggan. This site did not prove satisfactory and a cable station was therefore established by H. C. Ritchie near the east boundary of the S.E. $\frac{1}{4}$ Sec. 28, Tp. 28, Rge. 16, W. 5th Mer., on August 30, 1911. The new station is about one half mile southeast of Laggan and 300 feet above the mouth of the Pipestone River.

SESSIONAL PAPER No. 25c

The gauge, which is of the standard chain type, is situated at the left bank, 8 feet downstream from the cable. The length of the chain from bottom of weight to marker is 11.00 feet. The zero (elev. 89.14) is referred to a permanent iron bench mark (assumed elev. 100.00), situated about 11 feet southeast of the cable tower on the left bank. The elevation of the bench mark referred to Canadian Pacific Railway elevations is found to be 4942.82 feet above mean sea level.

The river flows in one channel at all stages. It is straight for 75 feet above and 200 feet below the station. Both banks are high and not liable to overflow. The right bank is covered with a good growth of spruce but the left is almost clear. The bed of the stream is composed of gravel and boulders but is not liable to shift. The current has a fairly high velocity.

Discharge measurements are made by means of a cable, car, tagged wire and stay wire. The initial point for soundings is the centre of the lower on the left bank, and distances are marked on the measuring wire by tags at five foot intervals.

During 1913, the gauge was read by E. Braund.

PIPESTONE RIVER NEAR LAGGAN.

This station was established August 31, 1911, by H. C. Ritchie. It is located on the S.W. $\frac{1}{4}$ Sec. 27, Tp. 28, Rge. 16, W. 5th Mer., seven-eighths of a mile east of Laggan station, 1,000 feet below the Canadian Pacific Railway bridge and 500 feet above where the stream enters the Bow River.

The gauge, which is of the standard chain type, is supported over the water by two posts set upright in the left bank of the stream, twelve feet south and downstream from the cable. The length of the chain is 10.51 feet from the bottom of the weight to the marker. The zero (elev. 91.54) is referred to a bench mark (assumed elev. 100.00), on an iron spike driven into the side of a spruce tree on the left bank, 22 feet north of the cable. The elevation of the bench mark referred to Canadian Pacific Railway elevations is found to be 4943.77 feet above mean sea level.

The channel is straight for 60 feet above and 100 feet below the station. Both banks are low, but are not liable to overflow. They are covered with low scrub and a sparse growth of spruce. The bed is rocky but fairly smooth at the cross-section. The fall of the stream is considerable and the current is swift.

Discharge measurements are made with a cable, ear, tagged wire and stay wire. The initial point for soundings is the centre of the left tower supporting the cable and distances are marked every five feet by tin tags.

During 1913, the gauge was read by E. Braund.

LOUISE CREEK NEAR LAGGAN.

(1)

This station was established July 5, 1913, by H. C. Ritchie. It is located on the N.E. $\frac{1}{4}$ Sec. 20, Tp. 28, Rge. 16, W. 5th Mer., near the Chateau Lake Louise, at the wooden culvert crossed by the Chateau Railway from Laggan station, 500 feet downstream from the outlet of Lake Louise, the source of the stream.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to the culvert at the right bank. The gauge is referred to a bench mark at the upstream end of the right timber abutment (elev. 5.92 above the zero of the gauge).

The channel makes a sharp angle immediately at the gauge. Both banks are low but are not liable to overflow. The bed is composed of coarse gravel which is not liable to shift.

Discharge measurements are made with a current meter by wading near the gauge.

During 1913, the gauge was read by Samuel Farquhar.

Water is piped from the lake to the turbines of the Chateau power plant, situated one half mile below this station. Measurements of the tail race, which are given under miscellaneous measurements, show this discharge to remain fairly constant at approximately ten sec. ft. This discharge must be added to obtain the total run-off for the station.

(1) This stream appears in the list of miscellaneous measurements in the 1912 report as Chalet Creek.

FORTYMILE CREEK NEAR BANFF.

This station was established July 31, 1912, by H. C. Ritchie. It is located at the traffic bridge, on the S.W. $\frac{1}{4}$ Sec.2, Tp. 26 Rge. 12, W. 5th Mer., on the trail leading from Banff to Castle. It is about a quarter of a mile from the Canadian Pacific Railway depot in Banff and about a mile from the mouth of the creek.

The gauge, which is a plain staff graduated to feet and hundredths, is driven into the bed of the stream near the left bank, four feet upstream from the bridge, and stayed to two trees. It is referred to a bench mark on the right abutment of the bridge, elevation 8.94 above the zero of the gauge.

The channel is straight for about 50 feet above and 100 feet below the station. Both banks are high and wooded and not liable to overflow. The bed of the stream is of clean sand and gravel and not likely to shift.

Discharge measurements are made from the lower side of the bridge with a current meter and cable. The initial point for soundings is at the left abutment and is marked with a knife cut on the handrail.

During 1913, the gauge was read by J. Anderson who lives 500 feet distant.

SESSIONAL PAPER No. 25c

BOW RIVER AT BANFF.

This station was established May 25, 1909, by P. M. Sauder. It is located at the highway bridge in the village of Banff, about one mile from the Canadian Pacific Railway Station. It is on the quartering line in the S. $\frac{1}{2}$ Sec. 35, Tp. 25, Rge. 12, W. 5th Mer., and is about a mile above the mouth of Spray River, and a short distance below Vermilion lakes.

The gauge, which is a plain staff graduated to feet and hundredths, is attached to the downstream side of the centre pier. The zero (elev. 92.36) is referred to a permanent iron bench mark (assumed elev. 100.00) situated on the right bank 40 feet east of the southern extremity of the bridge.

The channel is straight for about 300 feet above and 400 feet below the station. Both banks are low and are partly covered with brush and timber, but are not liable to overflow. The bed is composed of gravel and boulders. There is a deep hole near the right bank, part of which is backwater at low stages. The current is sluggish above the station but increases in velocity until rapids are reached about 300 feet below. Bridge piers divide the stream into four channels.

Discharge measurements are made from the downstream side of the bridge. The initial point for soundings is one and a half feet from the north end of the bridge; distances are marked on the bottom chord of the downstream side of the bridge at five foot intervals.

During 1913, the gauge was read by N. B. Sanson, Meteorological Observer at Banff.

SPRAY RIVER NEAR BANFF.

This station was established July 15, 1910, by J. C. Keith. It is located at a traffic bridge about one mile southeast of the village of Banff, on the N.W. $\frac{1}{4}$ of Sec. 25, Tp. 25, Rge. 12, W. 5th Mer., and about 100 yards above the junction with Bow River.

The gauge, which is of the standard chain type, is nailed to the downstream end of the left or west abutment of the bridge, and projects about five feet over the water. The length of the chain is 14.67 feet from bottom of weight to marker. The zero of the gauge (elev. 88.71) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the left bank 50 feet downstream from the bridge.

The channel is straight for 75 feet above and 100 feet below the station. The right bank is low and may overflow at high stages of the stream. The left bank is steep and high. The bed is composed of coarse gravel and is not liable to shift. From the middle of the section to the right bank, the depth of water decreases at the lowest stages to barely sufficient to cover the gravel. The greatest depth is near the left bank. At the left bank there is a quantity of large rocks which interferes slightly with the accuracy of measurement.

Discharge measurements are made from the downstream side of the bridge with current meter, cable and stay line. The initial point for soundings is the extreme west end of the bottom chord of the bridge.

During 1913, the gauge was read by N. B. Sanson, Meteorological Observer, at Banff.

CASCADE RIVER AT BANKHEAD.

This station was established August 16, 1911, by P. M. Sauder. It is located on the S.E. $\frac{1}{4}$ Sec. 19, Tp. 26, Rge. 11, W. 5th Mer., at the Bankhead mines. It is located at a foot bridge, 100 feet below an old crib dam and one mile below the dam and reservoir of the Calgary Power Company at Lake Minnewanka.

The gauge, which is a plain staff graduated to feet and hundredths, is spiked to the cribbing which supports the north end of the bridge. It is referred to a bench mark on a tree stump on the left bank a few feet downstream from the bridge; elevation above gauge datum, 5.51 feet.

The channel is straight for 100 feet above and below the station. The left bank is low, but not liable to overflow. The right bank is built high by a coal dump. The bed is coarse gravel which is not liable to shift. The current is swift near the left bank and dead at the right bank.

Discharge measurements are made from the downstream side of the bridge with a meter and rods. The initial point for soundings is the left end of the bridge and is marked "O" on the handrail.

During 1913, the gauge was read once each day by J. B. Mackinlay, Accountant at the Bankhead mines.

Abnormal conditions of discharge will be found in the tables due to the effect of the reservoir of the Calgary Power Company above the station.

BOW RIVER NEAR KANANASKIS.

This station was established on March 10, 1912, by H. C. Ritchie, to replace the old station near Morley. It is located at the Canadian Pacific Railway bridge on N. W. $\frac{1}{4}$ Sec. 32, Tp. 24, Rge. 8, W. 5th Mer. The upper dam of the Calgary Power Company, completed November, 1913, is situated one mile below the station at the point where the Kananaskis River enters.

The gauge, which is of the standard chain type, is securely fastened to the inside of the guard rail on the first span from the right bank. The length of the chain from the marker to the bottom of the weight is 18.48 feet. The zero of the gauge (elev. 91.05) is referred to a bench mark (assumed elev. 100.00) on the side of the east pier.

The channel is straight for 600 feet above and 900 feet below the station. The right bank is high and is not liable to overflow, while the left is low and is liable to overflow in high stages of the stream. Both banks have considerable growths of willow and cottonwood. The bed of the stream is of solid rock with fairly smooth and level surface and will not change. The current is fairly swift at this section.

Discharge measurements are made from the bottom chord of the downstream side of the bridge with meter, cable and stay line. At a very low stage measurements may be made by wading. The initial point for soundings is at the left abutment and is marked "O" painted on the bottom chord. Distances from the initial point are painted every ten feet across the bridge.

During 1913, the gauge was read by J. Gipson for the Calgary Power Co.

SESSIONAL PAPER No. 25c

KANANASKIS RIVER NEAR KANANASKIS.

This station was established August 31, 1911, by P. M. Sauder. On May 13th, 1913, the station was moved by H. C. Ritchie to its present position one and one half miles upstream, on account of backwater from the Calgary Power Company's new dam. The station is located on the S.W. $\frac{1}{4}$ Sec. 34, Tp. 24, Rge. 8, W. 5th Mer., one and one-half miles above the junction with the Bow River. The upper dam of the Calgary Power Company, completed November, 1913, is situated immediately below the junction of the two rivers and is two miles east of Kananaskis station.

The gauge, which is of the standard chain type, is supported on posts at the right bank, 60 feet upstream from the gauging section. The length of the chain is 11.10 feet from bottom of weight to marker. The zero of the gauge (elev. 88.17) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the right bank between the gauge and the cable tower.

The channel is straight for 400 feet above and 700 feet below the station. Both banks are high, wooded and not liable to overflow. The channel at the station is of coarse gravel and very uniform; below the station it is somewhat rocky. The current is swift; at low stages there is backwater at the left bank.

Discharge measurements are made with a current meter and rods by means of a cable and ear. The initial point for soundings is the centre line of the tower on the left bank. Distances are marked every five feet by a tagged wire stretched between the cable towers.

During 1913, the gauge was read by J. Gipson for the Calgary Power Company.

GHOST RIVER AT GILLIES' RANCHE.

This station was established on August 17, 1911, by L. R. Brereton. It is located on the N.E. ¼ Sec. 23, Tp. 26, Rge. 6, West of 5th Mer., opposite Gillies' ranche buildings and one mile above the highway bridge which crosses the stream just above its junction with the Bow River

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a post sunk in the bed of the stream at the left bank. The zero of the gauge (elev. 90.87) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the right bank of the river 270 feet due north of the quarter mound on the east boundary of Sec. 23, Tp. 26, Rge. 6, W. 5th Mer., and 469 feet east and slightly south of the gauge.

The channel curves just above the gauge but is straight for 200 feet below. The right bank is a steep clay cut bank and will not overflow. The left is low, gravelly and slightly wooded and will not overflow. The bed of the stream is uniform and is composed of gravel which may shift at high stages.

Discharge measurements during high water are made at the highway bridge below. The initial point for soundings is the face of the right abutment. At low stages the stream is waded near the gauge.

During 1913, the gauge was read by Miss E. Gillies.

SESSIONAL PAPER No. 25c

JUMPINGPOUND CREEK NEAR JUMPING POUND.

This station was established May 7, 1908, by P. M. Sauder. It is located at a traffic bridge on a road diversion on the S.E. $\frac{1}{4}$ Sec. 30, Tp. 24, Rge. 4, West 5th Mer., and is about 300 yards from Jumping Pound P. O.

The gauge, which is a plain staff graduated to feet and hundredths, is attached vertically to the downstream face of the first pile bent west of the main truss of the bridge. The zero (elev. 89.84) is referred to a permanent iron bench mark (assumed elev. 100.00) situated 30 feet northeast of the east end of the bridge.

The channel is straight for 600 feet above and 500 feet below the station. The current is sluggish at and above the station, but breaks into rapids about 150 feet below the station. The right bank is composed of gravel and boulders, mixed with clay, and is not liable to overflow. The left bank is similar, but not so high, and is liable to overflow in excessive floods. The bed of the stream is composed of coarse gravel and boulders. It is rough and may shift in flood stages. The stream is divided into several channels during its higher stages by a pier and pile bents supporting the bridge.

At low water stages of the stream discharge measurements are made at wading sections, either above or below the bridge. During higher stages of the stream, discharge measurements are made from the down stream side of the bridge. The initial point for soundings is the west side of the right abutment. Distances are marked on the railing of the bridge, at very five feet from the initial point.

During 1913, the gauge was read by John Bateman, the postmaster at Jumping Pound.

BOW RIVER AT CALGARY

This station was established on November 25, 1910, by H. R. Carscallen. It is located at the Langevin traffic bridge, on Fourth Street East, in the N.E. $\frac{1}{4}$ Sec. 15, Tp. 24, Rge. 1, W. 5th Mer., two miles above the original station at the Cushing bridge, established May 5, 1908 by P. M. Sauder. As the cross-section at the Langevin bridge was affected by some old bridge piers, a plain staff gauge was at first fixed to a breakwater several hundred feet upstream from the bridge but on November 14, 1911, a chain gauge was established on the Langevin bridge and the observations have been made with it since that date.

This gauge, which is of the standard chain type, is fixed to the floor of the bridge at a point about the centre of the downstream side of the north span. The length of the chain from the bottom of the weight to the marker is 22.28 feet. The zero of the gauge (elevation 82.59) is referred to a permanent iron bench mark (assumed elevation 100.00) situated at the intersection of Second and Third Avenues and about 60 feet west of First Street East. There is a gauge embedded in the cement on the north side of the centre pier, (whose zero is 87.20 above the same assumed datum), which is usually used to check the chain gauge.

The river flows in one channel at all stages. It is almost straight for about half a mile above and a quarter of a mile below the station. Both banks are low but are not liable to overflow. The bed of the stream is composed of coarse gravel and may shift in flood stages of the stream.

Discharge measurements are made from the downstream side of the bridge, which is a two span steel structure supported by concrete abutments and a pier. The initial point for soundings is the south face of the left abutment.

During 1913 the gauge was read by C. A. Lang.

SESSIONAL PAPER No. 25c

ELBOW RIVER AT CALGARY.

This station was established May 8, 1908, by P. M. Sauder. It is located at the traffic bridge between Eleventh and Twelfth Avenues East, in the S.W. $\frac{1}{4}$ Sec. 18, Tp. 24, Rge. 1, W. 5th Mer.

The gauge, which is of the standard chain type, is fixed to the side-walk on the upstream side of the bridge. The zero (elev. 84.75) is referred to a bench mark (assumed elev. 100.00) on the extreme upstream corner of the cement wing wall of the left abutment of the bridge. The length of the chain from the bottom of the weight to the marker is 16.03 feet.

The stream is confined to one channel. Both banks are high and do not overflow. The bed of the stream is composed of boulders and gravel and is not liable to change at the station, but may do so farther up the stream where there is a small ripple. The channel is straight for about 500 feet below and 50 feet above the station. The current is swift at all stages of the stream. This station is so close to the mouth of the river that there will be backwater at the gauge when the Bow River is in flood.

Discharge measurements are made by means of a cable-car, tagged wire, and stay wire. The initial point for soundings is the zero of the tagged wire, at its fastening to the cable support, on the left bank.

During 1913, the gauge was read by Mrs. I. S. White.

There are no tributaries below this station and there is no water diverted from the river except that used by the City of Calgary, whose intake is about eleven miles west of Calgary.

DISCHARGE MEASUREMENTS of Elbow River at Calgary, in 1913.

NOSE CREEK NEAR CALGARY.

This station was established April 24, 1911, by H. C. Ritchie. It is located at the traffic bridge on the N.W. $\frac{1}{4}$ Sec. 13, Tp. 24, Rge. 1, W. 5th Mer. The station is about one and one-half miles east of the centre of the city and about one quarter mile above the junction of Nose Creek with Bow River.

The gauge, which is a plain staff graduated to feet and hundredths, is spiked to the upstream face of the upper pile of a row near the left bank. The zero (elev. 92.81) is referred to a permanent iron bench mark (assumed elev. 100.00) on the left bank near the end of the bridge.

The channel is straight for about 50 feet above and 150 feet below the station. A small island just below the bridge divides the stream into two channels in low water and causes cross-currents at the bridge. Both banks are high, steep, gravelly and clear of brush. The bed of the stream is composed of coarse gravel.

Discharge measurements are made from the downstream side of the bridge at high stages and at a wading section downstream in low water.

During 1913, the gauge was read by C. A. Lang.

CANADIAN PACIFIC RAILWAY COMPANY CANAL AT OGDEN.

This station was established May 18, 1911, by H. C. Ritchie. It is located at Bridge No. 3, about six miles below the headworks of main canal "A". It is on the N.E. $\frac{1}{4}$ Sec. 21, Tp. 23, Rge. 29, W. 4th Mer., one half mile from Ogden Post Office.

The gauge, which is a plain staff graduated to feet and hundredths, is fastened in a wooden bay at the left bank, 100 feet upstream from the bridge. The gauge is referred to an iron post in the left bank, two feet from the lower end of the left abutment (elev. 13.35 above the zero of the gauge).

The channel is straight for about 300 feet above and 500 feet below the station. The banks are high, composed of clay and cut to a uniform slope. The bed is also composed of clay. The current is moderate and uniform.

Discharge measurements are made from the downstream side of the bridge, which is a wooden structure supported by piles. The initial point for soundings is a spike driven into the rail at the inner face of the left abutment.

The gauge was read during 1913 by A. Hatcher for the Canadian Pacific Railway Company.

An automatic gauge is maintained by the Company and is situated in the same position as the staff gauge. The readings of the automatic gauge were used as a check upon the observer's readings.

FISH CREEK NEAR PRIDDIS.

This station was established May 13, 1907, by P. M. Sauder. It is on the S.W. $\frac{1}{4}$ Sec. 26, Tp. 22, Rge. 3, W. 5th Mer., about one mile from Priddis, and near Pereval's buildings. A plain staff gauge, graduated to feet and hundredths, is placed vertically at the left bank, about 200 yards north of Mr. Perceval's house. The zero of the gauge (elev. 90.81) is referred to a permanent iron bench mark (assumed elev. 100.00) situated 36 feet west and a little south of the gauge.

The channel is straight for 300 feet above and 150 feet below the station. The left bank is high, and will not overflow. The right bank is low, covered with brush and timber, and is liable to overflow in extreme high water. The bed is composed of gravel, but not liable to shift. The current is sluggish in extreme low stages of the stream.

Measurements during low stages of the stream are made by wading at or near the gauge. High water discharges are computed from slope measurements by the use of Kutter's formula, or by gaugings made from the traffic bridge, about a mile upstream near Priddis post office.

During 1913, the gauge was read by Fred Perceval.

NORTH BRANCH OF SHEEP RIVER AT MILLARVILLE.

This station was established May 22, 1908, by P. M. Sauder. It is located on the S.W. ¼ Sec. 12, Tp. 21, Rge. 3, W. 5th Mer., 100 feet from Malcolm T. Millar's house.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to the cribwork a the left side of the stream. The zero (elev. 82.67) is referred to a permanent iron bench mark (assumed elev. 100.00), situated 36 feet southwest of the N.E. corner of Sec. 2, Tp. 21, Rge. 3, W. 5th Mer., and about 100 yards west of the gauge.

Gauging Station on the North Branch of Sheep River at Millarville, Alberta.

Gauging Station on the South Branch of Sheep River, near Black Diamond, Alberta.

The channel is straight for about 300 feet above and below the station; the banks are high and clean and not liable to overflow and there will be but one channel at all stages.

During high water discharge measurements are made at the traffic bridge about one mile downstream, on the road allowance on the east boundary of Sec. 12. At low stages the stream is gauged at a wading section about 200 feet downstream from the gauge. The cross-section at the gauge is unsuitable for gauging, as the stream is very deep and sluggish at this point.

During 1913, the gauge was read once daily by Malcolm T. Millar.

SOUTH BRANCH OF SHEEP RIVER NEAR BLACK DIAMOND.

This station was established May 23, 1903, by P. M. Sauder. It is located at the steel highway bridge on the road allowance between Secs. 8 and 17, Tp. 20, Rge. 2, W. 5th Mer. It is one half mile from Black Diamond.

The gauge, which is of the standard chain type, is fastened to the downstream side of the floor of the bridge, about midway between the west abutment and the centre pier. The zero of the gauge (elev. 93.66) is referred to a permanent iron bench mark (assumed elev. 100.00) located in front of the downstream end of the centre pier 75 feet north of the northeast corner of the N.W. ¼ Sec. 8, Tp. 20, Rge. 2, W. 5th Mer.

The channel is straight for about 150 feet above the station, then swings sharply to the left. It is straight for about 500 feet below the station, then turns gradually to the right. Both banks are composed of gravel. The right bank is low, partly covered with brush and overflows during the higher stages of the stream. The left bank is high and cannot overflow. The bed is composed of coarse gravel, and is permanent in low water stages of the stream, but a gravel bar at the right bank, which is covered during high water stages, is liable to shift. The river has considerable fall and the current is swift.

Discharge measurements are made from the downstream side of the bridge. The initial point for soundings is the outer edge of the bed plate on the west end of the bridge. Distances from the initial point are marked at every five feet on the bottom chord of the bridge.

During 1913 the gauge was read by Herbert Arnold, merchant at Black Diamond.

SHEEP RIVER NEAR OKOTOKS.

This station was established May 25, 1908, by P. M. Sauder. It is located at the Canadian Pacific Railway bridge about one mile from Okotoks, on the N.W. $\frac{1}{4}$ Sec. 22, Tp. 20, Rge. 29, W. 4th Mer.

The gauge, which is a plain staff graduated to feet and hundredths, is spiked to the cribwork on the left side of the centre pier. There is also a plain staff gauge graduated to feet and tenths embedded in the cement on the left face of the centre pier near the downstream end, for use during flood stages. The gauges are referred to a bench mark on the top of the left abutment at the southwest corner. This is a Canadian Pacific Railway bench mark and

SESSIONAL PAPER No. 25c

the elevation 3431.57 marked upon it, is used for reference. The elevation of the zero of the regular gauge is 3417.12 whilst that of the high water gauge is 2.00 feet higher.

The channel is straight for 500 feet above and below the station. The current is sluggish at the station, but swift both above and below. The right bank is high and not liable to overflow. The left bank is lower and may overflow in very high stages. Both banks are covered with brush and trees. The bed of the stream is composed of sand and gravel and is liable to shift. A number of piles, remnants of the old wooden bridge, still stand in the bed and affect the velocity observations.

Discharge measurements are made from the downstream side of the bridge, except in low water, when wading sections can be obtained.

During 1913 the gauge was read by Miss M. B. Henderson.

NORTH BRANCH OF HIGHWOOD RIVER AT BROWN'S RANCHE.

This station was established on July 27, 1912, by F. R. Burfield. It is located on the S.E. ¼ Sec. 20, Tp. 18, Rge. 2, W. 5th Mer., about eight miles north of Pekisko and five miles west of Longview Post Office.

The gauge, which is a plain staff gauge graduated to feet and hundredths, is nailed to a post driven into the bed of the stream near the right bank. The zero (elev. 91.97) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the right bank, 55 feet S. 70°. W. from the gauge.

The channel is straight for 300 feet above and below the gauge. The right bank is low and wooded, and may overflow in flood stages; the left bank is very high and rocky. The bed is of clean coarse gravel and shifts during floods. The current is swift.

Discharge measurements are made from the downstream side of the traffic bridge one and one half miles downstream with meter and weights, where also miscellaneous measurements were made previous to the establishment of the station.

During 1913 the gauge was read by B. F. Brown.

PEKISKO CREEK AT PEKISKO.

This station was established on October 6, 1911, by L. R. Brereton. It is located on the N.W. ¼ Sec. 8, Tp. 17, Rge. 2, W. 5th Mer., about 200 yards from Mr. Geo. Lane's rancho house, and is about twenty-five miles southwest of High River.

The gauge, which is a plain staff, graduated to feet and hundredths, is spiked to a post driven into the bed of the stream at the right bank about 10 feet downstream from the bridge. The zero (elev. 93.90) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the left bank 125 feet N. 55° E. from the gauge.

SESSIONAL PAPER No. 25c

The channel is straight for 200 feet above and 150 feet below the station. Both banks are fairly low, sparsely covered with brush and trees, and liable to overflow in high stages of the stream. The bed is composed of fine gravel.

Discharge measurements are made from a small suspension foot-bridge at high stages and at a wading section near the station in low water. The initial point for soundings is the stream side of the large tree on the left bank to which the end of the bridge is attached.

During 1913 the gauge was read by Mrs. R. W. L. Cowell.

STIMSON CREEK NEAR PEKISKO.

This station was established on June 30, 1912, by F. R. Burfield, to replace the station established October 6, 1911, on the S.E. ¼ Sec. 14, Tp. 17, Rge. 2, W. 5th Mer. It is located on the N.W. ¼ Sec. 2, Tp. 17, Rge. 2, West of the 5th Mer., near E. R. Baker's ranche.

The gauge, which is a plain staff graduated to feet and hundredths, is spiked to a post driven into the bed of the stream near the right bank. The zero (elev. 90.20) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the right bank 19.5 feet northwest of the gauge.

View of Pekisko Creek near Pekisko P.O., Alberta.

View of Willow Creek near Willows P.O., Alberta.

SESSIONAL PAPER No. 25c

The channel is straight for 100 feet above and below the gauge. Both banks are fairly high, grassy and not liable to overflow. The bed is of gravel, clean, and not liable to shift.

Discharge measurements are made at a wading section about 15 feet downstream from the gauge. In high water, measurements may be made from a bridge about 10 feet upstream from the gauge.

During 1913 from April 12th to October 4th the gauge was read by E. R. Baker.

FINDLAY AND MCDUGAL DITCH NEAR HIGH RIVER.

This station was established on June 17, 1911, by J. C. Milligan. It is located on the S.W. ¼ Sec. 31, Tp. 18, Rge. 29, W. 4th Mer., about four and half miles west of the town of High River.

The gauge is a plain staff, graduated to feet and inches. It is nailed to a post driven into the left bank of the ditch. The zero (elev. 99.25) is referred to a permanent iron bench mark (assumed elev. 100.00) situated on the right bank, about 50 feet downstream from the gauge.

SESSIONAL PAPER No. 25c

The channel is straight for 150 feet above and below the station. The right bank is built up from the excavation of the ditch, and would overflow if the headgates were opened to their fullest extent. The left bank is high and clean and will not overflow. The bed is of mud, but is not liable to shift.

Discharge measurements are made with meter and rods at a wading section near the gauge.

The gauge was not read during 1913 and in consequence the daily discharges cannot be computed.

LITTLE BOW DITCH AT HIGH RIVER.

This station was established August 1st, 1910, by J. C. Keith. It is located on the S.W. $\frac{1}{4}$ Sec. 6, Tp. 19, Rge. 2S, W. 4th Mer. 100 feet from the power station and pumping well of the town of High River.

The gauge, which is a plain staff graduated to feet and hundredths, is fastened to the left bank. The zero (elev. 92.07) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the right bank 60 feet upstream from the gauge.

The channel is straight for several hundred feet above and below the station. Both banks are high, clean, and steep and will not overflow.

Discharge measurements are made by wading, or from planks laid across the ditch, with current meter and rods.

During 1913 the gauge was read daily by Philip Weinard.

This canal, about 2,000 feet in length, was built by the Alberta Government, to divert water from Highwood River into Little Bow River. At a point about two miles above the town of High River, water is turned from the Highwood River into a spring creek, and at the confluence of that creek with the Highwood a dam diverts the waters of spring creek into the Little Bow Ditch, and thence into the Little Bow River.

HIGHWOOD RIVER AT HIGH RIVER.

This station was first established some years ago, by the Irrigation Surveys. It was re-established on May 28, 1908, by P. M. Sauder. It is located at the highway bridge in the town of High River, on the N.W. $\frac{1}{4}$ Sec. 6, Tp. 19, Rge. 28, W. 4th Mer.

A plain staff gauge, graduated to feet and hundredths, is fastened vertically to the downstream face of the centre pier. The zero (elev. 9162) is referred to a bench mark (assumed elev. 100.00) on the southwest corner of the concrete pier supporting the north end of the Canadian Pacific Railway Bridge.

The channel is straight for about 300 feet above and below the station. The right bank is low and liable to overflow. It is composed of gravel and sand and covered with brush. The left bank is low, but is protected from overflow by a crib work. The current is swift at high stages of the stream, but is sluggish in low water.

Discharge measurements are made from the downstream side of the bridge. The initial point for soundings is the inside edge of the crib abutment, supporting the north end of the bridge. Distances are marked on the bottom chord of the bridge at every five feet from the initial point. There is an eddy about the centre pier and special care must be exercised by the hydrographer in making discharge measurements at this station. At extreme low water, a check measurement is made at a wading station about 300 yards below the bridge.

During a flood in 1908, Highwood River overflowed its left bank some distance above the traffic bridge and did considerable damage to property. To prevent a repetition of this occurrence, a highwater overflow channel has been constructed from the Lineham mill pond to the river. The water carried off through this spillway does not pass the gauging station. Miscellaneous measurements of this flow were made on the same day that Highwood River was measured. The discharge of this spillway and that of Little Bow Ditch should both be added to the discharge of Highwood River to obtain the total yield of the drainage area.

During 1913, from April 27th to December 31st the gauge was read by W. E. M. Holmes.

SESSIONAL PAPER No. 25c

HIGHWOOD RIVER NEAR ALDERSYDE.

This station was established October 3, 1911, by L. R. Brereton. It is located at the traffic bridge on the surveyed trail about one mile east of Aldersyde, in the N.W. $\frac{1}{4}$ Sec. 17, Tp. 20. Rge. 28, W. 4th Mer.

A chain gauge of the standard type was installed in 1913. It is fastened on the right span of the bridge. The length of the chain is 21.02 feet from bottom of weight to marker. The zero (elev. 90.64) is referred to a permanent iron bench mark (assumed elev. 100.00) situated on the left bank, near the north end of the bridge.

The channel is straight for 1000 feet above and 150 feet below the station. Both banks are high, clear of brush and not liable to overflow. The bed is of coarse gravel with a scattering of large stones and boulders at and near the section. The latter affect the velocity observations to some extent. The current is swift.

Discharge measurements are made from the downstream side of the bridge. The initial point for soundings is the stream face of the north or left abutment.

During 1913 the gauge was read by L. W. Barrett.

The discharge of the Little Bow Ditch at High River should be added to those given to obtain the total yield of the drainage area.

BOW RIVER NEAR NAMAKA.

This station was established in September, 1909, by P. M. Sauder. It was originally located on Sec. 31, Tp. 21, Rge. 25, W. 4th Mer. During 1911 and 1912 no records were obtained, on account of the interference of construction work on the Southern Alberta Land Company's dam, which crosses the river at Johnstone Island. In May, 1913, the station was moved by the Company to its present position one half mile above the dam, on the N. E. ¼ Sec. 32, Tp. 21, Rge. 25, W. 4th Mer.

The gauge is a 6'' x 2'' plank, graduated to feet and tenths and is driven into the river bed at the right bank. The gauge readings give the water elevation in feet above mean sea level, (C.P.R. datum. The elevation of the gauge is referred to a bench mark (elev. 2969.10) on a tree stump 30' N. 80° W. of the N. W. corner of the right cable tower.

The channel is straight for 1,000 feet above and 1,500 feet below the station. The right bank is low, gravelly and liable to overflow at high stages. The left bank is high, covered mostly with large boulders, and is not liable to overflow. The bed of the stream is rocky and is not liable to shift. There is one channel at all stages.

Discharge measurements are made by means of a cable and car. The initial point for soundings is the north face of the bottom stringer of the cable tower on the right bank.

During 1913, the gauge was read by R. B. Bowen, timekeeper in the employ of the Southern Alberta Land Company.

BOW RIVER NEAR BASSANO.

This station was established on August 20, 1909, by the Department of Natural Resources, Canadian Pacific Railway Company. The station was moved in May 1913 from its original position one mile above the Company's dam to a position one half mile below the dam. It is located near the quarter line of the S. ½ Sec. 2, Tp. 21, Rge. 19, W. 4th Mer., at the Horseshoe bend, three and one half miles southeast of the town of Bassano.

The gauge, which is a 2" x 8" timber graduated to feet and tenths, is driven into the bed of the river at the left bank at the cable, and stayed from the bank. The gauge readings give the water elevation in feet above mean sea level (C.P.R. datum). The elevation of the gauge is referred to a bench mark (elev. 2526.14) on a tree stump on the right bank, 27 feet and 16 feet from the upstream and downstream sides of the cable tower, respectively.

The channel is straight for about one half mile above and below the station. The left bank is high steep bluffs, clean and not liable to overflow. The right bank is high, lightly wooded and not liable to overflow. The bed of the stream is composed of large boulders which may shift at high stages. There is one channel at all stages.

Discharge measurements are made by means of a cable and car. The initial point for soundings is a stake on the left bank and the distances are marked on a tag wire upstream from the cable.

During 1913, the gauge was read by employees of the Canadian Pacific Railway, Department of Natural Resources. Readings were taken until July on a gauge at the dam, but these could not be used for computing daily discharge.

^b Weir measurement.

LITTLE BOW RIVER DRAINAGE BASIN.

General Description.

The source of Little Bow River is a spring in the Town of High River in section 6, township 19, range 28, west of the fourth meridian. From here it flows in a southeasterly direction for one hundred miles and empties into the Belly River. In the first few miles, the natural flow is dependent entirely on a number of small springs and coulees which are dry most of the year, but later is augmented by the flow from Mosquito Creek, which drains the south and westerly part of the drainage basin.

There is a comparatively large flow in this stream during the spring freshets, but during summer it would under natural conditions dry up. There are a large number of ranchers and settlers on this stream and it is very important that there should be a good flow for domestic and stock watering purposes. For this reason, the Provincial Government has constructed a canal and diverts water from Highwood River into Little Bow River whenever required.

MOSQUITO CREEK NEAR NANTON.

This station was established August 1, 1908, by H. C. Ritchie. It is located at a traffic bridge, about four miles from Nanton, on the road from Nanton to Cayley. The bridge is on a road diversion on the N.E. $\frac{1}{4}$ Sec. 30, Tp. 16, Rge. 28, W. 4th Mer

The gauge, which is a plain staff graduated to feet and hundredths, is fixed in a stilling box in the left bank a few yards upstream from the bridge. It is referred to two spike heads on the south side of the bridge pier at the right bank; elevation 10.22 above the zero of the gauge.

The channel is straight for about 175 feet below the station, then curves to the left. Above the station the channel curves slightly to the left for about 500 feet, then it turns sharply to the left. The right bank is low near the water's edge but is high a few feet from it. Sand and mud deposit on this bank in high water. The left bank is high and is of solid clay with a few boulders. There is only one channel at low water. The bridge piers divide the stream into three channels at flood stage.

Discharge measurements are made from the bridge at high water and flood stages. The initial point for soundings is the north end of the bridge. The current is very sluggish at the bridge during low water and during this stage discharge measurements are made at wading sections above or below the bridge.

During 1913, the gauge was read by Wm. Monkman. •

NANTON CREEK NEAR NANTON.

This station was established August 3, 1908, by P. M. Sauder. It was originally located on the N.W. $\frac{1}{4}$ Sec. 20, Tp. 16, Rge. 2S, W. 4th Mer., but was moved in September 1913, by R. Palmer to the S.E. $\frac{1}{4}$ Sec. 19, Tp. 16, Rge. 2S, W. 4th Mer., The station is at the wooden highway bridge three and one half miles northwest of the village of Nanton and one half mile south of Mr. Monkman's house.

SESSIONAL PAPER No. 25c

The gauge, which is a plain staff graduated to feet and hundredths, is fastened to the south abutment of the bridge. The zero of the gauge (elev. 93.33) is referred to a permanent iron bench mark (assumed elev. 100.00), situated at the old station on the right bank.

The channel is straight for 50 feet above and below the station. Both banks are high, grassy and not liable to overflow. The bed of the stream is composed of gravel, not liable to shift.

Measurements are made 50 feet downstream from the gauge, by wading. The initial point for soundings is a stake at the left bank.

During 1913, from September 9th to October 31st, the gauge was read by W. Monkman. During the earlier part of the season no observer was available.

OLDMAN RIVER DRAINAGE BASIN.

General Description.

Oldman River, one of the principal tributaries of the South Saskatchewan River, is formed in the Livingstone range of the Rocky Mountains by the junction of four small rivers, viz.—Livingstone, Northwest Branch, West Branch and Racehorse Creek; it flows in a south and easterly direction to near Cowley, where it is joined by the Crowsnest and Southfork Rivers. Between Cowley and Kipp, where it empties into the Belly River, the Oldman River is augmented by several creeks, its course being easterly and northerly. It drains the area bounded on the north by the parallel of latitude through 59° 20', on the south by the parallel through 49° 20', and on the west by the Great Divide, this area being estimated to contain about 2,235 square miles, with topography varying from mountains to rolling prairie.

The bed of the river is of rock and gravel and has a large fall, with consequent swift water interspersed with falls and rapids, but it changes to quick sand and mud after reaching the prairie region where the current is more sluggish.

The flow of this river, draining as it does mountain ranges with peaks extending above the snow line, is subject to great changes, caused by melting snow and heavy summer rains in the mountains. Floods occur regularly in both May and June, the one in June generally rising higher and lasting longer. From this time on, however, the flow is normally steady but gradually decreases until the minimum is reached during January and February.

Up to the present, however, no power has been developed on this river, but investigations with that end in view are being made.

TROUT CREEK AT LOCKWOOD'S RANCHE.

This station was established on July 7, 1911, by A. W. P. Lowrie. It is located on the S.E. $\frac{1}{4}$ Sec. 33, Tp. 11, Rge. 28, W. 4th Mer., and is about 180 feet from Mr. Lockwood's house.

The gauge, which is a plain staff graduated to feet and hundredths, is fastened to the stump of a tree on the right bank. The zero (elev. 92.19) is referred to a permanent iron bench mark (assumed elev. 100.00), located 75 feet downstream from the gauge.

SESSIONAL PAPER No. 25c

The channel is straight for eighty feet above and seventy feet below the gauge. The right bank is wooded and may overflow during high water. The left bank is wooded and low. The bed of the channel is stony, and not liable to shift. Discharge measurements are made by wading, twenty feet upstream from the gauge. The initial point for soundings is a post on the left bank. During 1913, the gauge was read by F. N. Lockwood.

MUDDYPOND CREEK AT HART'S RANCHE.

This station was established July 27, 1908, by H. C. Ritchie. It is located at the foot bridge on L. O. Hart's rancho on the S.W. $\frac{1}{4}$ Sec. 27, Tp. 11, Rge. 2S, W. 4th Mer.

The gauge, which is a plain staff graduated to feet and hundredths, is placed at the left bank, 15 feet upstream from the bridge. The zero (elev. 90.06) is referred to a permanent iron bench mark (assumed elev. 100.00) 35 feet northeast of the gauge.

The channel is straight for 30 feet above and 110 feet below the station. Both banks are high, composed of clay, but liable to overflow in extreme floods. The bed is of clean gravel. The current is fairly swift.

SESSIONAL PAPER No. 25c

Discharge measurements are made from the bridge in high water, the initial point for soundings being marked at the left end of the bridge. In low stages the creek is waded about 100 feet upstream.

During 1913, the gauge was read by Mrs. M. E. Hart.

WILLOW CREEK NEAR MACLEOD.

This station was established July 1, 1909, by H. C. Ritchie. It is located at the traffic bridge on the S.E. $\frac{1}{4}$ Sec. 26, Tp. 9, Rge. 26, W. 4th Mer.

The gauge, which is a plain staff graduated to feet and hundredths, is located about 300 yards upstream from the bridge and near Mr. McLean's stable. It is driven into the bed of the creek and fixed to the bank with braces. The zero of the gauge (elev. 90.84) is referred to a permanent iron bench mark (assumed elev. 100.00), located 39 feet northeast of the gauge and 160 feet southwest from the corner of Mr. McLean's stable.

SESSIONAL PAPER No. 25c

The channel is straight for about 600 feet above and below the station. The right bank is high and wooded. The left bank is low, wooded, and liable to overflow in high water stages. The bed of the stream is of clean gravel. The slope is uniform and the current swift.

Discharge measurements are made from the bridge during high stages, the initial point for soundings being marked on the downstream handrail on a line with the face of the north abutment. During low stages the river is waded at the same section, and when very low it is waded at the gauge.

During 1913, the gauge was read by Hugh McLean.

OLDMAN RIVER NEAR MACLEOD.

This station was established on July 12, 1910, by H. C. Ritchie. It is located at the traffic bridge on the N.W. ¼ Sec. 10, Tp. 9, Rge. 26, W. 4th Mer.

The gauge, which is a plain staff graduated to feet and hundredths, is fastened to a crib protecting the pier near the right bank. The zero of the gauge (elev. 91.84) is referred to a bench mark on spikes in a wooden bent (assumed elev. 100.00) located 93 feet east of the gauge.

The channel is straight for 400 feet above and 1,000 feet below the station. Both banks are low, wooded and liable to overflow in extreme high water. The bed is composed of clean gravel, and shifts during high water stages. The current is swift, especially during high water.

Discharge measurements are made from the bridge, the initial point for soundings being at the north end of the handrail on the downstream side of the bridge.

During 1913 the gauge was read by Mrs. Walter Jackson.

PINCHER CREEK AT PINCHER CREEK.

Under the direction of Arthur O. Wheeler, a regular gauging station was established on Pincher Creek at Pincher Creek, in the spring of 1898. On August 13, 1906, J. F. Hamilton replaced the old gauge by a new one. Owing to local improvements the gauge has since been changed but the station remains practically in the same place as established by Mr. Wheeler. It is located on the S.W. $\frac{1}{4}$ Sec. 23, Tp. 6, Rge. 30, W. 4th Mer., at the steel traffic bridge in the town of Pincher Creek.

The gauge, which is a plain staff graduated to feet and hundredths is securely fastened to the breakwater on the right bank, about twenty feet below the traffic bridge. The zero of the gauge (elev. 86.35) is referred to a bench mark (assumed elevation 100.00) located on the right concrete abutment of the bridge.

The channel is straight for about 200 yards above and 300 yards below the bridge. Both banks are high, the right being well cribbed; neither is liable to overflow. The bed is rock and free from vegetation. At the wading section, the channel is straight for about 500 yards above and 70 yards below. Both banks are high, clean and not liable to overflow. The bed is gravel, mixed with heavy gumbo clay.

During high water, discharge measurements are made from the downstream side of the bridge. At low stages, the creek is waded 450 yards upstream.

During 1913 the gauge was read by Hugh Bertles.

The town of Pincher Creek has a gravity waterworks system, which diverts water from the creek at a point about three and one quarter miles above the bridge, and the records at this station do not include the water used by the town.

SOUTHFORK RIVER NEAR COWLEY.

This station was established on August 5, 1909, by H. C. Ritchie. It is located at G. W. Buchanan's ranche on the S.W. $\frac{1}{4}$ Sec. 2, Tp. 7, Rge. 1, W. 5th Mer.

The gauge, which is a plain staff graduated to feet and hundredths, is securely fastened by braces to supports on the right bank, and is about five minutes' walk from Mr. Buchanan's house. The zero of the gauge (elev. 92.34) is referred to a permanent iron bench mark (assumed elevation 100.00), located on the left bank of the river, 25 feet southwest from the gauge.

The river flows in one channel, which is slightly curved for some distances above and below the gauge. The left bank is high and will not overflow. The right bank is low and liable to be submerged during flood stages of the stream. The bed is composed of coarse gravel. The current is moderate.

Discharge measurements are made from the downstream side of the traffic bridge on the S.E. $\frac{1}{4}$ Sec. 2, Tp. 7, Rge. 1, W. 5th Mer. The initial point for soundings is marked on the superstructure in line with the face of the abutment on the left bank.

During 1913 the gauge was read by G. W. Buchanan.

MILL CREEK NEAR MOUNTAIN MILL.

This station was established July 7, 1910, by H. C. Ritchie. It is located on the S.W. 1/4 Sec. 18, Tp. 6, Rgc. 1, W. 5th Mer., at the site of the abandoned Government mill, nine and a half miles west of Pincher Creek P. O.

The gauge, which is a plain staff graduated to feet and hundredths, is placed at the left bank. It is referred to a bench mark on a spike at the northeast corner of the mill, (elev. 10.97 above the zero of the gauge).

The channel is straight for 200 feet above and 300 feet below the station. Both banks are high, clean rocky and will not overflow. The bed of the stream is of gravel, giving a stable cross section. The current is swift.

Discharge measurements in flood stages are made from the bridge. In normal and low water stages the creek is waded 50 feet upstream from the gauge, the initial point for soundings being a stake on the left bank.

During 1913 the gauge was read by K. B. Parsons.

CANYON CREEK NEAR MOUNTAIN MILL.

This station was established July 6, 1910, by H. C. Ritchie. It is located on the N.E. ¼ Sec. 14, Tp. 6, Rge. 2, W. 5th Mer., near G. Biron's ranche.

The gauge, which is a plain staff graduated to feet and hundredths., is placed at the left bank within 75 feet of Mr. Biron's corral. It is referred to a bench mark on a spike in a tree within fifteen feet; elevation 14.49.

The channel is straight for 150 feet above and 30 feet below the station. Both banks are high, wooded, and will not overflow. The bed of the stream is of clean gravel and rock. The current is very swift and turbulent. On this account discharge measurements are made about one half mile upstream at the traffic bridge on the road allowance to the Beaver coal mines.

During high water stages, discharge measurements are made from the bridge; the initial point for soundings is on a line with the face of the left abutment. At ordinary stages the stream is waded about 100 yards downstream, the initial point for soundings being marked by a hub on the left bank.

During 1913 the gauge was read by G. Biron.

OLDMAN RIVER NEAR COWLEY.

This station was established by H. C. Ritchie, on September 15, 1908. It is located at a ford on the N.E. ¼ Sec. 34, Tp. 7, Rge. 1, W. 5th Mer., and is approximatively four miles northeast of Cowley.

The gauge, which is a plain staff graduated to feet and hundredths, is securely fastened to a post on the right bank. The zero of the gauge (elev. 92. 8) is referred to a permanent iron bench mark (assumed elev. 100.00) located on the right bank of the river 90 feet east of the gauge.

The channel is straight for about 900 feet above and 250 feet below the section. The bed is of rock and gravel and is free from vegetation. The current has considerable velocity but

flows smoothly until about 150 feet below the section, where it breaks into small rapids. Both banks are high and wooded, neither being liable to overflow.

Discharge measurements are made at the gauge, where a cable station has been erected for use during high water stages. During low water the river is waded at the same section. The points for soundings are permanently marked by a tagged wire, stretched directly above the cable.

During 1913, the gauge was read by J. H. Hughes.

TODD CREEK AT ELTON'S RANCHE.

This station was established by H. C. Ritchie on August 3, 1909. It is located seven miles northwest of Cowley, at a private foot bridge about twenty feet from Cecil Elton's house, on the S.W. $\frac{1}{4}$ Sec. 19, Tp. 8, Rge. 1, W. 5th Mer.

The gauge, which is a plain staff graduated to feet and hundredths, is driven into the bed of the stream and securely braced to the left bank. The zero of the gauge (elev. 93.02) is referred to a permanent iron bench mark (assumed elev. 100.00), twelve feet northeast of the gauge.

The channel is straight for about 55 feet above and 60 feet below the gauge. The right bank is high and wooded and liable to overflow in extreme high water. The left bank is wooded, and liable to overflow for about six feet. The bed lies in one channel and is composed of clean sand and gravel. The current is inclined to be swift at high stages, but is quite sluggish at low.

Discharge measurements are made from the foot bridge with current meter and rods. During high stages measurements are made from a private traffic bridge 1000 feet downstream.

During 1913, the gauge was read by Cecil Elton.

Cecil Elton and Capt. Cardwell have irrigation ditches which divert water at points above this station.

COW CREEK NEAR COWLEY.

This station was established on May 26, 1910, by H. C. Ritchie; it replaced the station on Sec. 12, Tp. 8, Rge. 2, W. 5th Mer., established August 2, 1909. It is located on the N.E. $\frac{1}{4}$ Sec. 14, Tp. 8, Rge. 2, W. 5th Mer., at John Ross's rancho, five miles north of Lundbreck station.

The gauge, which is a plain staff graduated to feet and hundredths, is located at the right bank. The zero (elev. 94.53) is referred to a permanent iron bench mark (assumed lev. 100.00), located on the right bank of the creek, 30 feet north of the gauge and 20 feet from the edge of the creek.

SESSIONAL PAPER No. 25c

The channel is curved above the gauge and is straight 50 feet below. Both banks are low and partly covered with bushes, but are not liable to overflow. The bed is of clean sand and gravel. The current is swift.

Discharge measurements are made with meter and rods from a temporary foot bridge at the gauge. The initial point for soundings is a stake on the left bank.

During 1913, the gauge was read by William McKay.

CONNELLY CREEK NEAR LUNDBRECK.

This station was established on July 31, 1909, by H. C. Ritchie. It is located at a foot-bridge on the trail in the S.E. ¼ Sec. 36, Tp. 7, Rge. 2, W. 5th Mer., and is about 100 feet from the mouth of the creek.

There is no observer for the gauge at this station.

CROWSNEST RIVER AT LUNDBRECK.

This station was established September 7, 1907, by P. M. Sauder. It is located on the N.E. ¼ Sec. 26, Tp. 7, Rge. 2, W. 5th Mer., at the traffic bridge just north of Lundbreck.

The gauge, which is a plain staff graduated to feet and hundredths, is placed at the left bank twenty feet downstream from the bridge. The zero of the gauge (elev. 91.76) is referred to a bench mark (assumed elev. 100.00) located on the north abutment of the traffic bridge.

The channel is straight for 250 feet above and 1,500 feet below the station. The right bank is high, wooded and will not overflow. The left bank is low, wooded and liable to overflow in extreme high water. The bed of the stream is of rock, giving a stable cross-section. The current is swift and tumultuous.

Discharge measurements are made from the bridge, the initial point for soundings being marked on the lower downstream chord, on a line with the face of the left abutment.

During 1913 the gauge was read by Ed. Marlow.

CROWSNEST RIVER NEAR FRANK.

This station was established on July 28, 1910, by H. C. Ritchie. It is located at the traffic bridge on the N.E. $\frac{1}{4}$ Sec. 36, Tp. 7, Rge. 4 W. 5th Mer.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to a tree at the left bank about twenty feet downstream. It is referred to a bench mark, consisting of spikes driven into a tree stump, about three feet from the gauge; elevation 9.43 feet above datum of gauge.

The channel is straight for about 200 feet above the station and for 500 feet below, both banks being high, wooded and not liable to overflow. The bed of the stream is clean gravel.

During high water, discharge measurements are made from the bridge, the points for soundings being painted on the lower chord. In low stages the river is waded at the same section. The discharge measurements made at this station during 1913 were all under open water conditions as the river at this point remained open during the winter months.

During 1913, the gauge was read by I. Wilson.

MCGILLIVRAY CREEK NEAR COLEMAN.

This station was established on July 23, 1913, by R. Palmer. It is located on the S.E. $\frac{1}{4}$ Sec. 7, Tp. 8, Rge. 4, W. 5th Mer., about 150 feet north of the traffic bridge crossing the stream a short distance west of the town of Coleman.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a tree at the right banks. The zero of the gauge (elev. 97.01) is referred to a bench mark (assumed elev. 100.00), located on a poplar stump on the left bank about thirty feet from the gauge.

The channel is straight for 100 feet above and below the station. The left bank is low but the right is high. The bed is gravel and the current is swift.

Measurements are made with a current meter by wading near the gauge.

During 1913, the gauge was read by Thos. Blower.

CROWSNEST RIVER NEAR COLEMAN.

This station was established July 28, 1910, by H. C. Ritchie. It is located on the S.W. ¼ Sec. 12, Tp. 8, Rge. 5, W. 5th Mer., at a private bridge about two and a half miles west of Coleman.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to a tree at the left bank, 150 feet upstream from the bridge. The zero of the gauge (elev. 92.73) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the left bank.

The channel is straight for thirty feet above and 300 feet below the station. Both banks are high, wooded and will not overflow. The bed of the stream is of sand and gravel. The current is fairly swift.

Crowsnest Mountain near Coleman, Alberta.

Source of Crowsnest River, a Branch of Oldman River, near Coleman, Alberta.

SESSIONAL PAPER No. 25c

Discharge measurements are made from the bridge during high stages; the initial point for soundings being on line with the face of the left abutment. In low stages the stream is waded three quarters of a mile downstream from the bridge.

During 1913, the gauge was read by Prudent LeGal, whose house is about 40 feet from the gauge.

SUMMIT CREEK NEAR CROWSNEST.

This station was established by N. Mc. L. Sutherland on April 29, 1912. It is located on the S.W. ¼ Sec. 12, Tp. 8, Rge. 6, W. 5th Mer., and is about a quarter of a mile south of the railway station at Crowsnest, 1000 feet south of the Canadian Pacific Railway concrete dam and 450 feet south of A. Good's dam.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a tree on the right bank of the creek. It is referred to a bench mark on a stump, 18 feet downstream from the gauge; elevation 3.99 feet above the datum of the gauge.

The channel is straight for 15 feet above and 50 feet below the gauge. The right bank is high, heavily timbered and not liable to overflow. The left bank is low, wooded, and liable to overflow. The bed of the stream is of gravel and clear of vegetation. The current is swift.

Discharge measurements are made by wading at the gauge, the initial point for soundings being a post on the left bank. At low stages measurements are made with a weir at a point 15 feet below the gauge.

There is no observer for the gauge at this station.

a Weir measurement.

WATERTON RIVER DRAINAGE BASIN.

General Description.

Waterton River rises in the northwestern portion of the state of Montana, on the eastern slope of the Rocky Mountains. It flows in a northerly direction and, passing through a chain of lakes near the International Boundary, known as Waterton Lakes, it continues in a north and easterly direction and finally empties into Belly River near Stand Off, Alberta.

The topography of the basin is of a varied character, ranging from the mountainous regions of Montana to the rolling prairie of Southern Alberta. The tributaries are mostly in the upper portion of the basin, near the International Boundary and from the west side.

There is a large snow-fall in the upper portion of the basin, and the melting of this combined with heavy rains often causes big floods on this river in the early summer. Thereafter the river steadily decreases in volume, until the minimum is reached about mid-winter.

Waterton Lakes offer a very favourable site for a storage reservoir, approximately fourteen miles long and one mile wide. The steep rocky banks of the narrows is an ideal site for the construction of a dam. The flow could be more than doubled during the summer months and used for irrigation purposes, or a power project could easily be developed.

WATERTON RIVER AT WATERTON MILLS.

This station was established on August 26, 1908, by P. M. Sauder. It is located on the N.E. $\frac{1}{4}$ Sec. 8, Tp. 2, Rge. 29, W. 4th Mer., about 250 feet below the river's outlet from the Lower Waterton Lake.

The gauge, which is a plain staff graduated to feet and hundredths, is placed in a stilling box at the right bank. The zero (elev. 90.51) is referred to a permanent iron bench mark (assumed elev. 100.00), situated within six feet of the gauge.

The channel is wide and straight for 250 feet above and 400 feet below the station. Both banks are high, slightly wooded and will not overflow. The bed of the stream is rough and rocky but is not liable to shift. The current is always rather swift at mid-stream.

SESSIONAL PAPER No. 25c

Discharge measurements are made from a cable car during high stages. In low water the stream can be waded almost across, the deep channel in the middle being taken from the cable car. The measurements are affected frequently by heavy winds. The points for soundings are marked by a tagged wire stretched above the cable.

During 1913 the gauge was read by H. H. Hanson.

CROOKED CREEK NEAR WATERTON MILLS.

This station was established September 15, 1909, by H. C. Ritchie. It was at first located on the S.E. ¼ Sec. 22, Tp. 2, Rge. 29, W. 4th Mer., but as, an observer could not be secured at this point, it was moved on June 15, 1911, by L. J. Gleeson to a point 250 feet from Ernest Allred's house on the S.W. ¼ Sec. 23, Tp. 2, Rge. 29, W. 4th Mer. It was again moved on October 15, 1912, by G. F. Deas to the S.W. ¼ Sec. 22, Tp. 2, Rge. 29, W 4th Mer.

The gauge, which is a plain staff graduated to feet and hundredths, is securely fastened to the right bank. The zero of the gauge (elev. 89.48) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the right bank 25 feet from the gauge. The old bench mark is at elevation 101.58 referred to the present system of levels.

The stream flows in one channel at all stages. It is straight for 50 feet above and 100 feet below the station. The right bank is clean and not liable to overflow. The left bank is covered with brush and may overflow in extreme high water.

Discharge measurements are made by wading, 30 feet downstream from the gauge. The initial point for soundings is at a stump of a small tree on the left bank. During flood periods the stream cannot be waded at this point but gaugings can be made at a bridge about 1 1/2 miles downstream.

This stream is subject to sudden rises in stage due to rains and it is probable that the figures for the total run-off are slightly lower than they should be.

During 1913, the gauge was read by Frank Rowe.

BELLY RIVER DRAINAGE RIVER BASIN.

General Description.

Belly River rises near Chief Mountain in northern Montana. The main stream is augmented on the United States side of the boundary line by Middle Fork and on the Canadian side by North Fork. From the junction with North Fork on Sec. 21, Tp. 1, Rge. 28, W. 4th Mer., the river flows in a winding, but northeasterly course until it is joined by Oldman River in Sec. 27, Tp. 9, Rge. 23, W. 4th Mer., where it turns southeasterly, and after making a loop flows in a north and easterly direction until it joins Bow River in Sec. 27, Tp. 11, Rge. 13, W. 4th Mer., and forms the South Saskatchewan River.

The topography of the basin is of the most varied character, ranging from the mountainous regions of Montana and the rolling prairie and foothills at the boundary to the level prairie which extends from Lethbridge to the junction with the Bow River. The upper tributaries drain a forested region; the main stream flows through a deep valley with many clumps of large whitewood on its banks.

There is an abundant snowfall in the upper portion of the basin, but the precipitation diminishes into semi-arid conditions near Lethbridge. At first Belly River is a comparatively clear stream but soon after crossing the boundary line it gradually becomes turbid, especially at the times of high water. The greater portion of the sediment is caused by the washing away of banks and cutting of new channels. Freshets caused by melting snow and heavy rains are frequent in the summer. The maximum flow usually occurs in June or July and after that the flow gradually decreases until it reaches the minimum in January or February.

As yet very little use has been made of the water in this basin. In the upper regions, where water could easily be diverted, it is not required for irrigation purposes and farther downstream it would be an expensive undertaking.

There are a couple of small private irrigation schemes diverting water from this river, and the city of Lethbridge receives its domestic supply from the same source.

The Canadian Pacific Railway Company have located and may construct a canal from Belly River to supply their irrigation system, if St. Mary River is found deficient. A survey and estimate of the cost of this proposed canal were made by the Government during 1912, and a copy of the report may be seen in the report of the Commissioner of Irrigation for 1912. There are also a number of feasible power sites in the upper regions which will no doubt be developed when there is a market.

BELLY RIVER NEAR MOUNTAIN VIEW.

This station was established on November 1, 1911, by H. R. Carseallen. It is situated in the N.E. ¼ Sec. 5, Tp. 2, Rge. 28, W. 4th Mer., and is six miles southwest of Mountain View P. O.

The gauge, which is a plain staff graduated to feet and hundredths, is spiked to a post sunk in the bed of the stream at the right bank. The zero (elev. 88.16) is referred to a permanent iron bench mark (assumed elev. 100.00), situated beneath the centre of the cable support on the right bank.

The channel is straight for 250 feet above the station and for 350 feet below. The bed is composed of gravel and sand. The right bank is high, slightly wooded, and will not overflow except during extreme high water. The left bank is low, quite well wooded, and will overflow.

Discharge measurements are made from a cable car, by means of a current meter and stay wire. The initial point for soundings is a spike driven into the downstream cable support on the left bank, and the points for soundings are marked by red paint on a measuring wire.

During 1913, the gauge was read by J. N. West.

MAMI CREEK NEAR MOUNTAIN VIEW.

This station was established on August 13, 1909, by H. C. Ritchie. It is located at the traffic bridge on the road allowance south of the S.E. ¼ Sec. 19, Tp. 2, Rge. 27, W. 4th Mer., and is just below the junction of the east and west branches.

The gauge, which is a plain staff graduated to feet and hundredths, is fastened to a pile supporting the bridge at the left bank. The zero (elev. 93.06) is referred to a permanent iron bench mark (assumed elev. 100.00) located close to the east bank about 20 feet north of the bridge.

The channel is curved for about 100 feet above the bridge and straight for 200 feet below. Both banks are high, clear of brush, rocky and liable to overflow in extreme high water. The bed of the stream is composed of stones covered with sand and gravel.

Discharge measurements are made during high water from the bridge. In low water the east branch dries up and the west branch is waded just below the junction.

During 1913, the gauge was read by Chas. H. Findlay of Mountain View.

CHRISTIANSON DITCH NEAR MOUNTAIN VIEW.

This station was established on September 14, 1911, by L. J. Gleeson. It is situated in the S.E. $\frac{1}{4}$ Sec. 12, Tp. 3, Rge. 28, W. 4th Mer., on Elias Christianson's irrigation ditch. It is six miles northwest of Mountain View and one quarter of a mile south of Big Bend police post.

The gauge, which is a plain staff graduated to feet and tenths, is driven into the channel of the ditch on the line of the gauging section. The zero of the gauge (elev. 97.10) is referred to a bench mark (assumed elev. 100.00), situated on the left bank close to the gauge.

The channel is straight for 300 feet above and 100 feet below the station. The main ditch is about 400 feet long and 4 feet wide, and has a good fall.

During 1913, the gauge was read by Mrs. Christianson.

BELLY RIVER NEAR STAND OFF.

This station was established on May 27, 1909, by H. C. Ritchie. It is eighteen miles south of the town of Macleod, and is located on the S.E. ¼ Sec. 21, Tp. 6, Rge. 25, W. 4th Mer., 200 yards from George Pearson's house.

The gauge, which is of the standard chain type, is situated on the left bank about 200 yards from George Pearson's house. The gauge is graduated to feet and hundredths and is laid on two posts, sunk in the bank. The zero (elev. 91.82) is referred to a permanent iron bench mark (assumed elev. 100.00) near by.

For a distance of 75 feet above and 60 feet below the gauge, the channel is straight. The current runs smoothly with a moderate velocity over a bed of clean gravel. Both banks are low, free from brush, and liable to overflow during high stages of the river. Since the establishment of this station the cross-section has changed very little, if any, but owing to the sharp turns in the channel the river is liable to take a new course altogether in times of extreme flood.

Discharge measurements are made during the open season from the traffic bridge on the N.E. ¼ Sec. 21, Tp. 6, Rge. 25, W. 4th Mer., one mile upstream from the gauge. The points for soundings are painted on the lower chord of the superstructure. The initial point is at the left approach. During the frozen period measurements are made at or near the gauge.

During 1913, the gauge was read by George Pearson.

BELLY RIVER NEAR LETHBRIDGE.

This station was established on August 31, 1911, by A. W. P. Lowrie. It is located on the traffic bridge on the N.W. $\frac{1}{4}$ Sec. 1, Tp. 9, Rge. 22, W. 4th Mer., and is about two and a half miles from Lethbridge P. O.

A chain gauge of the standard type was installed on June 3, 1913. It is situated near the second pier from the right bank. The length of the chain is 30 feet from the bottom of weight to marker. The zero of the gauge (elev. 85.70) is referred to a bench mark (assumed elev. 100.00) marked on the right abutment by an arrow in white paint.

The channel is straight for 800 feet above and 2000 feet below the station. Above the station, the right bank is high and will not overflow. Below the station it is low and will overflow at flood stages. The left bank is low and liable to overflow. The bed of the stream is gravel and silt; it is liable to shift. At high stages there are five channels and at low stages three.

Discharge measurements are made from the downstream side of the bridge. The initial point for soundings is at the left bank and is marked by a white arrow on the handrail. Distances are marked every ten feet on the handrail.

During 1913, the gauge was read by William Bedster.

ST. MARY RIVER DRAINAGE BASIN.

General Description.

St. Mary River, an important tributary of the Belly River and so indirectly of the South Saskatchewan River, heads in northern Montana on the eastern slope of the main range of the Rocky Mountains. It starts from the great Blackfoot glacier and receives affluents from numerous lesser glaciers. These streams unite within a short distance from their source and flow into Upper St. Mary Lake. Below this lake and in close proximity, is lower St. Mary Lake, the aggregate lengths of the two being about 22 miles. The river flows out of the lower lake, at an elevation of 4160 feet above mean sea level, and takes a northerly course through the foothills to the International Boundary. From the boundary it flows in a north and easterly direction through a rolling country, finally emptying into the Belly River near Lethbridge, Alberta.

The basin is bounded on the south by the Rocky Mountains, on the west by the watershed between Belly and St. Mary Rivers and on the east by the watershed between Milk and St. Mary Rivers. The upper portion of the basin is heavily timbered and receives its precipitation mostly in the shape of snowfall; the lower and major portion is totally devoid of tree growth and has a small precipitation.

The river flows through a very deep valley having steep banks making the diversion of water from this stream for irrigation an expensive undertaking. In Canada the Alberta Railway and Irrigation Company has water rights on this river. The headgates of their canal is at Kimball, 5 miles north of the boundary, and they already have 231 miles of ditch constructed, which irrigates land surrounding Lethbridge. Further construction is being planned and the works, when completed, will irrigate approximately 500,000 acres of at present semi-arid land.

As this is an international river, discharge measurements are taken on it by the Hydrographic Surveys branches of both the Canadian and American Governments. The hydrographers of both countries use a common gauging station near Kimball.

FIDLER BROTHER'S DITCH AT BOUNDARY CREEK.

This station was established on September 13, 1911, by L. J. Gleeson. It is situated in the S.E. $\frac{1}{4}$ Sec. 19, Tp. 1, Rge. 26, W. 4th Mer., on Fidler Brothers' irrigation ditch, eighteen miles southwest of Cardston.

The channel of the ditch is straight for a distance of thirty feet above and twenty below the gauge. The soil is clay with a little sand.

The gauge is placed in the centre of the ditch, 100 feet downstream from the headgate. It is a plain staff graduated to feet and tenths. The zero of the gauge (elev. 96.10) is referred to a wooden bench mark (assumed elev. 100.00), situated on the left bank, eight feet west of the gauge and on the line of the gauging section.

Discharge measurements can be made with a small Price meter, but on account of the small velocity, a weir is more suitable.

During 1913, the gauge was read by Jas. Fidler.

BOUNDARY CREEK AT FIDLER BROTHERS' RANCHE.

This station was established June 18, 1913, by F. R. Burfield, and W. A. Burton. It is about 17 miles by trail south of Cardston and is located on Fidler Brothers' ranche on the N.W. $\frac{1}{4}$ Sec. 20, Tp. 1, Rge. 26, W. 4th Mer. It is within 800 feet of the Boundary Creek P.O.

The gauge, which is a plain staff graduated to feet and hundredths, is securely fastened to a post at the right bank. The zero (elev. 96.98) is referred to a permanent iron bench mark (assumed elev. 100.00), located 25 feet from the right bank of the stream and 10 feet below the gauge rod.

The channel is straight for about 100 feet below and above the section. The current is fairly swift. The bed is of gravel, but is not liable to shift. The left bank is high and the right is low; neither is liable to overflow.

Discharge measurements are made by wading, ten feet below the gauge,
From June to December during 1913, the gauge was read once a day by Jas. Fidler.

ST. MARY RIVER NEAR KIMBALL.

This station was established by the Alberta Railway and Irrigation Company, in 1905. It is located on the S.W. $\frac{1}{4}$ Sec. 25, Tp. 1, Rge. 25, W. 4th Mer., about one mile above the Alberta Railway and Irrigation Company's dam and headgate.

The gauge, which is a plain staff graduated to feet and hundredths, is set in the right bank, a few feet upstream from the cable. A trench, lined with plank, connects a stilling box about the gauge with the channel in low water. The zero of the gauge (elev. 85.84) is referred to a permanent iron bench mark (assumed elev. 100.00), situated near the cable support on the right bank. In addition to the staff gauge there is a Friez Water Stage register located about one thousand feet upstream, which is installed in a concrete shelter at the right bank and is maintained in co-operation with the United States Geological Survey. The zero of the automatic gauge is 88.75, referred to a bench mark (assumed elev. 100.00), located on a spike on the downstream side of the concrete gauge shelter.

The channel is straight for about 450 feet above and 400 feet below the station. Both banks are high and not liable to overflow. The right bank is partly covered with scrub above the station, but at and below the station it is clear. The bed of the stream is of gravel and is liable to slight changes. The current is quite uniform all the way across the stream.

Discharge measurements are made by means of a cable car, and tagged wire at high and ordinary stages. At low water periods, the river can be waded. The initial point for soundings is the zero of the tagged wire, which is 44.8 feet the inside edge of the cable support on the right bank.

During 1913, the staff gauge was read daily by J. M. Dunn who also looked after the automatic gauge. The gauge records given are as far as possible those obtained from the automatic gauge.

ALBERTA RAILWAY AND IRRIGATION COMPANY CANAL NEAR KIMBALL.

This station was established July 26, 1910, by F. H. Peters. It is located at the flume over Rolph Creek on the S.E. ¼ Sec. 21, Tp. 2, Rge. 24, W. 4th Mer. It is by trail fifteen miles southeast of Cardston, and six miles northeast of Kimball.

The gauge, which is a plain staff graduated to feet and hundredths, is fastened to the side of the flume five feet downstream from the foot bridge. The datum of the gauge (assumed elev. 100.00) is the bottom of the flume.

The flume carries all the water delivered to the company's irrigation system. It is 768 feet long, 27 feet wide, and 6 feet high (inside dimensions) and is perfectly straight. It is built of smooth plank and has a fall of one hundredth of a foot in sixteen feet.

Discharge measurements are made from a small footbridge spanning the flume at a point about midway from the ends. The initial point for soundings is the inside face of the left side of the flume.

This canal and irrigation system is known locally as the Canadian Pacific Railway Company's Lethbridge System.

During 1913, the gauge was read by J. M. Dunn, ditch rider for the company.

ROLPH CREEK NEAR KIMBALL.

This station was established on May 17, 1911, by L. J. Gleeson. It is located at the Alberta Railway and Irrigation Company's flume, in S.E. ¼ Sec. 21, Tp. 2, Rge. 24, W. 4th Mer. It is six miles northeast of Kimball and fifteen miles southeast of Cardston.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to the upstream side of the right wing wall. The zero (elev. 93.41) is referred to a permanent iron bench mark (assumed elev. 100.00), located about 100 feet downstream on the left bank.

The channel is straight for 200 feet above the station and for 150 feet below. The bed is gravelly in character and shifts during high water. Both banks are low, bare, and overflow at high stages. While passing under the flume the water is carried over an apron built to protect the piling from scour.

Discharge measurements are made by wading at or near the gauge.

During 1913, the gauge was read by J. M. Dunn.

LEE CREEK AT CARDSTON.

This station was established on June 28, 1909, by H. C. Ritchie. It is located at a footbridge in the eastern portion of the town of Cardston in the N.W. $\frac{1}{4}$ Sec. 10, Tp. 3, Rge. 25, W. 4th Mer.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to a pile near the east end of the footbridge. The zero (elev. 87.91) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the right bank 100 feet upstream from the gauge.

The channel is straight for 100 feet above and 300 feet below the station. The bed of the stream is composed of gravel with a thin covering of soft mud. In high water the current is very swift, but in low water is comparatively slow. The right bank is of clay formation, high and not liable to overflow. The left is low, gravelly and overflows during high water.

On account of the constantly shifting character of the bed during periods of high water, measurements are made at the most suitable sections near the gauge. When the water is low, a section 150 feet upstream from the footbridge is used. The initial point of soundings is on the left bank and is marked with a stake driven into the left bank, close to the water's edge.

During 1913, the gauge was read by Ora S. Williams.

LEE CREEK AT LAYTON'S RANCHE.

This station was established May 25, 1913, by F. R. Burfield. It is located on the S.E. ¼ Sec. 27, Tp. 2, Rge. 26 West of the 4th Mer., about six miles southwest of the town of Cardston. It is two miles upstream from the intake of the Cardston water supply.

SESSIONAL PAPER No. 25c

The gauge, which is a plain staff graduated to feet and hundredths, is spiked to a post driven into a crack in the rock and stayed to the left bank. The zero of the gauge (elev. 88.14) is referred to a permanent iron bench mark (assumed elev. 100.00), located at the fence north of Mr. Layton's house, seven feet from the northwest corner.

The channel is straight for 300 feet above and 400 feet below the station. The right bank is fairly high and covered with brush; it may overflow in flood stages. The left bank is high and clean and will not overflow. The bed of the stream is of solid rock, which is overlaid with gravel near the right bank. There is a gravel bar 300 feet below the gauge.

Discharge measurements are made at a point 15 feet upstream from the gauge, by wading. The initial point for soundings is a spike driven into the left bank.

During 1913, the gauge was read by B. Layton.

ST. MARY RIVER AT WHITNEY'S RANCHE.

This station was established on October 13, 1911, by H. R. Carsecallen. It is located on the N.E. ¼ Sec. 26, Tp. 7, Rge. 22, W. 4th Mer., near W. D. Whitney's house, and is about ten miles from Lethbridge P. O.

The gauge, which is a plain staff graduated to feet and hundredths, is spiked to a post sunk in the bed of the river at the right bank. The zero of the gauge. (elev. 89.15), is referred to a permanent iron bench mark (assumed elev. 100.00), near Mr. Whitney's house.

The channel is straight for 900 feet above and 1,000 feet below the station. The right bank is low and may overflow during flood stage of the stream. The left bank is high, and will not overflow. The bed of the stream is composed of gravel and is not liable to shift.

Discharge measurements are made by means of a cable, car, tagged wire and stay wire. The initial soundings is a spike driven into the downstream sill of the tower on the left bank. During 1913, the gauge was read by W. D. Whitney.

DISCHARGE MEASUREMENTS of St. Mary River at Whitney's Rancho, in 1913.

MILK RIVER DRAINAGE BASIN.

General Description.

Milk River rises on the eastern slope of the foothills in the Blackfoot Indian Reserve in the United States. Its headwaters run down in two main streams which are known, after entering Canada, as the north and south branches. The north branch runs in a northeasterly direction through the Blackfoot Reserve for a distance of about 15 miles and then enters Canada near the quarter mound on the south side of Section 3, Township 1, Range 23, West of the Fourth Meridian. From the international boundary the stream continues in a northeasterly direction for about nine miles, when it bends to the east and runs in an easterly direction through the second tier of townships to its junction with the south branch at the centre of Section 20, Township 2, Range 18, West of the Fourth Meridian.

The south branch runs to the south and east of, and parallels the north branch for a distance of about 48 miles, as the crow flies, through the Blackfoot Reserve, and then enters Canada near the quarter mound on the south side of Section 1, Township 1, Range 20, West of the Fourth Meridian. From the international boundary it runs in a northeasterly direction to its junction with the north branch. From the junction of the two branches Milk River runs in an easterly direction through the second tier of townships in Canada to the east boundary of range 7. From this point the river runs in a southeasterly direction to its first point of crossing the international boundary into the United States. This first point of crossing is near the quarter mound on the south side of Section 3, Township 1, Range 5, West of the Fourth Meridian. From this point the river meanders in an easterly direction through Canada and United States to a point on the international boundary about 900 feet west of the east boundary of Section 1, Township 1, Range 5, West of the Fourth Meridian, where it finally crosses into the United States. This point is known as the "Eastern Crossing". The length of the course of Milk River in Canada from the western crossing of the north branch to the eastern crossing is 179 miles. The length of the course of the south branch in Canada is 20 miles.

Throughout its course in Canada from the western crossing of the north branch to the eastern crossing, Milk River runs through a well defined valley bordered on each side by a range of hills. The whole of its watershed in Canada is bald prairie land. The river receives a number of small tributary creeks along its course, all of which discharge a considerable volume of water during the spring freshets; usually they all dry up by about July 1, and have no considerable discharge again until late in the fall, when some of them have a small flow for perhaps a month before the freeze up.

The general conditions of flow in the river are such as are typical of all rivers which have a watershed devoid of tree growth; that is, it is subject to extreme floods during the freshet period and to correspondingly low flow during the summer months. From its headwaters to the eastern crossing the total area of the watershed of Milk River is 2,448 square miles. Of this total amount 1,645 square miles are in Canada and 803 square miles in the United States.

NORTH BRANCH OF MILK RIVER NEAR PETERS' RANCHE.

This station was established by P. M. Sauder and F. H. Peters on July 21, 1909. It was located on the N.E. $\frac{1}{4}$ Sec. 13, Tp. 1, Rge. 23, W. 4th Mer., but on the installation of an automatic gauge on this stream in May 1913 the gauge was re-located on the N.E. $\frac{1}{4}$ Sec. 11, Tp. 1, Rge. 23, W. 4th Mer., which is about six miles by trail from Taylorville P. O. and 14 miles from Kimball.

The gauge, which is of the Stevens Continuous type, is installed in a shelter and stilling box on the left bank of the stream. Staff gauges are also installed inside and outside the shelter. The zero of the gauge (elev. 93.58) is referred to a permanent iron bench mark (assumed elev. 100.00) located a few feet upstream from the shelter on the left bank.

The stream flows in one channel which is slightly curved at the gauge. The left bank is high but the right might overflow in flood stages. The bed of the stream is of clay and gravel and is not liable to shift.

Discharge measurements are made at all stages except flood, by wading about 100 yards downstream. During flood stages a small foot bridge some 300 yards below, or the cable and car at the old station may be used.

During 1913, Wm. Wheeler made daily observations at the lower station first and then on the rod outside the shelter as a check on the automatic gauge.

a During Jan., Feb., Mar., and Apr., the records are from the station on N. E. 13-1-23-4 and the drainage area used is 109 square miles.

SESSIONAL PAPER No. 25c

NORTH BRANCH OF MILK RIVER AT KNIGHT'S RANCHE.

This station was established by F. H. Peters and P. M. Sauder on July 17, 1909. It is located in the N.E. $\frac{1}{4}$ Sec. 18, Tp. 2, Rge. 20, W. 4th Mer., almost directly south of the Knight Sugar Company's Horse-shoe ranche buildings. It is about 33 miles by trail from Kimball.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to a post at the right bank. The zero (elev. 90.70) is referred to a permanent iron bench mark (assumed elev. 100.00), situated close to the initial point for soundings.

The stream flows in one channel about 44 feet wide at ordinary stages. It is straight for about 150 feet above and 100 feet below the station. The right bank is composed of clay, is high and not liable to overflow. The left bank is composed of light sandy loam, is low and liable to overflow to quite a distance, during high stages of the stream. The bed of the stream is composed of clay, gravel and boulders.

Discharge measurements are made by means of a cable, ear, tagged wire and stay wire. The initial point for soundings is the face of a cedar post on the right bank. Discharge measurements can be made by wading during low water.

During 1913, the gauge was read once a day by W. D. Whitney.

NORTH BRANCH OF MILK RIVER NEAR MACKIE'S RANCHE.

This station was established July 16, 1909, by P. M. Sauder and F. H. Peters. It is located on the S.W. ¼ Sec. 19, Tp. 2, Rge. 18, W. 4th Mer. It is 17 miles by trail from Milk River, three miles north of Mackie Brothers' buildings and one mile west of the junction of the north and south branches.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to a post at the right bank. The zero (elev. 91.50) is referred to a permanent iron bench mark (assumed elev. 100.00), located 25 feet from the edge of the right bank, and under the cable.

SESSIONAL PAPER No. 25c

The stream flows in one channel, which at ordinary stages is about 60 feet wide. It is straight for 200 feet above and about 150 feet below the station. Both banks of the stream are low and liable to overflow at high stages. The bed of the stream is composed of gravel and is constantly changing.

Discharge measurements are made by means of a cable, ear, tagged wire, and stay wire. The initial point for soundings is the face of a cedar post planted in the north bank and marked "O+OO".

As it was impossible to secure an observer, the gauge was not read during 1913.

SOUTH BRANCH OF MILK RIVER AT CROFF'S RANCHE.

This station was established April 23, 1913, by W. A. Lamb of the United States Geological Survey. It is located in the State of Montana, five miles south of the international boundary at Croff's rancho on the Blackfoot Indian Reservation. It is on the S.W. $\frac{1}{4}$ Sec. 29, Tp. 37, N., Rge. 9, W., of Montana Principal Meridian, and is in line with the road allowance between ranges 21 and 22, west of the 4th Meridian in Canada.

The gauge is a Stevens continuous automatic gauge set in a wooden shelter three feet wide, four feet long and six feet high. It is set by a staff gauge in the float chamber, the bottom of the record paper being equal to one foot on the staff gauge. Both gauges are checked by the old chain gauge 15 feet downstream. The zero of the gauge (elev. 87.08) is referred to the top of an iron pipe (assumed elev. 100.00), set in the ground 15 feet back from the gauge shelter.

The channel is straight for 350 feet above and 600 feet below the station. The right bank is clear and will not overflow; the left bank is fairly high and clear and may overflow at flood stages. The bed of the stream is of gravel, covered with mud where the current is not swift; it is not likely to shift. There is one channel at all stages.

Discharge measurements during high stages are made by means of a cable and ear situated 150 feet upstream from the gauge. During ordinary stages measurements are made by wading at the gauge. The initial point for soundings is the middle of the river side of the gauge house.

SOUTH BRANCH OF MILK RIVER AT MACKIES' RANCHE.

This station was established July 14, 1909, by P. M. Sander and F. H. Peters. It is 17 miles by trail from Milk River and is located on the N.W. $\frac{1}{4}$ Sec. 31, Tp. 1, Rge. 18, W. 4th Mer., about one quarter mile upstream from Mackie Brothers' ranche buildings, and is about five miles upstream from the junction of the north and south branches of Milk River.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to a post at the left bank. The zero of the gauge (elev. 86.60) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the left bank, directly under the cable and five feet from the initial point of soundings.

The stream flows in one channel and is straight for about 150 feet above the station and for 100 feet below. The right bank is composed of sand and gravel and is liable to overflow. The left bank is composed of clay and is high. The bed of the stream consists of gravel and sand and is liable to shift.

Discharge measurements are made during high stages by means of a cable, car, tagged wire and stay wire, and at low stages by wading. The initial point for soundings is the face of a cedar post planted in the left bank.

During 1913, the gauge was read by Mrs. F. Cathro.

SESSIONAL PAPER No. 25c

MILK RIVER AT MILK RIVER.

This station was established by H. C. Ritchie on May 18, 1909, and re-established by F. H. Peters on July 3, 1909. It is located on the N.E. $\frac{1}{4}$ Sec. 21, Tp. 2, Rge. 16, W. 4th Mer., at the Canadian Pacific Railway bridge, one quarter of a mile south of the town of Milk River.

The gauge, which is of the standard chain type, is securely fastened to the railway bridge, above the centre of the stream. The zero of the gauge (elev. 90.97) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the left bank, 20 feet upstream from the bridge and 30 feet from the bank.

The stream flows in one channel at all stages and in ordinary stages is not more than 140 feet wide. The channel is almost straight for 500 feet above and below the station. The right bank is sandy, fairly high, and not liable to overflow. The left bank is lower and overflows during high water. The bed of the stream is composed of sand and fine gravel which is constantly shifting.

Discharge measurements are made from the downstream side of the bridge at high water, and in low water a wading section about 50 feet upstream is used.

During 1913, the gauge was read by Dan O'Connell.

MILK RIVER AT WRITING-ON-STONE POLICE DETACHMENT.

This station was established on August 2, 1909, by F. H. Peters. It is located at Writing-on-stone R.N.W.M.P., detachment, in the S.W. $\frac{1}{4}$ Sec. 35, Tp. 1, Rge. 13, W. 4th Mer. It is 17 miles by trail from Coutts and 25 miles from Milk River station.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to a post at the right bank. The zero (elev. 86.13) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the right bank directly under the cable and one foot north of the tower.

The river flows in one channel at all stages. It is straight for 300 feet above and 250 feet below the station. Both banks are slightly wooded, high and not liable to overflow except in extreme flood stages of the stream. The bed of the stream is composed of sand which is constantly shifting.

Discharge measurements are made during high water by means of a cable, car, tagged wire and stay wire, and at low stages by wading. The initial point for soundings is 50 feet south of a post on the right bank and marked "50".

During 1913, the gauge was read by Constable A. P. White.

SESSIONAL PAPER No. 25c

MILK RIVER AT PENDANT D'OREILLE POLICE DETACHMENT.

This station was established by F. H. Peters on August 5, 1909. It is located 300 feet upstream from the buildings of the police post on the S.W. $\frac{1}{4}$ Sec. 21, Tp. 2, Rge. 8, W. 4th Mer., and is about 61 miles by trail from Milk River station.

The gauge, which is a plain staff graduated to feet and hundredths, is at the left bank about 80 feet downstream from the cable. The zero (elev. 82.45) is referred to a permanent iron bench mark (assumed elev. 100.00), located directly under the cable, about five feet from the tower on the left bank.

The river flows in one channel, which at ordinary stages is about 150 feet wide. It is straight for about 400 feet above and 300 feet below the station. The right bank is low covered with small willows, and liable to overflow at high stages. The left bank is high, almost clear and not liable to overflow. The bed of the stream is composed of sand and is constantly changing.

Discharge measurements are made during high water by means of a cable, ear, tagged wire and stay wire, and at low stages by wading. The initial point for soundings is the face of a cedar post on the left bank.

During 1913, the gauge was read by J. E. Capstick.

MILK RIVER AT SPENCER'S LOWER RANCHE.

This station was established August 7, 1909, by F. H. Peters. In August, 1913, it was re-established as an international station. It is located south of the international boundary, on the N.E. $\frac{1}{4}$ Sec. 6, Tp. 37 N, Rge. 9, E. of Montana Principal Meridian, and is south of the S.E. $\frac{1}{4}$ Sec. 3, Tp. 1, Rge. 5, W. 4th Mer., in Canada. It is 90 miles by trail from Milk River station, 26 miles from Pendant d'Oreille police detachment and one half mile from Brownlee's ranche house in Montana.

The original staff gauge is located 1000 feet upstream from the international boundary. On August 13, 1913, an automatic gauge was established 300 feet south of the boundary. The gauge is a Gurley weight-driven automatic water stage register and is enclosed in a wooden shelter five feet square. A staff gauge is also placed outside the gauge house. The zero of the gauge (elev. 82.94) is referred to a permanent iron bench mark (assumed elev. 100.00), situated at the old gauge 1300 feet upstream on the left bank.

The channel is straight for 500 feet above and 600 feet below the station. The right bank is high and clean; the left is high and very heavily wooded. Neither is liable to overflow. The bed of the stream is composed of gravel and rock near the left bank and of quicksand and rock from the middle to the right bank.

Discharge measurements at ordinary stages are made by wading at the gauge. The initial point for soundings is a spike driven in a 4" x 6" timber in the left bank in line with the downstream side of the gauge house. At high stages, measurements are made by means of a cable and car 1800 feet upstream.

During 1913, the old gauge was read by A. W. Brownlee from April 1st to September 30th. During the remainder of the year the staff gauge at the automatic gauge was read by Frank Gallaway.

DEER CREEK AT DICKENSON'S RANCHE.

This station was established May 26, 1911, by J. E. Degnan. It is 22 miles by trail from Coutts and is located on the S.W. $\frac{1}{4}$ Sec. 15, Tp. 1, Rge. 12, W. 4th Mer., about 300 feet above the dam and intake of Dickenson Bros' irrigation ditch and about one quarter of a mile above their ranche buildings.

The gauge, which is a plain staff graduated to feet and hundredths, is located at the right bank. The zero (elev. 92.72) is referred to the top of a post at the final point for soundings on the right bank (assumed elev. 100.00).

The stream flows in one channel and is straight for about 30 feet above and 100 feet below the station. The right bank is composed of a sandy loam, covered with rose bushes, and is liable to overflow. The left bank is high and liable to overflow. The bed of the stream is composed of gravel and sand and is about 40 feet wide. In ordinary stages the stream averages from six feet to ten feet wide and runs along the right side of the bed. It is liable to great change in high water but apparently remains constant in low water.

Discharge measurements are made by wading. The initial point for soundings is the face of a stake driven in the left bank and marked "I.P."

No gauge height observations were obtained during 1913 as it was impossible to secure an observer.

DEER CREEK CATTLE COMPANY IRRIGATION DITCH.

This station was established on April 27, 1912, by J. E. Degnan. It is located on the S.W. $\frac{1}{4}$ Sec. 36, Tp. 1, Rge. 12, W. 4th Mer. It is 200 feet below the dam and intake of the ditch.

The gauge, which is a plain staff graduated to feet and hundredths, is located at the left bank. The zero (elev. 93.49) is referred to a permanent bench mark (assumed elev. 100.00), located on a stone on the northwest corner of the barn foundation, about 100 feet east of the gauge.

The original bed of the stream is composed of clay, but a great amount of sand has washed in from the creek, causing a continual change in the cross-section. The banks are not liable to overflow, the surplus water finding its way through the two spillways at the dam.

Discharge measurements are made by wading. The initial point for sounding is a spike driven in the downstream brace post of the gauge.

During 1913, the gauge was read by F. W. Webster from March 29th until it went dry on July 14th. As no discharge measurements were obtained during the season no estimate of the discharge has been made.

PAKOWKI LAKE DRAINAGE BASIN.

General Description.

The drainage into Pakowki Lake comes from three different directions; from the west by way of Etzikom Coulee, from the southeast through canal and Ketchum creeks, and from the northeast through Manyberries Creek. The lake has no outlet. The streams within this drainage basin are very similar in their general characteristics, all having narrow, deep and well defined valleys, with sparse growths of brush along the bottoms, and all drainage a sandy and very unproductive appearing soil. The drainage consists almost entirely of the spring run-off, the soil being so devoid of moisture as to take care of any ordinary rainfall without allowing any drainage into the streams, except during periods of exceptional rainfall.

Very little information has as yet been collected regarding the flow in any of the above mentioned streams, the only one touched upon as yet being Manyberries Creek. No high water measurements have been taken, and owing to the nature of the channel it is practically impossible to estimate the spring run-off.

Hooper and Huckvale have constructed very efficient irrigation works, and divert water from Manyberries Creek to irrigate 2,120 acres of hay meadow. The yield of hay has been very much increased by the use of the water.

MANYBERRIES CREEK AT HOOPER AND HUCKVALE'S RANCHE.

This station was established June 7, 1910, by H. R. Carscallen on the S.E. $\frac{1}{4}$ Sec. 3, Tp. 5, Rge. 6, W. 4th Mer. It was moved May 2, 1912, by J. E. Degnan to the S.W. $\frac{1}{4}$ Sec. 27, Tp. 4, Rge. 6, W. 4th Mer. It is located about three hundred yards south of Messrs. Hooper and Huckvale's ranche buildings and one half mile downstream from the dam and intake of their irrigation ditch.

The gauge, which is a plain staff graduated to feet and hundredths, is attached vertically to a post driven in the bed of the stream and securely stayed to the right bank. The zero of the gauge (elev. 87.00) is referred to a permanent iron bench mark (assumed elev. 100.00), sunk in the right bank about fifty feet north of the gauge.

The channel is straight for about one hundred feet upstream and two hundred feet downstream from the station. The left bank is high and will not overflow. The right bank is low, covered with brush, and is liable to overflow in extreme high water. The bed of the stream is composed of sand and gravel, and shifts at high stages.

Discharge measurements are made by wading. The initial point for soundings is a post driven in the right bank.

During 1913, the gauge was read by Sidney Hooper.

SESSIONAL PAPER No. 25c

HOOPER AND HUCKVALE IRRIGATION DITCH.

This station was established May 2, 1912, by J. E. Degnan. It is located on the S. W. $\frac{1}{4}$ Sec. 27, Tp. 4, Rge. 6, W. 4th Mer., about 100 yards north of Messrs. Hooper and Huekvale's ranche buildings and 700 feet downstream from the dam and intake of the ditch.

The gauge, which is a plain staff graduated to feet and hundredths, is attached vertically to a post driven in the bed of the stream and securely stayed to the right bank. The zero of the gauge (elev. 93.35) is referred to a permanent bench mark (assumed elev. 100.00), on the northwest corner of the foundation of the ranche house.

The channel is straight for about 50 feet above and 30 feet below the station. The bed of the stream is composed of clay and is not liable to shift.

Discharge measurements are made with a current meter by wading. The initial point for soundings is a post driven in the right bank.

During 1913, the gauge was read by Sidney Hooper from March 7th until May 31st. As no discharge measurements were obtained during the season no estimate of the discharge has been made.

SAGE CREEK DRAINAGE BASIN.

General Description.

Sage creek is a small unimportant stream which rises in township 5, range 4, west of the 4th meridian, and flows southerly, crossing the international boundary in range 2.

The stream has no definite or permanent source of supply, and derives its discharge principally from the melting of snow, which accumulates in numerous coulees during the winter months. The period of flow therefore is in general confined to the spring months while the melting snow is passing off. Very heavy rains sometimes cause a flow, but the drainage area being absolutely devoid of tree growth the run-off is very rapid.

After entering the United States, Sage Creek spreads out over a large dry lake which has no outlet. This lake is about ten miles long and averages one and a half miles in width, and lies close to the boundary. The lake is bounded on the south by a low range of hills and at some time has held two or three feet of water at its deepest parts. Since 1908 there has been no water in the lake.

SAGE CREEK AT WILD HORSE POLICE DETACHMENT.

This station was established on August 10, 1909, by F. H. Peters. It is located on the N.E. $\frac{1}{4}$ Sec. 9, Tp. 1, Rge. 2, W. 4th Mer., about one and a quarter miles from Wild Horse police post. It is about 115 miles by trail from Milk River P.O.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to a post in the centre of the channel. The zero of the gauge (elev. 93.36) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the right bank 1020 feet south and 600 feet east of $\frac{1}{4}$ mound north of Sec. 9.

The channel is straight for 40 feet above and below the station. The banks are composed of hard clay, and are high, but liable to overflow. The bed is composed of hard gumbo clay.

Discharge measurements are made with a meter by wading. The initial point for soundings is the face of a post on the right bank, marked "I.P." in red paint.

During 1913, the gauge was read by George Sherwood. As no discharge measurements were obtained during the season no estimate of the discharge has been made.

LODGE CREEK DRAINAGE BASIN.

General Description.

Lodge Creek, which rises in township 7, range 3, west of the fourth meridian, flows in a southerly direction for about 12 miles, then turns southeastward, crosses the international boundary in section 4, township 1, range 28, west of the third meridian, and eventually empties into Milk River Chinook, Montana. Its principal tributary is Middle Creek, which joins it in section 4, township 2, range 29, west of the third meridian.

Near its head the valley is very deep and narrow but it broadens out considerably lower down, giving rise to large flats and meadows. The upper part of the drainage basin is cut up to a great extent by deep coulees which drain into the creek. This part of the creek is thickly covered with brush along the banks, but lower down it is totally devoid of tree growth. The valley is rather unproductive owing to the absence of moisture but a few good hay meadows have been developed along its course through the storage of the flood waters and their application to the soil by irrigation. As is the case with many of the streams in this locality the flow in Lodge Creek, is not continuous throughout the year, the creek being dry, with the exception of pools of standing water, during the greater part of the summer months. At flood stages the creek carries a considerable amount of water and as a result its channel is wide and well defined throughout the whole length of its course.

Three stations have been established on the main stream, at Willow Creek Police detachment near the international boundary, at Hart's ranche near the head of the creek and about midway between these last two at Hester's ranche near the fourth meridian. Descriptions of these stations are given below.

EAST BRANCH OF LODGE CREEK AT ENGLISH'S RANCHE.

This station was established on October 7, 1911, by M. H. French. It is located at James English's ranche in the S.E. $\frac{1}{4}$ Sec. 1, Tp. 7, Rge. 3, W. 4th Mer., about 150 feet north of his house. It is five miles above the junction with the main creek and about 45 miles by trail from Medicine Hat.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a post sunk in the bed of the stream near the right bank. The zero of the gauge (elev. 95.35) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the left bank four feet from the initial point for soundings and in line with the regular cross section.

The channel is straight for about 50 feet above and 25 feet below the station. Both banks are wooded and high enough to contain the stream during all stages. The bed is composed of very coarse gravel and will not shift.

Discharge measurements are made with a meter by wading, a short distance above the gauge. The initial point for soundings is a four inch stake, one foot above ground, on the left bank.

During 1913, the gauge was read by Mrs. Annie English.

Water is diverted from this stream at a point about three miles above this station, by James English. During the irrigation season almost the total flow is diverted.

ANDERSON DITCH NEAR THELMA.

This station was established on September 23, 1911, by W. A. Fletcher. It is located on the S.W. $\frac{1}{4}$ Sec. 23, Tp. 6, Rge. 3, W. 4th Mer., about fifteen feet below the intake of the ditch, and about one quarter of a mile from Robert Anderson's house.

The gauge, which is a plain staff graduated to feet and inches, is fixed to a post at the left bank of the ditch. The zero of the gauge (elev. 98.64) is referred to the top of a stake (assumed elev. 100.00), about five feet southeast of the gauge.

The channel is straight for twenty feet above and thirty feet below the gauge. Both banks are low but are not liable to overflow. The bed is composed of clay and gravel and is not liable to shift.

Discharge measurements are made by wading near the gauge. The initial point for soundings is the inner face of the post used as a bench mark.

No water was diverted during 1913.

LODGE CREEK AT HARTT'S RANCHE.

This station was established July 22, 1909, by F. T. Fletcher. It was originally located just north of the road allowance between Secs. 10 and 15, Tp. 6, Rge. 3, W. 4th Mer., but was moved on June 22, 1912, by G. R. Elliott, about 800 feet downstream to the N.W. $\frac{1}{4}$ Sec. 10, Tp. 6, Rge. 3, W. 4th Mer., about one mile below the junction of the east branch. It is about 45 miles by trail south of Medicine Hat.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a support on the upstream side of the wooden bridge near Mr. Hartt's house. The zero of the gauge (elev. 83.33) is referred to a permanent iron bench mark, (assumed elev. 100.00), which is located at the permanent section on the left bank, five feet south of the initial point for soundings and in line with the section.

The channel is straight for about 200 feet above and 50 feet below the station. The banks are high, steep and not liable to overflow. Both are covered with a dense growth of willow brush. The bed of the stream is composed of soft clay and there is one channel at all stages. At periods of no flow, water stands at a depth of as much as two feet at the gauge.

Discharge measurements are made during high water with a meter at the gauge. At ordinary stages measurements are made with a meter by wading, 840 feet upstream. The initial point for soundings is the face of a four inch post marked "I.P." located on the left bank, 300 feet north and 215 feet west of the gauge.

During 1913, the gauge was read by Mrs. Ed. Hartt.

LODGE CREEK AT HESTER'S RANCHE.

This station was established August 31, 1912, by G. R. Elliott. It is located on the N.E. ¼ Sec. 36, Tp. 3, Rge. 1, W. 4th Mer., and is about seventeen miles by trail west from Govenlock P. O., Sask.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to^a a heavy post, sunk in the bed of the stream at the right bank, 305 feet S.33° E. of the quarter

mound of Sec. 36, Tp. 3, Rge. 1, W. 4th Mer. The zero of the gauge (elev. 87.51) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the right bank immediately back of the initial point.

The channel is straight for 100 feet above and 30 feet below the station. The banks are high, brush covered, and are not liable to overflow. The bed is composed of clean gravel.

Discharge measurements are made at the gauge, at ordinary stages by wading and at low stages by a weir. The initial point for soundings is the face of a five inch post on the right bank marked "I.P" in knife cuts.

During 1913, the gauge was read by Miss Marcia Hester.

MIDDLE CREEK AT MCKINNON'S RANCHE.

This station was established June 21, 1910, by H. R. Carseallen. It is located on the S.W. $\frac{1}{4}$ Sec. 35, Tp. 5, Rge. 1, W. 4th Mer., about 11 miles southwest of Battle Creek P. O.

The gauge, which is a plain staff graduated to feet and hundredths, is spiked to a braced post sunk in the bed of the stream at the left bank. The zero of the gauge (elev. 91.47) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the left bank about five feet from the edge, on the line of the cross section and 664 feet N. 41° 30' E of the N.E. corner Sec. 27, Tp. 5, Rge. 1, W. 4th Mer.

The channel is almost straight for about 150 feet above and 100 feet below the station. The right bank is high with a gradual slope; the left bank is high and steep. Neither bank is liable to overflow except in extreme flood. The bed of the stream is composed of sand and coarse gravel.

At ordinary stages, discharge measurements are made with a weir, and at high stages with a current meter by wading.

During 1913, the gauge was read by Angus McKinnon.

Springs just above this station keep the creek flowing all summer although a few miles below it is dry a large portion of the season.

MIDDLE CREEK AT ROSS' RANCHE.

This station was established July 20, 1909, by H. R. Carseallen. It is located on the S.W. ¼ Sec. 30, Tp. 5 Rge. 29 W. of 3rd Mer. about four miles southwest of Battle Creek, P. O.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a post sunk in the bed of the stream at the right bank and securely stayed. The zero of the gauge (elev. 3290.98) is referred to a permanent iron bench mark (elev. 3297.37 irrigation surveys), situated on the right bank.

The channel is straight for 50 feet above and below the station. The right bank is high, but the left is low and liable to overflow in flood stages of the stream. The bed of the stream is composed of sand and coarse gravel with a little vegetation at the station, and may shift slightly during high water. There is only one channel at low stages but in extreme flood stages, water breaks out over the left bank and forms two channels. The current is sluggish at low stages and moderate at higher stages.

Discharge measurements are made with a weir at ordinary summer stages and with a current meter by wading at high stages.

During 1913, the gauge was read by Maurice Ross.

The stream would be dry most of the summer at this station if it were not for the discharge of a few springs a short distance above. A part of the run-off of the drainage basin above this station is held back by dams at Wright's and McKinnon's ranches and used for irrigation purposes.

MIDDLE CREEK AT HAMMOND'S RANCHE.

This station was established June 13, 1910, by H. R. Carscallen. It is located at Hammond's ranche, on the N.W. ¼ Sec. 4, Tp. 2, Rge. 29, W. 3rd Mer., about seven miles above the Willow Creek police detachment and about one quarter of a mile above the junction of Middle and Lodge Creeks.

The gauge, which is a plain staff graduated to feet and hundredths, is spiked to a post sunk in the bed of the creek near the left bank. An auxiliary gauge, reading from ten to fourteen feet, is located near the top of the left slope opposite the main gauge. The zero of the gauge (elev. 87.60) is referred to a permanent iron bench mark (assumed elev. 100.00), on the left bank. The "B.M." is about six inches above ground and is protected by a mound of stones. It is also used as the initial point for soundings.

The channel is straight for 200 feet above and 125 feet below the station. Both banks are high and fairly steep, free from brush and not liable to overflow. The bed of the stream is sandy and may shift at high stages. The station, being located only a short distance above the junction with Lodge Creek, may be affected by backwater from that creek during high water stages.

Discharge measurements are made at the station by wading and at extreme low stages a weir may be used. High water measurements are not attainable as there is no structure at or near the station to support the engineer in taking the gaugings when the water becomes too deep for wading. The initial point for soundings is the permanent bench mark.

During 1913, the gauge was read by Mrs. D. A. Hammond.

- a* Gauge height interpolated.
- b* Creek dry for remainder of season.
- c* These gauge heights are probably a little high on account of back water.

a Creek dry from August 2 to end of year.

LODGE CREEK AT WILLOW CREEK POLICE DETACHMENT.

This station was established on August 13, 1909, by F. H. Peters. It is located on the S.E. ¼ Sec. 12, Tp. 1, Rge. 29, W. 3rd Mer., about 500 feet east of the house at Willow Creek Police Detachment. It is about 75 miles by trail from Maple Creek, and about 35 miles by trail south of Battle Creek P.O.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to a post at the right bank. An auxiliary gauge, reading from ten to fourteen feet is located near the top of the right slope opposite the main gauge. The zero of the gauge (elev. 2721.06) is referred to a concrete bench mark (elev. 2768.00 above mean sea level) which was set by the International Boundary Survey, upon a hill about 500 feet west of the gauge.

The channel is straight for 400 feet above and 300 feet below the station. The right bank, is high, clean, grassy and will not overflow. It forms a bench part way up which is covered at very high stages. The left bank is high and steep and will not overflow. The narrow low-water channel is gravelly, the remainder is grass covered. There is one channel at all stages.

During ordinary stages of flow, discharge measurements are made by wading, and at very low stages a weir is used. A cable structure was erected at this station during 1913 for use in obtaining high water measurements.

During 1913, the gauge was read by William Tudgay and M. Dunnigan.

BATTLE CREEK DRAINAGE BASIN.

General Description.

Battle Creek, rises in Tp. 8, Rge. 2, W. 4th Mer., and flows in an easterly direction for about eight miles where it crosses the 4th meridian, then turns in a southeasterly direction and crosses the international boundary in Sec. 3, Tp. 1, Rge. 26, W. 3rd Mer., eventually emptying into Milk River near Chinook, Montana. As is characteristic of the streams in this locality, the valley is narrow and deep near the source and gradually broadens out into large flats and meadows. These large flats are first noticed in the vicinity of Battle Creek P.O. Near the head of the stream the valley is well wooded with fair sized timber, but this diminishes to a growth of willow brush along the banks and finally disappears altogether.

The chief tributaries of Battle Creek are Tenmile Creek, joining it in Sec. 4, Tp. 6, Rge. 29, W. 3rd Mer., and Sixmile Coulee, joining it in Sec. 21, Tp. 6, Rge. 29, W. 3rd Mer. Stations have been established on both of these streams.

There are three stations on Battle Creek, at the following places:—Nash's ranche, Wilkes' ranche and Tenmile police detachment.

Although it will be several years before it reaches its fullest development, the irrigation of the flats along the creek is increasing every year. This, it is expected, will result in a more uniform flow in the creek, as a certain amount of the water diverted by the irrigation ditches will be returned to the creek through seepage.

The principal irrigation schemes under development at the present time are Marshall and Gaff's near Battle Creek P.O., and Richardson's, McKinnon's, Stirling's and Nash's, near Kelvindhurst P.O.

CHEESEMAN DITCH NEAR COULEE.

This station was established on June 24, 1911, by W. A. Fletcher. It is located in the S.W. $\frac{1}{4}$ Sec. 12, Tp. 8, Rge. 29, W. 3rd Mer., about 50 yards from Ben Cheeseman's house.

The gauge, which is a plain staff graduated to feet and inches, is nailed to a post at the left bank. The zero of the gauge (elev. 96.00) is referred to the top of a stake (assumed elev. 100.00), driven in the ground six feet southwest of the gauge.

The channel is straight for 40 feet above and 30 feet below the station. The bottom of the ditch is composed of clay.

Discharge measurements of ordinary flow are made with a weir. For high discharges a current meter is used. The bench mark is used as the initial point for soundings.

During 1913, the ditch was used for 31 days, but not enough measurements were taken to calculate discharge.

SPANGLER'S DITCH NEAR BATTLE CREEK.

This station was established on July 10, 1911, by W. A. Fletcher. It is located on the S.W. $\frac{1}{4}$ Sec. 6, Tp. 7, Rge. 28, W. 3rd Mer., about one quarter mile below the intake of the ditch. The station was moved one quarter mile upstream to its present location on June 4, 1912, by G. R. Elliott. It is about one quarter mile above J. M. Spangler's house and the gauging station on Sixmile Coulee.

The gauge, which is a plain staff graduated to feet and inches, by saw cuts, is fixed to a braced plank at the left bank. The zero of the gauge (elev. 96.57) is referred to the top of the final point stake (assumed elev. 100.00) on the left bank.

The channel is straight for 30 feet above and 30 feet below the station. The banks are high, clean, grassy and are not liable to overflow. The bed is soft clay.

Discharge measurements are made with a current meter by wading. The initial point for soundings is the face of a stake six inches high on the right bank marked "I.P."

During 1913, the gauge was read by J. M. Spangler.

SIXMILE COULEE AT SPANGLER'S RANCHE.

This station was established July 22, 1909, by H. R. Carscallen. On June 11, 1911, it was moved five miles downstream by M. H. French, and is now located on the S.W. ¼ Sec. 6, Tp. 7, Rge. 28, W. 3rd Mer., and is 150 feet from J. M. Spangler's house. It is 34 miles by trail southwest of Maple Creek and six miles north of Battle Creek P.O.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a post sunk in the bed of the stream at the left bank. The zero of the gauge (elev. 96.77) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the left bank in line with the gauging section, and 750 feet east and 290 feet south of the N.E. corner of Sec. 35, Tp. 6, Rge. 29, W. 3rd Mer.

The channel turns through about 90 degrees at the station and is straight for about 50 feet above and 100 feet below. The banks are covered with brush which causes back water during flood stages. The bed of the stream is composed of sand and gravel, but is not liable to shift. There is a large pond of standing water at the station and at low stages there is practically no current.

Discharge measurements are made at a permanent cross section, 850 feet south and about 2000 feet downstream from the gauge, with a current meter by wading. The initial point for soundings is a four inch post on the right bank, 56.2 feet from the final point, which is the permanent bench mark. At high water, discharge measurements are made at the bridge 100 feet below the gauge.

During 1913, the gauge was read by J. M. Spangler.

Water is diverted about one half mile above the station by J. M. Spangler. Water was diverted for one month and a half during 1913. The discharge of Spangler's ditch should be added to obtain the total run-off for the station.

a Creek not running Aug. 29—Sept. 22.

LINDNER'S DITCH NEAR BATTLE CREEK.

This station was established July 26, 1910, by H. R. Carseallen. It is located on the N.W. ¼ Sec. 10, Tp. 6, Rge. 29, W. 3rd Mer., about 100 feet west of the surveyed trail to Maple Creek. It is about a quarter of a mile south of Battle Creek P. O. and about 500 yards below the intake of the ditch.

The gauge is a plain staff, graduated to feet and hundredths, driven firmly into the bed of the ditch near the right bank about twelve feet upstream from the weir.

The channel is straight for 200 feet above and 150 feet below the station, where it curves sharply to the right and enters Lindner Bros' hay meadow, and is diverted into a number of different laterals for irrigation purposes. The bed of the ditch is composed of clay and coarse gravel. The current is swift below the station.

Discharge measurements are made by means of a 42 inch rectangular sharp-crested weir with complete end contractions.

During 1913, the gauge was read by Phil Lindner.

The discharge at this station must be added to that of Battle Creek at Tenmile police detachment, when computing the total run-off for the latter station.

TENMILE CREEK AT TENMILE POLICE DETACHMENT.

This station was established July 21, 1909, by H. R. Carscallen. It is located on the S.E. ¼ Sec. 4, Tp. 6, Rge. 29, W. 3rd Mer. It is about 2,500 feet north of the steel highway bridge and gauging station on Battle Creek, and about 1,000 feet north of Tenmile police detachment.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a post sunk in the bed of the stream at the right bank, 500 feet above the junction of this stream with Battle Creek. The zero of the gauge (elev. 95.94) is referred to the permanent iron bench mark at the Battle Creek station (assumed elev. 100.00).

The channel is straight for 100 feet above and 30 feet below the station. Both banks are high, clean, grassy, and are not liable to overflow. The bed is composed of sand and coarse gravel. The current is swift above and below but is sluggish at the gauge.

Discharge measurements are made above the gauge at ordinary stages by a weir, and at high stages with a meter by wading. The initial point for soundings is a four inch stake with "I,P" carved on the face, on the left bank, 70 feet upstream from the gauge.

During 1913, the gauge was read by W. G. Paterson.

BATTLE CREEK AT TENMILE POLICE DETACHMENT.

This station was established June 3, 1909, by F. T. Fletcher. It is located below the mouth of Tenmile Creek, at the highway bridge on the surveyed trail from Maple Creek to Tenmile, and about 400 yards from the Tenmile police detachment. It is practically in the centre of the N.E. ¼ Sec. 33, Tp. 5, Rge. 29, W. 3rd Mer., about two miles south of Battle Creek Post Office and 55 miles south of Maple Creek. The bridge is a steel structure of the pony truss type, consisting of one 80 foot span, supported by two timber, rock-filled piers and having a twenty foot approach at each end of the bridge. There is only one channel at all ordinary stages of the stream, but owing to the presence of the two piers supporting the truss there are three channels at times of floods.

The gauge, which is of the standard chain type, is located about the centre of the steel truss and is securely fastened to the guard-rail on the downstream side of the bridge. The length of the chain from the bottom of the weight to the marker is 19.11 feet. The zero of the gauge (elev. 86.84) is referred to a permanent iron bench mark (assumed elev. 100.00) at the northeast corner of the bridge. The bench mark stands about three inches above ground and is well protected by rock. It is nine feet southwest of road diversion pin "R.5" and thirty feet northeast of the north end of the bridge pier.

The channel is straight for 500 feet above and 300 feet below the station. Both banks are high and not liable to overflow except in extreme floods, when the water breaks over the right bank some distance above the station and flows around the bridge. The right bank is free of brush for some distance above and below the station; the left bank is sparsely covered with willows near the station. The bed of the stream is sandy and may shift somewhat in in high stages of the stream. The current is very sluggish, and at very low stages vegetation appears in the bed of the stream at the station. During the summer months there is a heavy growth of weeds in the bottom of the channel which retards the water and alters conditions at the station.

Discharge measurements are made from the downstream side of the bridge. The initial point for soundings is the inner face of the right abutment. Low-water measurements are made by wading near the bridge:

During 1913, the gauge was read by W. G. Paterson.

MARSHALL AND GAFF DITCH NEAR TENMILE POLICE DETACHMENT.

This station was established on July 11, 1911, by W. A. Fletcher. It is located in the N. E. $\frac{1}{4}$ Sec. 33, Tp. 5, Rge. 29, W. 3rd Mer., about one half mile below the regular station, upon Battle Creek near Tenmile police detachment.

The gauge, which is a plain staff graduated in feet and inches, is nailed to a post sunk in the ditch near the right bank, 250 feet below the headgate. The zero of the gauge is referred to the top of a three inch stake on the right bank near the gauge.

The channel is straight for 100 feet above and 40 feet below the station. The bed is muddy and covered with weeds.

Measurements are made at the station with a current meter by wading. The initial point for soundings is the bench mark.

Not sufficient daily gauge height records were received during 1913 to accurately compute the discharge. Records at a point three miles downstream are given under Gaff ditch.

GAFF DITCH NEAR TENMILE POLICE DETACHMENT.

This station was established on July 11, 1911, by W. A. Fletcher. It is located on the S.W. $\frac{1}{4}$ Sec. 25, Tp. 5, Rge. 29, West of the 3rd Mer., about half a mile from Mr. Gaff's house.

The gauge, which is a plain board divided into feet and inches, is nailed to a post at right bank. The zero of the gauge (elev. 96.90) is referred to the top of a stake driven in the ground three feet southwest of the gauge (assumed elev. 100.00).

The channel is straight for 200 feet above and 300 feet below the station. The bottom of the ditch is composed of a sandy loam.

Discharge measurements are made with a current meter by wading. The initial point for soundings is the bench mark stake.

During 1913, the gauge was read by J. A. Gaff.

BATTLE CREEK AT WILKES' RANCHE.

This station was established July 5, 1910, by H. R. Carseallen. On May 29, 1912, it was moved seven miles downstream by G. R. Elliott. It is located on the N.W. ¼ Sec. 33, T.p. 5, Rge. 27, W. 3rd Mer., and is twelve miles straight east of Tenmile police detachment and about ten miles north of Kelvinhurst Post Office.

The gauge, which is a plain staff graduated to feet and hundredths is nailed to a well-braced post sunk in the bed of the stream at the left bank, and is 120 feet from Wilkes' house. The zero of the gauge (elev. 90.01) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the left bank 750 feet downstream from the gauge.

The channel curves at the gauge. Both banks are fairly high, sandy and not liable to overflow. The bed is composed of clean sand and is somewhat shifting.

Discharge measurements are made with a current meter by wading. The initial point for soundings is a five inch stake marked "I.P." in red paint, located on the left bank, 1700 feet downstream from the gauge. The final point, 171 feet distant, is 654 feet north and 255 feet east of the quarter mound east of Sec 32, Tp. 5, Rge. 27, W. 3rd Mer.

During 1913, the gauge was read by Mrs. Bertha Wilkes.

Water was diverted in 1913 during June by Marshall and Gaff's ditch, twenty miles above this station.

GILCHRIST BROTHERS DITCH NEAR KELVINHURST.

This station was established on October 16, 1911, by F. T. Fletcher. It is located on the S.W. ¼ Sec 11, Tp 5, Rge 27, W. 3rd Mer., at the intake to the ditch.

The gauge, which is a plain staff graduated to feet and inches, is nailed to the right side of a flume at a point 45 feet from the intake gate. The zero of the gauge (elev. 96.92) is referred to the top of a post (assumed elev. 100.00) at the lower end of the flume.

Discharge measurements are made with a current meter. The initial point for soundings is the right side of the flume at the gauge. Low discharges are measured with a weir below the flume.

Water was diverted for eight days during June after the ditch had been repaired, to inspect the grades, but discharge measurements were not obtained

STIRLING AND NASH DITCH NEAR KELVINHURST.

This station was established on July 11, 1911, by F. M. French. It is located on the S.E. $\frac{1}{4}$ Sec. 22, Tp. 3, Rge 27, W 3rd Mer., and is about one mile from the headgate of the ditch and 1,000 feet east of Stirling Brothers' house.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a post and braced to a small bridge near the centre of the ditch. The zero of the gauge (elev. 94.81) is referred to the top of a stake (assumed elev. 100.00), on the right bank.

The ditch is straight for 1,000 feet above and 600 feet below the gauge. The cross-section is uniform and the bed and banks of the ditch are in good condition at this point.

At ordinary stages, discharge measurements are made with a current meter by wading near the gauge, but during low water a weir is used.

During 1913, the gauge was read by Robert Stirling.

Sufficient discharge measurements have not been made to determine accurately the discharge for 1913. The ditch was in used for 21 days from June 28th to July 19th.

BATTLE CREEK AT NASH'S RANCHE.

This station was established May 11, 1910, by N. M. Sutherland. It is located on the N.E. $\frac{1}{4}$ Sec. 3, Tp. 3, Rge 27, W. 3rd Mer., and is 270 feet west of E. R. Nash's house. It is about 70 miles by trail from Maple Creek.

The gauge, which is a plain staff graduated to feet and hundredths, is fastened to a post sunk in the bed of the stream at the left bank. The zero (elev. 90.23) is referred to a permanent iron bench mark (assumed elev. 100.00) on the left bank, seven feet east of the initial point of soundings, and in the line of the cross-section. The bench mark is also 1903 feet S. 81°, 28 W. from the N. E. cor., Sec. 3, Tp. 3, Rge.27, W. 3rd Mer. It is about eight inches above ground and is protected by a mound of rock.

The stream flows in one channel 45 feet wide at ordinary stages. The channel is straight for 250 feet above and 300 feet below the station. The right bank is solid clay, high and not liable to overflow. The left bank is also of clay, but is low, and liable to overflow during high stages of the stream. The bed of the stream is composed of sand and gravel and may shift in high stages of the stream.

Discharge measurements are made at ordinary stages with a current meter by wading. At high stages the stream cannot be waded and the discharge is computed from slope measurements. The initial point for soundings is the face of a five inch post on the left bank, 27 feet upstream from the gauge and marked "I.P." in red paint.

During 1913, the gauge was read by E. R. Nash.

a Weir measurement.

FRENCHMAN RIVER DRAINAGE BASIN.

General Description.

Frenchman River drains the greater portion of southwestern Saskatchewan. It rises in Cypress Lake in Tp. 6, Rge. 26, W. 3rd Mer., and follows a southeasterly course for about 150 miles, crossing into the United States in Range 10, West of the Third Meridian. It eventually finds its way into Milk River near Saeco, Montana, and therefore forms a part of the general drainage basin of the Missouri.

Cypress Lake is on the southern slope of Cypress Hills at an elevation of about 3155 feet above sea level. It occupies what is probably a portion of an abandoned water course or channel of an ancient river, which joined Battle Creek to the Frenchman River. The water of the lake is fresh and is supplied by a number of coulees and small streams which rise in the hills to the north. The largest of these are Oxarart and Sucker Creeks, both of which have a small continuous flow.

During dry years Cypress Lake does not overflow and the whole discharge of the Frenchman River is derived from Belanger, Davis and Fairwell Creeks and the north branch. From Township 6, Range 23, West of the Third Meridian, where the north branch joins the main stream, there is no appreciable supply to the river while in Canada. Mule Creek which joins the river in Township 5, Range 17, West of the Third Meridian, and Snake Creek in Township 3, Range 13, West of the Third Meridian, however, have a small flow.

The country surrounding Cypress Lake is of rolling prairie much broken by coulees. In many of these there is considerable tree growth but for the most part the country is devoid of all vegetation other than grasses. All the streams in the upper section of the drainage basin, with the exception of the north branch, rise on the plateau at the top of the hills. Flowing southward they break through deep well wooded gorges before reaching the lower flats along the river. The north branch, however, is in a deep valley throughout its entire length. Its feeders, like the western tributaries of the main stream, cut through from the bench to the valley in deep well wooded coulees. Below the mouth of the north branch there is little tree growth. Here and there along the river may be found small growths of shrubs and maple while up on the hillsides in some of the coulees there are small clumps of poplar covering an acre or so. Most of these coulees are rapidly becoming cleared by the settlers who are taking up the bench lands above the river valley. The benches are well covered with grasses but the hills and sides of the valley are almost devoid of vegetation. In the flats along the river, except where irrigated, the chief vegetation consists of sage-brush and cactus.

When the Frenchman River leaves the lake, it flows through a wide flat valley as far as mouth of Fairwell Creek. Most of this land is under proposed or constructed irrigation ditches, the covering an area of about 393 acres. Below this point the valley becomes more broken and narrows considerably while the side hills become higher. Small portions of this bottom will no doubt be brought under irrigation, but as yet little has been done in that direction.

Below the junction of the north branch the valley becomes rough and rugged, the sides being cut with buttes and deep coulees. Here numerous outcroppings of lignite may be seen and also a deep seam of light colored clay and sand. This seam, which has been bleached

almost a pure white shows at many points along the river's entire course and is one of the most conspicuous objects in this region. From its color and nature the river receives its local name of the "Whitemud".

At East End, some miles lower down, the valley again widens out into flats. Here is located the largest irrigation project in the Cypress Hills district. Messrs. Strong and Day have a large dam in the river and a system of ditches and storage reservoirs, by which they irrigate 2,581 acres. Directly above this project there are two smaller schemes covering 200 acres. Just below, Messrs. Morrison Brothers have a dam and ditch which will irrigate 1,595 acres. Their ditch is carried across the river and continued by Messrs. Duncan and Watson who irrigate 935 acres more.

Below the East End flat none of the flats, which occur at various points along the river, are irrigated as yet. A short distance below the mouth of Snake Creek, the river enters badlands which continue into the United States.

The mean annual rainfall of this basin is not well established, but it is estimated that it would range from 12 to 16 inches, most of which falls in May, June and July. From November to April, the streams are frozen over and usually there is an abundant snowfall.

OXARART CREEK AT WYLIE'S RANCHE.

This station was established June 15, 1909 by H. R. Carscallen. It is located on the N.E ¼, Sec. 20, Tp. 6. Rge. 27, W. 3rd Mer., three miles above the point where the creek flows into Cypress Lake, and thirty-five miles south of Maple Creek. It is above the intake of Joseph Wylie's irrigation ditch.

The gauge, which is a plain staff graduated to feet and hundredths, is attached to a braced post sunk in the bed of the stream at the left bank. The zero of the gauge (elev. 3199.03) is referred to a permanent iron bench mark (elev. 3203.75 above mean sea level irrigation surveys), situated on the right bank, four feet from the final point stake and in line with the cross section.

The channel is straight for ten feet upstream, at which point four small courses converge. It is straight for twenty feet downstream and then is turned almost at right angles by Mr. Wylie's dam. Both banks are low and sodded and are liable to overflow at very high stages. The bed is coarse gravel and shifts during floods. During high stages the creek has several channels. On account of the porous gravel bed there is considerable seepage near the gauge.

Discharge measurements are made during high stages at the gauge with a current meter by wading. The initial point for soundings is a square stake, driven close to the ground on the left bank and marked "I.P.". During ordinary stages measurements are made seventy five feet downstream from the gauge, where the current is swift.

During 1913, the gauge was read by Mrs. Rachel Wylie.

SUCKER CREEK AT WHITCOMB AND ZEIGLER'S RANCHES.

This station was established May 26, 1909, by H. R. Carscadden. It is located on the N.W. ¼ Sec. 24, Tp. 6, Rge. 26, W. 3rd Mer., about five miles south of Belanger post office and about thirty-two miles south of Maple Creek.

The gauge, which is a plain staff graduated to feet and hundredths, is attached to a vertical post sunk in the bed of the stream and securely stayed to the left bank. The zero of the gauge (elev. 3191.11) is referred to a permanent iron bench mark (elev. 3196.25 feet above

SESSIONAL PAPER No. 25c

mean sea level, Irrigation Surveys.) located 60' S.W. of the rod, which is 590 ft. N. 69°E. of the N.E. corner Sec. 23, Tp. 6, Rge. 26, W. 3rd Mer.

The channel is straight for 50 feet above and 25 feet below the station. Both banks are low, sparsely covered with brush, and will overflow at high stages. The bed of the stream is composed of sand and coarse gravel. The current is sluggish at the station but swift immediately below.

Discharge measurements are made with a meter at or near the gauge by wading and at very low stages a weir is used. It is difficult to make accurate gaugings during high water, as the water overflows the banks.

During 1913, the gauge was read by Mrs. P. A. Zeigler.

LONEPINE CREEK AT HEWITT'S RANCHE.

This station was established July 17, 1909, by H. R. Carsecallen. It is located on the N.W. $\frac{1}{4}$ Sec. 27, Tp. 7, Rge. 26, W. of 3rd Mer., about two miles west of the surveyed trail from Belanger post office to Maple Creek, and about four miles west of Belanger.

The gauge, which is a plain staff graduated to feet and hundredths, is attached vertically to a post sunk in the bed of the stream at the right bank and securely stayed in place. The zero of the gauge (elev. 93.35) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the right bank fifty feet west of the gauge.

The channel is straight for about 35 feet above and 45 foot below the station. The right bank is high and not liable to overflow; the left is comparatively low and will overflow at high stages of the stream. The surface of the ground on the left bank is very rough and broken. The bed of the stream is composed of sand and coarse gravel. The current is smooth and swift.

On June 27, 1913, a permanent 15" weir was placed on this creek along with a gauge, which was read during the remainder of the season. The elevation of the crest of the weir and zero of the gauge rod is 96.34, referred to the permanent iron bench mark at the old station.

During 1913, the gauge was read by S. W. Hewitt.

This station is below ditches constructed by A. P. McDonald and S. W. Hewitt and in the case of water being used in these ditches the records at the gauge do not give the complete discharge of the creek.

BELANGER CREEK AT GARRISON'S RANCHE.

This station was established June 12, 1909, by H. R. Carsecallen. It is located on the S.W. $\frac{1}{4}$ Sec. 18, Tp. 7, Rge. 25, W. 3rd Mer., one hundred and fifty yards west of Garrison's ranche (Belanger P.O.), and about twenty seven miles south of Maple Creek.

This station was abandoned in June 1913 on account of the difficulty of securing a reliable observer. The station at Oakes' ranche $5\frac{1}{2}$ miles downstream is maintained instead.

^a This measurement was made $\frac{1}{4}$ mile upstream from old station after gauge rod was moved to new station.

BELANGER CREEK AT OAKES' RANCHE.

This station was established on March 31, 1912, by M. H. French. It is located on the S.W. $\frac{1}{4}$ Sec. 30 Tp. 6, Rge. 25, W. 3rd Mer., at Oakes' ranche and about 35 miles south of the town of Maple Creek.

The gauge, which is a plain staff graduated to feet and hundredths, is attached to a vertical post sunk in the bed of the stream and securely stayed to the left bank. The zero of the gauge (3164.10) is referred to a permanent iron bench mark (elev. 3168.57 feet above mean sea level, Irrigation Surveys) and located 80' S.W. of the rod.

The channel is straight for about 50 feet above and below the gauge. The left bank is heavily wooded. Both banks are low and liable to overflow during floods. The bed of the stream is composed of sand and gravel and is liable to shift.

Discharge measurements are made by wading at a graded cross section about 25' above the gauge; the initial point for soundings is a willow stake, driven in the right bank and marked "I.P".

During 1913 the gauge was read by E. C. R. Harris.

Practically no water was diverted from this creek during 1913.

DAVIS CREEK AT DRURY'S RANCHE.

This station was established May 24, 1909, by H. R. Carscallen. It is located on the N.E. ¼ Sec. 29, Tp. 6, Rge. 25, W. 3rd Mer., about five miles southeast of Belanger P.O., and about one-half mile from the mouth of the creek.

The gauge, which is a plain staff graduated to feet and hundredths, is attached to a vertical post sunk in the bed of the stream and securely stayed to the right bank. The zero of the gauge (elev. 3176.79) is referred to a permanent iron bench mark (elev. 3183.06 feet above mean sea level, Irrigation Surveys) located about 25 feet west of the gauge.

The channel is straight for 150 feet above and 200 feet below the station. The right bank is comparatively high and will not overflow except in cases of extreme flood; the left bank is low and will overflow at high-water stages of the stream. Both banks are covered with brush. The bed of the stream is composed of sand and coarse gravel and there may be a slight subsurface flow at this point. The current is swift.

Discharge measurements are made at or near the gauge by wading. Owing to the left bank being low, high-water measurements cannot be made. Considerable annoyance is experienced by the construction of dams below the gauge by beavers.

During 1913, the gauge was read by E. C. R. Harris.

There are one or two proposed irrigation schemes on the head-waters of this stream, but as yet there has been no diversion of water.

FAIRWELL CREEK AT DRURY'S RANCHE.

This station was established June 10, 1909, by H. R. Carscallen. It is located about eleven miles southeast of Belanger P.O., at Drury's rancho, on the N.W. ¼ Sec. 30, Tp. 6, Rge. 24, W. 3rd Mer.

The gauge, which is a plain staff graduated to feet and hundredths, is attached to a vertical post sunk in the left bank. The zero of the gauge (elev. 95.13) is referred to a permanent iron bench mark (assumed elev. 100.00), located about 20 feet southeast of the gauge. An auxiliary rod was located on this creek to enable gauge heights to be made during extreme high water. The zero of the auxiliary rod has the same elevation as the main rod and is referred to the same bench mark.

View in Valley of Fairwell Creek near East End, Saskatchewan.

View of Frenchman River near Seventy-mile Crossing, Saskatchewan.

The channel is straight for 75 feet upstream, but curves slightly to the right for 50 feet downstream. Both banks are comparatively low and will overflow at high stages of the stream. The banks are covered with brush above and below the station. The bed of the stream is composed of sand and coarse gravel. The current is sluggish at the station, but is swift a short distance below.

Discharge measurements are made by wading, a short distance below the gauge. Owing to the low banks, high water measurements cannot be made. The initial point for soundings is a square stake driven close to the ground at the left bank and marked "I.P."

During 1913, the gauge was read by Ivan A. F. Harris.

There are a number of proposed irrigation schemes which will take their supply from this stream at points above the gauging station. Armstrong and Sons were the only ones to divert water during the season of 1913.

FRENCHMAN RIVER AT GORDON'S RANCHE.

This station was established July 10, 1912, by G. H. Whyte. It is situated about three miles below the mouth of Fairwell Creek and about six miles above the mouth of the North Branch of Frenchman River. It is located on the N.W. ¼ Sec. 16, Tp. 6, Rge. 24, W. 3rd Mer.

The gauge, which is of the chain type, is spiked horizontally to two 8" by 8" posts sunk in the right bank and situated about 60 feet upstream from the cable. The zero of the gauge

SESSIONAL PAPER No. 25c

(elev. 85.69) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the right bank 150 feet west of the gauge. The length of chain from the marker to the bottom of the weight is 16.98 feet.

The river flows in one channel at all stages, which is straight for about 100 feet above and below the station. Both banks are slightly wooded, high and not liable to overflow except in extreme flood stages of the stream. The bed of the stream is composed of clay and gravel and is not liable to shift.

Discharge measurements are made during high water by means of a cable, ear, tagged wire, and stay wire. Beaver dams above and below the station affect discharge measurements when the stream is not in flood. During low water, discharge measurements are made by wading at a point about 200 yards below the gauge.

The gauge was read in 1913 by Capt. R. N. S. Gordon.

ROSE CREEK AT EAST END.

This station was established on May 1, 1911, by G. H. Whyte. It is located on the N.E. $\frac{1}{4}$ Sec. 26, Tp. 7, Rge. 22, W. 3rd Mer., at East End post office.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a vertical post sunk in the left bank. The zero of the gauge (elev. 91.09) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the left bank about 30 feet downstream from the gauge. The gauge is situated 1324 feet N. 46° 30' W. of the E. $\frac{1}{4}$ corner of Sec. 26, Tp. 7, Rge. 22, W. 3rd Mer.

The channel of the stream is straight for about 40 feet above and 75 feet below the station. The right bank is low and liable to overflow, but the left is high and not liable to overflow. The bed of the stream is composed of sand, which has a small amount of vegetation and shifts slightly.

Discharge measurements are made during high water stages by wading at the gauge. The initial point for soundings is a stake on the left bank. During 1913 a permanent weir was established on this stream about 25' above the gauge rod. The elevation of the crest and the zero of the rod is 92.98, referred to the permanent iron bench mark at the old station (assumed elev. 100.00).

During 1913, the gauge was read by B. E. Rose post master at East End.

B. E. Rose has an irrigation ditch which diverts water from Rose Lake, the source of Rose Creek. No water was diverted by this ditch during 1913.

SESSIONAL PAPER No. 25c

NORTH BRANCH OF FRENCHMAN RIVER AT CROSS' RANCHE.

This station was established July 25, 1908, by F. T. Fletcher. It is located on the N.E. $\frac{1}{4}$ Sec. 16, Tp. 7, Rge. 22, W. 3rd Mer., about two and one-half miles from East End post office, and about forty-five miles southeast of Maple Creek by trail.

The gauge, which is a plain staff graduated to feet and hundredths, is placed vertically at the right bank about one mile downstream from the intake of Frank Cross' irrigation ditch, and one hundred yards below his house. The zero of the gauge (elev. 90.27) is referred to a permanent iron bench mark (assumed elev. 100.00), situated 260 feet northeast of the gauge and 1315 feet S. $5^{\circ} 36'$ W. from the N.E. corner of Sec. 16, Tp. 7, Rge. 22, W. 3rd Mer.

The channel is straight for about 100 feet above and 400 feet below the station. Both banks are fairly high, but are liable to overflow during floods. The bed of the stream is sandy and may shift at high stages. The current is smooth and fairly swift.

Discharge measurements are made at or near the gauge by wading. The initial point for soundings is a square hardwood plug, driven into the ground on the right bank of the stream and marked "B.M." with white paint.

During 1913 the gauge was read by Frank Cross.

Irrigation ditches owned by F. Cross, H. Cross and W. F. McNicol take their supply from this stream above the gauging station; F. Cross and H. Cross were the only ones to divert water during 1913.

FRENCHMAN RIVER AT PHILLIPS' RANCHE.

This station was established July 9, 1912, by G. H. Whyte. It is located on Phillips' Rancho, in the N.E. ¼ Sec. 23, Tp. 6, Rge. 23, W. 3rd Mer. It is 13 miles by trail from East End post office.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to a post at the left bank about 900 feet upstream from the station. The zero (elev. 90.02) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the left bank and about 25 feet N.E. of the gauge.

The river flows in one channel at all stages. It is straight for 300 feet above and 500 feet below the station. Both banks are slightly wooded, high and not liable to overflow. The bed of the stream is composed of sand and gravel.

Discharge measurements are made during high water by means of a cable car, tagged wire and stay wire, and at low stages by wading. The initial point for soundings is the anchorage on the left bank, and marked I. P. 0+00.

During 1913 the gauge was read by A. A. Phillips.

STRONG AND DAY'S DITCH NEAR EAST END.

This station was established July 31, 1908, by F. T. Fletcher. On April 17, 1911 it was moved upstream by G. H. Whyte. It is located on the N.E. $\frac{1}{4}$ Sec. 25, Tp. 6, Rge. 22, W. 3rd Mer., and is three quarters of a mile above the old station and about half a mile below the headgate of the ditch.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to a post at the right bank of the ditch. It is referred to bench marks as follows:—(1) A spike on the initial post, which is about six inches above ground, on the left bank of the ditch; elevation 5.49 feet

above the datum of the gauge. (2) The top of a plug, about four inches above ground, on the top of the right bank and about 50 feet downstream from the gauge; elevation 7.52 feet above the datum of the gauge.

The ditch is straight for about 250 feet above and 100 feet below the station. The current is rather sluggish and, during a greater part of the season, vegetation in the ditch causes considerable trouble in making discharge measurements.

Discharge measurements are made at the rod by wading, or from the old bridge station; (for description see 1910 report). The initial point for soundings at the station is a plug on the left bank, 23 feet from the rod.

During 1913, the gauge was read by Miss M. E. H. Robertson.

FRENCHMAN RIVER AT STRONG AND DAY'S RANCHE.

This station was established July 31, 1908, by F. T. Fletcher. It is located at Strong and Day's highway bridge on the N.E. ¼ Sec. 31, Tp. 6, Rge. 21 W. 3rd Mer., and is about eight miles south of East End post office and a mile above the East End police detachment.

The gauge, which is of the standard chain type, is fixed to the floor of the east end of the upstream side of the bridge. The length of chain from the marker to the bottom of the weight is 16.80 feet. The zero of the gauge (elev. 85.54) is referred to a permanent iron bench mark (assumed elev. 100.00), situated 240 feet N. 11° E. from the gauge. This gauge reads one foot higher than the staff gauge used during previous years.

The channel is straight for 300 feet above and 600 feet below the station. Both banks are high and not liable to overflow. The bed of the stream is composed of sand and gravel. The current is sluggish.

Discharge measurements are made from the lower side of the bridge during high water stages, and at a wading section a short distance upstream during low water stages. The initial point for soundings is the inner face of the left abutment. The bridge is not quite at right angles to the direction of the current.

During 1913 the gauge was read by Miss Robertson until August 22nd, after which no observer could be obtained.

Three miles above the station are the dam and headgates of Messrs. Strong and Day's ditch and hence the discharge of the stream at the station does not include that of the ditch and the latter must be added in order to obtain the total flow of the Frenchman River.

NOTE.—This table shows the total discharge of the river and Strong and Day's ditch at this point.

MORRISON BROTHERS' DITCH NEAR EAST END.

This station was established August 22, 1911, by G. R. Elliott. It is located on the S.W. ¼ Sec. 26, Tp. 6, Rge. 21, W. 3rd Mer., one half mile below the intake of the ditch at the Frenchman River.

The gauge is a plain staff 3" X 1", graduated to feet and inches, and is on the right side of the ditch. The zero of the gauge (elev. 97.36) is referred to the top of a rock (assumed elev. 100.00) 300 feet downstream on the right bank, marked "B.M." with red paint.

The station is at a uniform cross-section of the ditch, which is seven feet wide at the bottom with side slopes of 4 to 1.

During 1913 the gauge was read by A. A. Morrison.

a Weir measurement.

SWIFTCURRENT CREEK DRAINAGE BASIN.

General Description.

Swiftcurrent Creek rises in the eastern slope of the Cypress hills, follows a north-easterly course for 75 miles and then a northerly one for about 25 miles and finally empties into the South Saskatchewan River in Tp. 20, Rge. 13, W. 3rd Mer.

The only important tributary is Bone Creek, which rises in the Cypress hills and joins the Swiftcurrent in Tp. 10, Rge. 19, W. 3rd Mer.

The main stream flows through a valley, two to three hundred feet deep and a mile wide, to within a few miles of its mouth, where it enters a sand-stone gorge, about five hundred feet deep.

The bench land above the creek is of rolling prairie broken by innumerable coulees. The soil is a sandy loam. There is very little tree growth along the stream.

The mean annual rainfall at the twon of Swift Current is about 15 inches. This increases slightly at the stream's headwaters. The greatest precipitation occurs during the months of May, June, and July. From November to April the stream is frozen over.

There are a number of small irrigation ditches in this drainage basin, and the town of Swift Current and the Canadian Pacific Railway Company take water for domestic and industrial purposes from the creek.

POLLOCK DITCH NEAR SOUTH FORK.

This station was established August 10, 1911, by G. R. Elliott on the irrigation ditch of D. Pollock, which diverts water from Swiftcurrent creek. It is located on the N.W. ¼ Sec. 22, Tp. 7, Rge. 21, W. 3rd Mer.

The gauge, which is a plain staff graduated to feet and inches, is situated at the left side of the ditch, 20 feet from the intake. The zero (elev. 91.96) is referred to a permanent iron bench mark (assumed elev. 100.00), located at the gauging station on Swiftcurrent Creek, which is three quarters of a mile below the intake of the ditch.

The station is at a uniform section of the ditch, which is one and a half feet wide at the bottom and has side slopes of one to one and two to one.

During 1913, the gauge was read by D. Pollock.

SWIFTCURRENT CREEK AT POLLOCK'S RANCHE.

This station was established May 18, 1909, by H. R. Carseallen. It is located on the S.W. $\frac{1}{4}$ Sec. 22, Tp. 7, Rge. 21, W. 3rd Mer., about 4 miles southwest of Southfork P.O.

The gauge, which is a plain staff graduated to feet and hundredths, is attached vertically to a post sunk in the bed of the stream at the right bank and firmly stayed. The zero of the gauge (elev. 88.76) is referred to a permanent iron bench mark (assumed elev. 100.00), situated 138 feet N. 30° E. of the gauge.

The channel is straight for 50 feet above and 15 feet below the station. Both banks are high and not liable to overflow. The bed of the stream is composed of sand and gravel. The current is moderate at ordinary stages, but sluggish at very low stages of the stream.

Discharge measurements are made at or near the gauge by wading at ordinary stages, and at very low stages a weir is used.

During 1913, the gauge was read by D. Pollock.

Mr. D. Pollock diverts water from the creek into an irrigation ditch about one half mile above the gauge; therefore when he is using water in his ditch the gauge does not record the total flow of the creek.

JONES' CREEK AT STEARN'S RANCHE.

This station was established on May 15, 1912, by J. S. Wright. It is located on S. E. $\frac{1}{4}$ Sec. 20, Tp. 8, Rge. 20, W. 3rd Mer. It is about 39 miles south of Gull Lake.

The gauge, which is a plain staff graduated to feet and hundredths, is attached vertically to a post sunk in the bed of the stream and securely stayed to the left bank. The zero of the gauge (elev. 93.14) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the right bank about 40 feet west of the gauge.

The channel is straight for 50 feet above and 25 feet below the station. The right bank is high and not liable to overflow. The left bank is low and liable to overflow. The banks are free from brush except for a little undergrowth on the left bank. The bed of the stream is composed of soft clay with sand underneath.

Discharge measurements are generally made by wading, a short distance downstream from the gauge, but at very low stages a weir is used. The initial point for soundings is a stake driven close to the ground on the right bank and marked "I.P".

During 1913 the gauge was read by Chas. E. Stearns.

SWIFTCURRENT CREEK AT SINCLAIR'S RANCHE. (UPPER STATION.)

This station was established June 15, 1910, by R. G. Swan. It is located on the S.E. $\frac{1}{4}$ Sec. 18, Tp. 10, Rge. 19, W. 3rd Mer., about 150 feet upstream from the mouth of Bone Creek, and about 1200 feet above the lower station.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to a post at the right bank. The zero (elev. 87.86) is referred to a permanent iron bench mark (assumed elev. 100.00), located 300 feet S. 64.5° W. of the gauge.

SESSIONAL PAPER No. 25c

The channel is straight for about 250 feet above and 150 feet below the station. Both banks are fairly high and covered with a growth of brush. Neither bank will overflow. The bed of the stream is composed of sand which will shift.

Discharge measurements are made at the station by wading. The initial point for soundings is a plug on the left bank, about four inches above ground and 45 feet from the gauge. During high stages the gauge heights at this station are affected by backwater from Bone Creek.

During 1913 the gauge was read by Mrs. K. Sinclair.

BONE CREEK AT LEWIS' RANCHE.

This station was established July 2, 1908, by F. T. Fletcher. It is located at the highway bridge on the N.W. $\frac{1}{4}$ Sec. 34, Tp. S, Rge. 22, W. 3rd Mer. It is on the surveyed trail from Skull Creek P.O. to East End P.O., and is about fifteen miles south of Skull Creek P.O. by trail. The bridge is a small wooden structure, built in the form of a culvert with a rectangular cross-section.

The gauge, which is a plain staff graduated to feet and hundredths, is attached vertically to the left abutment on the upstream side of the bridge. The zero of the gauge (elev. 95.02) is

referred to a permanent iron bench mark (assumed elev. 100.00), sunk in the right bank, about 62 feet southwest of the gauge.

The channel is straight for 50 feet above the station; below the station it curves gradually to the left after emerging from the downstream side of the bridge. The right bank is high and will not overflow; the left bank is comparatively low, but no indication of the water overflowing the bank can be found. Both banks are free from brush at the station. The bed of the stream is sandy with some large stones scattered along the cross-section. The current is moderate, becoming very swift below the station.

At high stages discharge measurements are made from the upstream side of the bridge. The initial point for soundings is the inner face of the left abutment. Low-water measurements are made near the station by wading.

During 1913 the gauge was read by C. L. Lewis.

SWIFTCURRENT CREEK AT SINCLAIR'S RANCHE. (LOWER STATION.)

This station was established on May 27, 1910, by H. R. Carseallen. It is located on the S.W. $\frac{1}{4}$ Sec. 17, Tp. 10, Rge. 19, W. 3rd Mer., at the highway bridge on the surveyed trail from East End to Gull Lake, and just below the mouth of Bone Creek.

The gauge is of the standard chain type. The box is nailed securely to the downstream side of the floor of the bridge. The length of chain from bottom of weight to marker is 20.65 feet. The zero (elev. 55.73) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the right bank 600 feet upstream from the bridge.

The channel is straight for 75 feet above and 20 feet below the station. The left bank has a gradual slope, is high and well wooded. The right bank rises abruptly; it is also high and well wooded. The stream bed is sandy in character, free from vegetation and liable to shift at high water. The current at this point is sluggish.

Discharge measurements are made from the downstream side of the bridge. The initial point for soundings is the inner face of the left abutment. Low water measurements are made by wading at a point about 100 feet upstream.

During 1913, the gauge was read by Mrs. K. Sinclair.

SWIFTCURRENT CREEK NEAR SWIFT CURRENT.

This station was established on May 5, 1913, by O. H. Hoover, to obtain the flow of the creek above the intake of the town of Swift Current's water supply. It is located on the N. W. ¼ Sec. 18, Tp. 15 Rge. 13, W. 3rd Mer., and about 2 miles from the centre of the town of Swift Current.

The gauge, which is a plain staff graduated to feet and hundredths, is located on the right bank. The zero (elev. 87.20) is referred to a bench mark (assumed elev. 100.00) on a rock about 20 feet from the gauge.

The channel is straight for 1200 feet above and 150 feet below the station. The right bank is high; the left is low but not liable to overflow. The bed of the stream is of sand and gravel, while the current is sluggish; there is no growth of vegetation in the channel.

Discharge measurements are made at the gauge with a current meter by wading. There is a bridge a short distance downstream, from which measurements can be made at high water and flood periods.

The gauge was read during 1913 by Mrs. C. E. Downes and Stanley Tite.

The reservoir dam of the town of Swift Current was constructed a short distance above the gauge and therefore this station will not in future include the full discharge of the stream.

SWIFTCURRENT CREEK AT SWIFT CURRENT.

This station was established April 30, 1910, by H. R. Carscallen. It is located at the traffic bridge on the north side of the Canadian Pacific Railway tracks in the town of Swift Current on S.W. $\frac{1}{4}$ Sec. 30, Tp. 15, Rge. 13, W. 3rd Mer.

The gauge is a plain staff, graduated to feet and hundredths, spiked vertically to the inside face of the left abutment of the bridge. The zero of the gauge (elev. 85.71) is referred to a permanent iron bench mark (assumed elev. 100.00), situated eight feet east of the south approach of the bridge.

The channel curves slightly, but is almost straight for about 300 feet above the station and is straight for about 300 feet below. The right bank is rather low with a gradual slope; the left bank is high. Both banks are clear of brush and undergrowth and are not liable to overflow. The bed of the stream is sandy with a few large stones and is liable to shift at high stages. Weeds in the cross-section make it difficult to make discharge measurements during the low stages of the stream, when the current is sluggish.

During ordinary stages, discharge measurements are made from the downstream side of the bridge, but at low stages they are made by wading near the bridge. The initial point for soundings is the inner face of the row of piles at end of the south approach.

During 1913, the gauge was read by C. E. Wesley, who lives within 200 yards of the bridge.

a Weir measurements.

ANTELOPE LAKE DRAINAGE BASIN.

General Description.

Antelope Lake is a small body of saline water, six miles long and from one to one and a half miles wide, situated at an elevation of 2,300 feet above sea level. It lies in a deep depression north of the main line of the Canadian Pacific Railway, in Tp. 15, Rge. 18, W. 3rd Mer., and drains an area of about 350 square miles.

The lake receives its supply from Bridge Creek, which rises in the Cypress Hills. The altitude of the source of this creek is 2,800 feet and it has an average fall of fifteen feet per mile.

The valley traversed by Bridge Creek is narrow and quite shallow, rarely exceeding 100 feet in depth. The land lying along the creek bottom is very flat and liable to become inundated during periods of flood. The bench land is rolling prairie, cut up by innumerable coulees which drain the surrounding country into the main valley.

The mean annual rainfall amounts to about fourteen inches, most of which occurs during May, June and July. The creek has only a small flow., and is dry along most of its course for several months during the year.

A number of irrigation schemes receive their supply from this basin. The largest of these are Moorhead and Fearon's works, which divert water from Bridge Creek in Sec. 33, Tp. 10, Rge. 22, W. 3rd Mer.

BRIDGE CREEK AT RAYMOND'S RANCHE.

This station was established April 8, 1911, by G. H. Whyte. It is located on the S. E. $\frac{1}{4}$ Sec. 33, Tp. 10, Rge. 22, W. 3rd Mer., and about 400 yards upstream from the headgate of Fearon and Moorhead's ditch and some two miles from Skull Creek P.O.

The gauge, which is a plain staff graduated to feet and hundredths, is placed at the left side of the channel. The zero of the gauge (elev. 89.42) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the left bank about 50 feet southwest of the gauge.

The channel is straight for about 30 feet above and below the station. The right bank is low and covered with small shrubs, while the left is high and clear of tree growth. The bed of the stream is sandy and shifts. The current is moderate at all stages.

Discharge measurements are made at the gauge by wading, or during high stages at the government bridge three miles below. During most of the season, however, measurements are made with a weir at or near the gauge. The initial point for soundings is a plug driven close to the ground on the left bank, and a tagged wire is strung across the stream to mark the regular section.

During 1912 the gauge was read by Mrs. Charles Raymond.

BRIDGE CREEK NEAR SKULL CREEK POST OFFICE.

This station was established July 29, 1909, by H. R. Carscallen. It is located at the highway bridge on the surveyed trail running eastward from Maple Creek, on the N. E. $\frac{1}{4}$ Sec. 11, Tp. 11, Rge. 22, W. 3rd Mer. It is about four miles from Skull Creek P.O., and 27 miles from Maple Creek.

The gauge, which is a plain staff graduated to feet and hundredths, is attached vertically to the centre pile on the downstream side of the bridge. The zero of the gauge (elev. 87.51) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the right bank about 100 feet southeast of the gauge.

The channel is straight for 100 feet above and 30 feet below the station. Both banks are high and not liable to overflow. The stream is entirely devoid of tree growth. The bed of the creek is composed of clay and may shift somewhat at high stages. There is a small amount of vegetation at the station. The current is sluggish.

During high water, discharge measurements are made from the downstream side of the bridge. The initial point for soundings is the inner face of the left or west abutment. Low-water measurements are made near the bridge by wading, and at very low stages a weir is used.

During 1913 the gauge was read by James Mann.

BRIDGE CREEK AT GULL LAKE.

This station was established March 29, 1911, by G. H. Whyte. It is located at the highway bridge on the S.E. $\frac{1}{4}$ Sec. 23, Tp. 12, Rge. 19, W. 3rd Mer., near the Canadian Pacific Railway station.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to the downstream side of the right abutment of the bridge. The zero of the gauge (elev. 95.63) is referred to a permanent iron bench mark (assumed elev. 100.00) located on the right bank 182 ft. from the gauge and 158 ft. from the northwest corner of the C.P.R. station.

SESSIONAL PAPER No. 25c

The channel is slightly curved for 160 feet above but is straight for 80 feet below the station. Both banks are low and liable to overflow. The bed of the stream is sandy and liable to shift.

During high stages, discharge measurements are made from the bridge or by wading near the section. During very low stages a weir is used. The initial point for soundings is at the north end of the downstream side of the bridge and is marked with a broad arrow.

From July 5th to the end of the season W. Airth was the observer. There was no flow during this period. No observer was obtainable during the early part of the season; also no discharge measurements were made.

LAKE OF THE NARROWS DRAINAGE BASIN.

General Description.

Lake of the Narrows is a small lake, three miles long and one and a half miles wide, in Township 3, Range 23, West of the 3rd Meridian. It has a drainage area of about 200 square miles.

The principal stream in the basin is Skull Creek, which rises in the eastern slope of Cypress Hills. It flows through a narrow valley for the greater part of its course, but as it nears the lake, the valley widens out into large meadows. The surrounding country is rolling prairie.

The mean annual precipitation in the drainage basin is about 13 inches, but very little rainfall occurred during 1913 causing Skull Creek to go dry in places.

There are several small irrigation ditches in this drainage basin, the largest of which is Moorhead and Fearon's ditch, which diverts water from Skull Creek on the N.E. $\frac{1}{4}$ Sec. 29, Tp. 10, Rge. 22, W. 3rd Mer.

SKULL CREEK AT DOYLE'S RANCHE.

This station was established April 8, 1911, by G. H. Whyte, to obtain the discharge of the stream above all ditches. It is located on the N.E. $\frac{1}{4}$ Sec. 29, Tp. 10, Rge. 22, W. 3rd Mer., about one quarter of a mile above the headgates of Fearon and Moorhead's irrigation ditch, one and a half miles above Skull Creek P.O., and half a mile upstream from Thos. Doyle's house.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to a post at the left bank. The zero of the gauge (elev. 86.82) is referred to a permanent iron bench mark (assumed elev. 100.00), located 350 feet N. 32° E. of the gauge.

The channel is straight for about 20 feet above and below the station. The right bank is high, while the left is low and liable to overflow during high water stages. Both banks are well wooded. During 1913 an artificial control was constructed about 40 feet below the gauge rod.

Discharge measurements are made at low and ordinary stages by wading or with a weir. At high stages, measurements are made from the traffic bridge at the lower station, which is three miles downstream.

During 1913, the gauge was read by Thomas Doyle.

SKULL CREEK NEAR SKULL CREEK.

This station was established June 29, 1908, by F. T. Fletcher. It is located on the N.W. ¼ Sec. 10, Tp. 11, Rge. 22, W. 3rd Mer., at the highway bridge on the surveyed trail running east from Maple Creek. It is about two miles north of Skull Creek P.O., and about twenty five miles east of Maple Creek, by trail.

The gauge, which is a plain staff graduated to feet and hundredths, is attached vertically to the centre pile on the upstream or south side of the bridge. The zero of the gauge (elev.

SS.41) is referred to a permanent iron bench mark (assumed elev. 100.00), sunk in the left bank of the stream about forty feet southwest of the gauge.

The channel is straight for 100 feet above and 150 feet below the station. Both banks are high and not liable to overflow. The banks are clear of brush for about fifty feet above and below the station, and then become densely wooded. The bed of the stream is composed of sand and may shift somewhat at high stages. The current is moderate.

Discharge measurements are made from the upstream side of the bridge. The initial point for soundings is the inner face of the right abutment of the bridge. There is only one channel at low stages, but owing to the centre row of piles supporting the bridge there are two channels at high stages of the stream. Low water measurements are made at or near the gauge by wading, and at very low stages a weir is used.

During 1913 the gauge was read by J. Mann.

CRANE LAKE DRAINAGE BASIN.

General Description.

Crane Lake is one of the largest of the lakes which receive their supply from the drainage of the northern slope of Cypress Hills. It is situated in Tp. 13, Rge. 23, W. 3rd Mer., and covers an area of 25 square miles.

The lake has no outlet, is shallow, and the water is saline in character. It is fed by Piapot Creek, which rises in the Cypress Hills, flows northeastward, and is joined by Bear Creek in Sec. 7, Tp. 12, Rge. 22, W. 3rd Mer., before it reaches the lake.

The country to the north of the lake is rolling and of little use for agriculture, being the eastern end of a range of sand hills which extend northwestward about 40 miles. South of the lake the country is rolling prairie, which is bare of tree growth, except along the creeks where there is small growth of willow and shrub. As one gets closer to the hills the country becomes more broken and the tree growth increases, making the ravines and coulees at the head of the creeks natural reservoirs, which regulate the spring run-off considerably.

There are a number of irrigation schemes in operation and a number proposed, in this basin, also one or two industrial schemes along the main line of the Canadian Pacific Railway.

The mean annual precipitation of the northern part of the basin is about 12 inches, but in the hills this is exceeded. During the winter season, from November to April, the streams are frozen over.

EAST BRANCH OF BEAR CREEK AT JOHNSON'S RANCHE.

This station was established August 18, 1909, by H. R. Carscallen. It is located on the S.E. $\frac{1}{4}$ Sec. 21, Tp. 10, Rge. 23, W. 3rd Mer., about a mile and a half southeast of Skibe-reen P.O.

The gauge, which is a plain staff graduated to feet and hundredths, is attached to a vertical post sunk in the bed of the stream at the right bank and securely stayed. The zero (elev. 92.26) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the right bank in the line of the gauging section and 53 feet from the gauge.

The channel is straight for 50 feet above and 40 feet below the station. Both banks are high, and not liable to overflow except during extreme floods. The banks are free from brush at the station, but are wooded above and below. The bed of the stream is composed of coarse gravel and stones. Large stones in the bed of the stream make accurate soundings at the station rather difficult to obtain. The current is moderate.

Discharge measurements are made at or near the gauge by wading, or by means of a weir. A measuring wire is stretched across the stream at the section. The initial point for soundings is a square stake, driven close to the ground on the left bank and marked "I.P."

During 1913 the gauge was read by Mrs. F. Quarry.

WEST BRANCH OF BEAR CREEK AT BERTRAM'S RANCHE.

This station was established September 16, 1909, by H. R. Carseallen. It is located on the S.W. ¼ Sec. 32, Tp. 10, Rge. 23, W. 3rd Mer. It is about three hundred yards above the junction of this branch with the east branch of Bear Creek.

The gauge, which is a plain staff graduated to feet and hundredths, is attached vertically to a post sunk in the bed of the stream at the left bank and firmly stayed to the bank. The zero of the gauge (elev 92.25) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the right bank about 35 feet from the gauge.

The channel is straight for 25 feet above and 15 feet below the station. Both banks are comparatively high and will overflow only in extreme flood. The banks are free from brush at the station, but are heavily wooded immediately above and twenty feet below. The bed of the creek is composed of sand and coarse gravel. The current is moderate at the station, and becomes very swift twenty feet downstream.

During ordinary stages discharge measurements are made at, or a short distance below, the gauge by wading. High-water measurements are made at the government bridge, situated about three-quarters of a mile upstream. The initial point for soundings at the station is a square stake driven close to the ground on the left bank and marked "I.P."

During 1913, the gauge was read by Charles Bertram.

BEAR CREEK NEAR UNSWORTH'S RANCHE

This station was established June 22, 1908, by F. T. Fletcher. It is located on the S.E. ¼ Sec. 18, Tp. 11, Rge. 23, W. 3rd Mer., at the highway bridge on the surveyed trail running east from Maple Creek. It is about one half mile south of S. Unsworth's rancho, and fifteen miles east of Maple Creek.

The gauge, which is a plain staff graduated to feet and hundredths, is attached vertically to the centre pile of the downstream side of the bridge. It is referred to a circle of nail-heads

in the top of the stringer at the left abutment on the downstream side of the bridge; elevation, 14.05 feet above the zero of the gauge.

The channel is straight for 100 feet above and below the station. Both banks are high and not liable to overflow. The station is kept clear of underbrush, but both banks are covered with small trees above and below the bridge. The bed of the stream is sandy and is liable to change at high stages of the creek. The current is moderate, becoming sluggish at very low stages.

Discharge measurements are made from the downstream side of the bridge. The initial point for soundings is the inner face of the left abutment of the bridge. Low water measurements are made at a wading section about one half mile downstream from the gauge, or about 200 feet above. There is only one channel at low stages, but at high stages the centre row of piles supporting the bridge divides the stream into two channels. Gauge height records are sometimes affected by beaver dams.

During 1913, the gauge was read by S. Unsworth.

PIAPOT CREEK AT CUMBERLAND'S RANCHE.

This station was established June 17, 1908, by F. T. Fletcher. It was originally located on Sec. 17, Tp. 11, Rge. 24, W. 3rd Mer., at the highway bridge on the surveyed trail running east of Maple Creek and about nine miles from Maple Creek. On account of the difficulty of obtaining an observer, it was moved on May 13, 1909, by H. R. Carscallen to a wading section near A. Cumberland's house. It is now located in the N.E. $\frac{1}{4}$ Sec. 18, Tp. 11, Rge. 24 W. 3rd Mer., about one mile north of the bridge.

The gauge, which is a plain staff graduated to feet and hundredths, is attached vertically to a post sunk in the bed of the stream at the left bank and securely stayed to the bank. The zero (elev. 88.75) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the right bank 47 feet N. 40° E. from the gauge, and sunk within five inches of the ground.

The channel is straight for 50 feet above and 100 feet below the station. The right bank is high and not liable to overflow; the left is comparatively low and will overflow at flood stages of the stream. The bed of the stream is composed of sand and may shift during high stages. The current is sluggish. During the summer months vegetation in the stream bed gives considerable trouble.

During ordinary stages, discharge measurements are made from the downstream side of the bridge at the old station.

During 1913 the gauge was read by A. Cumberland.

HAY LAKE DRAINAGE BASIN.

General Description.

Hay Lake is in Township 11, Range 25 West of the Third Meridian, and is fed by Hay Creek which rises in the Cypress Hills. It is a comparatively small body of saline water of an approximate area of three square miles. Like all lakes in this locality it has no outlet.

The basin supplies water for a number of irrigation schemes, and also to the town of Maple Creek for domestic and industrial purposes, the water being piped some nine miles, by means of a gravity system.

The annual precipitation averages about twelve inches; during 1913 it was slightly less than this amount.

HAY CREEK AT HAY CREEK SCHOOL.

This station was established on July 4, 1910, by R. G. Swan. It is located on the S.W. $\frac{1}{4}$ Sec. 29, Tp. 10, Rge. 25, W. 3rd Mer., and is above Mr. Fauquier's ditch and below the overflow of the Maple Creek waterworks reservoir.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to a post at the right bank of the stream. The zero of the gauge (elev. 94.79) is referred to a permanent iron bench mark (assumed elev. 100.00) sunk in the right bank about 125 feet east of the gauge.

The channel of the creek is slightly curved for about eight feet above and 50 feet below the gauge. The bed of the stream is sandy and covered with vegetation, which affects the point of control. The current is sluggish, and during high stages both banks, being low, are liable to overflow.

Discharge measurements are made with a meter at high stages and with a weir at ordinary and low stages.

During 1913 the gauge was read by Miss F. Burnham until June 30th; it was read for the remainder of the season by Miss K. Jones.

HAY CREEK AT FAUQUIER'S RANCHE.

This station was established on April 22, 1909, by F. T. Fletcher. It is located on the N.E. $\frac{1}{4}$ Sec. 30, Tp. 10, Rge. 25, W. 3rd Mer., about seven miles southeast of Maple Creek. It is situated below the intake of H. Fauquier's irrigation ditch, and also below the intake of the Maple Creek waterworks. Hence, records of flow obtained at this station do not represent the total discharge of the stream. The flow of springs below the Maple Creek waterworks intake, together with drainage, and the overflow from the Maple Creek waterworks give a continuous flow in the creek above the station. This flow, which is very largely the overflow from the Maple Creek waterworks, varies greatly, depending upon the consumption of water by the town of Maple Creek and by the Canadian Pacific Railway. The disappearance of water before reaching this station is explained in part, by the fact that Mr. Fauquier diverts water into his irrigation ditch. The remainder of the water must seep through the gravel of the creek bed before it reaches this station. The fact springs break out a short distance below the gauge and give a continuous flow (so far as is known) seems to bear out the seepage theory.

The gauge, which is a plain staff graduated to feet and hundredths, is fixed to a post at the left bank. The zero of the gauge (elev. 91.39) is referred to a permanent iron bench mark (assumed elev. 100.00) sunk in the left bank about 30 feet southwest of the gauge.

The channel is straight for 100 feet above and 200 feet below the station. Both banks are high and not liable to overflow. The bed of the stream is composed of sand and coarse gravel and is liable to shift at high stages. The current is sluggish during low water but is very swift at high stages.

Discharge measurements are made near the gauge by wading and at very low stages a weir is used. The initial point for soundings is a square stake driven close to the ground on the left bank, marked "I.P."

During 1913, the gauge was read by Miss M. Fauquier.

No water was diverted by Mr. Fauquier's ditch during the season of 1913.

BIG STICK LAKE DRAINAGE BASIN.

General Description.

Big Stick is one of the largest lakes in the northern Cypress Hills district. It is situated about township 15, range 25, west of the 3rd meridian, and covers an area of 35 square miles. The lake is alkaline in character and has no outlet.

The only source of supply of the lake is Maple Creek which its tributary Gap Creek rises in the Cypress Hills thirty miles south. On the south and east the lake is bounded by the Sand Hills. The drainage area is 820 square miles.

The topography of the drainage basin is for the most part gently rolling and the creek slope is small except near the source. The basin is bare of trees except in the hills. The channel is flat, wide and in most places sandy.

The spring break-up in 1913 took place about March 28th. This was the only flood of importance during the year. No damage of any extent was caused by floods.

There are several small irrigation ditches in the basin.

MAPLE CREEK AT MAPLE CREEK.

This station was established May 9, 1908, by R. J. Burley. It is located at the highway bridge just north of the Canadian Pacific Railway tracks in the town of Maple Creek, on the road allowance east of the N.E. $\frac{1}{4}$ Sec. 16, Tp. 11, Rge. 26, W. 3rd Mer.

The gauge, which is a plain staff graduated to feet and hundredths, is attached vertically to a pile on the upstream side of the bridge. The zero of the gauge (elev. 92.83) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the right bank at the west road fence, 37 $\frac{1}{2}$ feet west and 13 feet south of the southeast corner of the bridge.

The channel is straight for 200 feet above and 100 feet below the station. Both banks are comparatively low and will overflow at high-water stages of the stream. The bed of the stream is composed of sand and may shift during flood stages. The current is moderate at high and sluggish at low stages of the stream.

During high water discharge measurements are made from the downstream side of the bridge. The initial point for soundings is the face of the right or south abutment, and is marked by "O" in white paint on the bridge beam. During ordinary stages, discharge measurements are made about fifty feet downstream from the gauge by wading, and at low stages a weir is used. The bridge is not at right angles to the current and measurements from the bridge must be corrected.

During 1913, the gauge was read by Miss Kate William.

a Creek dry from July 31 to the end of the year.

MAPLE CREEK NEAR MAPLE CREEK.

This station was established on May 4, 1910, by H. R. Carscallen. It is one mile and a half north of the town of Maple Creek, at the highway bridge east of the S. E. ¼ Sec. 28, Tp. 11, Rge. 26, W. 3rd Mer.

The gauge, which is a plain staff graduated to feet and hundredths, is fastened to a pile in the middle of the downstream side of the bridge. The zero of the gauge (elev. 81.60) is referred to a permanent iron bench mark (assumed elev. 100.00), situated at the west road fence, 100 feet south and 29 feet west of the southeast corner of the bridge.

The channel is straight for 100 feet above and 10 feet below the gauge. Both banks are high, sandy and not liable to overflow. The bed is sandy and liable to shift.

Discharge measurements are made during high stages with a current meter from the downstream side of the bridge. The initial point for soundings is the face of the left abutment and is marked on the side of the bridge beam by "O" in white paint. The current is not at right angles to the cross section and a correction is applied to the area. During ordinary stages gaugings are made upstream by wading, and during low stages a weir is used.

During 1913, the gauge was read by Miss Kate Williams.

GAP CREEK AT SMALL'S RANCHE.

This station was established April 25, 1909, by F. T. Fletcher. It is located on the S.E. 1/4 Sec. 4, Tp. 10, Rge. 27, W. 3rd Mer., 1,000 feet west of the surveyed trail from Maple Creek to Tennile police detachment, and about twelve miles south of Maple Creek.

The gauge, which is a plain staff graduated to feet and hundredths, is fastened to a post sunk in the bed of the stream at the right bank. It is situated at the road allowance between Secs. 3, and 4, Tp. 10, Rge. 27, W. 3rd Mer., and is just above the point where McShane Creek joins Gap Creek. The zero of the gauge (elev. 66.63) is referred to a permanent iron

bench mark (assumed elev. 100.00), situated at the McShane Creek bridge about 1,000 feet south of the gauge.

The channel is straight for 60 feet above and 500 feet below the station. The right bank is high and will not overflow except at very extreme flood stages; the left bank is much higher than the right and will not overflow at any stage of the stream. The bed of the stream is composed of loose, coarse gravel. The current is sluggish.

Discharge measurements are made at ordinary stages with a current meter by wading, and from a cable car at high stages. The initial point for soundings is a seven-eighths inch iron pin on the right bank, 226 feet upstream from the gauge.

During 1913, the gauge was read by William Small.

^a No flow from July 20 to end of year, except for one day, August 18th.

MESHANE CREEK AT SMALL'S RANCHE.

This station was established April 23, 1909, by F. T. Fletcher. It is located on the S. W. ¼ Sec. 3, Tp. 10, Rge. 27, W. 3rd Mer., at the highway bridge on the surveyed trail from Maple Creek to Tenmile police detachment, about 12 miles south of Maple Creek. It is about 600 feet above the mouth of the creek and about 500 feet from Wm. Small's house.

The gauge, which is a plain staff graduated to feet and hundredths, is attached firmly to the right abutment on the downstream side of the bridge. The zero of the gauge (elev. 85.21) is referred to a permanent iron bench mark (assumed elev. 100.00), located just east of the bridge upon the north side of the diversion of the road allowance. The bench-mark stands about four inches above ground and is protected with stones.

The channel is straight for 100 feet above and 200 feet below the station. Both banks are high and not liable to overflow. The bed of the stream is composed of coarse gravel and shifts at high stages. The current is swift.

Highwater measurements are made from the downstream side of the bridge. The initial point for soundings is the inner face of the right abutment of the bridge. Low water measurements are made near the gauge by wading and at very low stages a weir is used.

During 1913, the gauge was read by William Small.

The period of flow of this creek is short. It becomes dry usually in the month of June and remains so during the remainder of the season, except during the very heavy rains. Mr. Small diverted water above this station in 1913 during the month of May.

GAP CREEK NEAR MAPLE CREEK.

This station was established on May 3, 1910, by H. R. Carscallen. It is located at the traffic bridge on the road allowance east of the N.E. $\frac{1}{4}$ Sec. 31, Tp. 11, Rge. 26, W. 3rd Mer. about four and a half miles northwest of the town of Maple Creek.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to the right abutment on the downstream side of the bridge. The zero of the gauge (elev. 81.61) is referred to a permanent iron bench mark (assumed elev. 100.00), situated 95 feet east of the northeast corner of the bridge.

The channel is straight for about 130 feet above the station and 60 feet below. The left bank is high and the right low, but not liable to overflow. The bed is sandy and shifts during flood stages.

During high water, discharge measurements are made from the bridge, and during ordinary stages by wading. The initial point for soundings is marked on the north end of the bridge in red paint. The bridge is not at right angles to the direction of the current and a coefficient is applied to the measured discharge to obtain the actual discharge. The discharge is determined in extreme low water by means of a weir.

During 1913 the gauge was read by Miss Kate Williams.

MANY ISLAND LAKE DRAINAGE BASIN.

General Description

Many Island Lake, about 25 square miles in area, is situated on the boundary line between the provinces of Alberta and Saskatchewan about ten miles north of the town of Walsh. It is the farthest west of the several lakes which receive the drainage of the north slope of the Cypress Hills. The water is shallow and alkaline. Its only source of water supply is Mackay Creek with its tributaries, Stony and Boxelder Creeks.

The topography of the basin is very rough and the creek slopes are heavy. The basin is bare of trees except in the hills near the sources of the streams. The creek channels are deep and the beds are mostly gravel.

The spring breakup in 1913 took place about April 1st. As is the case with all prairie streams, the highest discharges took place at this period. All the streams of this drainage basin stopped running in June or July and remained so for the remainder of the season.

In the lower part of the drainage basin near the lake, irrigation has been developed to some extent on hay meadows. In the upper part there are few irrigation schemes.

EAST BRANCH OF MACKAY CREEK AT GRANT'S RANCHE.

This station was established on October 13, 1911, by M. H. French. It is located in the N. W. $\frac{1}{4}$ Sec. 36, Tp. 10, Rge. 1, W. 4th Mer., about 100 feet north of Arthur Grant's house. It is about five miles south of Walsh and one mile above the junction of the east and west branches of Mackey Creek.

The gauge, which is a plain staff graduated to feet and hundredths is nailed to a post sunk in the bed of the stream near the right bank. The zero of the gauge (elev. 75.85) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the right bank, in line with the cross section and 100 feet from the initial point.

The channel is straight for 50 feet above and below the station. The right bank is a cut bank and will never overflow. The left bank is rather low, covered with brush, and will overflow in extreme floods. The bed of the channel is composed of coarse gravel and will not shift.

Discharge measurements are made with a current meter by wading. The initial point for soundings is the face of a five inch stake on the right bank, ten feet from the water's edge, and is well protected by a mound of stones. The final point is a willow stump on the left bank, 45.1 feet from the initial point and protected by a mound of stones.

During 1913, the gauge was read by A. D. Grant.

a Creek dry from July 21 to end of year.

WEST BRANCH MACKAY CREEK AT SCHNELL'S RANCHE.

This station was established October 12, 1911, by M. H. French. On September 20, 1912, it was moved six miles downstream by G. R. Elliott. It is located on the N. E. ¼ Sec. 27, Tp. 10, Rge. 1, W. 4th Mer., and is two miles above the junction with East Branch Mackay Creek and seven miles south of the village of Walsh.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a well braced post sunk in the bed of the stream at the left bank. The gauge is 126 feet S. 57° E. from ¼ mound on the north boundary of Sec. 27, Tp. 10, Rge. 1, W. 4th Mer. The zero of the gauge (elev. 91.66) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the left bank 104 feet north of the gauge.

The channel curves above and below the gauge. The right bank is low and covered with brush and liable to overflow. The left bank is high and covered with bushes and not liable to overflow. The bed is composed of clean, coarse gravel, liable to shift.

Discharge measurements are made with a current meter by wading and by the weir method in low water. The initial point for soundings is a five inch stake marked "I.P." in red paint, located on the left bank 34 feet from the gauge in line with the iron bench mark. The final point is 66.8 feet from the initial point and is a five inch stake marked "F.P." in red paint.

During 1913 the gauge was read by Christian Schnell.

MACKAY CREEK AT WALSH.

This station was established on July 29, 1909, by F. T. Fletcher. It is located at the traffic bridge one half mile south of the C.P.R. track at Walsh, and is on the N. W. $\frac{1}{4}$ Sec.26, Tp. 11, Rge. 1, W. 4th Mer.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to an upright timber on the upstream side of the bridge near the right abutment. The zero of the gauge (elev. 88.92) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the right bank on the downstream side of the bridge and 77.5 feet from the gauge.

The channel is straight for about 225 feet above and 500 feet below the station. Both banks are clean and are liable to overflow during high stages. The bed is clean, composed of clay and is not liable to shift. The current is sluggish.

During high water, discharge measurements are made from the downstream side of the bridge. At low stages, the discharge is measured by wading, and at extreme low water a weir is used.

During 1913 the gauge was read by G. G. Sept.

BOXELDER CREEK AT YOUNG'S RANCHE.

This station was established May 24, 1910, by P. M. Sauder. It is located at John Young's farm on the N. E. ¼ Sec. 2, Tp. 12, Rge. 30, W. 3rd Mer., and is two miles east of Walsh.

The gauge, which is a plain staff graduated to feet and hundredths, is attached to a post at the right bank. The zero of the gauge (elev. 88.83) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the left bank 65 feet from the gauge and 113 feet from Mr. Young's house.

The stream flows in one channel, which curves both above and below the gauge. The banks are high and not liable to overflow. The bed of the stream is composed of clay.

Discharge measurements are generally made by wading at or near the gauge, but during floods it is measured from the Canadian Pacific Railway bridge a few hundred feet below the gauge.

During 1913, the gauge was read by John Young.

ROSS CREEK DRAINAGE BASIN.

General Description.

Ross Creek rises in Elkwater Lake, a small body of water covering an area of approximately two square miles, situated in township 8, range 3, west of the fourth meridian. The creek flows in a northerly direction as far as Irvine and then turns sharply to the west and closely parallels the main line of the Canadian Pacific Railway to Medicine Hat. Here it is joined by Sevenpersons River and the combined flow empties into the South Saskatchewan in section 32, township 12, range 5, west of the fourth meridian. The tributaries of Ross Creek are Bullshead Creek, which joins it in section 21, township 12, range 5, west of the fourth meridian, and Grosventre Creek, which joins it in section 14, township 11, range 3, west of the fourth meridian.

The topography of this basin is exceedingly rough and rolling and almost totally devoid of tree growth. The one exception is a small area of the Forest Reserve just south of Elkwater Lake, which has a good stand of pine and spruce.

The Canadian Pacific Railway takes the water supply for its tank at Irvine from Ross Creek.

ROSS CREEK AT ROBINSON'S RANCHE.

This station was established on October 11, 1911, by M. H. Freneh. It is located on the N.W. $\frac{1}{4}$ Sec. 24, Tp. 9, Rge. 3, W. 4th Mer., about 30 miles southeast of Medicine Hat.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a post sunk in the bed of the stream near the right bank; it is 720 feet S. 29° E. of the northeast corner Sec. 23, Tp. 9, Rge. 3, W. 4th Mer. The zero of the gauge (elev. 93.12) is referred to a permanent iron bench mark (assumed elev. 100.00) seven feet from the initial point for soundings and in line with the regular cross section.

The channel is straight for about 75 feet above and 50 feet below the station. Both banks are high enough to carry all stages of the stream. The bed of the stream is composed of very coarse gravel and will not shift. The fall of the stream at this point is very great. Water runs here all summer, but at the lowest stage the flow ceases a short distance below owing to seepage and evaporation.

Discharge measurements are made at ordinary stages eighteen feet downstream from the gauge with a current meter by wading and at very low stages with a weir. The initial point for soundings is a five inch stake on the right bank 56 feet from the water's edge. It is painted red and is protected by a mound of stones. The final point for soundings is a stake on the left bank 103.2 feet from the initial point.

During 1913, the gauge was read by James Robinson.

^a High discharges, Oct. 24 to 31, due to opening of headgates at Elkwater Lake.

GROSVENTRE CREEK AT TOTBILL'S FARM.

This station was established on October 10, 1911, by M. H. French. It is located beside Tothill's house in the S. E. ¼ Sec. 27, Tp. 9, Rge. 4, W. 4th Mer., about 28 miles southeast of Medicine Hat.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a post sunk in the bed of the stream near the right bank and is 755 feet N. 60° W. of the northeast corner of Sec. 21, Tp. 9, Rge. 4, W. 4th Mer. The zero of the gauge (elev. 83.89) is referred to a permanent iron bench mark (assumed elev. 100.00, situated on the right bank.

The channel is straight for fifty feet above and 100 feet below the station. The right bank is very high and brush covered. The left bank is low and produces a wide channel at high stages. The bed of the stream is coarse gravel and is not liable to shift.

Discharge measurements are made during high stages with a current meter by wading at a point about 18 feet downstream from the gauge. The initial point for soundings is the face of a four inch stake driven in the left bank against a large rock and marked "I. P." in knife cuts. At low stages gaugings are made with a weir, 88 feet downstream from the gauge.

During 1913, the gauge was read by Mrs. Kate Tohill.

ROSS CREEK AT IRVINE.

This station was established on July 28, 1909, by F. T. Fletcher. It is located at the traffic bridge in the town of Irvine, on the N. W. ¼ Sec. 31, Tp. 11, Rge. 2, W. 4th Mer., about 400 yards below the Canadian Pacific Railway Company's dam.

The gauge, which is a plain staff graduated to feet and hundredths, is spiked to the downstream pile of the second row from the left abutment. The zero of the gauge (elev. 77.35) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the left bank of the creek 66.5 feet east of the end of the upstream handrail.

The stream flows in one channel, which is slightly curved for 75 feet above the station and almost straight for 600 feet below. The banks are composed of clay, and are high and not liable to overflow. The bed is composed of sand and gravel and may shift at high stages.

Discharge measurements are made from the downstream side of the bridge during high stages of the stream, and during low water it is waded. During extreme low water a weir is used.

During 1913, the gauge was read by H. E. Price.

BULLSHEAD CREEK AT CLARK'S RANCHE.

This station was established on October 9, 1914, by M. H. French. It is located at Clark's house in the N. W. $\frac{1}{4}$ Sec. 15, Tp. 9, Rge. 5, W. 4th Mer., about 25 miles south of Medicine Hat.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a post sunk in the bed of the stream near the left bank. The zero of the gauge (elev. 88.45) is referred to a permanent iron bench mark (assumed elev. 100.00), situated on the left bank 3300 feet N. 68° W. from the quarter mound on the east boundary of Sec. 15, Tp. 9, Rge. 5, W. 4th Mer.

The channel is curved for 100 feet above and straight for 200 feet below the gauge. Both banks are grassy and high and will not overflow. The bed is coarse gravel and is not liable to shift.

Discharge measurements at high stages are made with a current meter by wading. The initial point for soundings is the face of a four-inch stake, driven in the left bank 113 feet downstream from the gauge and marked "I.P." in knife cuts. At low stages measurements are made with a weir, 300 feet downstream.

During 1913, the gauge was read by W. E. Clark.

The headgate of Mrs. Clark's irrigation ditch is about a mile above this station. Water was diverted during the month of September.

STARKS AND BURTON DITCH NEAR WOOLCHESTER.

This station was established on October 9, 1911, by W. A. Fletcher. It is located on the S. E. $\frac{1}{4}$ Sec. 17, Tp. 11, Rge. 5, W. 4th Mer., about 260 feet below the headgate of the ditch and ten miles south of Medicine Hat.

The gauge, which is a plain staff graduated to feet and inches, is nailed to a post at the right bank. The zero of the gauge (elev. 97.87) is referred to the top of a stake (assumed elev. 100.00), in the right bank and six feet upstream from the gauge.

The channel is straight for 250 feet above and 50 feet below the gauge. The cross section is uniform and the bed and banks are sandy.

Discharge measurements during high water are made with a current meter by wading. The initial point for soundings is the top of the bench mark. Ordinary discharge are measured with a weir.

Daily gauge heights were not obtained during 1913. The ditch flowed for about 10 days from April 28th to May 8th.

BULLSHEAD CREEK NEAR DUNMORE.

This station was established July 26., 1909, by F. T. Fletcher. It is located at the traffic bridge on the S. E. $\frac{1}{4}$ Sec. 16, Tp. 12, Rge. 5, W. 4th Mer. It is four miles from Medicine Hat, and one mile above the junction of Ross and Bullshead Creeks.

The gauge, which is a plain staff graduated to feet and hundredths, is spiked to the upstream side of the left abutment. The zero of the gauge (elev. 89.48) is referred to a permanent iron bench mark (assumed elev. 100.00), located 15 feet south of left abutment of bridge.

The stream flows in one channel, which is straight for about 200 feet above and 450 feet below the station. The banks are high, clean and not liable to overflow. The bed is composed of sand and shifts.

During high water, discharge measurements are made from the bridge, but during low water the discharge is measured by wading, or by means of a weir.

A competent observer could not be secured during 1913, and there are therefore no records of the daily discharge.

SEVENPERSONS RIVER DRAINAGE BASIN.

General Description.

Sevenpersons River lies between the South Saskatchewan River and the Cypress Hills, and empties into the South Saskatchewan River at Medicine Hat. The drainage area consists mostly of open level prairie which has a small rainfall and a run-off confined chiefly to the spring freshet.

The creek has a considerable flow during the month of April but the discharge decreases to nil about June.

There are no irrigation works of importance on this stream and the records are valuable chiefly for statistical purposes.

SEVENPERSONS RIVER AT MEDICINE HAT.

This station was established on April 27, 1910, by H. R. Carscallen. It is located in the N. E. $\frac{1}{4}$ Sec. 30, Tp. 12, Rge. 5, W. 4th Mer., at the bridge on the road from Medicine Hat to Dunmore Junction and about one and a half miles east of the Canadian Pacific Railway station at Medicine Hat.

The gauge, which is a plain staff graduated to feet and hundredths, is attached to the east or right abutment of the bridge. The zero of the gauge (elev. 86.68) is referred to a permanent iron bench mark (assumed elev. 100.00), located 100 feet north of the mound and 64 feet northwest of the left abutment.

The channel is straight for about 100 feet above and below the station. Both banks are high and wooded. The stream bed is sandy and liable to change at high water.

During high water stages, discharge measurements are made with a current meter. The initial point of soundings is the inner face of the left abutment of the bridge. Low water measurements are made with a weir.

During 1913 the gauge was read by Chas. Pickering.

QU'APPELLE RIVER DRAINAGE BASIN.

General Description.

Qu'Appelle River rises in Township 23, Range 4, West of the Third Meridian, and flows eastward into the Assiniboine River in Township 28, Range 17, West of the First Meridian. These waters eventually find their way into Hudson's bay through the Red River, Lake Winnipeg and Nelson River.

The chief tributaries of Qu'Appelle River are Moosejaw Creek, Last Mountain Lake, Wascanna Creek and Loon Creek. Last Mountain is the largest lake in the basin, being some sixty miles long and from one to three miles wide.

The valley of the main stream is from two to three hundred feet deep, with a flat from one to three miles wide along the river. This flat is covered in many places with brush, and the side hills are in many places well wooded. The bench lands above the river are mostly level prairie, much of which is now under cultivation.

The mean annual rainfall at Moose Jaw is fourteen inches, at Regina fifteen inches, and at Indian Head nineteen inches. The streams are frozen during the winter months, and there is usually an abundant snow fall.

There are several irrigation and many industrial water rights in this basin.

QU'APPELLE RIVER AT LUMSDEN.

This station was established on May 12, 1911, by J. C. Keith. It is located at a private bridge on the premises of Mr. Jas. McEwan, on the N.W. $\frac{1}{4}$ Sec. 33, Tp. 19, Rge. 21, W. 2nd Mer., in the north end of the town of Lumsden; it is about three miles below the mouth of Wascana Creek and a little over a mile above the mouth of Boggy Creek.

The gauge, which is a plain staff graduated to feet and hundredths, is fastened to the downstream side of the left abutment of the bridge. The zero of the gauge (elev. 85.33) is referred to a permanent iron bench mark (assumed elev. 100.00), located on the right bank of the river, 34 feet from the southeast corner of the bridge.

The channel is straight for 200 feet above and below the station. Both banks are fairly high but liable to overflow in an excessive flood. The bed of the stream is composed of gravel and is not likely to shift. The current is moderate.

Discharge measurements are made from the bridge during flood stages and by wading during low stages.

During 1913 the gauge was read by Jas. McEwen and J. G. Miller.

MOOSEJAW CREEK DRAINAGE BASIN.

General Description.

Moosejaw Creek rises in the Yellowgrass marsh, which lies in townships 9 and 10, range 17, west of the second Meridian, and flows in a north and westerly direction until it reaches the city of Moose Jaw, where it is joined by Thunder Creek. From Moose Jaw it follows an easterly and northerly course, finally emptying into the Qu'Appelle River near Buffalo Pound Lake. From the headwaters to the city of Moose Jaw the drainage area is estimated at about 1830 square miles. This area is almost entirely devoid of tree growth, except in the vicinity of Moose Jaw, where the valley is lined with brush.

Throughout its entire length the creek flows in a very crooked but well defined channel. The upper portion of the valley is small, being merely a depression, but it gradually increases in size until at Drinkwater it is about thirty feet deep and at Moose Jaw about eighty feet deep. The fall in the creek is very small, and particularly so between Drinkwater and Moose Jaw, where the total fall is only 67.5 feet or an average of 2.3 feet per mile of valley.

The Canadian Pacific Railway Company has dams at Milestone, Rouleau, Drinkwater, two at Moose Jaw and one at Pasqua. There is also a municipality dam in Sec. 19 Tp. 15, Rge. 24, W. 2nd Mer., which supplies water to the neighbourhood during periods when there is no flow in the creek. In 1913 the Canadian Pacific Railway Company constructed a new dam to replace their present dam in Moose Jaw.

MOOSEJAW CREEK NEAR LANG.

This station was established on June 21, 1911, by J. C. Keith. It is located at the traffic bridge on the road allowance east of the N. E. $\frac{1}{4}$ Sec. 24, Tp. 11, Rge. 19, W. 2nd Mer., and is four miles west of the village of Lang.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to the downstream face of the centre row of piles of the bridge. The zero of the gauge (elev. 95.04) is referred to a permanent iron bench mark (assumed elev. 100.00) located on the left bank of the stream 17 feet south of the last pile in the south approach of the bridge.

The channel is straight for 200 feet above and 150 feet below the station. Both banks are low and overflow in high stages of the stream. The bed of the stream is composed of clay, and in summer when the stream is very low becomes overgrown with vegetation. The current is sluggish at all stages.

Discharge measurements are made from the bridge in high stages of the stream and by wading or with a weir at some other section during low stages. The initial point for soundings at the bridge is the inner face of the south abutment.

The gauge was read during 1913 by Miss Irene Irvine.

MOOSEJAW CREEK AT CHEVRIER'S FARM.

This station was established on April 13, 1910, by P. M. Sauder. It is located at the traffic bridge on the road allowance east of the N. E. $\frac{1}{4}$ Sec. 15, Tp. 15, Rge. 25, W. 2nd Mer., and is about seventeen and one half miles southeast of Moose Jaw.

After April, 14, 1913, measurements were discontinued at the above station due to the expense of obtaining the same.

MOOSEJAW CREEK AT MCCARTHY'S FARM.

This station was established on April 7, 1910, by P. M. Sauder and W. H. Greene. It is located at the traffic bridge on the N. W. $\frac{1}{4}$ Sec. 16 Tp. 16, Rge. 26, W. 2nd Mer., and is three miles south of Moose Jaw P.O.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to the inner face of the right abutment of the bridge. The zero of the gauge (elev. 82.99) is referred to a permanent iron bench mark (assumed elev. 100.00), situated 33.5 feet northeast of the gauge.

The stream flows in one channel, which is straight for about 100 feet above and 300 feet below the station. The right bank is high, slightly wooded, and not liable to overflow. The left bank is low, partly wooded and liable to overflow. The bed of the stream is composed of gravel, and is not liable to shift except during high water.

During high water, discharge measurements are made from the downstream side of the bridge, but in low water they are made by wading at a section about 30 feet downstream. The initial point for soundings is at the west end of the handrail of the bridge.

The gauge was read during 1913 by V. J. McCarthy and members of his household.

SOURIS RIVER DRAINAGE BASIN.

General Description.

The source of the Souris River is in marshes near Yellow Grass, Saskatchewan. From here it flows in a southeasterly direction almost parallel to the Soo line of the Canadian Pacific Railway to Estevan. It then flows east to Oxbow; then it turns south and crosses the international boundary in Range 34, W. of Principal Meridian. After making a loop into North Dakota, it recrosses the International boundary in range 27, West of the First Meridian and flows in a northeasterly direction to Souris, Manitoba, where it turns east, and finally joins the Assiniboine River, in Township 8, Range 16, West of the First Meridian.

The chief tributaries of Souris River are, Long Creek, which joins it near Estevan, Moose Mountain Creek near Oxbow, North and South Antler Creeks near Sourisford, and Pipestone Creek near Souris.

This stream drains a large tract of typical Western Plains. The rainfall will probably average very little over fifteen inches, and is usually sufficiently divided over the year to prevent excessive run-off or floods. At times when there is an unusual amount of rainfall, and in the early spring the water drains into the streams very rapidly and causes a flood of short duration.

There are towns, villages, and farms, all along the course of the stream and its tributaries, which depend on it for a domestic and industrial water supply. The Canadian Pacific Railway is a large consumer. The town of Estevan is establishing a waterworks system, and there is a proposed system at Weyburn to divert water from Souris River. In North Dakota it has been proposed to divert water for irrigation purposes.

LONG CREEK NEAR ESTEVAN.

This station was established on June 22, 1911, by J. C. Keith. It is located on the S.E. $\frac{1}{4}$ Sec. 10, Tp. 2, Rge. 8, W. 2nd Mer., and is about half a mile above the mouth of the creek and about two and one half miles south of the town of Estevan.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to the shore face of the first row of piles from the north end of the bridge. The zero of the gauge (elev. 83.90) is referred to a permanent iron bench mark (assumed elev. 100.00) on the right bank near the end of the bridge.

The channel is straight for 100 feet above and below the station. Both banks are steep but are liable to be flooded during very high stages of the stream. Both are also covered with brush. The bed of the stream is composed of clean gravel which is not liable to shift. The current is sluggish.

During high water discharge measurements are made from the bridge but during low stages a wading section elsewhere, where the current is swifter, must be used. The initial point for soundings at the bridge is the inner face of the left abutment.

During 1913, the gauge was read by George Pawson.

SOURIS RIVER NEAR ESTEVAN.

This station was established on June 23, 1911, by J. C. Keith, it is located about 50 feet below the Canadian Pacific Railway Company's dam on the N.E. $\frac{1}{4}$ Sec. 11, Tp. 2, Rge 8, W. 2nd Mer., and is about two miles south and three quarters of a mile east of the town of Estevan, and about three quarters of a mile below the mouth of Long Creek.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a heavy timber sunk in and anchored to the left bank. The zero of the gauge (elev. 82.55) is referred to a permanent iron bench mark (assumed elev. 100.00), on the right bank and about 47 feet southeast of the end of the C.P.R. dam.

The channel is straight for about 100 feet above and below the gauge. Both banks are steep but become submerged in very high water. They are also both covered with brush. The bed of the stream is covered with cinders from the Canadian Pacific Railways power house and the section is liable to slight change due to the dumping of cinders on the banks.

Discharge measurements can only be made by wading at the gauge, as the cross-sections at the bridges in that locality are affected by backwater. The flood discharge is estimated by use of suitable weir formulæ for the dam above.

During 1913 the gauge was read by Wm. Bevan.

MOOSE MOUNTAIN CREEK NEAR OXBOW.

This station was established on September 4, 1913, by O. H. Hoover. It is located near W.E. Christmas' house on N. E. 1/4 Sec. 15, Tp. 3, Rge. 2, W. of the 2nd Mer., and is about one mile south and half a mile west from Oxbow.

SESSIONAL PAPER No. 25c

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a post sunk in the bed of the stream on the left bank. The zero of the gauge (elev. 91.94) is referred temporarily to the top of a stump of a small tree (assumed elev. 100.00) on the left bank approximately fifteen feet from the gauge.

The channel is straight for a considerable distance above the gauge but takes a sharp curve to the right about one hundred yards below the gauge. Both banks are steep and not likely to overflow during flood stages. Both are partly covered with wood. The bed of the stream consists of clean sand and gravel and may shift slightly during flood stages. The records could be affected by future beaver dams as they are now numerous in the vicinity.

Discharge measurements are made at the traffic bridge about one half mile upstream during high stages, and during low water periods are made by wading at a section very close to the gauge.

During 1913, the gauge was read by W. E. Christmas.

SOURIS RIVER NEAR GLEN EWEN.

This station was established on June 26, 1911, by J. C. Keith. It is located near D. F. Preston's house on the N.E. $\frac{1}{4}$ Sec. 36, Tp. 2, Rge 1, W. 2nd Mer., and is about three miles south and half a mile east from Glen Ewen.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to a post sunk in the bed of the stream at the left bank. The zero (elev. 79.32) is referred to a permanent iron bench mark (assumed elev. 100.00) on the left bank and within a few feet of the gauge.

The channel is slightly curved for some distance above and below the gauge. Both banks are steep but will overflow in very high stages of the stream. Both are partly covered with woods. The bed of the stream is composed of clean sand and gravel and may shift during high water. Beavers sometimes affect the records at the gauge by building dams and causing backwater.

Discharge measurements are made at the traffic bridge on the road allowance east of Sec. 2, Tp. 3, Rge. 1, W. 2nd Mer., during high stages; during low water periods measurements are made by wading at a point about 400 yards below the gauge.

During 1913 the gauge was read by D. F. Preston.

SOURIS RIVER NEAR MELITA.

This station was established on July 20, 1911, by J. C. Keith. It is located at the traffic bridge on the S. W. 1/4 Sec. 6, Tp. 4, Rge. 26, W. 1st Mer.

The gauge, which is a plain staff graduated to feet and hundredths, is nailed to the west pile on the down stream side of the bridge. The zero of the gauge (elev. 84.45) is referred to a permanent iron bench mark (assumed elev. 100.00), on the right bank 51 feet from the end of the bridge.

The channel is straight for a distance above the station, but curves to the right a short distance below. The banks are high and partly wooded. The bed of the stream is composed of clean sand and gravel, which may shift during high water.

Discharge measurements are made from the bridge, except during extreme low water when they are made by wading.

During 1913, the gauge was read by E. Sykes.

APPENDIX

REPORT ON ATHABASCA DISTRICT BY GORDON J. SMITH B.A.,

DISTRICT HYDROGRAPHER.

Previous to the summer of 1913, what was known as the "Edmonton district", included the district from Red Deer to Edmonton and thence eastward to Fort Saskatchewan, northward to St. Albert and occasionally to Athabasca Landing and westward over the line of the Grand Trunk Pacific as far as the "Summit"; covering the streams flowing from the eastern slope of the mountains. With the exception of a few winter measurements taken early in 1913, practically no work has been done west of Edmonton.

During the month of May however, preparations were made for more extensive work along the line of the Grand Trunk Pacific Railway west of Edmonton, and during June a cable station was erected across the Athabasca River at Jasper, a point 235 miles west of Edmonton, thus enabling discharge measurements to be made on the Athabasca at all stages of flow.

It was found that with the cable station at Jasper, and so many other streams, the area was too extensive to be covered by one hydrographer, and so the part westward from Edmonton to Jasper was placed under a separate head, to be known as the "Athabasca Hydrographic District". This was to extend from the divide between the North Saskatchewan and Athabasca drainage basins (about five or six miles east of Entwistle), westward to Jasper. I was placed in charge of this new district, while Mr. Thompson took over the Edmonton area.

The Athabasca River forms the main drainage channel in the district to the west and north of Edmonton. But there are also two minor basins, those of the MacLeod and Pembina Rivers. While these two eventually reach the Athabasca, I wish to consider them to some extent separately from the Athabasca.

The channel of the Athabasca drains the area farthest west in the district, the MacLeod the central part, and the Pembina the most easterly area.

Athabasca River.—The Athabasca River rises in the Rocky Mountains at about 52° 20' N. Latitude and 117° 30' W. Longitude, and flows in a north and easterly direction to its mouth in Lake Athabasca.

In the early part of its course, the Athabasca has the characteristics of a large mountain stream with its canyons, waterfalls and rapids. The character of the country is such, the rocks being almost all sedimentary, of the limestone and quartzite varieties, that all the mountain streams even the Athabasca in its upper stretches, have developed canyons at some points in their courses.

I was able to make a reconnaissance of the Athabasca to a point about thirty miles from Jasper towards its source. I reached the "Falls of the Athabasca" at this time and have already reported on them.

I did not follow the river farther eastward however, than where it leaves the line of the Grand Trunk Pacific Railway, near Hinton. In this direction there are some fairly large tributaries, including the Hay and Baptiste Rivers, which I was unable to reach.

Below the falls, the Athabasca widens out and flows with a very even gradient, there being very few sudden falls of any extent. The valley also widens out, as the river grows larger, and varies from two to three miles or more in width. From Jasper eastward, the valley of the Athabasca is known as the "Yellowhead Pass" and its course is followed by the Grand Trunk Pacific Railway. Perhaps the most noticeable characteristic here is the very low altitude of the river, which is around 3000 feet. This accounts to a large extent for the small drop of the river throughout its course.

After leaving the mountains the Athabasca flows for some distance through a wooded section, and here it does not exhibit the meandering tendencies of the MacLeod and Pembina Rivers farther east, but rather tends towards a straight even course.

During the month of June a cable station was erected across the river of Jasper. A gauge rod and permanent iron bench mark were put in, and discharge measurements were made during the remainder of the season. Previous to this, measurements had been taken by wading the river, when possible, a short distance upstream.

The main channel of the river at this point is about 360 feet wide, and there is a small channel on the east side about 40 feet in width, which can be waded at all times, and which dries up in the late summer. When the station was built in June, the river was in flood and

what appeared to be the best section then was chosen; as the river dropped however, a gravel bar appeared in the centre of the main channel which caused some cross-currents.

Discharge measurements were made at Jasper on an average of once in from two to three weeks during the summer, and the discharge varied from 12,000 to 4,500 second-feet from July to October.

One feature of the Athabasca to be noted is that rain plays, directly, only a very small part in the variation of the discharge of the river at the Jasper station. A rainfall of two or three days will, contrary to the behaviour of the McLeod and some of the other rivers, make scarcely a noticeable difference in the gauge-heights of the Athabasca. A day or two of hot clear weather will on the other hand cause a rise of from one to three feet, and a cold or freezing night, a corresponding depression.

The small direct effect of rainfall and the large one of hot weather is probably due, to some extent, to the large size of the Athabasca, and more particularly to the fact that the lower valleys of the mountains are the only places where precipitation is received directly as rain, it coming as snow farther up the slopes and accumulating as snow-fields, which serve as reservoirs to swell the river in the hot weather.

Whirlpool River.—The Whirlpool River enters the Athabasca from the southwest at a point, about twelve miles south of Jasper. I was unable to visit this river and am not able to report on it.

Miette River.—The Miette River joins the Athabasca about a mile southwest of Jasper. It flows eastward from the "Divide" to its mouth, a distance of some eighteen miles. Above the mouth the river follows a twisted course for some distance and has a comparatively low gradient. At Jasper the Grand Trunk Pacific Railway leaves the valley of the Athabasca, turns to the westward and follows the narrower valley of the Miette to the summit of the Yellowhead Pass.

During the early part of 1913 a few winter measurements were taken on the Miette River, and for a short time after the ice went out, the river could be waded. But continued hot weather brought down the snow, and the river rose about six feet, so that wading was out of the question. There is a traffic bridge across the river about two miles south of Jasper, and from this a discharge measurement was made, with considerable difficulty, when the river was practically at its highest and the water running over the bridge.

Several measurements of the discharge were made here during the summer. The bed of the stream at this point is mostly soft mud and was continually shifting. Later in the season the section became blocked with debris. Due to this, and the fact that it was the intention of the Park Superintendent to erect a more permanent structure at this point, I established the regular station for the Miette at the second traffic bridge, a short distance farther upstream. This bridge is a wooden structure built on heavy broken stone piers and is supposed to be permanent. The section here is also much better, being composed of hard gravel and small stones. The river is comparatively straight for a short distance on each side of the bridge, so that the current at the station is perpendicular to the section. Measurements were taken at this station after the beginning of September.

The discharge of the Miette from June to October varied from about 1,600 to 400 second-feet.

Maligne River.—The Maligne River rises in Maligne Lake and follows a northwesterly course to the Athabasca River, joining it about six miles northeast of Jasper. Its basin lies about parallel to that of the Upper Athabasca, and is separated from the latter by the Maligne range of mountains.

I visited the Maligne River during the early part of July, and found that fording at this time of year was impossible. For a distance of some two miles above its mouth, the river is about fifty feet wide, from three to four feet in depth, and runs very swiftly, making a crossing in this stretch impracticable. In these two miles the river has a bed of sand and gravel. Its banks are fairly low and even. Above this however the channel lies in a deep, narrow canyon, which grows continually deeper and narrower for some distance upstream.

At the lower end of the canyon the Maligne seems to have its full volume flowing at the surface, but at a point about half a mile above the lower end, two-thirds of the flow disappears underground, leaving in the spring and summer a small third, and in the later fall a mere trickle flowing down through the canyon above this point.

Above the entrance of the underground portion the remaining water flows down through the very narrow, deep canyon in a series of cataracts, falling about 300 feet in a distance of half to three-quarters of a mile. The character of the surroundings is such, that the question of power would be reasonable, were it not for the comparatively small surface-flow of water, which in the late autumn would almost disappear.

I was unable to cross the river where it had its full volume, and therefore was unable to make any measurements of its discharge. Above the canyon where the river was comparatively small, I made some measurements during September and October, and the discharge was slightly over one hundred second-feet. This is only a small percentage of the flow below the canyon, where the river is all above ground.

SESSIONAL PAPER No. 25c

I made a triangulation survey of the Maligne, and preparations were made for erecting a cable station at a point about one hundred yards above the mouth of the river. The section at this point is very good and should prove satisfactory for obtaining discharge measurements at all stages.

Snaring River.—The Snaring River flows into the Athabasca from the northwest, at a point about twelve miles northeast of Jasper.

I made several visits to the Snaring by trail from Jasper during the season, but until the middle of September, when I was able to wade the river, I could not get a satisfactory measurement of its discharge.

The Grand Trunk Pacific Railway has a steel bridge across the river a short distance from its mouth, but the section at this point is very poor, so that I did not attempt a measurement.

The Canadian Northern Railway had bridge in course of construction about a quarter of a mile further upstream, and while at the time, the section there was also very poor, changes may be made during the erection of the bridge, that may enable measurements to be taken there. Otherwise it will be necessary to construct a cable station, as the river can rarely be waded before the second or third week in September at any point, where a satisfactory discharge measurement could be made.

Rocky River.—The course of the Rocky River lies to the northeast and parallel to those of the Maligne and the Upper Athabasca Rivers. From the former it is separated by the Colin range, and its eastern limit is the Miette range. The river comes down from the southeast and joins the Athabasca near a station on the Grand Trunk Pacific Railway called Hawes.

Some winter measurements were made of the Rocky River during the early part of 1913, and when the ice went out, measurements were made from the steel bridge of the Grand Trunk Pacific Railway.

Early in June, I put in a staff gauge and established a regular station at the bridge the description of which I sent to Calgary. The gauge was read during the summer by the pump man at the Hawes water tank.

The river is very swift at this point during its high stages, but with care accurate gaugings may be made. Later in the summer the river drops considerably, and may be waded beneath the bridge. Between this point and its mouth, a distance of some three hundred yards, the river drops about five or six feet and empties into the Athabasca through several small channels. At high stages the force of the discharge has been such that the Athabasca has been forced over and has torn down its opposite bank for some distance back.

Above the railway the river flows in several channels over a wide flat, which gradually narrows, till at a point about five miles upstream, it becomes a canyon, which extends for some miles. The canyon is very narrow and at places has sheer limestone walls rising from the water to a height of about three hundred feet on both sides. At these points the width of water at the bottom is scarcely twenty-five feet, so that the flow is very turbulent and swift.

From the data collected over a period of five or six months, from May until October, it will be seen that the discharge was exceedingly irregular, at times the higher gauge height having the smaller discharge and vice versa. I tried by careful study of the data, and of the stream itself, to find some explanation for this, and the only reason I could find was the shifting nature of the stream bed. The bed is composed of small gravel and coarse sand, shifts a great deal under even small floods, so that this might alter the relation of the discharge to the gauge height.

Stoney River.—The Stoney river flows down from the Northwest and joins the Athabasca about three miles downstream from the mouth of the Rocky. The valley of the Stoney forms the pack route into the mountains to the northward.

Some winter measurements were made in the Stoney in the early part of 1913, but after the first part of May there was no way to cross the Athabasca, so that I was unable to visit the river.

Railway workmen, who had been on the northwest side of the Athabasca, stated that the Stoney was quite large, and could not be waded till late in the autumn.

Fiddle Creek.—Fiddle Creek joins the Athabasca from the Southeast about four miles east of the Grand Trunk Pacific Railway station of Pochontas. The railway crosses the river about one hundred yards above its mouth.

Above its mouth the river flows in several small channels over a flat, but a short distance up the valley narrows and soon develops into a canyon. The character of the country is such that the river is subject to violent floods, which on one occasion carried out the bridge piers.

I obtained discharge measurements by wading the river, a short distance above the Grand Trunk Pacific Railway bridge during August and September, and its discharge at this time varied from 300 down to 70 second-feet.

Toward the end of this time the river was dropping rapidly. It is improbable that the stream could be waded much before the middle of July.

Prairie Creek.—Prairie Creek lies to the east of the first range of the Rockies. It runs northward in the foothills, and joins the Athabasca in Sec. 5, Tp. 51, Rge. 25, W. 5th Mer., about four miles west of Hinton.

The stream varies up to twenty-five feet in width and is quieter and more regular in its flow than the mountain streams. I made measurements of the stream by wading, and from July to October the discharge ran from 70 to 10 second-feet. It would probably be much greater earlier in the season, and become negligible during October.

McLeod River.—A short distance east of Hinton, the Grand Trunk Pacific Railway leaves the valley of the Athabasca, crosses a divide near Obed, turns to the eastward, and strikes into the drainage area of the McLeod River. From Obed the Athabasca continues in a northeasterly direction, through a rolling country interspersed with muskeg.

The McLeod River rises in the Rockies just south of the 53rd Parallel and in ranges 23 and 24, west of the 5th meridian.

I was unable to spend much time in the upper regions of the McLeod, but early in September, together with Mr. G. H. Whyte, I made a trip in from Bickerdike to "Mile 37" on the Alberta Coal branch. From there, through the kindness of the Forest Supervisor, I was able to go up over the Mountain Park line on his gasoline speeder, and get a look at the country through which the McLeod River flows in its early stages.

In these upper stretches the McLeod is typically mountainous in character, and drops very rapidly. It differs from the Athabasca, not only greatly in size, but it also has a much narrower and more confined valley.

After leaving the mountains the McLeod flows through a series of rolling, well watered forest, and as it leaves the mountains farther behind, its gradient becomes very regular, and its bed wide and comparatively shallow. Its most noticeable characteristic is its meanders. The country through which it flows is fairly soft, consisting mostly of clay and soft sandstone and this probably helps to account for its exceedingly twisted course.

Discharge measurements had been made on the McLeod during the spring of 1913, from the railway bridge at "Mile 6" on the Alberta Coal Branch, in Sec. 5, Tp. 52, Rge. 18, W. 5th Mer. This point however is objectionable in almost every particular, so that, while I was forced to take measurements here, it being the only available spot, I did not establish a regular station. The discharge at this point from May to October varied between about 1,850 to 350 second-feet.

The section under the railway bridge is very poor, there being two channels, both of which are running at high water, and one of which is full of still water, when the river is lower. The bottom is very uneven with large rocks and ledges. The river turns a short distance above the bridge, so that in no way is the section particularly good.

In addition to this the measurements had to be taken from the bottom girders of the steel bridge, which are about forty feet above the river. This was an awkward proposition.

Finally there is the train service. The train leaves Edson three days a week at 2 a.m. There is no scheduled time for its return, and it is liable to come back anywhere between three the same afternoon and noon the following day. As there is no accommodation at all at "Mile 6", this is very troublesome. On one occasion the train failed to stop at twelve at night, necessitating a six mile walk to Bickerdike, and the sending of a section crew for the instruments and sounding weights.

There were towers and a cable across the McLeod a short distance above the bridge, which had been used by the contractors when building the railway. These could have been repaired and used perhaps, but the section here was worse, if anything, than that at the bridge.

I examined the McLeod River, near the mouth of Wolf Creek, about ten miles east of Edson, on my visit to the latter stream, and at the end of September I was able to wade the McLeod at this point and make a discharge measurement. The section here is admirable, the river being about three hundred feet wide, of almost uniform depth, and having a bed of small gravel. Wading however is not possible much before the middle of September.

At this point the Provincial Department of Public Works has a ferry cable across the river, and I would recommend that, if possible, the use of this be obtained. A stay-line, car, etc., would be required and measurements could be taken at all stages of flow. The interference with the ferry would not be serious, being only for the short time that the gaugings were actually being taken.

The discharge of the McLeod at the Wolf Creek ferry includes the discharges of Wolf Creek, Embarras River and Sundance Creek, so that unless special data were required on these streams, the necessity of measuring them would be obviated.

I did not visit the river at the town of Tollerton, about three miles south of Edson, and there is the possibility of measurements there.

Embarras River.—The Embarras River joins the McLeod in S. W. $\frac{1}{4}$ Sec. 5, Tp. 52, Rge. 18, W. 5th Mer. It runs in a northerly direction and rises in Townships 48 and 49, Range 21 west of the 5th Meridian.

View of Upper Maligne River Valley.

The Alberta Coal Branch of the Grand Trunk Pacific Railway follows the valley of the Embarras practically to its source. I made one trip as far as "Mile 37", where I made a measurement of the river. The train ran at night, both going and coming, so that I am unable to say much of the country through which the river flows.

The mouth of the Embarras is about two miles east from the crossing of the McLeod. From July until October, I took discharge measurements at a point about a quarter of a mile above the mouth by wading the stream. The discharge varied from 550 to 150 second-feet. At the time of the higher discharge I had difficulty in wading, so that in high stages this would be impossible. The river here is about 210 feet wide and has a bed of gravel and small stones.

The discharge of the river at "Mile 37" Alberta Central Branch., in the middle of September was about 17 second-feet.

Sundance Creek.—Sundance Creek enters the McLeod River in N. W. $\frac{1}{4}$ Sec. 4, Tp. 53, Rge. 18, W. 5th Mer., at a point about nine miles southwest of Edson. The valley of the stream is fairly wide and of low gradient. I was unable to go any distance up the creek but it seems that it is fed from a lake, and this probably accounts for its comparative regularity of flow.

There is a pack road west from Edson, though in very poor shape, so that when I could secure horses I was able to visit the stream and measure its discharge by wading at a point about a quarter of a mile above its mouth. The discharge from July to October ranged from about 50 to 35 second-feet.

East of Edson.—Some distance east of Edson the railroad crosses the McLeod River at a point, where there seemed to be a good section, and a short distance farther on, what is known as Wolf Creek. To make a reconnaissance of these, I secured a team at Edson and drove eastward from there, some ten miles to the village of Wolf Creek.

The country east of Edson is a mixture of muskeg and parkland, and the streams consequently flow slowly and meander in every direction. There are two small streams in this district, the Edson River (Muskeg Creek, and Wolf Creek, and finally the main McLeod of which I have already spoken.

Edson River.—The Edson River, or what was formerly called "Muskeg Creek" is well described by the latter name. It flows through the muskeg and low country north and east of Edson, and reaches the McLeod River in Sec. 16, Tp. 54, Rge. 16, W. 5th Mer.

I first noticed the stream while driving from Edson to Wolf Creek, and measured the discharge at a point about a mile above its mouth. The river is about fifty feet wide, with a weedy bottom and sluggish flow. The discharge during August and September ranged from about 75 to 40 second-feet.

Wolf Creek.—Wolf Creek flows from the South and enters the McLeod River in Sec. 3, Tp. 54, Rge. 16, W. 5th Mer., about one hundred yards north of the railway bridge across the former stream.

I first measured the discharge of Wolf Creek in August, at a point under the bridge. At this time the stream was very high from recent rains, and I had great difficulty in wading it. The discharge at this stage was about 380 second-feet. The stream dropped considerably after this, and during September there was about fifty second-feet flowing.

I reached Wolf Creek by driving eastward from Edson, some ten miles to the village of Wolf Creek, then crossing the McLeod on the ferry and walking about two miles to the mouth of the creek.

Pembina River.—The Pembina River forms the second minor drainage channel. The Grand Trunk Pacific Railway crosses the divide between the McLeod, and Pembina basins in about Range 13, west of the 5th meridian.

The Pembina rises in Townships 46 and 47, Ranges 19 and 20, west of the 5th Meridian, and flows a northeasterly direction, joining the Athabasca in Tp. 66, Rge. 2, W. 5th Mer. I did not examine the river for any distance on either side of the railroad, but in this vicinity the district it drains is fairly high and wooded.

During the summer season I was unable to wade the Pembina at Entwistle, where it is crossed by the Grand Trunk Pacific Railway and so could not obtain a discharge measurement. Mr. G. H. Whyte visited the river during September, and thought that it might be possible to make arrangements with the Grand Trunk Pacific Railway to stretch a cable across the river, between the piers of the bridge. The bridge is about 200 feet high, and the piers at the bottom are solid concrete. The section at this point is uniform, and though rather deep, measurements here should prove satisfactory. If this were not possible, there is a place a short distance below the bridge, where a cable station could be fairly easily built. The river here is about 200 feet wide.

Lobstick River.—The Lobstick River joins the Pembina in Sec. 29, Tp. 53, Rge. 7, W. 5th Mer. It flows in an easterly direction, and west of Entwistle its course is followed for some distance by the Grand Trunk Pacific Railway. A large portion of the drainage area appears to be low and swampy.

Measurements of the discharge of the river were made by wading at a point about one hundred yards above its mouth during the early part of the season, but later the river became so high it was impossible to wade it.

In searching for another section I found, some distance up stream, a bridge crossing to an abandoned coal mine. The section here is fairly good and measurements could be made at all stages, so I established a regular gauging station here and put in a staff gauge which was read twice daily by one of the villagers. This bridge is about two and a half mile northwest of Entwistle.

From May until October, the discharge of the Lobstick varied from 450 to 200 second-feet.

These last two rivers form the easterly limit of the "Athabasca Hydrographic District". The divide between the Athabasca and North Saskatchewan drainage areas lies in Range 6 or 7, west of the 5th Meridian, about five or six miles east of Entwistle.

ORDER IN COUNCIL
THE CANADA GAZETTE.

OTTAWA, Saturday, June 25, 1893.

[3824]

AT THE GOVERNMENT HOUSE AT OTTAWA.

SATURDAY, DECEMBER 18, 1897.

PRESENT :

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

His Excellency, by and with the advice of the Queen's Privy Council of Canada is pleased to create a 'Geographic Board' to consist of one member for each of the Departments of the Geological Survey, Railways and Canals, Post Office, and Marine and Fisheries, such member, being appointed by the Minister of the department; of the Surveyor General of Dominion Lands, of such other members as may from time to time be appointed by Order in Council, and of an officer of the Department of the Interior, designated by the Minister of the Interior, who shall act as secretary of the Board; and to authorize the Board to elect its chairman and to make such rules and regulations for the transaction of its business as may be requisite.

His Excellency is further pleased to order and direct, that all questions concerning geographic names in the Dominion which arise in the departments of the public service shall be referred to the Board, and that all departments shall accept and use in their publications the names and orthography adopted by the Board.

JOHN J. MCGEE,
Clerk of the Privy Council.

Extract from O. in C. dated Dec. 14, 1899.

'That the Order in Council constituting the Board be amended by giving to the government of the Northwest Territories and to each Province the right to nominate one of their officials as a member of the Board who shall advise the Board with reference to names in his Province, provided that the several governments undertake to be guided by the decisions of the Board.

MEMBERS OF THE GEOGRAPHIC BOARD OF CANADA

Chairman

E. DEVILLE, Surveyor-General of Dominion Lands.

Secretary

A. H. WHITCHER, Department of the Interior.

Executive Committee.

D. B. DOWLING, Geologist, Geological Survey, Department of Mines.

C. O. SENÉCAL, Geographer and Ch. Draughtsman, Geol. Survey, Dept. of Mines.

JAMES WHITE, Secretary, Commission of Conservation.

Members.

WM. P. ANDERSON, Chief Engineer, Department of Marine and Fisheries.

W. H. BOYD, Topographer, Geological Survey, Department of Mines.

A. G. DOUGHTY, Dominion Archivist.

E. V. JOHNSON, Inspecting Engineer, Department of Railways and Canals.

WM. SMITH, Secretary, Post Office Department.

Provincial Representative Members.

(Order in Council, December 14, 1899.)

Ontario—

AUBREY WHITE, Deputy Minister of Lands and Forests, Toronto, Ont.

Quebec—

EUGENE ROUILLARD, President, Quebec Geographic Board, Quebec.

New Brunswick—

WM. S. CARTER, Chief Superintendent of Education, Fredericton, N.B.

Nova Scotia—

A. H. MACKAY, Superintendent of Education, Halifax, N.S.

Prince Edward Island—

Hon. M. MCKINNON, Provincial Secretary, (ex-officio), Charlottetown, P.E.I.

British Columbia—

WM. FLEET ROBERTSON, Provincial Mineralogist, Victoria, B.C.

Saskatchewan—

JOHN A. REID, Deputy Provincial Treasurer, Regina, Sask.

GEOGRAPHIC BOARD OF CANADA

BY-LAWS.

I—OFFICERS OF THE BOARD.

The officers shall consist of a chairman (who shall be elected by ballot), of an executive committee of three to be nominated by the chair and approved by the Board, all of whom shall serve for one year or until their successors shall be chosen, and of the secretary.

II—DUTIES OF OFFICERS.

(a.) The chairman shall preside at the meetings and shall certify to the decisions of the Board. He shall appoint all committees not specially named by the Board. In his absence the Board shall have power to elect a temporary chairman.

(b.) The secretary shall keep minutes of the proceedings of the Board and shall record the decisions rendered, or other action of the Board upon cases submitted to it, with reference to the papers filed in each case. He shall maintain files of the original papers, or copies of them, that may be presented in each case, conveniently arranged for reference. He shall, under the instructions of the Board, conduct the general correspondence and shall receive communications presented for the consideration of the Board.

(c.) The executive committee shall receive through the secretary all communications requiring decision by the Board, shall investigate the questions presented, and after securing information from all available sources, shall report to the Board with recommendations regarding them.

(d.) Before dealing with any name within a province represented upon the Board, such name shall be submitted to the representative of said province for examination and report.

(e.) Upon the receipt of a communication submitting place-names for the consideration of the Board, it shall be the duty of the secretary, after preliminary submission to the executive committee, to transmit at once a copy of such communication, together with any papers relating thereto, to the member of the Board for the province affected, and also, in the case of coast names appearing on admiralty charts, to the hydrographer of the admiralty.

(f.) So soon as the report of the provincial representative, and in the case of chart names, the report of the hydrographer, are received, the secretary shall immediately submit the whole correspondence to the executive committee who shall promptly prepare the names for submission to the Board.

(g.) The secretary shall enter upon every record submitted for the consideration of the Board, the recommendation of the provincial representative, and, if any, the recommendation of the hydrographer.

III—MEETINGS.

The Board shall hold regular meetings on the first Tuesday in each month. Special meetings may be called by the chairman or by the executive committee. Five members of the Board shall constitute a quorum, but on the written request of any member, filed with the secretary of the Board within a month from the date of a meeting, any decision adopted at such meeting shall be reserved for approval by a

4 GEORGE V., A. 1914

majority of the full Board. The affirmative vote of a majority of all the members of the full Board shall be required for the final decision in any case. All motions presented for the consideration of the Board shall be submitted in writing.

IV—REPORTS.

The Board shall publish its decisions on geographic names, after each meeting, in the *Canada Gazette* and in bulletins, the same to be consolidated in a general report of the Board's work, to be issued after the 30th of June in each year.

V—AMENDMENT.

These by-laws may be amended at any regular or special meeting, by a majority vote of all the members of the Board, provided that copies of the proposed amendment have been sent by the secretary to the members of the board at least twenty days previous to the time the vote is taken.

RULES OF NOMENCLATURE.

1. When the priority of a name has been established by publication, particularly when such publication has occurred in any standard or authoritative work or works, that name should, if possible, be retained.

2. When names have been changed or corrected, if not too firmly established by local usage or otherwise, the original forms should be restored.

3. In cases where what was evidently originally the same word, appears with various spellings sanctioned by local usage or otherwise, these various spellings when applied to different features should be regarded as in effect different names, and as a rule it is inadvisable to attempt to produce uniformity.

4. As a rule the first published name should be retained, but where a choice is offered between two or more names for the same place or locality, all sanctioned by local usage, that which is most appropriate and euphonious should be adopted.

5. The possessive form should be avoided whenever it can be done without destroying the euphony of the name or changing its descriptive application. Where the possessive form is retained, the apostrophe should be dropped.

6. It is desirable to avoid the use of hyphens to connect parts of Indian names

7. Names consisting of more than one word may be connected by hyphens or combined in one word as may be advisable.

8. It is desirable to avoid the use of the words city and town as parts of names.

9. The form 'canyon' may be used instead of 'cañon,' but the latter is preferable.

10. The term 'brook' is considered preferable to 'creek' for designating small streams, and will be adopted in cases where the latter has not become too firmly fixed.

11. The Board suggests that the initial letters of generic or descriptive parts of geographical names, when used in reports or other documents, should not be capitals.

12. The use of alternative names should be discontinued where possible or not inconvenient.

13. Geographical names in a foreign country should be rendered in the form adopted by that country, except where there are English equivalents already fixed by usage.

14. French names in Canada are to be spelt, accented, hyphenated, &c., according to the rules of the French language.

15. In cases where names already exist, and have been published in both English and French form and have been sanctioned by long usage, no attempt shall be made to abolish either form, but both may be recognized and published in the Board's lists or decisions and it shall be deemed correct to use either form in official documents in either language. In all other cases any duplication of form shall be discouraged and preference shall be given to the form which has priority of origin, whether this be English or French.

16. In English text and map printing, the use of hyphens for composite French names, though it is recommended, shall not be considered obligatory.

17. The spelling of native geographical names should represent, approximately, the true sounds of the words as pronounced in the native tongue. In the orthography of names of Indian origin in the province of Quebec, the rules of the Board, based on those of the Royal Geographical Society, are preferable to French practice as being simpler and in accordance with international usage, and shall be followed in the case of new names.

18. Where a generic descriptive term, such as Cape, Bay, River, &c., is added to a name, it is permissible to translate such term into French for use in French

publications, or into English for use in English publications, if it can be done without producing a mixture of English and French.

19. The Board adopts the rules of the Royal Geographical Society for the orthography of geographical names, of which the broad features are as follows:—

- (a) The vowels are to be pronounced as in Italian and the consonants as in English.
- (b) Every letter is pronounced, and no redundant letters are introduced. When two vowels come together each one is sounded, though the result, when spoken quickly, is sometimes scarcely to be distinguished from a single sound, as in *ai, au, ei*.
- (c) One accent only is used, the acute, to denote the syllable on which stress is laid. This is very important, as the sounds of many names are entirely altered by the misplacement of this 'stress.'

The following amplification of the foregoing rules explains their application:—

SESSIONAL PAPER No. 25d

Letters.	Pronunciation and Remarks.	Examples.
a	<i>ah</i> , <i>a</i> as in <i>father</i> .	Java, Banana, Somali, Bari.
e	<i>eh</i> , <i>a</i> as in <i>faté</i> .	Tel el Kebir, Oleleh, Yezo, Medina, Levuka, Peru.
i	English <i>e</i> ; <i>i</i> as in <i>ravine</i> ; the sound of <i>ee</i> in <i>beet</i> .	
o	<i>o</i> as in <i>note</i> .	Thus, not <i>Feejee</i> , but Fiji, Hindi.
u	long <i>u</i> as in <i>flute</i> ; the sound of <i>oo</i> in <i>boot</i> . <i>oo</i> or <i>ou</i> should never be employed for this sound.	Tokyo.
	<i>All vowels are shortened in sound by doubling the following consonant.</i>	Zulu, Sumatra.
	Doubling a vowel is only necessary when there is a distinct repetition of the single sound.	Yarra, Tanna, Mecca, Jidda
ai	as in <i>aisle</i> , or English <i>i</i> as in <i>ice</i> .	Nuulua, Oosima.
au	<i>ow</i> as in <i>hour</i> .	Shanghai.
ao	is slightly different from above	Fuchau.
aw	when followed by a consonant or at the end of a word, as in <i>law</i> .	Macao.
ei	is the sound of the two Italian vowels, but is frequently slurred over, when it is scarcely to be distinguished from <i>ei</i> in the English <i>eight</i> or <i>ey</i> in the English <i>they</i> .	Cawnpore.
b	English <i>b</i> .	Beirut, Beihul.
c	is always soft, but is so nearly the sound of <i>s</i> that it should be seldom used.	Celebes.
	If <i>Celebes</i> were not already recognized it would be written <i>Stelebs</i> .	
ch	is always soft as in <i>church</i> .	Chingchin.
d	English <i>d</i> .	
f	English <i>f</i> . <i>ph</i> should not be used for the sound of <i>f</i> .	Thus, not <i>Haiphong</i> , but Haifong, Nafa.
g	is always hard. (Soft <i>g</i> is given by <i>j</i>).	Galapagos.
h	is always pronounced when inserted.	
hw	as in <i>what</i> ; better rendered by <i>hw</i> than by <i>wh</i> , or <i>h</i> followed by a vowel, thus <i>Hwang ho</i> , not <i>Whang ho</i> , or <i>Hoang ho</i> .	Hwang ho, Ngan hwei.
j	English <i>j</i> . <i>Dj</i> should never be put for this sound.	Japan, Jinchuen.
k	English <i>k</i> . It should always be put for the hard <i>c</i> .	
kh	The Oriental guttural	Thus, not <i>Corea</i> , but Korea.
gh	is another guttural, as in the Turkish.	Khan.
l	} As in English.	Dagh, Ghazi.
ni		
n		
ng	has two separate sounds, the one hard as in the English word <i>finger</i> , the other as in <i>singer</i> . As these two sounds are rarely employed in the same locality, no attempt is made to distinguish between them.	
p	As in English.	
ph	As in <i>tophale</i> .	Chemulpho, Mokpho.
th	stands both for its sound in <i>thing</i> , and as in <i>this</i> . The former is most common.	
q	should never be employed; <i>qu</i> (in <i>quiver</i>) is given as <i>kw</i> .	Bethlehem.
	When <i>qu</i> has the sound of <i>k</i> as in <i>quoit</i> , it should be given by <i>k</i> .	Kwangtung.
r	} As in English.	
s		
sh		
t		
v		
w		Sawakin.
x		
y	is always a consonant, as in <i>yard</i> , and therefore should never be used as a terminal. <i>i</i> or <i>e</i> being substituted as the sound may require.	Kikuyu.
	Thus, not <i>Mikindany</i> , but <i>Mikindani</i> .	
z	English <i>z</i> .	Kwale.
zh	The French <i>j</i> , or as <i>s</i> in <i>treasure</i> .	Zulu.
	Accents should not generally be used, but where there is a very decided emphatic syllable or stress, which affects the sound of the word, it should be marked by an <i>acute</i> accent.	Muzhdaha.
		Tongatabu, Paiawon, Sarawak.

DECISIONS

In the following list of names, those approved by the Board are printed in black type. Names, and different forms of the same name, which have been discarded are also given; the former being printed in *italics* and alphabetically arranged with the adopted names, but the latter, when nearly like the adopted forms, are not repeated.

A

- Abatagush**; bay, at the south end of Mistassini lake, Mistassini territory, Que.
Aberdeen; mount, northeast of mount Lefroy, Alta. (Not Hazel peak.)
Abbika. See Apika.
Abbot; pass, near mount Lefroy, Alta. and B.C.
Abbott; mount, south of Glacier station, Kootenay district, B.C.
Abbott Corners; post office, Missisquoi county, Que. (Not Abbotts Corners.)
Abitibi; territory, Que., also lake on boundary line between Ontario and Quebec, and river flowing from the lake to Moose river, Ont. (Not Abitibbi, Abittibi, nor Abittibbi.)
Abloviak; bay, east shore of Ungava bay, New Quebec. (Not Ablorialik.)
Aboushagan; river, Westmorland county, N.B. (Not Abouchagan, Aboushogan, Aboushagin, nor Abougoggin.)
Abraham. See Abram.
Abram; lake, north of Minnitaki lake, Kenora district, Ont. (Not Abraham nor Abram's.)
Acheninni; lake, on Grassberry river, central Saskatchewan. (Not Blackfeet.)
Achigo. See Sachigo.
Active; pass, between Galiano and Mayne islands, in the southern portion of the strait of Georgia, B.C. (Not Plumper's.)
Actonvale; town, Bagot county, Que. (Not Acton Vale.)
Acton Corners; post office, Grenville county, Ont. (Not Acton's Corners.)
Adam; lake, west of Fluke lake, Kenora district, Ont.
Adamant; glacier, mountain, and range, Selkirk mountains, Kootenay district, B.C.
Adams; creek, branch of Bonanza creek, Klondike river, Yukon.
Adams; lake and river, emptying into the westerly end of Shuswap L., Yale dist., B.C.
Adelaide; island, northeast of Grenadier island, St. Lawrence R. Leeds county, Ont.
Admiral. See Saltspring.
Admiralty; group of islands, St. Lawrence R., south of Gananoque, Leeds Co., Ont.
Adstock; township and village, Frontenac county, Que.
Advance; reef, off Michael point, Manitoulin island, Manitoulin district, Ont.
Affleck; lake, northwest of Rosamond lake, Kenora district, Ont.
Afton; mount, south of mount Abbott, Selkirk mountains, Kootenay district, B.C.
Agawa; bay, islands, point, and river, Manitoulin district, Ont. (Not Aguawa.)

- Agnes**; lake, west of lake Louise, Alta. (Not The Goat's Looking Glass.)
Agotawekami. See Duparquet.
- Aguawa*. See Agawa.
- A. H. Ward*. See Ward.
- Ahwillgate*. See Awillgate.
- Aiabewatik**; lake, east of Anzhekumming lake, Kenora district, Ont.
- Aiktow**; creek, flowing into the S. Saskatchewan at 'The Elbow,' Sask.
- Ainslie**; shoal, south of Girouard point, Manitoulin island, Manitoulin district, Ont.
- Airy**; mount, east of mount Stanley, Kootenay district, B.C.
- Aishihik**; lake, and river tributary to the Dezadeash, southwestern Yukon.
- Aiskew**; island, northward of Frank point, western shore of Observatory inlet, Cassiar district, B.C.
- Akamina**; creek, tributary to Kishinena creek, near international boundary, Kootenay district, B.C., also pass, Alta. and B.C. (Not Akimina.)
Akamina. See Starvation.
- Akolkolex**; river, tributary to Columbia river, between Revelstoke and Arrowhead, Kootenay district, B.C. (Not Akotkolex.)
- Akos**; lake, at head of Kamachigama R., Montcalm Co., Q. (Not Akonse nor Akoney.)
Akotkolex. See Akolkolex.
- Akpatok**; island, Ungava bay, New Quebec.
Akpatok. See Aukpatuk.
- Akuinu**; river, tributary to Athabaska river, Alta. (Not A-kew-i-new.)
- Akuling**; inlet, north shore of Hudson strait, N.W.T. (Not A-ku-ling.)
- Akwatuk**; bay and river, south of Big river, New Quebec. (Not Aquatuk.)
- Albanel**; lake, east of Mistassini lake, Mistassini territory, Que. (Not Little Mistassini nor Mistassinis.) Mistassini lake and the lake called in recent years 'Little Mistassini' or 'Mistassinis,' were explored in 1762 by Père Charles Albanel, a Jesuit missionary, when on his way from L. St. John to Hudson bay *via* Rupert river. Père Albanel gave his name to the smaller lake and it is so named on the maps of Laure 1732, Bellin 1755, D'Anville 1755 and others from 1763 to 1794. In view of this evidence and the recommendation of the advisory member of the Board representing the province of Quebec, the previous decision has been revised.
- Albee**; lake, Montbeillard township, Pontiac county, Quebec.
- Albert**; canyon, creek, glacier, peak, and snowfield, east of Illecillewaet river, Kootenay district, B.C.
- Albert**; port, Huron county, Ont.
- Albert**; town, in Albert county, N.B. (Not Hopewell Corner.)
Albert. See Anderson.
- Alberta**; province, also Mt. Alberta north of Mt. Columbia, Rocky Mts., Alta.
- Aldborough**; post office and township, Elgin county, Ont. (Not Aldboro.)
- Albury**; post village, Ameliasburg township, Prince Edward county, Ont.
- Alcott**; creek, flowing northeasterly into Chitek river, central Sask. (Not Rat.)
- Aldridge**; lake, west of Obowanga river, Thunder Bay district, Ont.
- Alemek*. See Lamek.
- Alexander**; railway station, slough, and village, Manitoba. (Not The Big slough.)

SESSIONAL PAPER No. 25d

- Alexandra**; lake, Smellie township, Kenora district, Ont.
- Alexandra**; mount, west of Mt. Lyell, summit range of the Rockies, Alta., and Kootenay district, B.C.
- Alexis**; creek and lake, tributary to Chilcotin river, also Alexis Creek, post office, Cariboo district, B.C.
- Alford**; post office and railway station, Brant county, Ont. (Not Alford Junction.) *Alford Junction*. See Alford.
- Algernon**; rock, in St. Lawrence river, southeast from 'Stone Pillar,' below Goose island, L'Islet county, Que. (Not Roche à Veillons nor South.)
- Alice**; lake, northeast of Bow lake, Alta.
- Alki**; creek, tributary to Klondike river, Yukon.
- Allan**; lake, east of Wallace river, and river tributary to Sauleteux R., central Alta.
- Allan**; point, south of Dorval, Jacques Cartier county, Que. (Not Marion.)
- Allan Corners**; post office, Chateauguay county, Que. (Not Allan's Corners.)
- Allan Mills**; post office, Lanark county, Ont. (Not Allan's Mills.)
- Allanwater**; river, emptying into Wabakami lake, Thunder Bay district, Ont.
- Allen**; island, west of Beekman peninsula, N.W.T.
- Allgold**; creek, tributary to Klondike river, Yukon.
- Alligator**; lake and mountain, north of Watson river, southern Yukon.
- Allumette**; lake, an expansion of Ottawa river, Renfrew county, Ont. (Not Pembroke.) *Allumette*. See Chalk.
- Alma**; creek, tributary to Klondike river, Yukon.
- Alouettes**, (pointe aux); point, at southern entrance to Saguenay river, Saguenay county, Que. (Not Lark point nor Pte. Aux Alouette.)
- Alsek**; river, formed by the junction of the Dezadeash and Kaskawulsh, Cassiar district, B.C., and Yukon. (Not Alseck nor Altsek.)
- Altrude**; creek, flowing from a group of small lakes of same name, near Vermilion pass, to Bow river, west of Castle station, Alta. (Not Little Vermilion.)
- Alukpaluk**; bay, southeast shore of Ungava bay, New Quebec.
- Alwin**; rock, west of Bigsby island, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.
- Amazon*. See Milton.
- Ambella*. See Arabella.
- Ameliasburg**; township, Prince Edward county, Ont. (Not Ameliasburgh.)
- Amherst**; island, in lake Ontario, Addington county, Ont.
- Amik**; lake, south of Minnitaki lake, Kenora district, Ont.
- Amikitik*. See LaSarre.
- Amiskwi**; peak, at headwaters of Amiskwi R. Rocky Mts., Kootenay district, B.C.
- Amiskwi**; river, tributary to Kicking Horse river, Kootenay district, B.C. (Not Beavertail nor North Branch of Kicking Horse river.)
- Ammerman**; mountain, a spur of Davidson mountains, international boundary, Alaska and Yukon.
- Amy**; point, at north end of Gribbell island, Coast district, B.C.
- Anaham*. See Anahim.
- Anahim**; creek, tributary to Chilcotin river, also lake and Indian Reserve, Cariboo district, B.C. (Not Anaham.)

- Anamebini**; river, tributary to Severn R., Patricia district, Ont. (Not Anamabine.)
- Anderson**; channel, east of Beekman peninsula, N.W.T.
- Anderson**; lake, southwest of Seton lake, Lillooet district, B.C.
- Anderson**; mount, south of Wheaton river, southern Yukon.
- Anderson**; point N.E. entrance to Washow bay, L. Winnipeg, Man. (Not Albert.)
- Anderson.* See Henderson.
- Anderson Corners**; settlement, Huntingdon county, Que. (Not Anderson's Corners.)
- Anerley**; lake, Tp. 28, Rges. 9 and 10, W. 3 M. Sask. (Not Red Deer.)
- Anesty.* See Anstey.
- Ange Gardien de Rouville.* See Canrobert.
- Angle**; mountain, in the angle formed by the Seymour arm of Shuswap lake, Yale district, B.C.
- Angle peak.* See The Vice-President.
- Ann**; point, Upper Arrow lake, Kootenay district, B.C. (Not Lone Tree.)
- Anne**; point, opposite Massasauga point, Hastings county, Ont.
- Annette**; lake, north of mount Temple, Alta.
- Annie**; lake, north of the 'big bend' of Wheaton river, southern Yukon.
- Animwash**; bay, in L. St. Joseph, and lake north of L. St. Joseph, Patricia, Ont.
- Anse-à-Beaufils**; post settlement, Gaspé county, Que. (Not L'Anse au Beaufils.)
- Anse-au-Vallon**; village, Gaspé county, Que. (Not L'Anse-à-Valleau.)
- Anstey**; arm, creek, lake, and river, Shuswap lake, Yale district, B.C. (Not Anesty.)
- Anstey**; mount, Selkirk range, Kootenay district, B.C.
- Anstruther**; lake and township, Peterborough county, Ont. (Not Eagle.)
- Ant.* See Deacon.
- Anticline**; mountain, between headwaters of Nordenskiöld R. and L. Laberge, Yukon.
- Antler**; creek, tributary to Souris river, southern Man. and Sask. (Not South Antler.)
- Antonio**; point, southerly extremity of Maurelle island, Coast district, B.C.
- Anuk**; river, tributary to Stikine river, Cassiar district, B.C.
- Anvil**; mountain, between Cottonwood and Dease rivers, Cassiar district, B.C.
- Anwatan**; lake, east of Grand lake Victoria, Pontiac county, Que.
- Anzhekumming**; lake, northeast of Manitou lake, Kenora district, Ont. (Not Upper Manitou.)
- Apeganau**; river, tributary to Burntwood river, Manitoba. (Not Muddy Water.)
- Apika**; brook, flowing into head of L. Timiskaming, Que. (Not Abbika.)
- Apussigamasi**; lake, on Burntwood river, Manitoba. (Not Appussigamahsin.)
- Aquatuk.* See Akwatuk.
- Arabella**; island, south of Francis island, between Grindstone and Wolfe islands, St. Lawrence river, Frontenac county, Ont. (Not Ambella.)
- Arbutus**; rock, south of cape Hurd, Bruce county, Ont.
- Arbutus.* See Saddle.
- Arcand**; bay, in Ottawa river, west of Montebello, Ottawa county, Que. (Not Arcans, Cardinal's nor Charlebois.)
- Arcans.* See Arcand.
- Archibald**; bay, north shore of Hudson strait, N.W.T.
- Arcola**; lake, Tp. 10, R. 3, W. 2 M. Sask. (Not Fish.)

SESSIONAL PAPER No. 25d

Arcs (lac des); lakes, south of Bow river, Rocky Mountains park, Alberta.

Ardoise. See L'Ardoise.

Argyle; creek, tributary to St. Mary river, Kootenay district, B.C.

Argyle; islands, northwest of Burke island, Bruce county, Ont.

Arignole. See Original.

Arkansas; creek, tributary to Dominion creek, Indian river, Yukon.

Ark-e-teenik. See Thelon.

Arkell. See Kusawa.

Arlington; lakes and mountain, west of the west fork of Kettle river, Yale, B.C.

Arm; islands, Southgate group, Queen Charlotte sound, Coast district, B.C.

Arm; river, flowing into the southern portion of Last Mountain lake, southern Sask.

Armit; river, flowing into Red Deer lake, Man. and Sask. (Not Armit.)

Armitt. See Armit.

Armstrong; lake, Redditt township, Kenora district, Ont.

Armstrong. See Downey.

Arnet; island, southwest of Stone island, Clayoquot sound, Vancouver I., B.C.

Aroma; lake, northeast of Tramping lake, Sask.

Arroostook; river, tributary to St. John river, Victoria county, N.B. (Not Arroostook.)

Arosen; island, in Ottawa river, west of Montebello. Ottawa county, Que. (Not Arouson, Rousseau nor Roussin.)

Arrow; lake and river, tributary to Pigeon river, Thunder Bay district, Ont.

Arrowsmith; mount, southeast of Alberni, Vancouver island, B.C.

Arrowwood. See Rosebud.

Arthuret; village, Victoria county, N.B. (Not Arthurette.)

Arthur Land. See Ellesmere.

Arthur Seat; mountain, near Nahlin river, Cassiar district, B.C. (Not Arthur's.)

Arva. See Medway.

Asapikona. See Faucher.

Ascot; post office, Sherbrooke county, Que. (Not Ascot Corner.)

Ash; brook, northeast of Nozheiatik lake, Kenora district, Ont.

Ash; lake, Redditt township, Kenora district, Ont.

Ash. See Lynedoch.

Asham; point, southwest of Peonan point, lake Manitoba, Man.

Ashby; lake and township, Addington county, Ont. (Not Island lake.)

Ashe; inlet, south shore of Big island, Hudson strait, N.W.T.

Ashe; lake, northeast of Blaine lake, central Saskatchewan.

Asheigamo; lake, S. of L. Hill, Kenora district, Ont. (Not Bass nor Tasheigama.)

Ashewig; river, tributary to Winisk river, Patricia, Ont. (Not West Winisk.)

Ashnola; river, tributary to Similkameen river, Yale district, B.C. (Not Ashnoulou.)

Ashton; point, Douglas channel, opposite Maitland island, Coast district, B.C.

Ashuapmuchuan; lake and river, Lake St. John county, Que.

Asinitchibastat; lake, west of Chibougamau lake, Abitibi territory, Que. (Not Asinitebastat.)

Asipimocasi. See Magusi.

Asippitti; river, tributary to Burntwood river, Manitoba.

As̄ikwaj. See LaMotte.

Askitichi; lake, headwaters of Ashuapmuchuan river, Chicoutimi county, Que.

Askow. See Bow.

Askwahani. See Eskwahani.

Aspasia; island, southwest of Grenadier island, St. Lawrence R., Leeds county, Ont.

Aspatagoen. See Aspotogan.

Aspotogan; harbour, mountain, peninsula, and post office, Lunenburg county, N.S.
(Not Aspatageon.)

Aspy; bay and river, Victoria county, N.S. (Not Aspee.)

Assiniboine; mount, Alta. and Kootenay district, B.C.

Assinika; lake, discharging into the upper Broadback river, Abitibi territory, Que.

Assinkepatakiso; lake, near Atikwa lake, Kenora district Ont.

Assiwanan; lake, at headwaters of St. Maurice river, Champlain county, Que. (Not Asiwananan.)

Astounder; island, southwest of Axeman island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.

Asulkan; brook, falls, glacier, pass, and ridge, Selkirk Mts., Kootenay district, B.C.

Atem. See Atim.

Athabaska; lake, in Alta. and Sask. (Not Athabasca.)

Athabaska Landing; post settlement, Alberta. (Not Athabasca Landing.)

Athabaska; mount, at headwaters of Sunwapta river, also glacier, Rocky Mts., Alta.
(Not Athabasca.)

Athabaska; pass, at headwaters of Whirlpool river, Alta., and Cariboo district, B.C.
(Not Athabasca.)

Athabaska; river, Alberta. (Not Athabasca.)

Athalmer; town, on Columbia river below its outlet from Windermere lake, Kootenay district, B.C. (Not Athelmer.)

Athapapuskow; lake, west of Cranberry lake, Manitoba. (Not Athapuscow.)

Athol; bay, Athol township, Prince Edward county, Ont. (Not Little Sandy.)

Atic-a-make. See Atikameg.

Atik; river, tributary to Migiskan river, below Millie lake, Pontiac county, Que.
(Not Atikosipi.)

Atikameg; lake, western Manitoba. (Not Atic-a-make.)

Atikamek. See Lamy.

Atikmahik. See Beaudry.

Atikonak; lake and river, near height of land, south of Hamilton river, Ashuanipi territory, Que. (Not Attikonak.)

Atikosipi. See Atik.

Atikwa; lake, southwest of Dryberry lake, Kenora district, Ont. (Not Deer.)

Atim; river, flowing into Manuān lake, upper St. Lawrence river, Champlain county, Que. (Not Atem.)

Atlin; lake, Cassiar district, B.C. and Yukon.

Atlin; mining division and mountain, Cassiar district, B.C.

Atocas. See Azatika.

SESSIONAL PAPER No. 25d

- Attawapiskat**; lake and river, emptying into James bay, Patricia district, Ont. (Not At-tah-wha-pis-kat nor Attawapiscat.)
Attim Segoun. See Iosegun.
- Atikkamek**; creek, tributary to Iosegun river, Alta. (Not Atikkamey.)

- Boshkung**; lake, Stanhope township, Haliburton county, Ont.
- Boss Dick*. See Yorke.
- Boswell**; mount, also river, Teslin river, Yukon.
- Bosworth**; mount, northwest of Stephen station, Kootenay district, B.C.

SESSIONAL PAPER No. 25d

- Botsford**; lake, northeast of Minnitaki lake, Kenora district, Ont.
- Bottle**; portage, between Iron and LaCroix lakes, international boundary, Rainy River district, Ont.
- Bouchette**; lake, an expansion of the upper Ottawa river, Montcalm county, Que.
- Bouchier**; island, Navy group. St. Lawrence river, Leeds county, Ont. (Not Bouchie.)
- Bouckhill**; post office, Dundas county, Ont. (Not Bouck's Hill.)
- Boularderie**; island, Victoria county, N.S. (Not Boulardine nor Boulardarie.)
- Boulder**; creek, tributary to Kicking Horse river, Kootenay district, B.C.
- Boulder**; creek, branch of Bonanza creek, Klondike river, Yukon.
- Boulder.* See Nares.
- Boulder.* See Opabin.
- Boulder.* See Osipasinni.
- Boulder.* See Sharpe.
- Bouleau**; river, Saguenay county, Que. (Not Bason.)
- Bouleau.* See Cedars.
- Boulter**; lake, McClure township, Hastings county, Ont.
- Boundary**; bay, on international boundary, New Westminster district, B.C.
- Boundary**; cove, between Du Vernet and Dundas points, northeast of Digby island, Coast district, B.C.
- Boundary**; creek, flowing into Yukon river at the crossing of the international boundary, Yukon.
- Boundary**; creek, flowing into Kettle river, near Int. boundary, Yale, B.C.
- Boundary**; mountains, international boundary, Kootenay district, B.C.
- Bourgeau**; mount. also range of mountains, Rocky mountains, Alta.
- Boutillier**; cove, lake, and point; also Boutillier Point, P.O.; St. Margaret bay, Halifax county, N.S. (Not Boutillier.)
- Boutillier.* See Boutillier.
- Bow**; glacier, lake, pass, peak, and river, western Alberta. (Not Coldwater lake, Upper Bow lake, Coal mountain, nor Askow river.)
- Bow**; island, at junction of Belly, Bow and S. Saskatchewan rivers, S.E. Alberta.
- Bow**; range of mountains in the Rockies, Alta. and B.C.
- Bow.* See Hector.
- Bowden**; lake, south of Clay lake, Kenora district, Ont.
- Bowdoin.* See McLean.
- Bowes.* See Constance.
- Bow Island**; post office and railway station, southeastern Alberta.
- Bowman**; creek, west of Lower Arrow lake, Kootenay district, B.C.
- Bowsman**; post office and railway station, also river tributary to Woody river, Man. (Not Bowsman River post office.)
- Bowtree**; lake and river, emptying into south side of lake LaRonge, Sask.
- Boxer**; reach, east of Gribbell island, Coast district, B.C.
- Boyd.* See Belliveau.
- Boyer**; lake, south of Dinorwic lake, Kenora district, Ont. (Not Saganaga.)
(New name adopted to avoid duplication of Saganaga, the name of a well known lake on international boundary west of L. Superior.)

Boyer; reef, east of Belcher reef, Bruce county, Ont.

Boyer; river, tributary to Peace river, also settlement, Alta. (Not Paddle river.)
Reversal of former decision.

Boyne. See Morris.

Brabant; island, Clayoquot sound, S.W. coast of Vancouver I., B.C. (Not Pender.)

Brachiopod; mountain, south of Ptarmigan Lake, Rocky mountains, Alta.

Brackendale; settlement, on Squamish river, New Westminster district, B.C.

Braden; mount, also creek, west of mount McDonald, Vancouver island, B.C.

Braeburn; mount, also lake, northwest of lake Laberge, Yukon.

Bramham; island, Queen Charlotte sound, Coast district, B.C. (Not Branham.)

Brandon; hills, south of Brandon, Man. (Not Blue hills of Brandon.)

Brandon; island, Departure bay, east coast of Vancouver island, B.C. (Not Double.)

Brandyptot; bank, channel, and island, east of Hare island, St. Lawrence river,
Charlevoix county, Que. (Not Brandy Pot nor Pot-à-l'eau-de-vie.)

Branham. See Bramham.

Brantnober; mount, in southwestern Yukon.

Bras d'Or; lake, the expanse between St. Peter inlet and Barra strait, with its bays,
Cape Breton, Inverness, Richmond and Victoria counties, N.S. (Not Great
Brass d'Or lake.) Previous decision revised.

Bratt; island, west of Georgina island, St. Lawrence river, Leeds county, Ont.

Bray; post office and railway station, Russell county, Ont. (Not Bray's nor Bray's
Crossing.)

Bray; reef, east of Ruel shoal, at entrance to Key harbour, Georgian bay, Parry
Sound district, Ont.

Bray's Crossing. See Bray.

Brazeau; lake and river, tributary to the Saskatchewan, also mountain range, central
Alberta. (Not Brazeau's.)

Brébeuf; island, in the southern portion of Georgian bay, Muskoka district, Ont.
(Not Bréboeuf.)

Breeches; lake, Garthby township, Wolfe county, Que.

Brenton; mount, north of Chemainus river, Vancouver island, B.C.

Brenton; railway station, Vancouver island, B.C. (Not Brenton's.)

Breerton; lake, north of Rennie, southeastern Manitoba.

Brett; mount, northwest of mount Bourgeau, Alberta.

Brevoort; island, east of Beekman peninsula, N.W.T.

Brew; mount, on south side of Cayoosh creek, Lillooet district, B.C.

Brewer; creek, tributary to Stewart river, above Scroggie creek, Yukon.

Brewery; creek, tributary to Wild Horse river, Kootenay district, B.C.

Brewster; creek and glacier, southwest of Banff, Kootenay district, B.C.

Brian. See Brine.

Bridge; island, N. of Broughton I., St. Lawrence R., Leeds Co., Ont. (Not Chimney.)

Bridge; river, flowing into Fraser river, above Lillooet, Lillooet district, B.C.

Bridgland; river, tributary to Thessalon river, Algoma district, Ont. (Not East
branch of Thessalon river.)

Brier; island, at entrance to St. Mary bay, Digby county, N.S. (Not Bryer.)

SESSIONAL PAPER No. 25d

- Bright**; lake, McClintock township, Haliburton county, Ont.
- Brighton**; township, in Northumberland county, Ont.
- Brightsand**; lake, Tps. 53 and 54, R. 20. W. 3 M., Sask. (Not Bright Sand.)
- Brine**; lake, east of St. Margaret bay, Halifax county, N.S. (Not Brian.)
- Brinston**; post village, Dundas county, Ont. (Not Brinston's Corners.)
- Brinston's Corners.* See Brinston.
- Brion**; island, Magdalen group, Gaspé county, Que. (Not Bryon, Byron, nor Cross.)
- Brisco**; range of mountains, between Columbia and Kootenay rivers, B.C.
- Bristol.* See Shemogue.
- Britannia Bay**; post village and summer resort, Carleton county, Ont. (Not Britannia-on-the-Bay.)
- British**; range of mountains, near the Arctic coast, crossed by international boundary, Alaska and Yukon.
- Britton**; mount, north of Tulameen river, Yale district, B.C.
- Broadback**; river flowing from the height of land near Mistassini lake, westerly through lake Evans to Rupert bay, Abitibi, Que. Includes the waters formerly named "Little Nottaway river," "Rapid river" and "Victoria river." Previous decision revised.
- Brock**; group of islands, St. Lawrence river, west of Brockville, Leeds county, Ont. (Not Brock's.)
- Brock**; island, north of St. Lawrence island, Lake Fleet group, St. Lawrence river, Leeds county, Ont. (Not Squaw.)
- Brockway**; post settlement, York county, N.B. (Not Brookway.)
- Brodeur**; island, south of Shesheeb bay, Thunder Bay district, Ont.
- Brokenhead**; river, flowing northerly into lake Winnipeg, also village, Man. (Not Broken Head.)
- Brokenmouth**; river, tributary to Nelson river, Manitoba. (Not Broken-mouth.)

- Burveith**; arm, Ladysmith harbour, east coast of Vancouver island, B.C.
- Burwell**; port, east shore of Ungava bay, New Quebec.
- Bush**; lake, peak, and river, northwest of Donald, Rocky Mts., Kootenay district, B.C.
- Bush**; mountain, between Watson and Wheaton rivers, southern Yukon.
- Bush*. See Renny.
- Butler**; bay, north of Cyrus Field bay, N.W.T.
- Butler**; lake, south of Wabigoon lake, Kenora district, Ont. (Not Kabitustigweiak.)
- Button**; islands, on south side of entrance to Hudson strait, New Quebec.
- Butwell**; peak, west of Garnet mountain, Yoho park, Rocky Mts., Kootenay dist., B.C.
- Butze**; point and rapids, between Morse basin and Shawatlan passage, east shore of Kaien island, Coast district, B.C.
- Buzzard**; lake, Burleigh township, Peterborough county, Ont.
- Byron*. See Brion.

C

- Cabane*. See Coban.
- Cabistachuan*. See Kabistachuan.
- Cabri**; lake, northeast of the mouth of Red Deer river, southern Saskatchewan.
- Cache**; bay, W. end of Saganaga lake, Int. boundary, Rainy River district, Ont.
- Cache**; lake, in Algonquin National park, Nipissing district, Ont.
- Cacouna**; island and village, Temiscouata county, Que.
- Cactus**; lake, southeast of Eyehill creek, Sask.
- Cadman**; point, west of Consecon, Weller bay, Prince Edward county, Ont.
- Cadwallader**; creek, tributary to south fork of Bridge river, Lillooet district, B.C.
- Cahill**; lake, west of Slocan lake, Kootenay district, B.C.
- Cahnish*. See Kanish.
- Cain**; point, Active pass, strait of Georgia, New Westminster district, B.C.

- Cain**; river, tributary to Miramichi river, Northumberland county, N.B. (Not Cain's nor Kains.)
- Cain River**; post village, Northumberland county, N.B. (Not Cain's River.)
- Cairn**; island and mountain, Richmond gulf, New Quebec.
- Calder**; lake, west of Manitou lake, Kenora district, Ont.
- Caldwell**; island and point, Thunder Bay district, Ont. (Not Crystal island nor Grassy point.)
- Caledon East**; railway station and village, Peel county, Ont. (Not East Caledon.)
- Caledonia**; village, Guysborough county, N.S. (Not Middle Caledonia.)
- Calete*. See Kaiete.
- Calf**; creek, headwaters of Klondike river, Yukon.
- Calf Pasture**; point and shoal, Brighton township, Northumberland county, Ont.
- Call Mill**; post office, Brome county, Que. (Not Calls Mills.)
- Calvin Grove*. See Kelvingrove.
- Camden*. See Campden.
- Camelot**; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont. (Not Hog.)
- Cameron**; lake, northwest of Kakagi lake, Kenora district, Ont.
- Cameron**. lake, international boundary, southwestern Alberta.
- Cameron**; mountains, south of Taku arm, Cassiar district, B.C.
- Camp**; lake, Finlayson township, Nipissing district, Ont.
- Campbell**; creek, flowing westerly into Semiamu bay, New Westminster district, B.C. (Not Tahtaloo.)
- Campbell**; creek, tributary to Pelly river, Yukon. At the mouth of this stream is the site of Pelly Banks Post, abandoned in 1850.
- Campbell**; island, E. of Flatland I., Thunder Bay district, Ont. (Not Little Flatland.)
- Campbell**; island, Admiralty group, St. Lawrence R., Leeds Co., Ont. (Not Round.)
- Campbell**; mountains, N.W. of Dawson, also at upper waters of Laird river, Yukon.
- Campbell**; reef, southwest of Dorcas bay, Bruce county, Ont.
- Campbell**; river, tributary to Tobique river, from Trousers lake, Victoria county, N.B. (Not Right Hand Branch of Tobique river.)
- Campbell**; valley, west of Ice river, Kootenay district, B.C.
- Campbell Cross**; post village, Peel county, Ont. (Not Campbell's Cross.)
- Campbellton**; town, Restigouche county, N.B. (Not Campbell-town.)
- Campden**; post office, Lincoln county, Ont. (Not Camden.)
- Campobello**; island, N.W. of Grand Manan I., Charlotte Co., N.B. (Not Campo Bello.)
- Campo Bello*. See Welshpool.
- Canaan*. See New Canaan.
- Canboro**; post office, Haldimand county, Ont. (Not Canborough.)
- Candle**; lake, central Saskatchewan.
- Canning**; lake, Minden township, Haliburton county, Ont. (Not Canning's.)
- Canoe**; lake, in Algonquin National park, Nipissing district, Ont.
- Canoe*. See Kamongus.
- Cañon**; lake and river, tributary to Wabigoon river, Kenora district, Ont.
- Canous*. See Kanus.
- Canouse*. See Kanus.

SESSIONAL PAPER No. 25d

- Canrobert**; post village and railway station, Rouville county, Que. (Not Ange Gardien de Rouville nor L'Ange Gardien East.)
- Canterbury.* See Invermere.
- Cantin**; shoal, southwest of St. Joseph, Huron county, Ont.
- Canyon**; creek, tributary to Dease river, also lake south of lake Lindeman; Cassiar district, B.C. (Not Deep.)
- Canyon**; creek, branch of Quartz creek. Indian river, and hill between lakes Laberge and Marsh, Yukon.
- Cap-à-l'Aigle**; village, Charlevoix county, Que.
- Cap Brûlé**; lightstation, on cape of same name, below Cap Tourmente, Montmorency county, Que. (Not Montée du Lac.)
- Cap Chat**; lightstation and post office on cape of same name, also river and township, Gaspé county, Que. (Not Cap-de-Chate nor Cape Chatte.)
- Cap-de-Chate.* See Cap Chat.
- Cap de Moselle.* See Demoiselle.
- Cape Chatte.* See Cap Chat.
- Cape of Hopes Advance.* See Hopes Advance.
- Cape Horn.* See Pilot.
- Caplan**; river, and Caplan River post office, Bonaventure county, Que. (Not Capelan.)
- Caps (rivière des)**; river, flowing into the St. Lawrence below Fouquette river, Kamouraska county, Que.
- Captain John's.* See Foresters.
- Caraquet**; bay, parish, river, and village, Gloucester county, N.B. (Not Caraquette.)
- Carbon**; hill, south of Wheaton river, southern Yukon.
- Carcajou**; river, tributary to Kinojevis river, Timiskaming county, Que.
- Carcross**; post station, between Bennett and Nares lakes, southern Yukon. (Not Caribou nor Caribou Crossing.)
- Cardinal's.* See Arcand.
- Cariboo**; district, lake, and mining division, British Columbia. (Not Caribou.)
- Cariboo.* See Stevens.
- Caribou**; creek, tributary to Dominion creek, Yukon.
- Caribou**; creek and point, east of Columbia river, between the Arrow lakes, Kootenay district, B.C.
- Caribou.* See Carcross.
- Caribou.* See Keshkabuon.
- Caribou.* See Lawrence.
- Caribou.* See Meachan.
- Caribou.* See Mudjatic.
- Caribou Crossing.* See Carcross.
- Caribou Mines**; post office, Halifax county, N.S. (Not Caribou Gold Mines.)
- Carleton**; lake, west of Manitou lake, Kenora district, Ont.
- Carlsbad Springs**; post office and railway station, Russell county, Ont. (Not Eastman's Springs.)
- Carmack**; a fork of Bonanza creek, Yukon.

- Carmi**; creek, tributary to west fork of Kettle river, also village at junction of the streams, Yale district, B.C.
- Carnarvon**; mount, northwest of Emerald lake, Rocky mountains, Kootenay district, B.C. (Not McMullen.)
- Carnegie**; island, north of Hill island, St. Lawrence river, Leeds county, Ont.
- Caron**; lake, Pettypiece township, Kenora district, Ont.
- Caron**; lake, Bellecombe, Claire and Vaudray townships, Timiskaming county, Que. (Not Crooked.)
- Caron**; point, east of Ste. Anne-de-Bellevue, Jacques Cartier county, Que.
Caron. See Carron.
- Carp**; lake and portage, W. of Knife lake, Int. boundary, Rainy River district, Ont.
Carp. See Lomond.
- Carr**; railway station, Huntingdon county, Que. (Not Carr's Crossing.)
Carroll. See Macdonald.
- Carroll Wood**; bay, S. shore Manitoulin I. Manitoulin district, Ont. (Not Woods.)
- Carron**; point, at south entrance to Bathurst bay, Gloucester county, N.B. (Not Caron.) Previous decision reversed.
- Carrot**, river, tributary to Saskatchewan river, Man. and Sask. (Not Root.)
Carr's Crossing. See Carr.
- Carrying Place**; village, on the road of that name, Northumberland and Prince Edward counties, Ont.
- Carson**; lake, Jones township, Renfrew county, Ont.
- Carson**; post office, international boundary, Yale district, B.C.
- Carter**; bay, east of Jenkins point, Manitoulin district, Ont.
- Carter**; mount, east of Atlin lake, Cassiar district, B.C.
- Carter**; rock, west of Greene island and south of the west end of Manitoulin island, Manitoulin district, Ont.
- Carthew**; bay, northwestern shore of L. Simcoe, Simcoe Co., Ont. (Not Carthew's.)
- Cartier**; lake, Wylie township, Renfrew county, Ont.
- Cartier**; mount, east of Columbia river, Kootenay district, B.C.
- Cartier**; post office, Beauharnois county, Que. (Not Cartierville.)
Cartierville. See Cartier.
- Carys Swan Nest**; cape, Coats I., Hudson bay, N.W.T. (Not Cary's Swan Nest.)
- Cascade**; post village, on Kettle river, Yale district, B.C.
Cascade. See Coast.
Cascade. See O'Hara.
- Cascumpeque**; bay, Prince county, P.E.I. (Not Cascumpee nor Holland.)
- Casey**; cove, south of Pariseau point, Digby island, Prince Rupert harbour, Coast district, B.C.
- Cashionglen**; post office, Glengarry county, Ont. (Not Cashion's Glen.)
- Cassels**; lake, Cassels and Riddell Tps., Nipissing district, Ont. (Not White Bear.)
- Cassiar**; a district of British Columbia.
- Cassiar**; bar, Lewes river, south of Big Salmon river, Yukon.
- Cassiar**; creek, tributary to Yukon river, above Forty-mile, Yukon.
- Cassiar**; mountains, near upper waters of Liard river, B.C. and Yukon.

SESSIONAL PAPER No. 25d

- Cassidy**; lake and railway station, S.W. of Cobalt, Timiskaming, Ont. (Not Bass.)
- Cassidy**; railway station, Vancouver island, B.C. (Not Cassidy's nor Cassidy Siding.)
- Castle**; mountain, north of Castle Mountain station, Rocky Mts., Alta.
- Castor and Pollux**; peaks, east of Mt. Bonney, Selkirk Mts., Kootenay district, B.C.
- Castilian**; shoal, southeast of Cockburn island, near entrance to Mississagi strait, Manitoulin district, Ont.
- Castor**; creek, tributary to Battle river, Alta. (Not Beaverdam.)
- Cat**; lake and river, tributary to L. St. Joseph, Patricia, Ont. (Not Cat Lake river.)
- Catamount**; peak, in the Hermit range of the Selkirks, Kootenay district, B.C.
- Cataract**; brook, tributary to Kicking Horse river, near Hector station, Kootenay district, B.C. (Not Wapta creek.)
- Cataract**; peak, northeast of Mt. Molar, Rocky mountains, Alta.
- Cataract**; rock, southwest of Porcupine point, Bruce county, Ont.
- Cataract.* See Cline.
- Catch.* See Ketch.
- Catchacoma**; lake, Cavendish township, Peterborough Co., Ont. (Not Ketchacum.)
- Cathawachaga.* See Kathawachaga.
- Cathedral**; mountain, east of Mt. Stephen, Kootenay district, B.C. (Not Pinnacle.)
- Catline.* See Georgina.
- Cat-tail**; brook, tributary to Opichuan river, Thunder Bay district, Ont.
- Cattle.* See Cottle.
- Causapscal**; river and village, Matane Co., Que. (Not Casupscul nor Cosupscoult.)
- Cavalier**; island, southwest of Ghegheto island, Bruce county, Ont. (Not Gull.)
- Cave**; rock, in Yukon river, east of international boundary, Yukon.
- Cay-ke-quah-be-kung.* See Kekkekewabi.
- Cayoose.* See Cayoosh.
- Cayoosh**; creek, tributary to Fraser river, at Lillooet, B.C. (Not Cayoose.)
- Cedar**; island, west of Massasauga point, bay of Quinte, Prince Edward county, Ont.
- Cedar**; island, east of the mouth of Catarauqui river, Frontenac county, Ont.
- Cedar**; lake, north of L. Winnipegosis, Manitoba.
- Cedar.* See Kishikas.
- Cedars**; island, rapids, and village, Soulanges county, Que. (Not Bouleau rapids.)
- Cegemecega.* See Kejimkujik.
- Cegoggin.* See Chegoggin.
- Celtis**; lake, south of William bay, L. Seul, Kenora district, Ont.
- Centrefire**; lake, N.W. of Minnitaki lake, Kenora district, Ont. (Not Centre Fire.)
- Chaba**; river, tributary to Athabaska river, east of Fortress lake, Alta.
- Chabatok**; Indian village, Kabi-stachuan bay, Mistassini lake, Mistassini territory, Q.
- Chagoggin.* See Chegoggin.
- Chakwa**; lake, at headwaters of St. Maurice river, Champlain county, Que.
- Chaleur**; bay, an inlet of the gulf of St. Lawrence, between Quebec and New Brunswick. (Not Bay of Chaleur nor Baie des Chaleurs, &c.) If the French form is used it is to be "Baie de Chaleur."

- Chalk**; bay, at mouth of Chalk river, also lake which is an expansion of the river near the bay. Buchanan township, Renfrew county, Ont. (Not Allumette bay nor Sturgeon bay and lake.)
- Chalk River**; post village and railway station, Renfrew county, Ont.
- Chaloupe*. See Shallop.
- Chamberlain**; island, north shore of Hudson strait, N.W.T. (Not Crete.)
- Chambly**; village, Chambly county, Que. (Not Chambly Basin.)
- Champagne**; island and point, east of Shipman point, St. Lawrence R., Leeds Co., Ont.
- Champlain**; point, south of Atherley, at northern end of lake Simcoe, Ontario Co. Ont.
- Chancellor**; peak, east of Leancoil station, Kootenay district, B.C.
- Chandindu**; river, tributary to Yukon river, between Dawson and Cudahy, Yukon.
- Channel**; point, northeast side of Cockburn island, Manitoulin district, Ont.
- Channel**; rock, off northwest side of Fitzwilliam island, Manitoulin district, Ont.
- Chantler**; post office, Welland county, Ont. (Not Chantler's.)
- Chantry**; island, southwest of Saugeen river, Bruce county, Ont. The surrounding shoal bank is named after the island.
- Chaperon**; mountain, Blackwater range of the Rockies, Kootenay district, B.C.
- Chapleau**; lake, Tp. 14, Rgs. 10 & 11, W. 2 M. southwestern Saskatchewan.
- Chaplin**; lake and river, southern Saskatchewan (Not Old Wives.)
- Charlebois*. See Arcand.
- Charles**. island, in Hudson strait, New Quebec. (Not Katutok.)
- Charles**; point, west side of Prince Rupert harbour, Coast district, B.C.
- Charlo**; village, Guysborough county, N.S. (Not Charlo Cove nor Charlo's Cove.)
- Charlo's Cove*. See Charlo.
- Charlotte**; lake, Brudenell township, Renfrew county, Ont.
- Charlton**; bay, northeast of Leask point, Manitoulin island, Manitoulin district, Ont.
- Charlton**; mount, south of the narrows of Maligne lake, Rocky Mts., western Alberta.
- Charwell**; point, east of Peter lightstation, Prince Edward county, Ont. (Not Gull.)
- Chartier**; lake, south of Grand lake Victoria, Pontiac county, Que. (Not Wajabakoute.)
- Chase**; island, Frobisher bay, N.W.T.
- Chase**; railway station, Vancouver island, B.C. (Not Chase River Crossing.)
- Chase**; river, south of Nanaimo, Vancouver island, B.C.
- Chase River Crossing*. See Chase.
- Chassepot**; rock, S. of Tremayne bay, southern coast of Digby I., Coast district, B.C.
- Chateauguay*. See Lalonde.
- Chaudière**; falls and portage, between Namakan and Rainy lakes, international boundary, Rainy River district, Ont. (Not Kettle.)
- Chaudière*. See Koochiching.
- Cheakamus**; river, tributary to Squamish river, New Westminster district, B.C.
- Chebistuanonekau**; river, upper waters of Waswanipi river, Abitibi territory, Que.
- Cheggoggin**; point and post village, Yarmouth county, N.S. (Not Cegoggin nor Chagoggin.)
- Chehalis**; creek, flowing into Gladys bay, Cassiar district, B.C. (Not Che-halis.)

SESSIONAL PAPER No. 25d

- Chemainus**; bay, lake, railway station, river, and village, in the southwest portion of Vancouver island, B.C. (Not Horse Shoe bay.)
Chemainus. See Kulleet.
- Chematogan**; channel, between Squirrel and Walpole islands, L. St. Clair, Lambton county, Ont. (Not Blind.)
- Chemung**; lake and post office, Peterborough Co., Ont. (Not Chemong nor Shemong.)
- Cheney**; post village and railway sta. Russell Co., Ont. (Not Cheney Station village.)
Cheney Station. See Cheney.
- Chensagi**; river, emptying into Gull lake Abitibi territory, Que. (Not Tshensagi.)
- Cheops**; mount, Selkirk mountains, Kootenay district, B.C.
- Cherry**; island, southeast of Dead island, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.
- Cherry**; lake, northwest of Lost lake, Kenora district, Ont.
- Cherry**; point, southeast of Cowichan harbour, Vancouver island, B.C.
Cherry. See Robert.
Cherry. See St. Helena.
- Cherub**; mountain, Selkirk range, Kootenay district, B.C.
- Cheslatta**; lake, south of Francois lake, Coast district, B.C. (Not Chestatta.)
- Chetang**; ridge, east of Mumm peak, Rocky mountains, Cariboo district, B.C.
- Cheticamp**; island, river, and town, Inverness county, N.S. (Not Chetican.)
- Cheverie**; creek and village, Hants county, N.S. (Not Chiverie.)
- Chiblow**; lake, in Montgomery and Scarfe townships, Algoma district, Ont. (Not Macoming.)
- Chibougamau**; lake and river, south of Mistassini lake, Abitibi territory, Que. (Not Chibougamou nor Chibougamoo.)
- Chichester**; island, northwest of Grenadier I., St. Lawrence river, Leeds county, Ont.
Chickens. See Kathlyn.
- Chicot**; river, Two Mountains county, Que. (Not Petit Chicot.)
- Chidley**; cape, at entrance to Hudson strait, New Quebec. (Not Chudleigh.)
- Chief**; island, near north end of lake Timiskaming, Timiskaming county, Que.
Chief Mountain. See Waterton.
- Chiefs**; island, Couchiching lake, Ontario county, Ont. (Not Chief.)
- Chiefs**; point, Amabel township, Bruce county, Ont.
- Chieftain**; hill, between Watson and Wheaton rivers, southern Yukon.
- Chignecto**; bay, between Cumberland county, Nova Scotia, and Albert and Westmorland counties, New Brunswick. (Not Chignecto channel.)
- Chikobi**; lake, Guyenne township, Timiskaming county, Que. (Not Chikobee.)
- Chikoida**; mountain and river, Nakina river, Cassiar district, B.C.
- Chilako**; river, trib. to Neechako R., Cariboo district, B.C. (Not Chilacco nor Mud.)
Chilanco. See Chilanko.
- Chilanko**; river, trib. to Chilcotin R., Cariboo and Coast districts, B.C. (Not Chilanco.)
Chilco. See Chilko.
Chilcote. See Chilko.
- Chilcotin**; lake, river, and village, Cariboo and Lillooet districts, B.C.
- Childs**; lake, in Duck Mountain Forest reserve, western Manitoba.

- Chilko**; lake and river, tributary to Chilcotin river, Cariboo, Coast, and Lillooet districts, B.C. (Not Chilco nor Chilcote.)
- Chilliwack**; lake, river, and town, in southern British Columbia. (Not Chilliwak, Chilliwack, Chillukweyuk, nor Chiloweyuck.) Previous decision revised.
- Chimney**; creek, flowing into Fraser R., W. of Williams lake, Cariboo district, B.C. *Chimney*. See Bridge.
- Chimney Island* (point). See Patterson.
- Chimo**. post, Koksoak river, New Quebec. (Not Fort Chimo.)
- Chin**; coulée and post office, southern Alberta.
- China**; butte, creek, and ridge, east of the W. fork of Kettle river, Yale district, B.C.
- China**; cove and reef, near Wreck point, entrance to Georgian bay, Bruce Co., Ont. *China Hat*. See Klemtu.
- Chiniki**; creek and lake, tributary to Bow river, also mountain, Alta. (Not Chiniquy.)
- Chip**; lake, west of St. Ann, Alberta. (Not Dirt nor Lobstick.)
- Chipewyan**; H. B. Co.'s post, and Mission station, near outlet of Athabaska lake, also lake to southwest of Athabaska lake, Alta. (Not Chippawyan nor Chippewyan.)
- Chipewyan**; settlement, near southwesterly end of Athabaska lake, northeastern Alberta. (Not Fort Chipewyan.)
- Chipman Corner**; post office, Kings county, N.S. (Not Chipman Corners, Chipmans Corner nor Chipman's Corners.)
- Chippawa**; village, Welland county, Ont. (Not Chippewa.)
- Chippewa*. See Harmony.
- Chippewa*. See Welland.
- Chipuin**; mountain, Tp. 20, R. 27, W. 6 M. Yale district, B.C. (Not Chipooin.)
- Chiputneticook**; lakes, headwaters of St. Croix river, on western boundary of New Brunswick. (Not Chiputneticook nor Chiputnaticook.)
- Chisaouataisi*. See Sassawatisi.
- Chisholm**; shoal, in Michael bay, S. shore of Manitoulin I., Manitoulin district, Ont.
- Chismaina**; lake, southeast of Teslin lake, Cassiar district, B.C.
- Chitek**; lake and river, emptying into Meadow lake, Sask. (Not Pelican.)
- Chivelston**; lake, south of Harris lake, Thunder Bay district, Ont.
- Chiverie*. See Cheverie.
- Chlorydorme*. See Cloridorme.
- Choelquoit**; lake, north of Chilko lake, Coast district, B.C.
- Chonat**; bay and point, S. shore Okisollo channel, Coast district, B.C. (Not Lake.)
- Choniaban*. See Sholiaban.
- Choquette**; bar, in Stikine R., N. of Iskut R., Cassiar district, B.C. (Not Choquette's.)
- Chorkbak**; inlet, north shore of Hudson strait, N.W.T. (Not Tchork-back.)
- Chown**; mount, about 25 miles northwest of Mt. Robson, Rocky mountains, Cariboo district, B.C.
- Chrislers*. See Crysler.
- Christie**; mount, also pass, watershed of Ross and Gravel rivers, N.W.T. and Yukon.
- Christie**; mount, southwest of Mt. Moberly and west of Athabaska river, Alta.
- Christie Lake**; post office, Lanark county, Ont. (Not Christy's Lake.)
- Christina**; bay, S. shore of Manitoulin I. and east of Burnt I., Manitoulin district, Ont.

SESSIONAL PAPER No. 25d

- Christina**; lake and river, discharging into Clearwater river, northeastern Alberta. (Not Pembina.) To avoid duplication of the name Pembina applied to a larger stream tributary to Athabaska river.
- Christopherson**; lake, north of Grand lake, Victoria. Timiskaming county, Que.
- Christy**; creek, east of Whatshan lake, Kootenay district, B.C.
- Chrysler*. See Crysler.
- Chuan*. See Saltspring.
- Chuch Koone*. See Chukuni.
- Chudleigh*. See Chidley.
- Chudliasi**; bay, north shore of Hudson strait, N.W.T. (Not Chudli-a-si.)
- Chukuni**; river, north of Red lake, Patricia district, Ont. (Not Chuch Koone nor Whitefish Spawning.)
- Chungo**; creek, tributary to the south branch of Brazeau river, Alta. (Not Trail.)
- Church**; point, Markham bay, Hudson strait, N.W.T.
- Church**; point, east of Becher bay, southern coast of Vancouver island, B.C.
- Churchill**; river, emptying into Hudson bay, Manitoba and Sask. (Not English or Missinipi.)
- Chute**; cove, Annapolis county, N.S. (Not Chute's cove.)
- Ciboux**; island, at entrance to Great Bras d'Or, Victoria county, N.S. (Not Bird nor Hiboux.)
- Cigar**; island, north of Chiefs point, Bruce county, Ont.
- Cinder**; point, eastern side of Cockburn island, Manitoulin district, Ont.
- Cinnamon**; creek, west of Lower Arrow lake, Kootenay district, B.C.
- Circle**; lake, west of Favel lake, Kenora district, Ont.
- Cirque**; peak, northeast of Bow lake, Rocky mountains, Alta.
- Citadel**; mountain, Sir Sandford range, Selkirk mountains, Kootenay district, B.C.
- Citron*. See Gordon.
- Citrouille**; point, St. Lawrence river, Champlain county, Que.
- Clachnacudainn**; range of mountains and snowfield, Selkirk mountains, Kootenay district, B.C. (Not Clach-na-coodin.)
- Clairvaux-de-Bagot**; post village, Bagot county, Que. (Not Clairvaux de Bagot.)
- Clairville*. See Humber.
- Clapham**; lake, Thetford township, Megantic county, Que.
- Clappison**; post office, Wentworth county, Ont. (Not Clappison's Corners.)
- Clark Fork*. See Pend d'Oreille.
- Clark**; harbour, Cornell Grinnell bay, N.W.T. (Not Frank Clark.)
- Clark**; lake, Dungannon township, Hastings county, Ont. (Not Clark's.)
- Clark**; point, Gabarus bay, Cape Breton county, N.S. (Not Low.) New name to avoid confusion with Low point and Low Point P.O., George bay, Inverness Co.
- Clark**; point and reef, Bruce county, Ont. (Not Pine Point nor Clark Point reef.)
- Clarke**; glacier and peak, S.E. of Mt. Bonney, Selkirk Mts., Kootenay district, B.C.
- Clarke**; island, Blind bay, Halifax county, N.S. (Not Clarke's.)
- Claude**; lake, near northerly end of lake Manitoba, Man.
- Clay**; brook and lake, Villeneuve township, Ottawa Co., Que. (Not Clay Brook lake.)
- Clay**; river, tributary to Bell river, Timiskaming county, Que.

- Clayoquot**; sound, also post village on Stubbs island in the sound, west coast of Vancouver island, B.C.
- Clayoquot*. See Opitsat.
- Clear**; creek, tributary to Stewart river, Yukon.
- Clear*. See Smooth Rock.
- Clear*. See Sasaginaga.
- Clear*. See Wakomata.
- Clear Water*. See Madge.
- Clearwater**; river, tributary to Athabaska river, at McMurray, Alta. and Sask.
- Clearwater**; river, tributary to the Saskatchewan, at Rocky Mountain House, Alta.
- Clearwater**; river, tributary to Stikine river, Cassiar district, B.C.
- Clearwater*. See Teggau.
- Cleaveland**; point, S. shore of St. Margaret bay, Halifax Co. N.S. (Not Cleveland.)
- Cleftrock**; lake, west of Manitou lake, Kenora district, Ont. (Not Cleft Rock.)
- Clements Land**; in the southeastern portion of Baffin island, N.W.T.
- Cleopatra**; island; southwest of Grenadier I., St. Lawrence river, Leeds county, Ont.
- Cleveland*. See Cleaveland.
- Cliff**; lake, southwest of Perrault lake, Kenora district, Ont. (Not Mountain.)
- Cline**; mount, southwest of Sentinel mountain, also river flowing into the Saskatchewan, N. of Sentinel mountain, central Alberta. (Not White Goat nor Cataract.)
- Clinton**; creek, near Cudahy, Yukon.
- Clinton-Colden**; lake, northeast of Great Slave lake, N.W.T. (Not Clinton Golden.)
- Clio**; bay and point, Kitimat arm, Coast district, B.C.
- Clondyke*. See Klondike.
- Cloridorme**; township and village, Gaspé county, Que. (Not Cloridon, Chlorydorme, nor Chlorydormes.)
- Cloridon*. See Cloridorme.
- Cloyah*. See Kloiya.
- Club**; island, southwest of Rockport, St. Lawrence river, Leeds county, Ont.
- Cluster**; rocks, Lady-smith harbour, east coast of Vancouver island, B.C.
- Clyde Corners**; post office, Huntingdon county, Que. (Not Clyde's Corners.)
- Coac*. See Koak.
- Coachman**; head, east side of Mahone bay, Lunenburg county, N.S. (Not Covey.)
- Coal**; creek, lake, and ridge, north of Watson river, Yukon.
- Coal**; creek, tributary to Yukon river, below Fortymile, Yukon.
- Coal*. See Kirby.
- Coast**, island, west of Ridley island, Coast district, B.C.
- Coast**; range of mountains, in western part of British Columbia. (Not Cascade.)
- Cobalt**; lake and town, Timiskaming district, Ont.
- Coban**; river, tributary to Waswanipi R., below Otchisk R., Abitibi, Que. (Not Cabane.)
- Cobb**; lake, Russell county, Ont. (Not The lake.)
- Cobble Hill**; post office and railway station, west of Saanich inlet, Vancouver I., B.C.
- Cocagne**; harbour, island, river, and town, Kent county, N.B. (Not Cocaigne.)
- Cochrane**; river, flowing into Deer lake, south of Island lake, Patricia district, Ont.
- Cock*. See South Fowl.

SESSIONAL PAPER No. 25d

- Cockburn**; island, Manitoulin district, Ont.
Cockburn; island, Brock group, St. Lawrence river, Leeds county, Ont. (Not Picnic.)
Cockburn; land, in N.W. portion of Baffin island, N.W.T. (Not Cockburn island.)
Cockmagun. See Cogmagun.
Cockmigon. See Cogmagun.
Cockscomb; mountain, near the headwaters of Jumpingpound creek, southern Alberta.
Coehill; P.O. and Ry. sta., Hastings county, Ont. (Not Coe Hill nor Coe Hill Mines.)
Coffee; river, tributary to Bell river, Timiskaming county, Que. (Not Brownwater.)
Coffey; post office, Huntingdon county, Que. (Not Coffey's Corners.)
Coffey's Corners. See Coffey.
Cogle; pass, at head of St. Mary river, Kootenay district, B.C.
Cogmagun; river, Hants county, N.S. (Not Cockmagun, nor Coekmigon.)
Colborne. See Colburne.
Colbourne. See Colburne.
Colburne; passage between Piers island and Saanich peninsula, southeast coast of Vancouver island, B.C. (Not Colborne nor Colbourne.)
Cold; brook, tributary to Gizzard river, Abitibi territory, Que.
Cold; lake, north of Beaver river, central Alberta and Saskatchewan.
Cold. See Kississing.
Coldbrook; post office and railway station, Kings county, N.S. (Not Cold Brook Station, P.O.)
Cold Brook. See Colebrooke.
Coldstream. river, flowing into L. St. Francis, Frontenac and Megantic counties, Q.
Coldwater; river, emptying into east end of L. Superior, Algoma, Ont. (Not Blind.)
Coldwater. See Bow.
Cole; point, northwest point of Big island, bay of Quinte, Prince Edward county, Ont. (Not Cole's.)
Cole; rapids, Saskatchewan river, above the entrance of the south branch, Sask. (Not Cole's nor La Colle.)
Colebrooke; settlement, south of Campbellton, Restigouche county, N.B. (Not Coldbrook, nor Cold Brook.)
Coleman; cove and harbour, west of entrance to St. Margaret bay, Lunenburg county, N.S. (Not Coleman's.)
Coleman; island, Sagemace bay, lake Winnipegosis, Manitoba.
Coleman; mount, southeast of mount Athabaska, Rocky mountains, Alta.
Coleraine; railway station, township, and village, Megantic county, Que. (Not Colrairie nor Coleraine Station post office.)
Collie; mount, northwest of mount Balfour, Rocky mountains, Kootenay district, B.C.
Collie. See Yoho.
Collier; island, Navy group, St. Lawrence river, Leeds county, Ont. (Not Collyer.)
Collins; shoal, Ladysmith harbour, east coast of Vancouver island, B.C.
Collinson; point, Active pass, strait of Georgia, New Westminster district, B.C.
Colmer; cape, at entrance to Crooks inlet, Hudson strait, N.W.T.
Colrairie. See Coleraine.
Colombe. See Coulombe.

- Colquhoun**; island, in St. Lawrence river, below Cornwall, Glengarry county, Ont. (Not Colquhon nor Colquhouns.)
- Columbia**; lake, at source of Columbia river, Kootenay district, B.C. (Not Upper Columbia.)
- Columbia**; mount, also glacier and snowfield, west of Mt. Bryce, summit range of the Rockies, Alta., and Kootenay district, B.C.
- Columbia**; river, Kootenay district, B.C.
- Comb**; islands and river, E. side of Hudson bay, New Quebec. (Not Comb Hills island and river.)
- Commandant*. See Papineau.
- Commerall**; point, south side of Raft cove, northwest coast of Vancouver island, B.C.
- Commerell*. See Sutil.
- Commissioners**; lake, Lake St. John county, Que. (Not Commissioner.)
- Compass**; lake, Burleigh township, Peterborough county, Ont.
- Comporté**; river, tributary to Murray river, Charlevoix county, Que.
- Cone**; hill, near mouth of Clinton creek, Yukon.
- Cone**; mountain, near Stikine river, north of Scud river, Cassiar district, B.C.
- Cone**; mountain, north of Spray mountains, Rocky Mountains park, Alta.
- Cone**; point, on the west side of lake Evans, Abitibi territory, Que.
- Connaught**; mount, in the big bend of Salmon river, Yale district, B.C.
- Conn Mills**; village, Cumberland county, N.S. (Not Conn's Mills.)
- Connolly**. mount, between Mackenzie sound and Suttlej channel, Coast district, B.C. (Not Conolly.)
- Conrad**; mining camp, west shore Windy arm, Tagish L., Yukon. (Not Conrad City.)
- Conrad**; mount, east of Windy arm of Tagish lake, Cassiar district, B.C. and Yukon.
- Conran**; island, Brock group, St. Lawrence river, Leeds county, Ont. (Not Refugee.)
- Consecon**; lake and village, east of Weller bay, Prince Edward county, Ont.
- Consolation**. creek, emptying into Gladys lake, Cassiar district, B.C.
- Consolation**; valley, east of Moraine lake, Alta.
- Conspicuous peak*. See Empress mountain.
- Constance**; island, between Georgina and Hill islands, St. Lawrence river, Leeds county, Ont. (Not Bowes.)
- Contact**; brook and lake, southeast of File lake, Manitoba.
- Cony**; creek, near mount Woden, Kootenay district, B.C.
- Cook**; island, northeast of Grenadier island, St. Lawrence river, Leeds county, Ont.
- Cook**; lake, Britton township, Kenora district, Ont.
- Cook**; point below Kockport, Leeds county, Ont. (Not Cary nor Cook's.)
- Cook**; railway station, Haldimand county, Ont. (Not Cook's.)
- Cooking**; lake, in Tps. 51 and 52, R. 21, and Tp. 51, R. 22, W. 4th M., Alta.
- Coolen*. See Coonan.
- Coonan**; cove, Shag bay, Halifax county, N.S. (Not Coolen.)
- Cooper**; lake, an expansion of Marten river, Mistassini territory, Que.
- Cooper**; mount, near Hutshi lakes, Yukon.
- Cooper**; point, south shore of Okisollo channel, Coast district, B.C.
- Copeau**; river, tributary to Red Deer river, eastern Saskatchewan.

SESSIONAL PAPER No. 25d

- Copeland**; mount, Gold range, northwest of Revelstoke, Kootenay district, B.C.
- Copeway**; lake, Lake township, Hastings county, Ont.
- Copper**; creek, tributary to Hackett river, Cassiar district, B.C.
- Copper**; island in southern portion of Atlin lake, Cassiar district, B.C.
- Copper*. See Zymoetz.
- Coquihalla**; lakes, mountain, and river, Yale district, B.C. (Not Coquahalla.)
- Coral**; mountain, Beaverfoot range, Yoho park, Rocky Mts., Kootenay district, B.C.
- Corbay*. See Corbeil.
- Corbeil**; point, northern entrance to Batchawana bay, Herrick township, Algoma, district, Ont. (Not Corbay.)
- Corbin**; pass and peak, north of Illecillewaet, Kootenay district, B.C.
- Cordero**; channel, N. of Sonora and Thurlow Is., Coast district, B.C. (Not Cardero.)
Josef Cordero was the draughtsman of Galiano's expedition in the "Sutil" and "Mexicana," 1792. Walbran's Coast names, B.C.
- Cordova**; bay, southeast coast of Vancouver island, B.C. (Not Cormorant.)
- Cordova*. See Saanichton.
- Corisande**; bay, east shore of lake Huron, Bruce county, Ont
- Cormorant**; lake, northwest of Moose lake, Manitoba.
- Cormorant*. See Cordova.
- Corn**; island, southeast of Gananoque, St. Lawrence river, Leeds county, Ont.
- Corn**; lake, Redditt township, Kenora district, Ont.
- Corn*. See Broughton.
- Corneille**; point, below Goose cape, St. Lawrence river, Charlevoix county, Que.
- Cornet**; ground, southwest of Greenough point, Bruce county, Ont.
- Cornice**; peak, southerly spur of mount Palmer, also glacier, Selkirk mountains, Kootenay district, B.C.
- Corn island shoals*. See Broughton.
- Cornwall**; island, north of Grinnell peninsula, N.W.T. (Not North Cornwall.)
- Cornwallis**; island, west of Devon island, N.W.T.
- Cornwall Park**; a summer resort on east extremity of Big island, bay of Quinte, Prince Edward county, Ont.
- Coronation**; mountain, north of Chemainus river, Vancouver island, B.C.
- Corral**; creek, tributary to Bow river, east of Laggan, Alta.
- Corry**; lake, an expansion of Chalk river, Renfrew county, Ont. (Not Corry's nor Curry's.)
- Corsair**; mountain, N.E. of Blackwater range of the Rockies, Kootenay district, B.C.
- Corsair**; reef, west of Reid point, Bruce county, Ont.
- Corwin**; valley, north of Bennett lake, southern Yukon.
- Cosine**; lake, southeast of Eyehill creek, Sask.
- Coste**; island, Kitimat arm, Coast district, B.C.
- Costigan**; mount, northeast of lake Minnewanka, Rocky Mountains park, Alta.
- Coteau**; lake, Tp. 27, R. 8, W. 3 M., also creek flowing from the lake into the south branch of Saskatchewan river, Sask. (Not Red Deer.)
- Côte-des-Neiges-Ouest**; village, Hochelaga county, Que. (Not Côte des Neiges West.)
- Cottle**; hill, northwest of Departure bay, Vancouver island, B.C. (Not Cattle.)

- Cottonwood**; creek, tributary to Waskana creek, southeastern Saskatchewan.
- Cottonwood**; river, tributary to Dease river, Cassiar district, B.C.
- Couchiching**; lake, north of lake Simcoe, Ontario and Simcoe counties, Ont.
- Coudres**; island, Charlevoix county, Que. French usage, Ile aux Coudres.
- Cougar**; brook and mountain, in the Selkirk mountains, Kootenay district, B.C.
- Cougar**; creek, tributary to Little Slocan river, Kootenay district, B.C.
- Coulombe**; lake and river, emptying into L. Aylmer, Wolfe Co., Que. (Not Colombe.)
- Countess Warwick**; sound, north shore Frobisher bay, N.W.T.
- Counts**; bank, southwest of Dead island, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.
- Courteney**; bay, St. John harbour, N.B. (Not Courtney.)
- Coutlee**; plateau, railway station, and town, Yale district, B.C. (Not Coutlie.)
- Coutts**; river, tributary to Saulteux river, central Alberta.
- Cove**; island, in entrance to Georgian bay, Bruce county, Ont. (Not Isle of Coves.)
- Cove Island**; ground, off N.W. side of Cove island, Georgian bay, Bruce county, Ont.
- Covey*. See Coachman.

Cunliffe; island, Navy group, St. Lawrence river, Leeds county, Ont. (Not Gunliffe.)

Cupola; mountain, Selkirk range, Kootenay district, B.C.

Currie; mount, west of Lillooet lake, Lillooet district, B.C.

Currie; post village and railway station, Oxford Co., Ont. (Not Currie's Crossing.)

Currie's Crossing. See Currie.

Curry's. See Corry.

Curtain; falls, between Crooked and Iron lakes, Int. boundary, Rainy River dist., Ont.

- Curtis**; peak, southeast of Mt. Biddle, Rocky mountains, Kootenay district, B.C.
Cut. See Lindsay.
Cutarm; river, tributary to Qu'Appelle river, southern Sask. (Not Big Cutarm.)
Cutknife; creek, hill, and post office, S. of Battle river, Sask. (Not Cut Knife.)
Cyclone; peak, an outlying spur of mount Drummond, Rocky mountains, Alta.
Cypress; hills, southern Alberta and Saskatchewan.
Cypress; lake, south of Cypress hills, southwestern Saskatchewan.
Cypress; lake, southwest of Saganaga lake, Int. boundary, Rainy River district, Ont.
Cypress; river, tributary to Assiniboine river, southern Manitoba.
Cyprian; peak, in the Bishops' range, Selkirk mountains, Kootenay district, B.C.
Cyrus Field; bay, east shore of Baffin island, N.W.T. (Not Cyrus W. Field.)

D

- Dack**; spit, west of Port Elgin, Bruce county, Ont.
Dadancour. See Giroux.
Dago; creek, tributary to Little Slocan river, Kootenay district, B.C.
Dahadinni; river, trib. to Mackenzie R., N.W.T. (Not Dahadinee nor Dahadinne.)
Dail; creek and peak, west of Windy arm, Tagish lake, Yukon.
Dainard; creek, tributary to Moose creek, also lake east of the creek, Yoho park, Rocky mountains, Kootenay district, B.C.
Daisy; lake, emptying into Cheakamus river, New Westminster district, B.C.
Dalesville; river, tributary to West river, Argenteuil county, Que. (Not Middle Branch of West River.)
Dalhousie Mills. See Dalhousie Station.
Dalhousie Station; post village, Soulanges county, Que. (Not Dalhousie Mills.)
D'Alogmy. See Maple.
Dalton; range of mountains, near Dezadeash lake, southwest Yukon.
Daly; mount, southeast of mount Balfour, Rocky mountains, Kootenay district, B.C.
Dane; island, east of Lyal island, Bruce county, Ont.
Daniels; lake, north of Linklater lake, Kenora district, Ont. (Not Daniel nor Danish.)
Danish. See Daniels.
Daoust; mount, south of Lewes river, Yukon.
Dares; point, east side of Mahone bay, Lunenburg county, N.S. (Not Indian.)
Darlens; river, Darlens township, Timiskaming county, Que. (Not Bear.)
Dark; island, Admiralty group, St. Lawrence river, Leeds county, Ont.
Dark. See Aubrey.
Dashwood; island, east of Wallace island, St. Lawrence river, Leeds county, Ont.
Dasserat; lake, Timiskaming county, Que. (Not Island, Mattawagosik, nor Obadowagashing.) Previous decision revised.
Dauphin; lake and town, western Manitoba.
Dauphin; river, emptying into Sturgeon bay, lake Winnipeg, Man. (Not Little Saskatchewan.)
Dauphinee; head, Hubbard cove, mountain north of Head harbour, Halifax county, and lake northeast of St. Margaret bay, Halifax and Lunenburg counties, N.S. (Not Dauphiney nor Dauphney.)

SESSIONAL PAPER No. 25d

Dauphney. See Dauphinee.

Dave; bay, south side of Great Duck island, Manitoulin district, Ont.

Davenport; creek, flowing into west end of Gladys lake, Cassiar district, B.C.

David; point, Shawatlan passage, northeast of Kaien island, Coast district, B.C.

Davidson; mountains, between Ladue river valley and McQuesten lakes, Yukon.

Davies; lake, west of Barnard lake, Thunder Bay district, Ont.

Davis; creek, branch of Walker creek, west of Dawson, Yukon.

Davis; island, Navy group, St. Lawrence river, Leeds county, Ont.

Davis; lake, Lutterworth township, Haliburton county, Ont. (Not Davis'.)

Dawkins. See Jorkins.

Davy; lake and river, Trécession township, Timiskaming county, Que. (Not Davie.)

Dawson; bay, in northwestern portion of L. Winnipegosis, Manitoba.

Dawson; capital city of Yukon territory. (Not Dawson City.)

Dawson; island, lake Nipigon, Thunder Bay district, Ont.

Dawson; mount, also glacier, southeast of mount Bonney, Selkirk mountains, Kootenay district, B.C.

Dawson; peak, near Teslin lake, Yukon.

Dawson; point, at the northerly end of Primrose island, Coast district, B.C.

Dawson; point, at the head of lake Timiskaming, Ont.

Dawson; range of mts., at confluence of Lewes, Pelly, and Yukon rivers, Yukon.

Dawsonvale. See Dawsonville.

Dawsonville; town, Restigouche county, N.B. (Not Dawsonvale.)

Dayman; island, west of Kuper island, S.E. coast of Vancouver island, B.C.

Deacon; lake, Melick, Pettypiece, and Redditt Tps., Kenora district, Ont. (Not Ant.)

Dead; island, also Dead Island reef, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.

Deadman; harbour and head, Charlotte county, N.B. (Not Deadman's.)

Deadman; islets (2), east of Beck island, also the navigable channel between the islets and the spit extending north from Felice (Round) island, Clayoquot sound, Vancouver island, B.C.

Deadwood; creek, tributary to Yukon river, below Dawson, Yukon.

Dean; bay and spit, east of Dominion point, Manitoulin district, Ont.

Dease; lake and river, tributary to Liard river, Cassiar district, B.C.

Deathdealer; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.

DeBeaujeu (île); island, St. Lawrence river, Soulanges county, Que. (Not Grande île aux Erables.)

Debert; river and village, Colchester county, N.S. (Not DeBert.)

Debert. See Masstown.

Deception; bay, south shore Hudson strait, New Quebec. (Not Foster's Harbour nor Shedlui.)

DeCewville; post village and Ry. station, Haldimand Co., Ont. (Not Decewsville.)

Decker; lake, on telegraph trail, south of Babine lake, Coast district, B.C.

DeCourcy; group of islands, Pylades channel, southeastern coast of Vancouver island, B.C. (Not DeCourcey.)

Deep. See Canyon.

Deep creek. See Trepanege river.

Deepwater; lake, northeast of lake Timiskaming. Timiskaming county. Que.

Deer; island, 1½ m. N. W. from Gull harbour, L. Winnipeg, Man. (Not Punk.)

Deer. See Atikwa.

Deer. See Georgina.

Deer. See Punk.

Deer Park; mountain, post office, and landing to important mining district, east of Lower Arrow lake, Kootenay district, B.C. (Not Deer mountain.)

Defot; mount, also creek, Dease river, Cassiar district, B.C.

Delany; lake, southeast of Lount lake, Kenora district, Ont.

Delap Cove; village, Annapolis county, N.S. (Not Delap's Cove.)

Delisle; river, Glengarry county, Ont. (Not De Lisle nor L'Isle.)

Deltaform; mountain, Bow range of the Rockies, Alta. and Kootenay district, B.C.

Delthore; mount, Gravel river, N.W.T.

Delusion; bay, in southern portion of Digby island, Coast district, B.C.

Demaniel; creek, flowing into Sooke harbour, Vancouver island, B.C.

Demers; a peak of the Valhalla mountains, Kootenay district, B.C. (Not DeMers.)

Demers; rock, east of Brandypot channel, St. Lawrence river, Temiscouta Co., Que.

Demoiselle; cape and creek, Albert county, N.B. (Not D'Moiselle, Cap de Moselle, nor Cape de Moisselle.)

De Montigny; lake, Dubuisson and Varsan townships, Timiskaming county, Que. (Not Kienawisik.)

Denise; arm, northeast arm of Morse basin, east of Kaien island, Coast district, B.C.

Denmark; lake, south of Atikwa lake, Kenora district, Ont.

Dennis; mount, also pass, south of mount Stephen, Kootenay district, B.C.

Dennis. See Denys.

Dent; mount, north of Blaeberry river, Rocky mountains, Kootenay district, B.C.

Denver; creek, tributary to St. Mary river, Kootenay district, B.C.

Denver; mount, west of Slocan lake, Kootenay district, B.C.

Denys; river, Inverness county, N.S.; also River Denys P.O., River Denys Road P.O. River Denys Station, P.O. (Not Dennis.)

Departure; bay, north of Nanaimo, Vancouver island, B.C.

Depot; island, west of Supply point, Depot harbour, Parry Sound district, Ont. (Not Supply.)

DeRottenburg; island, Brock group, St. Lawrence, R. Leeds Co., Ont. (Not Bluff.)

Derry; post office, Peel county, Ont. (Not Derry West.)

Derry West. See Derry.

DeSalaberry; island, St. Lawrence river, Beauharnois county, Que. (Not Grand.)

Descanso; bay, Gabriola island, strait of Georgia, B.C. (Not Knight nor Rocky.)

Deschaillons; seigniorie and post village, Lotbinière county, and island in Richelieu river, Richelieu county, Que. (Not d'Eschaillons, des Chaillons, Eschaillons, St. Jean Deschaillons, nor St. Jean-Baptiste Deschaillons.)

Deschambault; lake, and river flowing from Wapawekka lake, central Saskatchewan. (Not Bear Lake river.)

Deschênes; post office, Ottawa county, Que. (Not Deschenes Mills.)

SESSIONAL PAPER No. 25d

Deschesnes Mills. See Deschênes.

Deseronto; town, Tyendinaga township, Hastings county, Ont.

Desert; point, N.E. end of Great Duck island, Manitoulin district, Ont. (Not Sand.)

Deselicaux See Azatika.

Despair. See Espoir.

Despatch. See Dispatch.

Desolation. See Ten Peaks.

Desolation. See Wenkehemna.

DeStein; point, west of Russell arm, Prince Rupert harbour, Coast district, B.C.

Deville; mount, northwest of Ottetail station, Rocky Mts., Kootenay district, B.C.

Devils Head; mountain, in the Rocky Mountains park, Alberta. (Not Devil's Head.)

Devil's Head (lake). See Minnewanka.

Devil's Pine. See Ghostpine.

Devizes; lake, west of Barrington lake, Thunder Bay district, Ont.

Devon; island, northwest of Baffin island, N.W.T. (Not North Devon.)

DeWatteville; island, southeast of the Brock group, St. Lawrence river, Leeds county, Ont. (Not Guide.)

Dewdney; mount, Porcupine river, Yukon.

Dezadeash; lake, and river tributary to the Alsek, southwestern Yukon.

Dez Amecane. See Azatika.

Diable (cap au); cape, western entrance Kamouraska bay, Kamouraska Co., Que.

Diamond; island, west of Jubilee island, north shore of Hudson strait, N.W.T.

Diamond; lake, Herschel township, Hastings county, Ont.

Diana; bay, west of Cape Hopes Advance, Hudson strait, New Quebec.

Dibble; creek, tributary to Bull river, Kootenay district, B.C.

Dickey; lake, Lake township, Hastings county, Ont. (Not Dickey's.)

Dickinson Landing; post village, Stormont county, Ont. Not Dickenson's Landing nor Dickinson's Landing.)

Dickson; hill, south of Wheaton river, southern Yukon.

Dinghy; island, between Barge and Deathdealer islands, Lake Fleet group, St. Lawrence river, Leeds county, Ont. (Not 34g.)

Dinorwic; lake and railway station, Kenora district, Ont. (Not Little Wabigoon.)

Dion; creek, tributary to Yukon river, near Dawson, Yukon.

Dirt. See Chip.

Dirtywater. See Houghton.

Discovery; lake, east of Minnitaki lake, Kenora district, Ont.

Discovery. See Plumber.

Disella; lake, south of Chismaina lake, Yukon.

Dispatch; island, in Columbia river, near south end of Upper Arrow lake, Kootenay district, B.C. (Not Despatch.)

Division; mountain, east of Schwatka river, southern Yukon.

Dixie; mount, also lake, east of Atlin lake, Cassiar district, B.C.

Dixie. See O'Donnell.

Dixon; lake, Limerick township, Hastings county, Ont. (Not Dixon's.)

Dixon Corners; post village, Dundas county, Ont. (Not Dixon's Corners.)

- Dobbs**; island, N. of Gordon island, St. Lawrence R., Leeds county, Ont. (Not Hay.)
- Doctor**; island, S.E. of Tar island, St. Lawrence R., Leeds Co., Ont. (Not Doctor's.)
- Doctor**. island, south shore of Hudson strait, New Quebec.
- Doctor**; island, between Russell island and Tobermory harbour, at entrance to Georgian bay, Bruce county, Ont.
- Doctor**; lake, on Churchill river, Sask.
- Dòdd**; narrows, between Mudge and Vancouver islands, B.C.
- Dodge**; cove, W. of Parizeau Pt., Digby I., Prince Rupert harbour, Coast district, B.C.
- Dodge**; island, north of Parizeau point, Prince Rupert harbour, Coast district, B.C.
- Dog**; island, also Dog Island lightstation, opposite Seal cove, north shore of Lennox passage, Richmond county, N.S. (Not Seal.)
- Doghead**; point, the northeastern point of entrance to the narrows of lake Winnipeg, Man. (Not East Doghead.)
- Dognose**; creek, tributary to Klondike river, Yukon.
- Dog's Head*. See Whiteway.
- Dogtooth**; mountains, Selkirk range, Kootenay district, B.C.
- Dokdaon**; creek, tributary to Stikine R., near Clearwater R., Cassiar district, B.C.
- Dokis**; island, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.
- Dollis**; creek, tributary to Tatshenshini river, southwestern Yukon.
- Dolomite**; lake, south of Reed lake, Manitoba. (Not Limestone.)
- Dolomite**; pass, peak, and stream, Rocky mountains, Alberta.
- Dombourg**; islet, in St. Lawrence river, near Pointe-aux-Trembles, Portneuf county, Que. (Not Donbour nor Frechette.)
- Dome**; mountain, west of Cudahy, near international boundary, Yukon.
- Dome**; mountain, near lake Evans, Abitibi territory, Que.
- Dominick**; lake, Rugby township, Kenora district, Ont. (Not Dominic.)
- Dominion**; bay and point, south shore of Manitoulin island, Manitoulin district, Ont.
- Dominion**; creek, tributary to Indian river, Yukon.
- Don**; lake, west of Favel lake, Kenora district, Ont.
- Don**; river, flowing into lake Ontario, York county, Ont. (Not West Branch of Don river.)
- Don*. See Little Don.
- Donald*. See McDonald.
- Donaldson**; island, east of Sooke inlet, Vancouver island, B.C. (Not Secretary.)
- Donbour*. See Dombourg.
- Dondaine**; islands, St. Lawrence river, near Valleyfield, Soulanges county, Que. (Not Soulanges.)
- Donjek**; river, tributary to White river, Yukon.
- Donkin**; mount, also glacier and pass, southeast of mount Bonney, Selkirk Mts., Kootenay district, B.C.
- Doobaunt*. See Dubawnt.
- Dorcas**; bay, east coast of lake Huron, Bruce county, Ont.
- D'Or**; cape, Cumberland county, N.S. (Not Dore nor D'Ore.)
- Doré** (baie du); bay, Bruce county, Ont.
- Dore*. See D'Or.

SESSIONAL PAPER No. 25d

Dorion. See Vaudreuil.

Dorothy; island and narrows, Devastation channel, Coast district, B.C.

Dotty; lake, Finlayson township, Nipissing district, Ont. (Not Dotty's.)

Double. See Brandon.

Douglas; channel, between Hawkesbury island and the mainland, Coast district, B.C.

Douglas; creek, southwest of Banff, Alta.

Douglas; harbour, King George sound, Hudson strait, New Quebec.

Douglas; lake, east of mount Douglas, Rocky mountains, Alta.

Douglas; mount, at headwaters of Red Deer river, Rocky mountains, Alta.

Douglas; mount, north of Victoria, B.C.

Douglas; point, Bruce county, Ont.

Douglas; point, E. entrance Melville arm, Prince Rupert harbour, Coast district, B.C.

Douglas. See Protection.

- End**; mountain, south of the south fork of Ghost river, Rocky mountains, Alta.
- Endako**; river, tributary to Stellako river, east of Francois lake, Coast district, B.C.
- Endikai**; lake, N.E. of Grasett Tp., Algoma district, Ont. (Not Endikai-a-go-ming.)
- Endymion**; island, Lake Fleet grp., St. Lawrence R., Leeds Co., Ont. (Not Endymian.)
- English**; portage, Pigeon river, above Grand portage, international boundary, Thunder Bay district, Ont.
- English**; river, rising near English River station, C.P.R., and flowing northward to L. Seul, and thence westward to its confluence with Winnipeg river, Kenora and Patricia districts, Ont.
- English*. See Churchill.
- Englishman**; lake and river, tributary to the Saskatchewan, central Sask.
- Ennett**; post office and railway station, Kent county, Ont. (Not Turnerville.)
- Ennis**; mount, east of mount Vaux, Rocky mountains, Kootenay district, B.C.
- Ennishone**; post settlement, Victoria county, N.B. (Not Ennishore.)
- Ennishore*. See Ennishone.
- Enrage**; cape, Chignecto bay, N.B. (Not Enragé.)
- Ensley**; creek, tributary to Yukon river, north of Indian river, Yukon.
- Entrance**; island, off Berry point, Gabriola island, S.E. coast of Vancouver I., B.C.
- Equan* See Ekwan.
- Erskine**; mount, Saltspring island, southeast coast of Vancouver island, B.C.
- Eschaillons*. See Deschaillons.
- Eskimo**; bay, islands, and river, west of the strait of Belleisle, Saguenay county, Que. (Not Esquimaux.)
- Eskimo**; island, one of the Mingan group; Saguenay county, Que. (Not Esquimaux.)
- Eskwahani**; lake, near the headwaters of Ottawa river, Berthier and Joliette counties, Que. (Not Askwahani.)
- Eskwanonwatin**; lake, on Black Sturgeon river, south of L. Nipigon, Thunder Bay district, Ont. (Not Esquanonwatin.)
- Esplanade**; range of mountains in the Selkirks, Kootenay district, B.C.
- Espoir (cap d')**; cape, at entrance of Chaleur bay, Gaspé Co., Que. (Not Despair.)
- Esquanonwatin*. See Eskwanonwatin.
- Esquimaux*. See Eskimo.
- Essington**; town, at mouth of Skeena river, Coast district, B.C. (Not Port Essington.)
- Etang*. See L'Étang.
- Etchipotchi**; river, tributary to Waswanipi R., Abitibi, Que. (Not Eatchepashi.)
- Ethel**; lake, south of Mayo brook, Stewart river, Yukon.
- Ethel**; lake, Redditt township, Kenora district, Ont.
- Etoimami*. See Etomami.
- Etoimami South*. See Lilian.
- Etomami**; lake and river, tributary to Red Deer river, eastern Saskatchewan. (Not Etoimami nor Etoimami North.)
- Etsi-kom*. See Etzikom.

SESSIONAL PAPER No. 25d

- Etta**; point, westerly extremity of Maurelle island, Coast district, B.C.
Etzikom; coulée, north of Milk river, southern Alberta. (Not Etsi-kom.)
Eulatazella; creek and lake, south of Nechako river, Cariboo district, B.C.
Eureka; creek, tributary to Indian river, Yukon.
Eva; lake, on N. T. railway, east side of Kenora district, Ont. (Not Wigwas.)
Eva; point, Devastation channel, Coast district, B.C.
Evain; lake, Montbelliard township, Timiskaming county, Que. (Not Kaishk.)
Evans; creek, west of Slocan lake, Kootenay district, B.C.
Evans; lake, in northern part of Abitibi territory, Que.
Evelyn; island, east of Warren island, Bruce county, Ont. (Not Birch.)
Evening; lake, southwest of Cliff lake, Kenora district, Ont.
Everest; island, Brock group, St. Lawrence river, Leeds county, Ont. (Not Sumach.)
Everett; reefs, at entrance to Timber bay, Manitoulin island, Manitoulin district, Ont.
Ewing; mount, west of Gladys lake, Cassiar district, B.C.
Execution. See Gallows.
Expanse; lake, an expansion of the upper Ottawa river, Timiskaming county, Que.
Exstew; Ry. sta., also river tributary to Skeena R., Coast district, B.C. (Not Ecstew.)
Extension; post office, west of South Wellington, Vancouver island, B.C.
Eyebrow; hills, lake, and post office, southern Saskatchewan.
Eyehill; creek, flowing into Manito lake, Alta. and Sask. (Not Eye Hill.)

F

- Fagan**; ground, S.W. of Yeo I., at entrance to Georgian bay, Manitoulin district, Ont.
Fairfield; bluff, on Yukon river, below Cudahy, Yukon.
Fairfield; post village and railway station, Leeds county, Ont. (Not Fairfield East.)
Fairfield; railway station, east of London, Middlesex county, Ont.
Fairfield East. See Fairfield.
Fairford; river, between Manitoba and St. Martin lakes, Man.
Fairground; post office, Norfolk county, Ont. (Not Fair Ground nor Fair Grounds.)
Fairholme; mountains, north of Bow river, Rocky Mountains park, Alta.
Fair Ness; headland, at entrance to Markham bay, Hudson strait, N.W.T.
Fairview; mountain, south of lake Louise, Alta. (Not Goat.)
Fairview; point, W. coast of Kaien island, Prince Rupert harbour, Coast district, B.C.
Fairway; channel, northwest of Gabriola island, southeast coast of Vancouver I., B.C.
Fairy; lake, east of Kejimikujik lake, Queens county, N.S.
Fairy. See Mamakwash.
Falcon; rock, at entrance to Prince Rupert harbour, Coast district, B.C.
Fall. See Tortue.
Falls; creek, west of Slocan lake, Kootenay district, B.C.
False; narrows, between Gabriola and Mudge islands, S.E. coast of Vancouver I., B.C.
False Detour; channel, between Cockburn and Drummond islands, Manitoulin district, Ont. The international boundary passes through the channel.
Fantail; lake and river, W. of Taku arm of Tagish L., Cassiar, B.C. (Not Otter.)

- Farewell**; cape, at the south end of Promise island, Coast district, B.C.
- Farnam Corners**; post office, Missisquoi county, Que. (Not Farnam's Corners.)
- Farnsworth**; mount, east of O'Donnel river, Cassiar district, B.C.
- Farquart**; lake, Harcourt township, Haliburton county, Ont.
- Farr**; creek, emptying into northerly part of lake Timiskaming, Ont.
- Farran Point**; post village and Ry. station, Dundas Co., Ont. (Not Farran's Point.)
- Farrell**; lake, Rosebud district, Alta. (Not Long.)
- Farrier**; river, flowing southeasterly into Primrose lake, central Alta. and Sask.
- Fatigue**; mountain, north of Mt. Assiniboine, Rocky Mountains park, Alta.
- Faucher**; lake, Varsan township, Timiskaming county, Que. (Not Asapikona.)
- Favel**; lake, northeast of Silver lake, Kenora district, Ont.
- Favourable**; lake, southeast of Island lake, Patricia district, Ont.
- Fawcett**; lake, southeast of Williams bay L. Seul, Kenora district, Ont.
- Fawcett**; lake and river, tributary to Lesser Slave river, central Alberta. (Not Moose.)
- Fawn**; river, tributary to Severn river, Patricia district, Ont.
- Fawn*. See Woodtick.
- Fay**; mount, Bow range of the Rockies, Alta., and Kootenay district, B.C.
- Fay**; river, tributary to Klondike river, Yukon.
- Felice**; island, between Low peninsula and Stubbs island, Clayoquot sound, Vancouver island, B.C. (Not Round.)
- Felucca**; mountain, east of Blackwater range of the Rockies, Kootenay district, B.C.
- Fenwick**; creek, tributary to Wheaton river, southern Yukon.
- Ferguson Falls**; post village, Lanark county, Ont. (Not Ferguson's Falls.)
- Fergusson**; mount, the highest point in the ridge to the northeast of the junction of Cadwallader creek with south fork of Bridge river, Lillooet district, B.C.
- Ferne (île de la)**; islet, centre-most of 3 rocky islets in the St. Lawrence, off St. Germain, Kamouraska county, Que.
- Fern**; passage, east and south of Kaien island, connecting upper portion of Prince Rupert harbour with Chatham sound, Coast district, B.C.
- Ferroux**; creek and mountain, north of Carmi, Yale district, B.C.
- Feuz**; a peak of mount Dawson, Selkirk mountains, Kootenay district, B.C.
- Fèves (rivière des)**; river, Chateauguay county, Que.
- Fiddlers Elbow**; channel, between Lynedoch and Wallace islands, St. Lawrence river, Leeds county, Ont.
- Field**; lake, on Ross river, Yukon.
- Field**; mount, and railway station, Kootenay district, B.C.
- Fife**; creek, northwest of Whatshan lake, Kootenay district, B.C.
- Fife**; lake, Tp. 3, Rs. 29 and 30, W. 2 M., Sask.
- Fifteen-mile*. See Jennings.
- Figury**; lake, Figury township, Timiskaming county, Que.
- File**; hills, southeastern Saskatchewan.
- File**; lake and river, north of Reed lake, Manitoba.
- File-axe**; lake, on the height of land, S.E. of Mistassini lake, Mistassini territory, Q.
- Findlay**; island, north of Bathurst island, Arctic ocean. (Not Finlay Land nor King Christian island.) The name "King Christian," which has appeared on some

SESSIONAL PAPER No. 25d

recent maps, was given by Sverdrup, but the island had been previously named for Alexander George Findlay, an eminent cartographer, and publisher of atlases, nautical directories, charts, etc. He was a member of the Council of the Royal Geographical Society for many years.

Finger; mountain, west of Bennett lake, Yukon.

Finlay. See Findlay.

Finlayson; arm, southern portion of Saanich inlet, Vancouver island, B.C.

Finlayson; lake and river, near head of Pelly R., Yukon. (Not Tle-tlan-a-tsoots.)

Finlayson; mount, S. of Finlayson arm, Vancouver island, B.C. (Not Leading peak.)

Fiord; bay, Separation lake, Kenora district, Ont.

Fir; river, tributary to Red Deer river, eastern Saskatchewan.

Fire; valley, west of Lower Arrow lake, Kootenay district, B.C.

Fish. See Arcola.

Fish. See Gap.

Fish. See Hébert.

Fish. See Incomappleux.

Fish. See Mami.

Fish. See Murphy.

Fish. See Norbury.

Fishbasket; river, emptying into Weibikwei lake, Patricia district, Ont.

Fisher; bay, northwest of Wakeham bay, Hudson strait, New Quebec.

Fisher; bay, northeast of Inner Duck island, Manitoulin district, Ont.

Fisher; creek, tributary to Wild Horse river, Kootenay district, B.C.

Fisher; creek, tributary to Sheep river, southern Alberta.

Fisher; harbour, north of Big island, Hudson strait, N.W.T.

Fisher; island, Brock group, St. Lawrence river, Leeds county, Ont.

Fisher; lake, east of Dryberry lake, Kenora district, Ont.

Fisher; lake, Timiskaming county, Que.

Fisher; mount, east of Kootenay river, Kootenay district, B.C.

Fisher; peak, southwestern Alberta.

Fisher; range of mountains, east of Kananaskis river, southern Alta. (Not Fisher's.)

Fisher; river, flowing northeasterly into the bay of the same name, L. Winnipeg, Man.

Fisherman; cove, at the north end of Gill island, Coast district, B.C.

Fishing; islands, extending from Chiefs point to Pike point, Bruce county, Ont. (Not Ghegheto.)

Fishing; lakes (4), expansions of Qu'Appelle river, southeastern Saskatchewan.

Fishtail; lake, Harcourt township, Haliburton county, Ont. (Not Fish Tail.)

Fitzwilliam; channel and island, entrance to Georgian bay, Manitoulin dist., Ont.

Five-finger; rapid, in Lewes river, below Nordenskiöld river, Yukon.

Flagstaff; hill, in Tp. 41, R. 11, W. 4 M., eastern Alberta.

Flamboro Centre; post village, Wentworth county, Ont. (Not Flamborough Centre.)

Flamboro East; township, Wentworth county, Ont. (Not East Flamboro nor Flamborough East.)

Flamboro West; post village and township, Wentworth county, Ont. (Not Flamborough West, West Flamboro nor West Flamborough.)

- Flat**; creek, tributary to Illecillewaet river, Kootenay district, B.C.
- Flat**; creek, tributary to Klondike river, Yukon.
- Flat**; point, east entrance to Sydney harbour, Cape Breton county, N.S. (Not Low.)
(To avoid confusion with Low point and Low Point post office, Inverness county.)
- Flat.* See Ridley.
- Flathead**; range of mountains, Alta., and Kootenay district, B.C., also river, Kootenay district, B.C.
- Flatland**; harbour, island, and reef, west of Pie island, Thunder Bay district, Ont.
- Fleet**; point, Nanaimo harbour, east coast of Vancouver island, B.C.
- Fleming**; island, southeast of Port Dover, Halifax county, N.S. (Not Fleming's.)
- Fleming**; peak, Hermit range of the Selkirks, Kootenay district, B.C.
- Flemming**; brook, tributary to Little R., Gloucester Co., N.B. (Not S. Br. of Little R.)
- Fletcher**; island, in Frobisher bay, N.W.T.
- Fletcher**; lake, in McClintock township, Haliburton county, Ont. (Not Fletcher's.)
- Flint**; lake, north of Kakagi lake, Kenora district, Ont.
- Float**; creek, tributary to Ottertail river, Rocky mountains, Kootenay district, B.C.
- Float.* See Downie.
- Florence**; river, tributary to Bell river, Abitibi territory, Que.
- Florence**; river, tributary to Klondike river, Yukon.
- Flowerpot**; island, east of Cove island, at entrance to Georgian bay, Bruce county, Ont. (Not Flower Pot.)
- Fluke**; lake, west of Cliff lake, Kenora district, Ont.
- Foam**; lake, Tps. 31 & 32, R. 12, W. 2 M., southeastern Saskatchewan.
- Foamfall**; river, tributary to Ashuapmucuan river, Chicoutimi county, Que.
- Fog**; lake, west of Manitou lake, Kenora district, Ont.
- Folden**; post office, Oxford county, Ont. (Not Folden's Corners.)
- Folden's Corners.* See Folden.
- Folding**; mountain, southeast of Brulé lake, central Alberta.
- Follé**; mountain, between Watson and Wheaton rivers, southern Yukon.
- Folly.* See Fort Folly.
- Footprint**; lake and river, N. of Threepoint L., Manitoba. (Not Squirrel nor Weir.)
- Forbes**; mount, southeast of Mt. Lyell, Rocky mountains, Alberta.
- Fording**; river, tributary to Elk river, Kootenay district, B.C.
- Foreleg**; bay, in Atikwa lake, Kenora district, Ont. (Not Little Jackfish.)
- Forest**; lake, west of Whitney lake, Kenora district, Ont.
- Foresters**; island, in the bay of Quinte, Prince Edward county, Ont. (Not Captain John's island.)
- Fork**; lake, Tp. 63, R. 11, W. 4 M., eastern Alberta.
- Fork**; river, tributary to Mossy river, south of L. Winnipegosis, Man.
- Forks**; lake, on Churchill R., below Stanley mission, Sask. (Not Rapid River lake.)
- Forks of Credit.* See Credit Forks.
- Forsyth**; island, Admiralty group, St. Lawrence R., Leeds county, Ont. (Not Quarry.)
- Fort Chimo.* See Chimo.
- Fort Chipewyan.* See Chipewyan.
- Fort Dunvegan.* See Dunvegan.

SESSIONAL PAPER No. 25d

- Fort Edmonton.* See Edmonton.
- Fort Folly**; point, between Memramcook and Petitcodiac rivers, Westmorland county, N.B. (Not Folly.)
- Fort Frances**; village and H. B. Co. post, on Rainy river, Rainy River district, Ont. (Not Fort Francis.)
- Fort Fraser.* See Fraser.
- Fort James.* See Fort St. James.
- Fort Lennox.* See Noix.
- Fort McKay.* See McKay.
- Fort Macleod.* See Macleod.
- Fort McMurray.* See McMurray
- Fort Nelson**; river, tributary to Liard river, Cariboo district, B.C. (Not Nelson.)
- Fortress**; lake, at head of Wood river, also mountain north of the east end of the lake, Rocky mountains, Alberta.
- Fort St. James**; H. B. Co. post, Mining Record office, and P. O., near the outlet of Stuart lake, Coast district, B.C. (Not Fort James.)
- Fort St. John**; H. B. Co. post, on Peace river, Cariboo district, B.C.
- Fort Selkirk.* See Selkirk.
- Fort Severn*; See Severn.
- Fort Smith**; H. B. Co. post, also post settlement, on Slave river, northern Alberta.
- Fort Wallace**; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.
- Fort William**; city, Thunder Bay district, Ont.
- Fortymile**; river and town, Yukon. (Not Forty Mile.)
- Fossil**; mountain, southwest of mount Douglas, Rocky mountains, Alta.
- Foster's.* See Deception.
- Fosthall**; creek, west side of Upper Arrow lake, Kootenay district, B.C.
- Fouquette**; river, flowing into the St. Lawrence, below St. André, Kamouraska county, Que.
- Fourchu**; harbour, Cape Breton county, N.S. (Not Fourché nor Fourchou.)
- Four-mile.* See Lakit.
- Fournier**; post village, Prescott county, Ont. (Not Fournierville.)
- Fowl**; point and portage, international boundary, Thunder Bay district, Ont.
- Fox**; mount, also glacier, in the Selkirks, B.C.
- Fox**; island, Weller bay, Ameliasburg township, Prince Edward county, Ont.
- Fox**; island, in lake Simcoe, York county, Ont. (Not Snake.)
- Fox**; islands, Gordon bay, N.W.T. (Not West Fox.)
- Fox**; land, S.W. portion of Baffin I., Gordon bay, N.W.T. (Not Foxe nor Luke Fox.)
- Fox.* See Gordon.
- Foxe.* See Fox.
- Framboise**; village, Richmond county, N.S. (Not Frambois.)
- Français.* See Francois.
- Frances**; lake and river, southeastern Yukon.
- Frances Smith**; shoal, entrance to Key harb., Georgian bay, Parry Sound dist., Ont.
- Francis**; island, between Grindstone and Wolfe islands, St. Lawrence river, Frontenac county, Ont. (Not Hickory.)

- Francis**; island, west side of entrance to Ucluelet arm, Barkley sound, Vancouver island, B.C. (Not Round.)
- Francisco**; point, southeast end of Quadra island, Coast district, B.C.
- François**; lake, south of Babine lake, Cassiar and Cariboo districts, B.C. (Not Français.) Reversal of previous decision.
- Frank**; lake, south of N. T. Ry., northeast of L. Nipigon, Thunder Bay district, Ont.
- Frank Clark.* See Clark.
- Franklin.* See Shawanaga.
- Franktown**; post village and railway station, Lanark county, Ont. (Not Frankstown.)
- Fraser**; lake, Carlow township, Hastings county, Ont. (Not Fraser's.)
- Fraser**; lake, H. B. Co. post, and telegraph station, south of Stuart lake, Cariboo district, B.C. (Not Nalta lake, nor Fort Fraser post and station.)
- Fraser**; point, southerly coast of Digby island, Coast district, B.C.
- Fraser**; reach, northeast of Princess Royal island, Coast district, B.C.
- Fraser**; river, central and southern British Columbia.
- Fraser.* See Frazer.
- Fraserville**; town, Temiscouata county, Que. (Not Frazerville.)
- Frazer**; creek and lake, S. of L. Nipigon, Thunder Bay district, Ont. (Not Fraser.)
- Frazer**; island, Becher bay, southern coast of Vancouver island, B.C. (Not Fraser.)
- Frazerville.* See Fraserville.
- Fréchette**; bay, bank, and point, near Misery bay, Manitoulin district, Ont.
- Fréchette**; lake, Desandrouins and Montbelliard townships, Timiskaming county, Que. (Not Merrill.)
- Fréchette.* See Dombourg.
- Freda.* See Freya.
- Frederick**; lake, Halifax county, N.S. (Not Pine Wood.)
- Frederick**; lake, west of Kusawa lake, southwestern Yukon.
- Frederick**; point, E. coast of Digby I., Prince Rupert harbour, Coast district, B.C.
- Freeman's.* See Freemen.
- Freemen**; lake, and river tributary to Athabaska river, Alta. (Not Freeman's.)
- Freestone.* See Gregory.
- Frenchman**; bay, Ontario county, Ont. (Not Pickering harbour.)
- Frenchman**; lake, Tp. 64, R. 10, W. 4 M., eastern Alberta.
- Frenchman**; river, in southern Saskatchewan. (Not White Mud.)
- Freshfield**; mount, north of Blackberry river, Rocky Mts., Kootenay district, B.C.
- Fresno**; creek, tributary to Yukon river, below Dawson, Yukon.
- Freya**; a spur of the Valhalla mountains, Kootenay district, B.C. (Not Freda.)
- Friday**; creek, branch of Sulphur creek, Indian river, Yukon.
- Friday**; lake, southwest of Lorrain township, Timiskaming district, Ont.
- Frigate**; mountain, N.E. of Blackwater range of the Rockies, Kootenay district, B.C.
- Fritz**; landing, on east side of Lower Arrow lake, Kootenay district, B.C.
- Froatsburn**; post office, Dundas county, Ont. (Not Froathburn nor Froathburn.)
- Frobisher**; bay, in S.E. portion of Baffin island, N.W.T. (Not Lumly inlet, &c.)
- Frobisher**; post office and railway station, southeastern Sask. (Not Frobysshire.)
- Frog**; lake, and Frog Lake Indian reserve, eastern Alberta.

SESSIONAL PAPER No. 25d

- Frostfish**; cove, in N.E. portion St. Margaret bay, Halifax Co., N.S. (Not Frost Fish.)
Froude; bay, northeast of McKim bay, Manitoulin island, Manitoulin district, Ont.
Fuller; lake, south of Chemainus, Vancouver island, B.C. (Not Howe.)

G

- Gabarus**; bay, cape, and P.O., Cape Breton Co., N.S. (Not Gabarous nor Gabarouse.)
Gaboury; lake, Bauneville and Vilars townships, Timiskaming county, Que. (Not Little Roger.) Previous decision revised.
Gabriel; island, Frobisher bay, N.W.T. (Not Gabriell.)
Gabriel; strait, between Resolution I. and mainland, N.W.T. (Not Tudjakdjudusirn.)
Gabriola; island, passage, and reefs, east of Nanaimo, B.C.
Gaetz; cove, east side of Mahone bay, Lunenburg county, N.S.
Gage. See Ninemile.
Gage. See Simcoe.
Gainsborough; creek, tributary to Souris R., Manitoba and Sask. (Not North Antler.)
Gainsborough; township, Lincoln county, Ont. (Not Gainsboro.)
Gale. See Peter.
Galena; bay, at north end of Upper Arrow lake, Kootenay district, B.C. (Not Thumb.)
Galena; creek, tributary to Yukon river, below Indian river, Yukon.
Galiano; island, and Galiano gallery near Descanso bay, Gabriola island, strait of Georgia, New Westminster district, B.C. (Not Malaspina's gallery.)
Galiano. See Nigei.
Galloway; rapids, between Morse and Wainwright basins, southeast of Kaien island, Coast district, B.C.
Galloway; settlement, Kent Co., N.B. (Not Galway, New Galway, nor New Galloway.)
Gallows; point, south extreme of Protection island, southeast coast Vancouver island, B.C. (Not Execution.)
Galop; canal, island, and rapids, St. Lawrence river, Dundas county, Ont. (Not Gallop, Gallops, Gallopes, Galoup, nor Galloup.)
Galt; creek, flowing into Grand river at Galt, Waterloo, Wellington, and Wentworth counties, Ont. (Not Mill.)
Galton; range of mountains, west of Wigwam river, Kootenay district, B.C.
Galway. See Galloway.
Gamskagamik; lake, south of lake Hill, Kenora district, Ont. (Not Painkiller.)
Gaotanaga; lake, west of Grand lake Victoria, Timiskaming county, Que.
Gap; creek, tributary to Maple creek, southwestern Saskatchewan. (Not Fish.)
Garden; island, N.E. of Du Vernet Pt., Digby I., Prince Rupert harb., Coast dist., B.C.
Garden; island, north of Wolfe island, St. Lawrence river, Frontenac county, Ont.
Garden Island. lake, north of Matchinianitou lake, Pontiac county, Que.
Garden; river, tributary to the Saskatchewan, east of Birson, Sask. (Not Sucker.)
Gardner; canal, Devastation channel, Coast district, B.C. (Not Gardiner.)
Garibaldi; hill, west of Pedder bay, Vancouver island, B.C. (Not North peak.)
Garnet; creek, tributary to Dominion creek, Indian river, Yukon.
Garnet; mountain, west of mount Goodsir, Rocky mountains, Kootenay district, B.C.
Garrett; island, N.W. Lynedoch I., St. Lawrence R., Leeds Co., Ont. (Not Garrett's.)

- Garry**; lake and river, tributary to Delisle R., Glengarry Co., Ont. (Not Black lake.)
- Garson**; lake and river, Alta. and Sask. (Not Swan lake nor Whitefish lake and river.)
- Garthby**; post village, railway station, and township, Wolfe county, Que. (Not Garthby Station P.O.)
- Garthby Station.* See Garthby.
- Gasline**; post office, Welland county, Ont. (Not Gas Line.)
- Gaspe** (Eng.) **Gaspé** (Fr.); bay, cape, county, and town, Que. (Not Gaspa, Gaspee, nor Gaspey.)
- Gaspereau**; lake, also river tributary to Salmon river, Queens and Sunbury counties, N.B. (Not Gaspereaux.)
- Gaspereau**; lake, also river tributary to Salmon river, Queens and Sunbury counties.
- Gaspesia**; shoal, southeast of Walkhouse point, Manitoulin district, Ont.
- Gat**; point, on western part of Cove I., at entrance to Georgian bay, Bruce county, Ont.
- Gatacre**; point, south shore of Manitoulin island, Manitoulin district, Ont.
- Gates**; island, west of Howe island, St. Lawrence river, Frontenac county, Ont.
- Gateway**; post village and railway station, Int. boundary, Kootenay district, B.C.
- Gatineau Point**; village, at the mouth of Gatineau river, Ottawa county, Que.
- Gaudet.* See Grindstone.
- Gaudin**; point, Devastation channel, Coast district, B.C.
- Gauley**; bay, northeast of Greenough point, Bruce county, Ont.
- Gawjewiagwa**; lake, east of Anzhekumming lake, Kenora district, Ont.
- Geikie**; creek and glacier, N. of Dawson glacier, Selkirk Mts., Kootenay district, B.C.
- Geikie**; island, L. Nipigon, Thunder Bay district, Ont. (Not White's.)
- Geikie**; lake, east of lake Evans, Abitibi territory, Que.
- Gem**; lake, in McGarry township, Timiskaming district, Ont.
- Genesta**; reef, S. of Maiden I., S. shore of Manitoulin I., Manitoulin district, Ont.
- Gens-de-terre**; river, tributary to Gatineau river, Ottawa and Pontiac counties, Que. (Not Jean de Terre.)
- George**; bay and cape, Northumberland strait, Antigonish Co., N.S. (Not St. George.)
- George**; creek, tributary to the south branch of Brazeau river, central Alberta.
- George**; island, Halifax harbour, Halifax county, N.S. (Not Georges nor George's.)
- George**; lake, Prescott county, Ont. (Not Georges nor Georgian.)
- George**; river, flowing into Ungava bay, New Quebec. (Not Kangerthialuksoak.)
- George**; point, at east entrance to Black bay, Thunder Bay district, Ont.
- George.* See Gorge.
- George.* See St. George.

- Giroux**; lake and post office, southeast of Cobalt, Timiskaming district, Ont.
- Gizzard**; river, tributary to Bell river, Abitibi territory, Que.
- Glacier**; creek, a branch of Gold creek, Yukon.
- Glacier**; lake, near Howse pass, Rocky mountains, Alta.
- Glacier**; point, west of Sheringham point, Juan de Fuca strait, Vancouver island, B.C. (Not Point-no-Point.)
Glacier. See Peyto.
Glacier. See Yoho.
- Glacier Crest**; mountain, Selkirk mountains, Kootenay district, B.C.
- Gladman**; mount, on Yukon river, near the international boundary, Yukon.
- Gladshiem**; a peak of the Valhalla mountains, Kootenay district, B.C.
- Gladstone**; creek, east of Lower Arrow lake, Kootenay district, B.C.
- Gladys**; lake and river, southwest of Teslin lake, Cassiar district, B.C. (Not Sucker lake, nor North river.)
- Glaises (rivière aux)**; river, flowing into the St. Lawrence, above Pte du Lac, St. Maurice county, Que. (Not Loutres.)
- Glasgow**; island, in North bay, Hudson strait, N.W.T.
- Glave**; mount, near upper waters of Chilkat river, Cassiar district, B.C.
- Glenallan**; village, Wellington county, Ont. (Not Glen Allan.)
- Glenbrook**; post office, Glengarry county, Ont. (Not Glen Brook.)
- Glencoe**; island, northwest of Strathcona islands, Hudson strait, N.W.T.
- Glencolin**; post office, Elgin county, Ont. (Not Glen Colin.)
- Glenelbe**; post office, Leeds county, Ont. (Not Glen Elbe.)

- Glengarry**; point, also Glengarry Point lightstation, opposite lower end of St. Regis island, Glengarry county, Ont. (Not Stonehouse.)
- Glenhuron**; village, Simcoe county, Ont. (Not Glen Huron.)
- Glenlyon**; mountains and river, Pelly river, Yukon.
- Glennevis**; post office, Glengarry county, Ont. (Not Glen Nevis.)
- Glenogle**; creek and railway station, Kootenay district, B.C.
- Glenora**; village, on Stikine river, below Telegraph creek, Cassiar district, B.C.
- Glenroy**; post office and railway station, Glengarry county, Ont. (Not Glen Roy.)
- Glensutton**; P.O. and Ry. station, Brome Co., Que. (Not Glen Sutton nor Glenton.)
- Glenwillow**; post settlement, Metcalfe Tp., Middlesex Co., Ont. (Not Glen Willow.)
- Glycerine**; rock, South bay, Manitoulin island, Manitoulin district, Ont.
- Gnat**; creek, tributary to Klondike river, Yukon.
- Gnat**; river, at south end of Kootenay lake, Kootenay district, B.C.
- Goacha*. See Maguasha.
- Goat**; range of mountains, east of Spray river, Rocky Mountains park, Alta.
- Goat*. See Bow.
- Goat*. See Fairview.
- Goat*. See Teresa.
- Goat Canyon**; creek, tributary to Caribou creek, Kootenay district, B.C.
- Goatfell**; railway station, Kootenay district, B.C.
- Gobeil**; island, north of Coste island, Kitimat arm, Coast district, B.C.
- Goble**; post office, Oxford county, Ont. (Not Goble's.)
- Godbout**; river, Saguenay county, Que. (Not Godbret nor Goodbout.)
- Goderich**; town, Huron county, Ont.
- Godfroy**; river and seignior, Nicolet county, Que. (Not Godfroi, Godefroi, nor Godefroy.)
- Gods**; lake and river, northeast of L. Winnipeg, draining into Hays R., Manitoba.
- God's Mercie**; islands of, north shore of Hudson strait, N.W.T. This name was also applied at one time to the island now known as "Middle Savage."
- Gods Mercy**; bay of, Southampton island, Hudson bay, N.W.T.
- Gold**; creek, tributary to Sixtymile river, Yukon.
- Gold**; range of mountains, west of Columbia river, Yale district, B.C.
- Gold**; river, flowing into Columbia river, above Bush river, Kootenay district, B.C.
- Goldbottom**; creek, branch of Hunker creek, a tributary to Klondike river, Yukon.
- Golden**; creek, branch of Henderson creek, north of Stewart river, Yukon.
- Golden**; valley, southeast of Pike bay, Bruce county, Ont.
- Golden Horn**; mountain, southwest of Lewes river, Yukon.
- Golden Mountain (settlement)*. See Gowland Mountain.
- Goldfinch**; lake, upper waters of Lievre river, St. Maurice county, Que.
- Gold-run**; creek, tributary to Dominion creek, Indian river, Yukon.
- Goldsmith**; river, tributary to Driftpile river, central Alberta.
- Goldstream**; lakes and river, emptying into Finlayson arm, Vancouver island, B.C.
- Goldstream**; glacier, mountain, and névé, west of mount Sir Sandford, also river flowing westerly into Columbia river, Selkirk mountains, Kootenay, B.C.
- Gonzales**; hill and point, east of Victoria, B.C. (Not Shotbolts.)

SESSIONAL PAPER No. 25d

Goodbout. See Godbout.

Goodsir; mount, also creek, S.E. of Mt. Vaux, Rocky Mts., Kootenay district, B.C.

Goodwin; creek, flowing east into Teslin lake, Cassiar district, B.C.

Goodwin; lake, Lorrain township, Timiskaming district, Ont.

Goose; cape, below Coudres island, St. Lawrence river, Charlevoix county, Que.

French usage: Oies (cap aux), which see.

Goose; point, south shore Manitoulin island, Manitoulin district, Ont.

Goose. See Granby.

Goose. See Grey Goose.

Goose. See Primrose.

Gooseberry. See Marjorie.

Goosehunting; creek, tributary to Carrot river, Sask. (Not Maple river.)

Gordon; bay, west of Chorkbak inlet, Hudson strait, N.W.T. (Not Fox.)

Gordon; brook, west of Lower Arrow lake, Kootenay district, B.C.

Gordon; island, N. of Lake Fleet group, St. Lawrence R., Leeds Co., Ont. (Not Citron.)

Gordon; lake, east of Linklater lake, Kenora district, Ont.

Gordon; lake, Tp. 45, R. 10, W. 3 M., Sask.

Gordon; mount, near Stikine river, south of Telegraph creek, Cassiar district, B.C.

Gordon; mount, northwest of mount Balfour, Rocky mountains, Alta. and B.C.

Gorge; creek, tributary to Deadman river, Yale district, B.C. (Not George.)

Gorge; creek, tributary to Sheep river, southern Alberta.

Gorman; lake, Brudenell township, Renfrew county, Ont.

Gothics; group of peaks, Adamant range, Selkirk mountains, Kootenay, B.C.

Goudron; river, tributary to Kamouraska river, Kamouraska county, Que.

Gough; lake, south of Battle river, Alta.

Goulbourn; post office and township, Carleton county, Ont. (Not Goulbourne.)

Goulbourne. See St. Helena.

Gould Dome; mountain, Rocky Mts., southwestern Alberta. (Not Gould's Dome.)

Gounamitz. See Gunamitz.

Gourdeau; island, north of Swede island, Thunder Bay district, Ont.

Govan; brook, Bruce harbour, Hudson strait, N.W.T.

Gowganda; lake, mining division, and post office, Timiskaming district, Ont. (Not Gow Ganda.)

Gowland Mountain; post settlement, Albert county, N.B. (Not Golden Mountain.)

Grace; lake, Dudley township, Haliburton county, Ont.

Grace; lake, in Skead township, Timiskaming district, Ont.

Graeme. See Pulteney.

Graham; creek, tributary to Souris river, southern Manitoba and Saskatchewan.

Graham; creek and inlet, west of Atlin lake, Cassiar district, B.C. (Not Taku inlet.)

Graham; mount, Selkirk range, Kootenay district, B.C.

Graham. See Lavigne.

Graisse, rivière a la. See Rigaud.

Gramophone; creek, flowing into Bulkley R., above M. town, Coast district, B.C.

Grampus. See Mosher.

- Granby**; bay, west of Larcom island, Observatory inlet, Cassiar district, B.C. (Not Goose nor Xschwan.)
- Granby**; point, southern entrance to Granby bay, Observatory inlet, Cassiar, B.C.
- Grand**; glacier and mountain, S.E. of Purity range, Selkirk Mts., Kootenay dist., B.C.
- Grand**; point and reef, Brulé bay, Thunder Bay district, Ont. (Not Brulé.)
- Grand*. See Black.
- Grand*. See DeSalaberry.
- Grand*. See Dumoine.
- Grand*. See Kelvin.
- Grand*. See Shubenacadie.
- Grandboro**; post village, Shefford county, Que. (Not Grandborough.)
- Grande (anse)**; bay, Gaspé county, Que. (Not Grand.)
- Grande-Anse**; post village, Gloucester county, N.B. (Not Grand Anse.)
- Grande Batture*. See Leonard.
- Grande Ile aux Erables*. See De Beaujeu.
- Grande Prairie**; post settlement, central Alberta.
- Grand Etang**; town, Inverness county, N.S. (Not Grande Etang.)
- Grand Forks**; town and railway junction, on Kettle river, Yale district, B.C.
- Grand Lac du Commissaires*. See Thirty-one-mile.
- Grand Lake Jacques Cartier*. See Jacques Cartier.
- Grand Lake Victoria**; upper waters of Ottawa river, Timiskaming county, Que.
- Grand Manan**; island, Charlotte county, N.B. (Not Menan.)
- Grand Manitoulin*. See Manitoulin.
- Grand Rustico*. See North Rustico.
- Grand Valley**; creek, tributary to Bow river, Alta.
- Granger**; mountain, west of Coal lake, southern Yukon.
- Granite**; creek, flowing into Quiet lake, southeastern Yukon.
- Granite**; creek, tributary to Caribou creek, Kootenay district, B.C.
- Granite Creek**; post office, on creek of same name, S.E. of Tulameen, Yale dist., B.C.
- Granite**; lake, west of Smoothbrook lake, Thunder Bay district, Ont.
- Granite**; point, northwesterly extremity of Quadra island, Coast district, B.C.
- Granite**; river, flowing southwesterly into lake of same name on international boundary, Thunder Bay district, Ont.
- Grant**; peak, Hermit range, Selkirk mountains, Kootenay district, B.C.
- Grant**; point, southwest point of Maitland island, Coast district, B.C.
- Grant*. See Dunn.
- Grant Corners**; post office, Glengarry county, Ont. (Not Grant's Corners.)
- Grantham**; shoals, southeast of Todman reef, Manitoulin I., Manitoulin district, Ont.
- Grant Land*. See Ellesmere.
- Granville**; lake, on Churchill river, Manitoba. (Not Grenville.)
- Grape**; island, Muscote bay, N.E. of Huff I., bay of Quinte, Prince Edward Co., Ont.
- Grape*. See Rose.
- Grasett**; railway station and township, Algoma district, Ont. (Not Grasset.)
- Grass**; river, tributary to Nelson river, Manitoba.
- Grass*. See Kiskitto.

SESSIONAL PAPER No. 25d

Grass. See Rose.

Grassberry; river, flowing southerly into Cumberland lake, central Saskatchewan.
Grassey's Corners. See Grassie.

Grasshopper; mountain, north of Tulameen river, Yale district, B.C.

Grassie; village, Lincoln county, Ont. (Not Grassies nor Grassey's Corners.)

Grassy; point, in northeastern portion of Sophiasburg Tp., Prince Edward Co., Ont.

Grassy. See Bronson.

Grassy. See Caldwell.

Grassy River lake. See Stanawan.

Gratton Corners; P.O., Prescott Co., Ont. (Not Gratton Corner nor Gratton's Corner.)

Grave. See Wapiabi.

Gravel; point, on eastern side of Great Duck island, Manitoulin district, Ont.

Gravel; river, tributary to Mackenzie river, N.W.T.

Gravelly. See Ostrander.

Gray; an elevation of ground locally known as "Gray island." on west side of Petittocodiac river, Albert county, N.B. (Not Gray's nor Grey.)

Gray; mount, also ridge, north of Bennett lake, Yukon.

Gray; strait, at eastern entrance to Hudson strait, New Quebec.

Grays; creek, flowing into Crawford bay, Kootenay, B.C. (Not Greys.)

Gray Wolf; mountain, north of the Valhalla mountains, Kootenay district, B.C.

Great. See Hamilton.

Great Bear; lake and river, Mackenzie, N.W.T. (Not Bear nor Great Bear Lake river.)

Great Bear Sand hills. See Wapawekka.

Great Beaver; lake, at headwaters of St. Maurice river, Champlain county, Que.

Great Bishop Roggan. See Roggan.

Great Black. See Hecla.

Great Bras d'Or; channel, northwest of Boularderie island, extending to Barra strait from the Atlantic, Cape Breton and Victoria counties, N.S.

Great Bras d'Or lake. See Bras d'Or lake.

Great Duck; island, the largest of the Duck island group, Manitoulin district, Ont.

Great Fish. See Backs.

Great Metis. See Metis.

Great New. See Long.

Great Opeongo. See Opeongo.

Great Shemogue. See Shemogue.

Great Tusk. See Tusk.

Greece Point; post village, Argenteuil Co., Q. (Not Græca Point nor Greece's Point.)

Green; creek, branch of Sulphur creek, Indian river, Yukon.

Green; lake and river, emptying into west end of Lillooet lake, Lillooet district, B.C.

Green; mount, southwest of Ross peak, Selkirk mountains, Kootenay district, B.C.

Green point, northeast extremity of Sophiasburg township, Prince Edward county, Ont.

Green; point, north of Iuner Duck island, Manitoulin district, Ont.

Green. See Victoria.

Greenan; lake, Jones township, Renfrew county, Ont. (Not Greenan's.)

Greenbush; lake, southeast of lake St. Joseph, Thunder Bay district, Ont.

Green Cove. See Port Maitland.

Greene; island, N.W. of Western Duck I., Manitoulin district, Ont. (Not Green's.)

Greene Island; harbour, Manitoulin island, Manitoulin district, Ont.

Greenfield; shoal, S. of Turning island, entrance to Georgian bay, Bruce county, Ont.

Greenough; bank, harbour, and point, S.E. of Pine Tree harbour, Bruce county, Ont.

Green Point; post settlement and railway station, Gloucester county, N.B.

Greens; glacier, in the Selkirk mountains, Kootenay district, B.C. (Not Green.)

Green's. See Terminal.

Greenshields; lake, on Severn river, Patricia district, Ont.

Greenwood Land; at head of Frobisher bay, N.W.T. (Not Greenwood's.)

Green Valley. See Verte-Vallée.

Gregg; creek and lake, between Athabaska and Baptiste rivers, Alta. (Not Lower White Fish.)

Gregory; island, northwest of Doctor island, St. Peters inlet, Richmond county, N.S. (Not Freestone islet.)

Grenadier; island, in St. Lawrence river, Leeds county, Ont. (Not Bathurst.)

Grenville. See Granville.

Grey; island, N. of Edward I. and S. of entrance to Black bay, Thunder Bay dist., Ont.

Grey. See Gray.

Grey Goose; island, opposite mouth of Big R., James bay, Que. (Not Goose.)

Greys. See Grays.

Gribbell; island, between Ursula channel and Verney passage, Coast district, B.C.

Grice; point, N.W. extreme of Low peninsula, Clayoquot sound, Vancouver I., B.C.

Griffin; bay, southwest shore Frobisher bay, N.W.T.

Griffin; mount, southwest of Griffin lake, Yale district, B.C.

Grimross; islands, in St. John river, Queens county, N.B. (Not Grimrose.)

Grimsthorpe; lake, Grimsthorpe township, Hastings county, Ont. (Not Wolf.)

Grindstone; creek, tributary to Petitecodiac river, above Upper Dover, Westmorland county, N.B. (Not Gaudet.)

Grindstone; island and point, northeast coast of Digby island, Coast district, B.C.

Grindstone; lake, Redditt township, Kenora district, Ont.

Grindstone; point, east entrance of Washow bay, lake Winnipeg, Manitoba.

Grinnell; glacier, southwest shore of Frobisher bay, N.W.T.

Grinnell; peninsula, northwesterly portion of Devon I., N.W.T. (Not Grinnell Land.)

Grinnell Land. See Ellesmere.

Griswold; island and shoals, east of Bridge island, St. Lawrence river, Yonge township, Leeds county, Ont. (Not East Chimney Island shoals.)

Grizzly; bluff, near the mouth of Teslin river, Yukon. (Not Grizzly Bear Bluff.)

Grizzly; mountain, in the Selkirks, Kootenay district, B.C.

Grog; island, in Batteau channel, N. of Howe I., St. Lawrence R., Frontenac Co., Ont.

Groswater. See Melville.

Grotto; mountain, east of Canmore, Rocky Mountains park, Alta.

Grove; island, northeast of Huff island, bay of Quinte, Prince Edward county, Ont.

Grundy; creek, east of Kootenay river, north of Steele, Kootenay district, B.C.

Gryphon; lake, southwest of Wapigo lake, Kenora district, Ont.

- Hackett**; river, tributary to Sheslay river, Cassiar district, B.C.
- Haddo**; peak of mount Aberdeen, Rocky mountains, Alberta.
- Haeckel**; hill, near the confluence of Lewes and Takhini rivers, Yukon.
- Hagerman**; post village, York county, Ont. (Not Hagerman's Corners.)
- Haggart**; creek, tributary to Johnston creek, McQuesten river, Yukon.
- Haggert.* See Hackett.
- Ha Ha**; bay, lake, and river, Chicoutimi Co., Q. (Not Bay Ha Ha, nor Baie des Ha Ha.)
- Haileybury**; town, Timiskaming district, Ont.
- Hair.* See Neehigona.
- Hair Cutting**; lake and river, at headwaters of St. Maurice R., Champlain Co., Que.
- Halcro**; mountain peak, east shore of Atlin lake, Cassiar district, B.C.

Halcyon; mountain and post office, east of Upper Arrow lake, Kootenay district, B.C.
(Not Halcyon Hot Springs post office.)

Haldane; mount, near Mayo brook, Stewart river, Yukon.

Hale; creek, near south end of Taku arm of Tagish lake, Cassiar district, B.C.

Haliburton; lake, Harburn township, Haliburton county Ont.

Hall; brook, harbour, and point, Kings county, N.S. (Not Hall's.)

Hall; creek, tributary to west fork of Kettle river, Yale district, B.C.

Hall; island, southeast of Reid island, southeast coast of Vancouver island, B.C.

Hall Harbour; post office, Kings county, N.S. (Not Hall's Harbour.)

Hall; lake, northwest of Cliff lake, Kenora district, Ont.

Hall; lake and river, W. of Teslin L., Cassiar dist., B.C. and Yukon. (Not North river.)

Hall; mount, west of Upper Arrow lake, Kootenay district, B.C.

Hall; mount, north of Chemainus river, Vancouver island, B.C. (Not Hall's.)

Hall; peninsula, in the southeastern portion of Baffin island, N.W.T.

Hallett; lake, on trail between Cheslatta and Fraser lakes, Coast district, B.C.

Hall's. See Kushog.

Halsey; point, at the entrance to Douglas channel, Coast district, B.C.

Halsted; islet, Shushartie bay, Goletas channel, northerly coast Vancouver I., B.C.

Hambly; island, Navy group, St. Lawrence river, Leeds county, Ont. (Not Humbly.)

Hamilton; island, in Ottawa river, Prescott county, Ont. (Not Great nor Large.)

Hamilton; lake, Tp. 35, Rs. 9 and 10, W. 4 M., southeastern Alberta.

Hammond; bay, north of Departure bay, southeast coast of Vancouver I., B.C.

Hammond; point, east of Jenkins point, Manitoulin island, Manitoulin district, Ont.

Hammond. See Nelson.

Hanbury; peak, east of mount Vaux, Rocky mountains, Kootenay district, B.C.

Hancock; hills, east of lake Laberge, Yukon.

Hand; hills, east of Red Deer river, southern Alberta.

Hangeville; post settlement, on Chilcotin river, Lillooet district, B.C.

Hanging Hide See Leather.

Hanna; bank, S. of Dokis I., entrance Key harbour, Parry Sound district, Ont.

Hannah; bay, south end of James bay, Timiskaming district, Ont.

Hannah Bay (river). See Harricanaw.

Hannah; lake, east of South bay, lake Nipigon, Thunder Bay district, Ont.

Hannah; point, South bay, Manitoulin district, Ont.

Hansen; lake, east of Kootenay river, north of Steele, Kootenay district, B.C.

Harbour; lake, west of Blind bay, Halifax county, N.S. (Not Black Duck Run.)

Harbour. See Rawson.

Harbour de Lute. See Loutre.

Hardisty; mount, east of Athabaska river, opposite mouth of Whirlpool river, Alta.

Hardwood Plains. See Harwood Plains.

Hardy; mountain, northwest of Carson, Yale district, B.C.

Hare; bank, island, passage, and reefs, St. Lawrence river, Temiscouata county, Que. French usage: Lièvres (île aux), which see.

Harmony; river, emptying into Harmony bay, east end of L. Superior, Algoma district, Ont. (Not Chippewa nor Harmonic.)

SESSIONAL PAPER No. 25d

Harmony. See Jones.

Harold; mount, on lower part of Stikine river, Cassiar district, B.C.

Harper; mount, in the Ogilvie range, north of Klondike river, Yukon.

Harper Corners; post office, Wentworth county, Ont. (Not Harper's Corners.)

Harricanaw; river, emptying into Hannah bay, Timiskaming, Ont., from Abitibi and Timiskaming, Que. (Not Hannah Bay river.)

Harrington; group of islands, north shore gulf of St. Lawrence, St. Vincent township, Saguenay county, Que.

Harrington; post office, Oxford county, Ont. (Not Harrington West.)

Harrington West. See Harrington.

Harris; creek, branch of Ophir creek, Indian river, Yukon.

Harris; lake, southwest of Manitou lake, Kenora district, Ont.

Harris; lake, southwest of Savant lake, Thunder Bay district, Ont.

Harris; point, Lambton county, Ont. (Not Blue.)

Harrison; post office, Stormont county, Ont. (Not Harrison's Corners.)

Harrison; river, flowing northwesterly into Athabaska lake, near Stone point, Alta.

Harrison Corners. (See Harrison.)

Harry; lake, Lawrence township, Haliburton county, Ont. (Not Harry's.)

Hart; mount, near Sixtymile river, southwesterly from Dawson, Yukon.

Hartz; creek, tributary to Tahltan river, Cassiar district, B.C.

Harvey; island, Broek group, St. Lawrence river, Leeds county, Ont. (Not Gibraltar.)

Harwood Plains; post office, Carleton county, Ont. (Not Hardwood Plains.)

Haskins; creek, tributary to Ottetail river, Rocky mountains, Kootenay district, B.C. (Not Haskin.)

Haslam; creek, tributary to Nanaimo river, Vancouver island, B.C.

Häsler; a peak of mount Dawson, Selkirk mountains, Kootenay district, B.C.

Hastings; county, and town in Northumberland county, Ont.

Hastings; lake, in Tp. 51, R. 20, W. 4th M., Alta.

Hatchau; lake, Hackett river, Cassiar district, B.C. (Not Macha.)

Hatin; lake, near upper part of Koshin river, Cassiar district, B.C.

Hatton; headland, at south end of Resolution island, N.W.T. (Not Cape Best.)

Haven; cape, Clements Land, N.W.T. (Not Siggia.)

Haven; creek, flowing into the Saskatchewan, below Bighorn river, central Alberta.

Hawk; lake, also Hawk Lake railway station, Kenora district, Ont.

Hawkcliff; lake, west of Eagle lake, Kenora district, Ont. (Not Hawk Cliff.)

Hawkesbury; island, north of Princess Royal and Gribbell islands, Coast district, B.C.

Hawkins; creek, tributary to Moyie river, international boundary, Kootenay district, B.C. (Not Meadow nor Ripple.)

Hawkrock. See Keikewabik

Hawtrey; town, Oxford county, Ont. (Not Hawtry.)

Hay; lake, Sabine township, Nipissing district, Ont.

Hay. See Dobbs.

Hay. See Melville.

Hayes; mount, south of Haslam creek Vancouver island, B.C.

Hayes; peak and river, west of Teslin lake, Cassiar district, B.C.

Hayes; river, southeast of Nelson R., Manitoba. (Not Hay's, Hill, Steel, nor Trout.)

This name is now applied to the whole river from the source of the Echimamish to Hudson bay.

Haygarth; creek, tributary to Ottertail river, Yoho park, Rocky mountains, B.C.

Hays; cove, southwest of Ritchie point, Kaien island, Coast district, B.C.

Hays; creek, Prince Rupert, Coast district, B.C.

Hays; mount, on Kaien island, east of Prince Rupert harbour, Coast district, B.C.

(Not Oldfield.) Previous decision revised.

Hay's. See Hayes.

Hays. See Ritchie.

Haystack; mountain, N.E. of Windigo bay, L. Nipigon, Thunder Bay district, Ont.

Hazel. See Aberdeen.

Hazelton; town, at confluence of Bulkley and Skeena rivers, Cassiar district, B.C.

Head; mount, Highwood range, southern Alta.

Headingley; parish and post village, Man. (Not Headingly.)

Head of Jordan River. See Jordan river.

Head of St. Peter's Bay. See St. Peter.

Healy; lake, south of Kusawa lake, Yukon.

Heart; creek, east of Lower Arrow lake, Kootenay district, B.C.

Heart; lake, east of L. LaBiche, central Alberta.

Heart; mountains, east of Sheslay river, Cassiar district, B.C.

Heathcote; lake, northwest of Barrington lake, Thunder Bay district, Ont.

Hebden; brook, flowing into Dinorwic lake, Kenora district, Ont. (Not Hebden's.)

Hébécourt; lake, Hébécourt township, Timiskaming county, Que.

Hébert; lake, Dufay township, Timiskaming county, Que. (Not Fish.)

Hebert. See Bear.

Hecate; channel, connecting Esperanza inlet with Tahsis canal, Vancouver I., B.C.

Hecate; strait, between Queen Charlotte islands and the mainland, Coast district, B.C.

Hecate. See Raymond.

Hecla; island, in lake Winnipeg, Man. (Not Big, Big Black, nor Great Black.)

Hector; island, north shore of Hudson strait, N.W.T. (Not Khartum.)

Hector; lake, west of Manitou lake, Kenora district, Ont. (Not Large Trout.)

Hector; mount, also lake, Alta. (Not Bow lake nor Lower Bow lake.)

Hector; railway station, Kootenay district, B.C.

Height-of-land; lake, northeast of Mattagami lake, Abitibi territory, Que.

Heimdal; a spur of the Valhalla mountains, Kootenay district, B.C.

Hela; a peak of the Valhalla mountains, Kootenay district, B.C.

Helen; lake, at headwaters of Bow river, Alta.

Helen; lake, north of Nipigon, Thunder Bay district, Ont.

Helen; point, Douglas channel, near Kitkiata, Coast district, B.C.

Helena. See Kinney.

Helmet; mountain, southeast of mount Goodsir, Rocky Mts., Kootenay district, B.C.

Hemlock. See Mackay.

Hen. See North Fowl.

Henderson; creek, tributary to Yukon river, below Stewart river, Yukon.

SESSIONAL PAPER No. 25d

Henderson; harbour, south of Crooks inlet, Hudson strait, N.W.T.

Henderson; lake, north of Uchucklesit harbour, Barkley sound, Vancouver island, B.C.

(Not Anderson.)

Hendon; river, tributary to Kuşawa river, Cassiar district, B.C. and Yukon.

Hennigar; brook and post village, Hants county, N.S. (Not Weir or Hennigar brook, Joshua Hennigar brook, nor Northfield village.)

Henning; mount, at headwaters of Coquihalla river, Yale district, B.C.

Henrietta; creek, tributary to Last-chance creek, a branch of Hunker creek, Yukon.

Henry Corners; post office, Lambton county, Ont. (Not Henry's Corners.)

Hensley; bay, south shore of Manitoulin island, Manitoulin district, Ont.

Herb. See Wekusko.

Herbert Corners; post office, Carleton county, Ont. (Not Herbert's Corners.)

Hermit; glacier, mountain, and range of mountains, in the Selkirks, B.C.

Heron. See Mirond.

Herschell; island, W. of Cockburn I. and N.E. of Kitchener I., Manitoulin dis., Ont.

Hess; river, tributary to Stewart river, Yukon.

Hester; creek, branch of Hunker creek, Yukon.

Hewson. See Hughson.

High. See Emma.

High. See Highwood.

High Bluff; parish and village, on Assiniboine river, Manitoba.

High Fall; creek, tributary to Koksoak river, New Quebec.

Highpound. See Buffalo Pound.

Highstone; lake, north of Stranger lake, Kenora district, Ont.

Highview; post office, south of Broadview, Sask. (Not High View.)

High Water. See Piché.

Highwood; range of mountains, southern Alta.

Highwood; river, tributary to Bow river, Alta. (Not High.)

Hilda; a peak of the Valkyr mountains, Kootenay district, B.C.

Hill; cove, northeast of Prince Rupert, Coast district, B.C.

Hill; island, S.W. of Rockport, St. Lawrence R., Leeds county, Ont. (Not Leroux.)

Hill; island, at entrance to Russell arm, Prince Rupert harbour, Coast district, B.C.

Hill; lake, northeast of Kakagi lake, Kenora district, Ont.

Hill; lake, on Minago river, Manitoba.

Hill. See Hayes.

Hillfarm; post office, north of Wolsley, Sask. (Not Hill Farm.)

Hillhead; village, Argenteuil county, Que. (Not Hill Head.)

Hilton; village, St. Joseph island, Algoma district, Ont. (Not Marksville.)

- Hinchinbrook**; township, Huntingdon county, Que. (Not Hinchinbrooke.)
- Hinton**; mount, Gustavus group, Yukon.
- Hippa**; island, W. of Graham I., Queen Charlotte Is., Coast dist., B.C. (Not Nesto.)
- Hitchcock**; creek, flowing east into Teslin lake, Cassiar district, B.C.
- Hobson**; island, in Mahone bay, Lunenburg county, N.S. (Not Hobson's Nose.)
- Hockstall*. See Ecstall.
- Hoder**; creek, tributary to Little Slocau river, Kootenay district, B.C.
- Hodgins**, lake, south of L. Seul, Kenora district, Ont.
- Hodnett**; mount, northwest of the "big bend" of Wheaton river, southern Yukon.
- Hoffman**; mount, on south branch of Sheep river, southern Alberta.
- Hog*. See Camelot.
- Hog*. See McDonald.
- Hog*. See O'Neil.
- Hogarth*. See Cumberland
- Hogg**; creek, tributary to Moyie river, Kootenay district, B.C.
- Hoggan**; lake, near Dodd narrows, east coast of Vancouver island, B.C.
- Holden**; lake, east of Nanaimo river, Vancouver island, B.C. (Not Trois Bras.)
- Hole*. See Wanipigow.
- Holland**; bank, Ladysmith harbour, east coast of Vancouver island, B.C.
- Holland*. See Cascumpeque.
- Holmes*. See Home.
- Holway**; mount, southwest of Sorcerer mountain, Selkirk Mts., Kootenay dist., B.C.
- Homalko*. See Homathko.
- Homan**; river, discharging into Bennett lake, Cassiar district, B.C.
- Homathko**; river, flowing into Bute inlet, Coast district, B.C. (Not Homalko.)
- Home**; bay, in N. end of Princess Royal I., Coast district, B.C. (Not Holme's.)
- Home**; island, Coronation gulf, N.W.T. (Not Sir E. Home's.)
- Hoodoo**; valley, near Leancoil, Kootenay district, B.C.
- Hooker**; pass, at the head of St. Mary river, Kootenay district, B.C.
- Hoole**; canyon and river, upper part of Pelly river, Yukon.
- Hooper**; island, off the southeast side of Grenadier island, St. Lawrence river, Leeds county, Ont. (Not Hooper's.)
- Hoope**; creek, flowing into the St. Lawrence, at Dickinson Landing, Stormont county, Ont. (Not Hoope's, Hoopole, nor Hoopple.)
- Hootalinqua*. See Teslin.
- Hopes Advance**; bay, west coast of Ungava bay, New Quebec.
- Hopes Advance**; cape, south shore of Hudson strait, New Quebec. (Not Cape of Hopes Advance nor Prince Henry Foreland.)
- Hopewell Corner*. See Albert.
- Hopkins**; bay and point, east of Baptist island, Bruce county, Ont.
- Hopkins**; lake, southeast of Aishihik lake, Yukon.
- Hopkins**; point, Devastation channel, Coast district, B.C.
- Horn**; cape, on the east side of Upper Arrow lake, Kootenay district, B.C.
- Horn*. See Beatrice.
- Horse**; creek, tributary to Bow river, Alta.

SESSIONAL PAPER No. 25d

- Horse**; point, in eastern part of Ameliasburg township, Prince Edward county, Ont.
- Horsehead**; creek, flowing northerly to Makwa R., central Sask. (Not Horse Head.)
- Horseshoe**; bay, west side of Great Duck island, Manitoulin district, Ont.
- Horseshoe**; glacier, south of mount Lefroy, Alta.
- Horseshoe**; island, west of Wolf island, Frontenac county, Ont. (Not Horse Shoe.)
- Horse Shoe*. See Chemainus.
- Horsfall**; island, between Campbell and Dufferin islands, Coast district, B.C.
- Horswell**; bluff and channel, S.E. coast of Vancouver I., B.C. (Not Inner channel.)
- Horton**; creek, tributary to Pelly river, between Hoole and Ketza rivers, Yukon.
- Horton**; point, north of Kincardine, Bruce county, Ont.
- Hosier**; river, flowing into St. Margaret bay, Halifax county, N.S. (Not Osier.)
- Hospital**; creek, flowing into Columbia river, below Golden, Kootenay district, B.C.
- Hotailuh**; mountains, between Stikine and Tanzilla rivers, Cassiar district, B.C.
- Houghton**; lake, southwest of Kashaweogama lake, Thunder Bay district, Ont.
- Houghton**; lake, in Tps. 39 and 40, R. 22, W. 2 M., Sask. (Not Dirtywater.)
- Houghton*. See Muskiki.
- Hourglass**; lake, west of Hodgins lake, Kenora district, Ont.
- House**; mountain, between Driftpile and Inverness rivers, S. of Lesser Slave L., Alta.
- House*. See Howse.
- Housten*. See Hughson.
- Houston*. See Houstoun.
- Houstoun**; passage, between Admiral, Kuper and Narrow islands, strait of Georgia, New Westminster district, B.C. (Not Houston.)
- Howe**; island, St. Lawrence river, Frontenac county, Ont.
- Howe*. See Fuller.
- Howse**; pass and peak, Rocky mountains, Alta. and B.C. (Not House.)
- Hozameen**; range of mountains, east of Skagit river, near international boundary, Yale district, B.C. (Not Hozamen, Hozomen nor Hozomeen.)
- Hubbards**; village, Halifax Co., N.S. (Not Hubbards Cove.) Previous decision revised.
- Huber**; mount, near mount Victoria, Rocky mountains, Kootenay district, B.C.
- Hubert**; railway station, north shore of Skeena river, Coast district, B.C.
- Huble**; cove, St. Margaret bay, also lake and Ry. sta., Halifax Co., N.S. (Not Hubly.)
- Hubly*. See Hubley.
- Huckleberry*. See Mile.
- Huckstall*. See Ecstall.

- Hudson Bay**; mountains, west of Bulkley river, and south of Moricetown, Coast district, B.C.
- Hudson**; island, south of Thetis island, Stuart channel, S.E. coast of Vancouver I., B.C.
- Hudson**; strait, between Baffin island, N.W.T. and New Quebec.
- Huff**; island, in Museote bay, bay of Quinte, Prince Edward Co., Ont. (Not Huff's.)
- Hugh**; mount, east of lake Evans, Abitibi territory, Que.
- Hughes**; brook, Barritt bay, Wabigoon L., Kenora district, Ont. (Not Hughes creek.)
- Hughes**; range of mountains, east of Kootenay river, Kootenay district, B.C.

- Hughson**; bay, east of Providence bay, Manitoulin island, Manitoulin district, Ont. (Not Hewson, Housten, nor Husten.)
- Humber**; bay, railway station, river, and village, also Humber Bay post office and summer resort, York county, Ont. (Not Clairville village.)
- Humbly*. See Hambly.
- Humboldt**; bay, east shore of lake Nipigon, Thunder Bay district, Ont.
- Humboldt**; electoral district, post office, and railway station, Sask. (Not Humbolt.)
- Hungabee**; glacier and mountain, Bow range, Alta. and Kootenay district, B.C.
- Hungerford**; point, on the southern portion of Manitoulin island, Ont.
- Hungry**; bay, northeast side of Big bay, bay of Quinte, Ont.
- Hungry**; peak, at head of St. Mary river, Kootenay district, B.C.
- Hunker**; creek, tributary to Klondike river, Yukon.
- Huns Valley**; village, Macdonald electoral district, Man. (Not Hun's Valley.)
- Hunter**; island, near Int. bdy., Rainy R. district, Ont. (Not Hunter's nor Hunters.)
- Hunter**; mount, north of Palliser station, Kootenay district, B.C.
- Hunters**; range of mountains, south of Eagle river, Yale district, B.C.
- Huntingdon**; post settlement, international boundary, New Westminster district, B.C.
- Huntress**; reef, southwest of Johnston point, Bruce county, Ont.
- Hurd**; cape, west extreme of Bruce Co., Ont. Cape Hurd channel is west of the cape.
- Hurd**; mount, also pass, in the Ottertail range of the Rockies, Kootenay district, B.C.
- Hurdman**; post office, Carleton county, Ont. (Not Hurdman's Bridge.)
- Hurdman's Bridge*. See Hurdman.
- Huron**; river, flowing into Chambly basin, Richelieu river, Rouville county, Que. (Not Marieville creek.) Authorized French form: rivières des Hurons.
- Hurricane**; river, tributary to Nakina river, Cassiar district, B.C.
- Husten*. See Hughson.
- Hutchinson**; post office, Middlesex county, Ont. (Not Hutchison.)
- Hutchison**; creek, flowing from Bowden lake to Wabigoon river, Kenora district, Ont.
- Hutchison**; creek, flowing into east side of Lower Arrow lake, Kootenay district, B.C.
- Hutchison*. See Hutchinson.
- Hutshi**; lakes, west of lake Laberge, Yukon.
- Hutshiku**; bluff, on Lewes river, below Rink rapid, Yukon.
- Hutsigola**; lake, south of Teslin lake, Cassiar district, B.C. (Not Hutsigula.)
- Huxstall*. See Ecstall
- Hyland**; hill, east of Hutsigola lake, Cassiar district, B.C.
- Hyndman**; bay, at S.W. end of Cockburn I., Manitoulin district, Ont. (Not Sand.)

I

- Icarus**; point, Nanoose harbour, east coast of Vancouver island, B.C.
- Ice**; portage, on the lower part of Nottaway river, below Kitchigama river, Abitibi, Q.
- Ice**; river, tributary to Beaverfoot river, Kootenay district, B.C.
- Ice-cap**; mountain, near lower Stikine river, Cassiar district, B.C. (Not Ice-capped.)
- Icelandic**; river, emptying into lake Winnipeg, Man. (Not Icelanders.)
- Ichimanicuagon*. See Ishimanikuagan.
- Iconoclast**; mountain, Selkirk range; Kootenay district, B.C.

SESSIONAL PAPER No. 25d

Icy; cove, east of North bay, Hudson strait, N.W.T.

Ida; mount, south of Salmon arm of Shuswap lake, Yale district, B.C.

Ikeda; bay, southeast of Skincuttle inlet entrance, southeast coast of Moresby island, Queen Charlotte group, Coast district, B.C.

Ile aux Morts. See Lark.

Ile-aux-Noix; post office, St. John county, Que. (Not Isle aux Noix.)

Ile-Bizard; post office, on island of same name, St. Lawrence river, Jacques Cartier county, Que. (Not Isle Bizard.)

Ile-Perrot; post office, Vaudreuil county, Que. (Not Isle Perrot.)

Isles aux Pêches. See Peach island.

Isle de Bois. See Morris.

Illecillewaet; glacier, mining division, river, and town, Kootenay district, B.C. (Not Illecilliwaet, Illicillewaet, nor Illicilliwaet.)

Illes; brook, emptying into Frances lake, Yukon. (Not Il-es-too-a.)

Impérieuse; rock, Nanoose harbour, east coast of Vancouver island, B.C.

Incomappleux; river, flowing into Upper Arrow L., Kootenay dist., B.C. (Not Fish.)

Independence; creek, tributary to Stewart river, Yukon.

Indian; brook, flowing into St. Ann bay, Victoria county, N.S.

Indian; harbour, point, and reef, south of Fitzwilliam island, Manitoulin district, Ont.

Indian; island, northeast of Murray canal entrance to the bay of Quinte, Prince Edward county, Ont.

Indian; river, tributary to Yukon river, south of Klondike river, Yukon.

Indian Pear Island lake. See Saskeram.

Ingall; island, S. of Whitney Pt., St. Lawrence R., Leeds Co., Ont. (Not Shoemaker.)

Ingall; lake, southwest of Wabigoon lake, Kenora district, B.C.

Inganish. See Ingonish.

Ingersoll; mount, west of Columbia river, Kootenay district, B.C.

Inglewood; post office and railway station. Peel county, Ont. (Not Inglewood Junction.)

Inglismaldie; mount, south of Minnewanka lake, Rocky mountains, Alta.

Ingonish; bay, river, and town, Victoria county, N.S. (Not Inganish nor Niganishe.)

Ingraham. See Louis.

Ingram; mount, north of Kusawa lake, Yukon.

Inhabitants; river, Richmond county, N.S. (Not Habitants.)

Inklin; river, tributary to Taku river, Cassiar district, B.C.

Inkster; rock, at South Baymouth, Manitoulin island, Manitoulin district, Ont.

Inlin; brook, tributary to lower Gravel river, N.W.T.

Innarulligang. See East Bluff.

Inner. See Horswell.

Inner Duck; island, northeastern island of Duck I. group, Manitoulin district, Ont.

Inonoaklin; creek, west of Lower Arrow L., Kootenay district, B.C. (Not Sanderson.)

Insulated. See Isolated.

Inukshilikaluk; point, south coast Ungava bay, New Quebec. (Not Big Rock.)

Inukshuktuyuk; point, south coast of Ungava bay, New Quebec. (Not Beacon.)

Inverhuron; bay and village, Bruce county, Ont.

Invermere; townsite, south of Windermere, Kootenay district, B.C. (Not Canterbury.)

Inverness; passage, between Porpoise harbour and Skeena R., B.C. (Not N. Skeena.)

Inverness; river, tributary to Swan river, south of Lesser Slave lake, central Alberta.

Iosegun; lake and river, tributary to Little Smoky river, Alta. (Not Attim Segoun nor Io-se-gun.)

Ipperwash. See Kettle.

Ireland; township, Megantic county, Quebec.

Irishman; creek, tributary to Moyie river, Kootenay district, B.C.

Iron; creek, tributary to Battle river, eastern Alberta.

Iron; lake, west of Crooked lake, international boundary, Rainy river district, Ont.

Iroquois; lake, Tp. 48, Rs. 7 and 8, W. 3 M., Sask.

Irving; bay, Crooks inlet, Hudson strait, N.W.T.

Irving; post settlement, Albert county, N.B. (Not Baltimore.)

Isaac Harbour; town, Guysborough county, N.S. (Not Isaac's Harbour.)

Isabella; lake, northeast of Peyto lake, Alta.

Isabemagussi. See Magusi.

Iserhoff; river, emptying into Waswanipi lake, Abitibi territory, Que.

Ishimanikuagan; lake, Saguenay Co., Q. (Not Ichimanicouagan nor Ishimanicouagan.)

Iskwatikan; lake, north of lake LaRonge, central Saskatchewan.

Island; lake, northeast of L. Winnipeg, and draining into Hayes river, Manitoba.

Island. See Ashby.

Island. See Dasserat.

Island. See Trade.

Island lake. See Isle lake.

Island Portage (lake). See Pine.

Islands; lake of, southeast of Abitibi lake, Timiskaming county, Que.

Isle; lake, west of St. Ann, Alta. (Not Island lake.)

Isle Bizard. See Ile-Blzard.

Isle of coves. See Cove.

Islet; point, southwesterly extremity of Sonora island, Coast district, B.C.

Isnor. See Eisner.

Isolated; peak, at head of Yoho valley, Rocky mountains, Kootenay district, B.C. (Not Insulated nor Lonely.)

Ithenotosquan. See Elbow.

Itsi; lakes, on Ross river, also mountains between Macmillan and Ross rivers, Yukon.

Ittimenotok; cape, east shore of Ungava bay, New Quebec.

Ivan; point, Manitoulin island, east of Burnt island, Manitoulin district, Ont.

J

- Jack**; lake, Burleigh township, Peterborough county, Ont. (Not Jack's.)
- Jack**; point, S. entrance to Nanaimo, Vancouver I., B.C. (Not Jack's nor Sharp.)
- Jackhead**; island, lake, and river, north of Fisher bay, lake Winnipeg, Man. (Not Jack-Head.)
- Jackman*. See Pritzler.
- Jackson**; creek, tributary to Souris river, southern Manitoba and Saskatchewan.
- Jackson**; mount, south of Tulameen, Yale district, B.C.
- Jackson*. See Robertson.
- Jackstraw**; island, west of Gordon island, St. Lawrence river, Leeds county, Ont.
- Jackstraw**; lighthouse and shoal, St. Lawrence river, west of Gananoque, Leeds county, Ont. (Not Jack Straw.)
- Jacob**; creek, tributary to Bow river, Alta.
- Jacob**; island, at entrance to Rupert bay, James bay, Que. (Not Wood.)
- Jacob**; lake, Caire township, Timiskaming county, Que. (Not Fish.)
- Jacques Cartier**; lake and river, Montmorency county, Que. (Not Grand Lake Jacques Cartier.)
- James**; cape, north shore of Hudson strait, N.W.T.
- James**; island and reef, between Fitzwilliam and Yeo islands, Georgian bay, Manitoulin district, Ont.
- James**; river, tributary to Red Deer river, southern Alberta.
- James Ross*. See Ross.
- Jamieson**; lake, Dungannon township, Hastings county, Ont. (Not Jamieson's.)
- Jamieson's*. See Egan.
- Janet**; lake, between Stewart river and Mayo brook, Yukon.
- Jansen**; lake and post office, west of the Quill lakes, southern Saskatchewan.
- Janvrin**; island, and Janvrin Harbour P.O., Richmond Co., N.S. (Not Jauvrin's.)
- Jareux*. See Jureux.
- Jarvis**; bay, island, point, river, and rock, Thunder Bay dist., Ont. (Not Turtle Pt.)
- Jarvis**; lake, between Athabaska and Baptiste rivers, Alta. (Not Upper White Fish.)
- Jauvrin's*. See Janvrin.
- Jay**. lake, Pettypiece township, Kenora district, Ont.
- Jean**; lake, southeast of L. Nipigon, Thunder Bay district, Ont.
- Jean de Terre*. See Gens-de-Terre.
- Jeannette**; creek, post office, and railway station, Kent county, Ont. (Not Jeannette's creek nor Jeannette's Creek P.O.)
- Jean-Noël**; river, flowing into the St. Lawrence, at St. Irénée, Charlevoix Co., Q.
- Jean-Pierre**; bay and point, southwest of Sturgeon bay, north shore of L. Superior, Thunder Bay district, Ont.
- Jeffrey**; mount, west of Saanich inlet, Vancouver island, B.C.
- Jenkins**; point, east of Providence bay, Manitoulin island, Manitoulin district, Ont.
- Jennie Graham**; the most southerly shoal off Great Duck I., Manitoulin district, Ont.
- Jennings**; river, emptying into Teslin lake, Cassiar district, B.C. (Not Fifteenmile.)
- Jensen**; creek, tributary to Dominion creek, Indian river, Yukon.
- Jesse**; island, entrance to Departure bay, southeast coast of Vancouver island, B.C.

- Jessie**; lake, Purdom township, Thunder Bay district, Ont.
- Jesup Land*. See Ellesmere.
- Jim**; creek, tributary to Yukon river, below Indian river, Yukon.
- Joan**; point, near Dodd narrows, east coast of Vancouver island, B.C.
- Joassa**; channel, between Dufferin and Horsfall islands, Coast district, B.C.
- Jocelyn**; hill, east side of Finlayson arm, Vancouver island, B.C.
- Jockvale**; post office, Carleton county, Ont. (Not Jock Vale.)
- Joel**; river, tributary to Klondike river, Yukon.
- Joggins**; village, Cumberland county, N.S. (Not Joggin Mines, South Joggins, nor South Joggings.)
- John**; lake, northeast of Silver lake, Kenora district, Ont.
- John**; lake, below Itsi lakes, Ross river, Yukon.
- John**; river, also River John post office, Pictou county, N.S.
- Johnny*. See Johnson.
- Johnson**; bay, north shore of Howe island, Frontenac Co., Ont. (Not Johnston.)
- Johnson**; lake, Havelock township, Haliburton county, Ont. (Not Johnson's.)
- Johnson**; lake and railway station, southeast of Latchford, Timiskaming district, Ont. (Not Johnny lake nor Johnston station.)
- Johnson**; range of mountains, between Atlin L. and O'Donnel R., Cassiar district, B.C.
- Johnston**; creek, tributary to McQuesten river, Yukon.
- Johnston**; creek, west of Lower Arrow lake, Kootenay district, B.C.
- Johnston**; harbour and point, southeast of Porcupine point, Bruce county, Ont.
- Johnston Corners**; post office, Carleton county, Ont. (Not Johnston's Corners nor Johnstone's Corners.)
- Johnston**; lake, southern Saskatchewan.
- Jojo**; lake, north of lake Nipigon, Thunder Bay district, Ont.
- Jolicœur**; village, Westmorland county, N.B. (Not Jolicure.)
- Joli Head**; headland, Queens county, N.S. (Not Jolie Head.)
- Jonas**; creek, flowing northwesterly into Sunwapta river, also pass at the head of the creek, Alta.
- Jones**; creek, flowing to Batchawana bay, L. Superior, Ont. (Not Harmony river.)
- Jones**; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.
- Jones**; shoal, S. of Labrador reef and S.W. from Belanger point, Manitoulin dist., Ont.
- Jordan Harbour**; post office, Lincoln county, Ont. (Not Jordan Harbor.)
- Jordan**; lake and river, Hastings county, Ont.
- Jordan**; river, flowing into Frobisher bay, N.W.T.
- Jordan**; river, tributary to Columbia river, near Revelstoke, Kootenay district, B.C.
- Jordan**; river, flowing into Juan de Fuca strait, Vancouver island, B.C.
- Jordan River**; village, Shelburne county, N.S. (Not Head of Jordan River.)
- Jorkins**; point, southeast entrance to Finlayson channel, B.C. (Not Dawkins.)
- Joseph**; creek, tributary to St. Mary river, Kootenay district, B.C.
- Joshua Hennigar*. See Hennigar.
- Joss**; mountain, northeast of Mabel lake, Yale district, B.C.
- Joubert**; island, south of Cascade point, Soulanges county, Que. (Not Round.)
- Joy**. bay, south shore of Hudson strait, New Quebec.

SESSIONAL PAPER No. 25d

- Joy**; mountain, between Hess and Lansing rivers, Yukon.
Jubilee; island, north shore of Hudson strait, N.W.T.
Jubilee; mountain, near north end of Atlin lake, Yukon.
Julian; point, east of Chorbak inlet, north shore of Hudson strait, N.W.T.
Julien; islet, on Kamouraska mud flats, Kamouraska county, Que.
Jumping; lake, east of the Birch hills, central Saskatchewan.
Jumping Deer; creek, tributary to Qu'Appelle river, Sask. (Not Jumpingdeer.)
Jumpingpond; creek, tributary to Bow river, Alta. (Not Jumping Pond.)
Junction; mountain, on south branch of Sheep river, southern Alberta.
Junnusuksoak; inlet, east shore of Ungava bay, New Quebec.
Juno; point, south of Pine Tree harbour, Bruce county, Ont.
Jupiter; river, south side of Anticosti I., Saguenay county, Que. (Not Observation.)
Jupiter. See Shallop.
Jureux; point, also river flowing into the St. Lawrence below Goose cape, Charlevoix county, Que. (Not Jareux.)

K

- Kabagukski**; lake, south of Sasakwei lake, Kenora district, Ont. (Not Mud.)
Kabakwa; lake, Stanhope township, Haliburton Co., Ont. (Not Kah-bah-bah-quah.)
Kabania; lake, west of Attawapiskat lake, Patricia district, Ont.
Kabikwabik; lake, south of Minnitaki lake, Kenora district, Ont. (Not Kapikwabikok.)
Kabistachuan; bay, in southern portion of Mistassini lake, Q. (Not Cabistachuan.)
Kabitotikwia; lake and river, draining into Kaiashk bay, L. Nipigon, Thunder Bay district, Ont. (Not Kabitotiquia.)
Kabitotiquia. See Kabitotikwia.
Kabitustigweiak. See Butler.
Kabona; lake, south of Matchimanito lake, Pontiac county, Que.
Kagianagami; lake, north of Ogoki river, Thunder Bay district, Ont.
Kag-ish-a-bog-a-mog. See Kasshabog.
Kagiwiosa. lake, east of Dinorwic lake, Kenora district, Ont.
Kaha; creek, tributary to Koshin river, Cassiar district, B.C. (Not Kahak.)
Kah-bah-bah-quah. See Kabakwa.
Kah-mini-ti-gwa-quiack. See Bluffy.
Kah-shah-gah-wig-e-mog. See Kashagawi.
Kahtate; river, tributary to lower part of Stikine river, Cassiar district, B.C.
Kahuch. See Katonche.
Kah-wah-she-be-mah-gog. See Kushog.
Kahwambejewagamog. See Kawagama.
Kaiashk; bay and river, W. shore of L. Nipigon, Thunder Bay dist., Ont. (Not Gull.)
Kaiashkomin; lake, north of Wabigoon lake, Kenora district, Ont. (Not Bad Rice.)
Kaien; island, Prince Rupert harbour, Coast district, B.C. (Not Kai-en.)
Kaiete; point, at east entrance to Lama passage, Coast district, B.C. (Not Calete, Ki-ette, nor Kyeet.)
Kaijick Manitou. See Baptiste.
Kaikaquabick. See Reception.

- Kains.* See Cain.
- Kaishk.* See Evain.
- Ka-its-siks.* See Kasiks.

Kapitagama; lake, southeast of Abitibi lake, Timiskaming county, Que.

Kapitajewan. See Kapitachuan.

Kapitashewinna. See Kapitachuan.

Kapitswe; lake, at headwaters of St. Maurice river, Champlain county, Que.

Kapkichi; lake, north of L. St. Joseph, Patricia district, Ont.

Kaposvar; creek, tributary to Qu'Appelle river, Sask. (Not Little Cutarm.)

Karmutsen. See Nimpkish.

Kasagiminnis; lake, north of L. St. Joseph, Patricia district, Ont.

Kasakachewiwak. See Uphill.

Kashagawi; lake, Stanhope Tp., Haliburton Co., Ont. (Not Kah-shah-gah-wig-e-mog.)

Kashagawigamog; lake, Dysart and Minden townships, Haliburton county, Ont.

Kashaweogama; lake, southwest of Savant lake, Thunder Bay district, Ont.

Kasiks; railway sta., also river tributary to Skeena R., B.C. (Not Ka-its-siks.)

Kaskawulsh; river, tributary to Alsek river, southwestern Yukon (Not O'Connor.)

Kasshabog; lake, Methuen Tp., Peterborough Co., Ont. (Not Kag-ish-a-bog-a-mog.)

Kate; point, at upper end of Lower Arrow lake, Kootenay district, B.C.

Kates Needle; mountain, near Stikine R., opp. Porcupine creek, Cassiar district, B.C.

Kathawachaga; lake, south of Coronation gulf, N.W.T. (Not Cathawachaga.)

Katherine; lake, on Lady Evelyn river, below Grays river, Sudbury district, Ont.

Katharine; lake, at headwaters of Bow river, Rocky mountains, Alta.

Kathlyn; lake, at east base of Hudson bay mountains, south of Moricetown, Coast district, B.C. (Not Chickens.)

Katina; creek, tributary to Silver Salmon river, Cassiar district, B.C.

- Katonche**; lake, east of Grand lake Victoria, Pontiac county, Que. (Not Kahuch.)
- Katrina**; creek, tributary to White river, Yukon.
- Kattaktok**; cape, east shore Ungava bay, New Quebec.
- Katutok**. See Charles.
- Kauffman**. See Kiwetinok.
- Kawagama**; lake, Sherborne Tp., Haliburton Co., Ont. (Not Kahwambejewagamog.)
- Kawakashkagama**. See Kawashkagama.
- Kawasachuan**; lake and river, near Grand L. Victoria, Timiskaming county, Que. (Not Kawasajewan nor Kawassajewan.)
- Kawasgisguegat**. See Kawaskisigat.
- Kawashegamuk**; lake, southeast of Dinorwic lake, Kenora district, Ont. (Not Long.)
- Kawasheibemagagamak**. See Washeibemaga.
- Kawashkagama**; lake and river, north of Long lake, Thunder Bay district, Ont. (Not Kawakashkagama.)
- Kawaskisigat**; lake, headwaters of Lièvre river, St. Maurice county, Que. (Not Kawasgisguegat.)
- Kawastaguta**; bay, at the northerly end of Grand lake Victoria, Timiskaming. Que.
- Kawaweogama**; lake, northeast of Seseganaga lake, Thunder Bay district, Ont.
- Kawawia**; lake, southeast of Manitou lake, Kenora district, Ont. (Not Oval.)
- Kawawiagamak**. See Wawiag.
- Kay-gat**. See Keigat.
- Kaypiscow**. See Kapiskau.
- Kazabazua**. river, Ottawa and Pontiac counties; also railway station and village, Ottawa county, Que. (Not Kazubazua nor Kazuabazua.)
- Kedgwick**; river, Restigouche Co., N.B. (Not Kedgewick nor Quatawamkedgewick.)
- Keec**. See Kiekkiek.
- Kee-ec-kee-ec**. See Kiekkiek.
- Keefer**; island, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.
- Keejimacogie**. See Kejimkujik.
- Keele**; peak, Mackenzie Yukon watershed, N.W.T.
- Keepewa**. See Kipawa.
- Kee-she-kas**. See Kishikas.
- Keq**; lake, on Churchill river, northeast of L. LaRonge, Saskatchewan. (Not Barrel.)
- Keglo**; bay, east shore Ungava bay, New Quebec.
- Keheewin**. See Kehiwin.
- Kehiwin**; Indian reserve, also lake, eastern Alberta. (Not Kehcewin.)
- Keigat**; lake, southwest of Cat lake, Patricia district, Ont. (Not Kay-gat.)
- Keikewabik**; lake, south of Minnitaki lake, Kenora district, Ont. (Not Hawkrock.)
- Kejimkujik**; lake, Annapolis and Queens counties, N.S. (Not Cegemecega, Keja-makuja, Keejimacogie, Kerjimacogie, nor Segum Sega.)
- Kekek**; river, tributary to Migiskan river, Pontiac county, Que.
- Kekeko**; lake, southeast of Abitibi lake, Timiskaming county, Que.
- Kekekwa**; lake, north of Anzhekumming lake, Kenora district, Ont.
- Kekeo**; river, tributary to Manuan R., upper St. Maurice R., Champlain county, Que.
- Kekkekwi**; lake, Stanhope Tp., Haliburton Co., Ont. (Not Cay-ka-qual-be-kung.)

SESSIONAL PAPER No. 25d

- Kellsall**; lake, discharging into Chilkat river, Cassiar district, B.C.
- Kelvin**; island, lake Nipigon, Thunder Bay district, Ont. (Not Grand.)
- Kelvin**; lake, an expansion of Nottaway river, Abitibi territory, Que.
- Kelvingrove**; post office, Huntingdon Co., Que. (Not Calvin Grove nor Kelvin Grove.)
- Kematch**; river, tributary to Woody river, western Manitoba.
- Kempenfelt**; bay, in lake Simcoe, Simcoe county, Ont. (Not Kempenfeldt.)
- Kempt**; lake, St. Maurice county Que. (Not Wabaskoutyunk.)
- Kempton**; village, Colchester county, N.S. (Not Kempt Town.)
- Kemptonville**; creek, tributary to Rideau R., Grenville Co., Ont. (Not South Rideau R.)
- Kenemich**; river, flowing to Melville lake, Ashuanipi, Que. (Not Kenemichie.)
- Keniapiskau**; lake, north of Opatawaga L., Abitibi territory, Que. (Not Kaniapiskau.)
- Kenilworth**; lake, in Tp. 50, R. 4, W. 4th M., Alta.
- Kennabutch**; lake, east of Dinorwic lake, Kenora district, Ont. (Not Kennabuch.)
- Ken-ne-big.* See Kennibik.
- Ken-ne-ses.* See Kennisis.
- Kennewapekko**; lake, south of Boyer lake, Kenora district, Ont.
- Kennibik**; lake, Dudley township, Haliburton county, Ont. (Not Ken-ne-big.)
- Kennicott**; lake, at head of Hackett river, Cassiar district, B.C.
- Kennisis**; lake, Havelock township, Haliburton county, Ont. (Not Ken-ne-ses.)
- Kenny**; lake, west of lake Tempest, Thunder Bay district, Ont.
- Kenogami**; river, tributary to Albany river, Algoma and Thunder Bay districts, Ont.
- Kenogamissee.* See Larch.
- Kenoniska**; lake, north of Opatawaga lake, Abitibi territory, Que.
- Kenora**; district and town, western Ontario. (Not Rat Portage town.)
- Kenora**; lake, Redditt township, Kenora district, Ont.
- Kenozhe**; lake, south of Machawaian lake, Patricia district, Ont.
- Kenozhe**; lake, southeast of Manitou lake, Kenora district, Ont. (Not Kinoje.)
- Kerkeslin**; mountain, south of Mt. Hardisty, east side of Athabaska river, Alta.
- Kernertut.** cape, southeast shore Ungava bay, New Quebec.
- Kerr**; mount, President range, Rocky mountains, Kootenay district, B.C.
- Kerr**; rocks off the western coast of Digby island, Coast district, B.C.
- Kersey**; point, at northerly end of Maitland I., Douglas channel, Coast district, B.C.
- Kerwood**; post village and railway station, Middlesex county, Ont. (Not Kerrwood.)
- Keshkabuon**; island, Thunder Bay district, Ont. (Not Caribou.)
- Kestrel**; rock, at entrance to Prince Rupert harbour, Coast district, B.C.
- Ketch**; harbour and head, also Ketch Harbour post settlement, southwest of entrance to Halifax harbour, Halifax county, N.S. (Not Catch harbour and head, nor White or Catch Harbour head.)
- Ketchacum.* See Catchacoma.
- Ketchum**; lake, northeast of Egnell, Cassiar district, B.C.
- Kettle**; point and reef N. from the point, Lambton county, Ont. (Not Ipperwash.)
- Kettle**; range of mountains and river, in southeastern portion of Yale district, B.C.
- Kettle.* See Chaudière.
- Ketza**; river, tributary to Pelly river, above Ross river, Yukon. (Not Kitza.)
- Kewagama**; lake, southeast of Abitibi lake, Timi-kaming county, Que.

Kewagodoongojioon. See La Pause.

Key; harbour and railway terminus, Georgian bay, Parry Sound district, Ont.

Keys; lake, north of Favel lake, Kenora district, Ont.

Khartum. See Hector.

Kiask; river, south of Kamshigama river, Abitibi territory, Que.

Kickendatch. See Kikendatch

Kicking Horse; pass, and river tributary to Columbia river, Kootenay district, B.C. (Not Wapta river.)

Kid; creek, tributary to Goat river, Kootenay district, B.C.

Kiekkiek; lake, Bosquet township, Timiskaming. Q. (Not Kee nor Kee-ec-Kee-ec.)

Kieley. See Coyle.

Ki-ette. See Kaïete.

Kiemawisk; lake, southwest of Shabogama lake, Timiskaming county, Que.

Kienawisik. See De Montigny.

Kikendatch; Indian village, upper St. Maurice river, Champlain county, Que. (Not Kirkendatch nor Kickendatch.)

Kildala; arm, near Kitimat arm, Coast district, B.C.

Killarney; village, on west side of Lower Arrow lake, Kootenay district, B.C.

Killsquaw; lake, northwest of Tramping lake, Sask.

Kilpatrick; mount, Purity range, Selkirk mountains, Kootenay district, B.C.

Kilvert; lake, south of Hawk lake, Kenora district, Ont.

Kimball; lake, Livingstone township, Haliburton county, Ont. (Not Kimball's.)

Kimmewin; lake, southwest of Schist lake, Kenora district, Ont.

Kinahan; islands, S. of Digby I., Chatham sound, Coast dist., B.C. (Not Kinnahan.)

Kinbasket; lake, an expansion of Columbia river, below Bush river, Kootenay district, B.C.

Kincardine; town, Bruce county, Ont.

King; mount, northwest of Ottertail station, Kootenay district, B.C.

Kingcome; inlet and mts., W. of Knight inlet, Coast district, B.C. (Not Kingcombe.)

Kingcome; point, at N. end of Princess Royal I., Coast dist., B.C. (Not Kingcombe.)

King Christian. See Findlay.

King George; sound, south shore of Hudson strait, New Quebec.

Kingham; river, Argenteuil county, Que. (Not Kingsey.)

Kinglake. post office, Norfolk county, Ont. (Not King Lake.)

King Oscar Land. See Ellesmere.

Kingscote; lake, Bruton township, Haliburton county, Ont.

Kingscourt; post office and railway junction, Lambton Co., Ont. (Not King's Court.)

Kingsey. See Kingham.

Kingsgate; post office and railway station, Int. boundary, Kootenay district, B.C.

King Solomon; mountain, east of Carmi, Yale district, B.C.

King William; island, S.W. of Boothia pen., N.W.T. (Not King William Land.)

Kinney; lake, at the southwest base of Mt. Robson, Cariboo dist., B.C. (Not Helena.)

Kinnickoneship; lake, near, Manitou L., Kenora district, Ont. (Not Black Sawbill.)

Kinnyu; lake, east of Manitou lake, Kenora district, Ont.

Kinojevis; lake and river, Timiskaming county, Que. (Not Kinojevisekaskatik.)

SESSIONAL PAPER No. 25d

Kinojè. See Kenozhe.

Kinonge; river, Petite Nation seigniory, Labelle county, Que. (Not Salmon.)

Kinsman; post settlement, Kings county, N.S. (Not Kinsman's.)

Kintail; village, south of Clark point, Huron county, Ont.

Kipawa; lake, post office, and river, Timiskaming, Q. (Not Keepawa nor Kipewa.)

Kipling; reef, west of Middle Duck island, Manitoulin district, Ont.

Kipp; coulée, north of Middle coulée, southern Alberta. (Not Kipp's.)

Kirby; creek, flowing into Juan de Fuca strait, Vancouver I., B.C. (Not Coal.)

Kirk; island, in northerly portion of lake Evans, Abitibi territory, Que.

Kirkendatch. See Kikendatch.

Kirk Ferry; village, Hull township, Ottawa county, Que. (Not Kirk's Ferry.)

Kirkpatrick; lake, south of Hamilton lake, southeastern Alberta.

Kishikas; lake and river, tributary to Severn river, Patricia district, Ont. (Not Cedar, Kee-she-kas nor Kishki.)

Kishinena; creek and mountain, international boundary, Kootenay district, B.C. (Not Kishenehn, Kish-e-neh-na, nor Kish-e-nehu.)

Kishki. See Kishikas.

Kiskitto; lake, north of L. Winnipeg, Man. (Not Grass nor West Niskitogisew.)

Kiskittogisu; lake, north of L. Winnipeg, Man. (Not Big Reed nor Niskitogisew.)

Kiskopkechewans. See Minnehaha.

Kispiox; river, tributary to Skeena river, above Hazelton, Cassiar district, B.C. (Not Kispyox nor Kis-py-ox.)

Kisseynew; lake, south of Kississing lake, Manitoba. (Not Lobstick.)

Kississing; lake and river, tributary to Churchill river, Manitoba. (Not Cold, Kissisino, nor Takipy.)

Kitchener; island, W. of Cockburn I., Manitoulin dist., Ont. (Not Little Cockburn.)

Kitchener; railway station, Kootenay district, B.C.

Kitchigama; river, trib. to Nottaway R., Abitibi territory, Que. (Not Michagama.)

Kitgargas; village, on Babine river near its junction with the Skeena, Cassiar district, B.C. (Not Kitgargasse.)

Kitigtung. See Lady Franklin.

Kitimat; arm and P.O., N. of Douglas channel, Coast district, B.C. (Not Kitamaat.)

Kitiwiti; shoal, southwest of Prospect, N.S. (Not Kittee Wittee.)

Kitkiata; Indian village, Douglas channel, Coast district, B.C. (Not Kit-kia-tah.)

Kitsalas; canyon and town, on Skeena river, Coast district, B.C. (Not Kitselas.)

Kitselas. See Kitsalas.

Kitsumgallum; lake and river, tributary to Skeena river, Coast district, B.C. (Not Kitsumgalum nor Kit-sum-kay-lum.)

Kitty; shoal, S. of Great Duck I., and S.W. from Mary shoal, Manitoulin district, Ont.

Kitwanga; village, on Skeena river, 20 miles below Hazelton, Cassiar district, B.C.

Kitza. See Ketzä.

Kiwanzi; brook, tributary to Burntwood river, Manitoba.

Kiwetinok; pass, peak, river, and valley, N. of Beavertail river, Rocky Mts., Kootenay district, B.C. (Not Mt. Kauffman, Wilson pass, nor Whymper pass.)

Kiyiu; lake, southeast of Opuntia lake, southern Saskatchewan. (Not Eagle.)

Kla-anch. See Nimpkish.

Klatsa; river, tributary to Frances river, Yukon. (Not Klatsatooa.)

Klemtu; passage and village, Coast district, B.C. (Not Klemtoo nor China Hat.)

Klesilkwa; river, tributary to Skagit river, Yale district, B.C.

Klewi; river, tributary to Little Buffalo R., S. of Great Slave L., (Not Tesse-Clewee.)

Kloiya; bay, Denise arm, Morse basin, E. of Kaien I., Coast dist., B.C. (Not Cloyah.)

Klokhok; river, tributary to Takhini river, Yukon.

Klondike; village, and river tributary to Yukon river, Yukon. (Not Klondyke, Clondyke, nor Throndiuck.)

Klootchman; canyon, on Stikine R., S. of Clearwater R., Cassiar district, B.C. (Not Kluchman.)

Klotassin; river, tributary to Donjek river, Yukon.

Klotz; mount, near Tatonduk river, Yukon.

Kluane; lake and river, in southwestern Yukon. (Not Kluahne.)

Kluchman. See Klootchman.

Kluhini; river, flowing out of Frederick lake into Dezadeash lake, Yukon.

Klukshu; lake, and river tributary to Alsek river, Yukon.

Klusha; creek, flowing through Braeburn lake, into Nordenskiöld river, Yukon.

Knapp; point, also Knapp Point lightstation, north shore of Wolfe island, Frontenac county, Ont. (Not Brown's.)

Knee; hills, between Kneehills and Threehills creeks, southern Alberta.

Kneehill; post office, east of Innisfail station, Alta. (Not Knee Hill Valley.)

Kneehills; creek, tributary to Red Deer river, Alta. (Not Knee Hills.)

Kneeland; bay, southwest shore Frobisher bay, N.W.T.

Knife; islands, west of Shute point, Bruce county, Ont.

Knife; lake, international boundary, Rainy River district, Ont.

Knight. See Descanso.

Knob; lake, Rugby township, Kenora district, Ont.

Knob. See The Knob.

Coak; islands and stream, St. John river, York county, N.B. (Not Coac nor Coak.)

Koidern; river, tributary to White river, Yukon.

Koketsa. See Kaketsa.

Kokomenhani; lake, at headwaters of Rupert river, Mistassini territory, Que. (Not Kokhamenhani.)

Kokomis; lake, southwest of Grand lake Victoria, Timiskaming county, Que.

Koksilah; railway station, ridge, and river, N. of Cowichan R., Vancouver I., B.C.

Koksoak; river, flowing into Ungava bay, New Quebec. (Not Big nor South.)

Kolfage; island, south of Pike point, Bruce county, Ont.

Koochiching; falls, in Rainy river, near Fort Frances, international boundary, Rainy River district, Ont. (Not Chaudière.)

Koos-ka-nax. See Kuskanax.

Kootanie. See Blakiston.

Kootenai. See Waterton.

Kootenay; lake and river, Kootenay district, B.C. (Not Kootanie, Kootenai, &c.)

Kopka; lake, west of lake Nipigon, Thunder Bay district, Ont.

SESSIONAL PAPER No. 25d

- Korikduardu**; inlet, E. of Chorkbak inlet, Hudson strait. (Not Ko-rick-du-ar-du.)
- Koshin**; river, tributary to Nahlin river, Cassiar district, B.C.
- Koya**; point, also lightstation on the point, east of Langford point, N.E. entrance to Houston Stewart channel, Coast district, B.C.
- Kramer**; lake, Redditt township, Kenora district, Ont.
- Kukukahuh**; lake, southeast of Manitou lake, Kenora district, Ont.
- Kukukus**; lake, southeast of Minnitaki lake, Kenora district, Ont. (Not Kukus.)
- Kuldo**; creek and village, Skeena river, 46 miles above Hazelton, Cassiar dist., B.C.
- Kulleet**; bay, northeast of Ladysmith harbour, Vancouver island, B.C. (Not Chemainos nor Chemainus.)
- Kunghit**; island, southernmost of Queen Charlotte Is., Coast dist., B.C. (Not Prevost.)
- Kuper**; island, northwest of Saltspring island, southeast coast of Vancouver island, B.C. The name "Kuper" is confirmed for this island and replaced by "Hibben" for the northerly one to avoid duplication.
- Kuper.* See Hibben.
- Kusawa**; lake, southwest of lake Laberge, Yukon. (Not Arkell.)
- Kusawa**; river, flowing northerly from Cassiar district, B.C., into Kusawa lake, Yukon. (Not Arkell.)
- Kushog**; lake, Stanhope township, Haliburton county, Ont. (Not Hall's nor Kah-wah-she-be-mah-gog.)
- Kusiwah.* See Surprise.
- Kuskanax**; creek, E. side of Upper Arrow L., Kootenay dist., B.C. (Not Koos-ka-nax.)
- Kuskonook**; P.O. and railway station, near the southern end of Kootenay lake, Kootenay district, B.C. (Not Kuskanook.)
- Kutawagan**; lake, Tp. 30, R. 20, W. 2 M., southern Saskatchewan.
- Kuthai**; lake, discharging into Silver Salmon river, Cassiar district, B.C.
- Kwadacha**; river, tributary to Finlay R., Cassiar, B.C. (Not Quadacha nor Quanecca.)
- Kwichpak.* See Yukon.
- Kwinitsa**; railway station, also river tributary to Skeena R., B.C. (Not Quintsa.)
- Kwoiek**; peak, west of Kanaka, Yale district, B.C. (Not Quoieek.)
- Kyak**; bay, west coast Ungava bay, New Quebec.
- Kyaska**; lake, on Churchill river, east of Reindeer river, central Saskatchewan.
- Kyeet.* See Kaiete.

L

- Laberge**; lake, in the southern portion of Yukon. (Not Laberge nor Lebarge.)
- Laberge**; lake, Pontleroy township, Timiskaming county, Que. (Not Lizard.)
- LaBiche**; lake and river, northeastern Alberta. (Not Red Deer.)
- Labrador**; reef, south of Belanger point, Manitoulin island, Manitoulin district, Ont.
- Labrador**; reef, north of cape Chidley, New Quebec.
- Labyrinth**; lake, on interprovincial boundary, Timiskaming, Ont. and Que.
- Lacaille**; point and river, Montmagny county, Que. (Not la Caille.)
- LaChapelle**; post office, Two Mountains county, Que. (Not Lachapelle.)
- La Colle.* See Cole.
- Lacroix**; lake, southeast of L. LaBiche, central Alberta.

- Lacroix**; lake, in the valley of Bulkley river, Cassiar district, B.C. (Not La Croix, Le Croix, nor Round.)
- LaCroix**; lake, Int. boundary, Rainy R. dist., Ont. (Not Namoukan nor Nequaquon.)
- Ladder**; hill and lake, southeast of Cowan lake, central Saskatchewan.
- Ladue**; river, tributary to White river, Yukon.
- Lady Beatrix**; lake, northeast of Mattagami lake, Abitibi territory, Que.
- Ladybird**; mountain, N. of Columbia R., Kootenay district, B.C. (Not Lady Bird.)
- Lady Franklin**; island, east of Clements Land, N.W.T. (Not Kitigtung.)
- Ladysmith**; harbour and town, southeast coast of Vancouver island, B.C. (Not Oyster harbour.)
- LaFrance**; creek, east side of Kootenay lake, Kootenay district, B.C. (Not Lafrance.)
- Laggan**; railway station, Alta.
- Lagoon**; head, south entrance to Hammond bay, S.E. coast of Vancouver island, B.C.
- Lahave**; island and river, Lunenburg county, N.S. (Not La Have nor Le Havre.)
- Lake**; creek, tributary to Stewart river, Yukon.
- Lake*. See Chonat.
- Lake Fleet**; group of islands, E. of Admiralty group, St. Lawrence R., Leeds Co. Ont.
- Lakelse**; lake and river, tributary to Skeena river, Coast district, B.C. (Not Lekelse.)
- Lake Megantic*. See Megantic.
- Lake of Islands*. See Dufault lake.
- Lake of the Narrows*. See Washi lake.
- Laketon**; post on Dease lake, Cassiar district, B.C.
- Lakit**; creek, E. of Kootenay R., N. of Steele, Kootenay dist., B.C. (Not Four-mile.)
- La Lime* See Lanim.
- La Loche*. See Methye.
- Lalonde**; island, St. Lawrence river, Soulanges county, Que. (Not Chateauguay.)
- L'Amable**; brook and lake, Dungannon and Faraday townships, Hastings county, Ont.
- Lamb**; creek, tributary to Moyie river, Kootenay district B.C.
- Lambert**; shoal, northwest of Saugeen river, Bruce county, Ont.
- Lamek**; bay, Shippigan island, Gloucester county, N.B. (Not Alemek, Lamec, L'amec, nor Lameque.)
- La Motte**; lake, LaMotte and Malartic townships, Timiskaming county, Que. (Not Askikwaj nor Seals Home.)
- Lamy**; lake, Sabourin township, Timiskaming county, Que. (Not Atikamek.)
- Landing**; lake, north of Sipiwesik lake, Manitoba.
- Langara**; island, off the northern extreme of Graham island, Queen Charlotte group; also point on the island, midway between Thrumb island and St. Margaret point, with lightstation thereon; name also applied to rocks off the north shore of the island; Coast district, B.C. (Not North island nor North point.)
- The island was named North by Capt. George Dixon in 1787; and Langara by Commander Jacinto of the Spanish corvette "Aranzazu", 1792, after Admiral Don Juan de Langara of the Spanish navy and the point was called North by Vancouver, 1793. Walbran's "Coast Names of B.C." The name "North" objected to as not being sufficiently distinctive.

L'Ange Gardien. See Canrobert.

SESSIONAL PAPER No. 25d

Langford; lake, west of Esquimalt, Vancouver island, B.C.

Langlais. See Langlois.

Langlois; point, at mouth of Grande rivière du Chêne, Lotbinière county, Que.
(Not Langlais.)

Lanim; point, west of Dalhousie, Restigouche county, N.B. (Not La Lime, nor La Nim, nor Le Nim.)

La Nonne; lake, Tp. 57, Rs. 2 and 3, W. 5th M., Alta.

L'Anse au Beaufile. See Anse-à-Beaufils.

L'Anse-a-Valleau. See Anse-au-Vallon.

Lansdowne. mount, west of lake Marsh, Yukon.

La Pause; lake, La Pause township, Timiskaming, Que. (Not Kewagodoongojooon.)

Lapêche; lake and river, tributary to Gatineau river, Pontiac, Que.

Lapie; river, tributary to Pelly river, below Ross river, Yukon.

Laplante; post village, Gloucester county, N.B. (Not LaPlante.)

Larch; river, tributary to Koksoak river, New Quebec. (Not Kenogamissee.)

Lardeau; mining division, Kootenay district, B.C. (Not Lardo.)

Lardeau; mountains, east of Upper Arrow lake, Kootenay district, B.C.

Lardeau; river, tributary to Duncan river, Kootenay district, B.C. (Not Lardo.)

Lardeau; town, on Upper Arrow lake, Kootenay district, B.C. (Not Lardo.)

Larder; lake, south of Abitibi lake, Timiskaming, Ont. (Not Present nor President.)

Lardo. See Lardeau.

Lardo. See Purity.

L'Ardoise; village, Richmond county, N.S. (Not Ardoise.)

Large. See Hamilton.

Large Trout. See Hector.

LaRivière; railway station and village, Lisgar electoral district, Man. (Not Larivière.)

Lark; islet, northeast of pointe aux Alouettes, entrance to Saguenay river, Saguenay county, Que. (Not Ile aux Morts.)

Lark. See Alouettes.

LaRonge (lac); lake, south of Churchill river, central Saskatchewan.

Larry; rock, south of Great Duck I., and west of Kitty shoal, Manitoulin district, Ont.

Lartigue. See Lois.

LaSalette; town, Norfolk county, Ont. (Not La Sallette nor Lasallette.)

La Sarre; river, flowing from Makamik lake to Abitibi lake, Timiskaming county, Que. (Not Amikitik nor Whitefish.)

Lash; island, E. of Dead I., entrance to Key harbour, Parry Sound district, Ont.

Lasher; island, south of Shesheeb point, Thunder Bay district, Ont.

Laskay; post village, York county, Ont. (Not Laskey.)

Lasketti. See Lasqueti.

Last-Chance; creek, branch of Hunker creek, Klondike river, Yukon.

Lasquely. See Lasqueti.

Lasqueti; island, south of Texada island, strait of Georgia, New Westminster district, B.C. (Not Lasquely nor Lasketti.)

Latchford; town, on Montreal river, Timiskaming district, Ont.

La Tete. See Walton.

- Laura**; mount, near lower Stikine river, north of Iskut river, Cassiar district, B.C.
- Laurie**; lake in Duck Mountain Forest reserve, western Manitoba.
- Laurie**; range of mountains, west of O'Donnel river, Cassiar district, B.C.
- Laurier**; cove, in upper portion of Prince Rupert harbour, Coast district, B.C.
- Laurier**; lake, Pettypiece township, Kenora district, Ont.
- Laurier**; mount, east of lake Laberge, Yukon.
- Laurier**; river, emptying into E. end Clinton-Colden L., N.E. of Slave L., N.W.T.
- Laussedat**; mount, S. of Mt. Freshfield and N.E. of Donald, Kootenay district, B.C.
- Lavallée**; lake, northwest of Crean lake, central Saskatchewan. (Not Pelican.)
- Lavigne**; post office and railway station, Vaudreuil county, Que. (Not Graham P.O.)
- Lawrence**; lake, north of DeLaronde lake, central Saskatchewan. (Not Caribou.)
- Lawrence**; lake, south of L. Winnipegosis, Man.
- Lazy**; lake, east of Kootenay R., north of Steele, Kootenay district, B.C. (Not Rock.)
- Leading peak.* See mount Finlayson.
- Leaf**; bay, lake, and river, south coast of Ungava bay, Que. (Not Nepihjee river.)
- Leah**; peak, northwest of Samson peak, Rocky mountains, western Alberta.
- Leak.* See Thwartway.
- Leancoil**; railway station, Kootenay district, B.C.
- Leary**; cove and point, entrance to Blind bay, Halifax county, N.S. (Not Leary's.)
- Leask**; bay and point, South bay, Manitoulin district, Ont.
- Leather**; river, tributary to Carrot river, Saskatchewan. (Not Hanging Hide.)
- Lebarge.* See Laberge.
- Leboeuf**; bay, Gabriola island, S.E. coast of Vancouver I., B.C. (Not Lebeuf.)
- Le Croix.* See Lacroix.
- Leda**; peak, near "Castor" and "Pollox," east of mount Swanzy, Selkirk mountains, Kootenay district, B.C.
- Lee**; bank, north of Saugeen river, Bruce county, Ont.
- Lee**; creek, tributary to St. Mary river, southern Alberta. (Not Lee's.)
- Leech**; river, tributary to Sooke river, Vancouver island, B.C.
- Leek.* See Thwartway.
- Lefroy**; mount, also glacier, in the Bow range of the Rockies, Alta. and B.C.
- Le Have.* See Lehave.
- Le Heu**; point, below Murray bay, Charlevoix county, Que.
- Lelu**; island, northwest of Smith island, Chatham sound, Coast district, B.C. (Not Le-loo nor South Porpoise.)
- Lemoine**; lake, Desroberts, Dubuisson and Laubanie townships, Timiskaming county, Que. (Not Kakinokamak.)
- Le Nim.* See Lanim.
- Lenore**; lake, north of Humboldt, Saskatchewan.
- Leon**; settlement, E. side of Upper Arrow L., Kootenay, B.C. (Not Leon Hot Springs.)
- Leonard**; island, St. Lawrence river, Soulanges county, Que. (Not Grand Batture.)
- Leonard**; mount, west of Surprise lake, Cassiar district, B.C.
- Leopold**; point, Markham bay, Hudson strait, N.W.T.
- Leotta**; creek, tributary to Klondike river, Yukon.
- Le Pas.* See Pas.

SESSIONAL PAPER No. 25d

- Lepreau**; basin, harbour, parish, point, river, and village, Charlotte county, N.B. (Not Lepreaux nor Belas basin.)
- Leroux*. See Hill.
- Lesser Slave**; lake and river, central Alberta. (Not Slave.)
- Lester**; lake, Haycock township, Kenora district, Ont.
- L'Etang**; harbour, river, and village, Charlotte county, N.B. (Not Etang nor Letang.)
- L'Etete*. See Letite.
- Letite**; passage and village, Charlotte county, N.B. (Not L'Etete nor Letete.)
- Lève**; lake, Radcliffe township, Renfrew county, Ont.
- Lewes**; lake, near the "big bend" of Watson river, and river tributary to Yukon river, Yukon. (Not Lewis.)
- Lewes**; mount, north of lake Laberge, Yukon. (Not River mountain.)
- Lewis**; creek, east of Kootenay river, north of Steele, Kootenay district, B.C.
- Lewis**; island, between Kennedy and Porcher islands, Coast district, B.C.
- Lewis**; lake, northeast of Tawatinaw lake, Kenora district, Ont.
- Lewis**; lake, Ross river, Yukon.
- Lewis*. See Crease.
- Lewis*. See Lewes.
- Lewis*. See Louis.
- Liard**; river, tributary to Maekenzie R., B.C., N.W.T. and Yukon. (Not Mountain.)
- Lichfield**; shoal, W. entrance to Halifax harbour, Halifax Co., N.S. (Not Litchfield.)
- Lièvres** (île aux); island, St. Lawrence river, Temiscouata county, Que. English usage: Hare island, which see.
- Lighthouse*. See Snake.
- Lilian**; lake and river, tributary to the Assiniboine, from the north, eastern Saskatchewan. (Not Etoimami South.)
- Lillooet**; district, river, and town, B.C.
- Lily**; bay, upper Ottawa river, west of Grand L. Victoria, Timiskaming county, Que.
- Lily**; bay, also Lily Bay P.O., east shore of L. Manitoba, Man.
- Lily**; glacier, and pass, north of mount Swanzy, Selkirk Mts., Kootenay district, B.C.
- Lily**; lakes, on international boundary, Thunder Bay district, Ont.
- Lima**; point, S. extreme of Digby I., W. entrance to Prince Rupert harbour, B.C.
- Limebank**; post office, Carleton county, Ont. (Not Lime Bank.)
- Limestone**; lake, Mayo township, Hastings county, Ont.
- Limestone**; point, Nipisiguit bay, Gloucester county, N.B. (Not Young's.)
- Limestone*. See Dolomite.
- Lina**; range of mountains, east of Atlin lake, Cassiar district, B.C.
- Linda**; lake, northeast of mount Odaray, Rocky mountains, Kootenay district, B.C.
- Lindal**; lake, Pettypiece township, Kenora district, Ont. (Not Lindel.)
- Lindeman**; lake, S. of Bennett L., Cassiar, B.C. (Not Linderman nor Lyndeman.)
- Lindoe*. See Lynedoch.
- Lindsay**; island, Admiralty group, St. Lawrence river, Leeds county, Ont. (Not Cut.)
- Line**; lake, southwest of Eagle lake, Kenora district, Ont.
- Lineham**; creek, tributary to Sheep river, southern Alberta.
- Link**; island, near Dodd narrows, east coast of Vancouver island, B.C.

Link; lake, Strathy township, Nipissing district, Ont.

Linklater; creek, tributary to Kootenay river, near international boundary, Kootenay district, B.C. (Not Linkwater nor Meadow.)

Linklater; lake, east of Willard lake, Kenora district, Ont.

Linkwater. See Linklater.

Lionhead; harbour, headland, and village, Eastnor township, Bruce county, Ont. (Not Lion Head nor Lion's Head.)

Liscomb; harbour and post village, Guysborough county, N.S. (Not Liscombe.)

Liskeard; town, Timiskaming district, Ont. (Not New Liskeard.)

L'Isle. See Delisle.

Listowel; town, Perth county, Ont. (Not Listowell.)

Litchfield. See Lichfield.

Little; mount, W. of Mt. Fay, Bow range of the Rockies, Alta. and Kootenay, B.C.

Little; rock, southwest of Phœbe point, Fitzwilliam island, Manitoulin district, Ont.

Little. See Rough.

Little Atlin; lake, between Atlin lake and lake Marsh, Yukon.

Little Black. See Belanger.

Little Black. See Burton.

Little Blanche; creek, branch of Quartz creek, Indian river, Yukon.

Little Bois Dur. See Battery.

Little Boshkung; lake, Minden township, Haliburton county, Ont.

Little Bow; river, tributary to Belly river, Alta.. (Not Small.)

Little Bras d'Or; the narrow channel, east of Boularderie island, leading into St. Andrew channel, from the Atlantic, Cape Breton county, N.S. The name 'Little Bras d'Or lake' to be dropped.

Little Brazeau. See Nordegg.

Little Candle. See Torch.

Little Cedar. See Pakhoan.

Little Charlton. See Trodely.

Little Cockburn. See Kitchener.

Little Outarm. See Kaposvar.

Little Don; river, tributary to Don river, York county, Ont. (Not Don.)

Little Fishing. See Peck.

Little Flatland. See Campbell.

Little Fork. See Gunamitz.

Little Fork of the Saskatchewan. See Mistaya.

Little-gem; creek, branch of Hunker creek, Yukon.

Little Grant. See Pearson.

Little Green. See Steevens.

Little Island (lake). See Ministikwan.

Little Jackfish. See Foreleg.

Littlejohn; island, Admiralty group, St. Lawrence river, Leeds county, Ont.

Little Knife; portage, between Knife and Cypress lakes, Rainy R. district, Ont.

Little Lorraine. See Little Lorembec.

Little Lorembec; post settlement, midway between Lorembec and Cape Breton, Cape

SESSIONAL PAPER No. 25d

Breton county, N.S. (Not Little Loran nor Little Lorraine.)

Little Lorraine. See Little Lorembec.

Little Madawaska; river, E. side of Algonquin National park, Nipissing district, Ont.

Little Magog. See Magog.

Little Mecattina. See Mekattina.

Little or South Miminigash. See Roseville.

Little Mistassini. See Albanel.

Little Musquodoboit; village, Halifax county, N.S. (Not Little River Musquodoboit.)

Little Natashquan. See Natashkwan.

Little Nation. See South Nation.

Little Nipisiguit. See Millstream.

Little Nottaway. See Broadback.

Little Opeongo. See Aylen.

Little Pelican. See Suggi.

Little Quill. See Quill.

Little Red. See Spruce

Little River Musquodoboit. See Little Musquodoboit.

Little Roger. See Gaboury.

Little Sachigo. See Oponask.

Little Salmon; river, tributary to Lewes river, Yukon.

Little Sandy. See Athol.

Little Saskatchewan. See Dauphin.

Little Saskatchewan. See Minnedosa.

Little Shallow. See Pakwash.

Little Shuswap; lake, west of Shuswap lake, Yale district, B.C.

Little Slocan; river, tributary to Slocan river, Kootenay district, B.C.

Little Slave. See Prince Regent.

Little Smoky; river, tributary to Smoky river, Alta.

Little Tahltan; river, tributary to Tahltan river, Cassiar district, B.C.

Little Tobique. See Sisson.

Little Tobique. See Tobique.

Little Vermilion; lake, between Loon and Sand Point lakes, international boundary, Rainy River district, Ont. (Not Vermilion.)

Little Vermilion. See Altrude.

Little Wabigoon. See Dinorwic.

Little Weslemcoon. See Effingham.

Livingstone; range of mountains and river, southern Alberta.

Lizard. See Laberge.

Llewellyn; glacier, south of Atlin lake, Cassiar district, B.C.

Loadstone. See Lodestone.

Lobster; lake, Airy township, Nipissing district, Ont.

Lobster. See Crayfish.

Lobstick; bay, in the lake of the Woods, Kenora district, Ont. (Not Lob-stick.)

Lobstick; river, tributary to Pembina river, central Alberta. (Not Lob-stick.)

Lobstick. See Chip.

Lobstick. See Kiskeynew.

Lock; bay, Gabriola island, southeast coast of Vancouver island, B.C.

Locke; island, Lockeport harbour, Shelburne county, N.S. (Not Ragged nor Rugged.)

Lockeport; harbour, also town on Locke island, Shelburne county, N.S. (Not Ragged or Rugged Island harbour.)

Lockhart; river, emptying into E. end of Great Slave L., N.W.T. (Not Lockhart's.)

Lodestone; lake and mountain, south of Tulameen river, Yale district, B.C. (Not Loadstone mountain nor Paradise lake.)

Lodge; creek, southern Alberta and Saskatchewan. (Not Medicine Lodge.)

Logan; island, in northerly portion of lake Nipigon, Thunder Bay district, Ont.

Logan; mount, east of Frances lake, Yukon.

Logie; rock, west of McNab point, Bruce county, Ont.

Lois; lake and river, emptying into Makamik lake, Timiskaming county, Que. (Not Lartigue, Matamik, nor Molesworth.)

Loks Land; at entrance to Frobisher bay, N.W.T. (Not Lok's Land.)

Lombard; creek, tributary to Indian river, Yukon.

Lomond; river, emptying into L. Superior, Thunder Bay district, Ont. (Not Carp.)

London Junction. See Pottersburg.

Lonely, bay, east of Dominion point, Manitoulin island, Manitoulin district, Ont.

Lonely; river, flowing into bay of same name, Opatatika lake, Timiskaming, Que. (Not Bagwah.)

Lonely. See Isolated.

Lonely. See Seul.

Lonely Valley. See Ten Peaks.

Lone Man's. See Oneman.

Lone Tree. See Ann.

Long; creek, the west branch of Souris river, southeastern Saskatchewan.

Long; point, extending into the central portion of lake Evans, Abitibi territory, Que.

Long; point, in southern part of Tyendinaga township, Hastings county, Ont.

Long; portage, between Rose and Watap lakes. International boundary, Thunder Bay district, Ont. (Not Great New.)

Long. See Farrell.

Long. See Kawashegamuk.

Long. See Lowes.

Long. See Methy.

Long. See Mountain.

Long. See Ord.

Long. See St. Andrew.

Long. See Trident.

Long. See Tye.

Long. See Vaudray.

Long. See Wolfe.

Long. See Woods.

Long-legged; lake and river, emptying into Wilcox lake on English river, Keewatin.

Long Point; bay and lightstation, L. Erie, Norfolk county, Ont. (Not North Foreland nor Outer Bay of Long Point.)

SESSIONAL PAPER No. 25d

- Long Sault**; rapids, below Manitou rapids, Rainy river, Rainy River district, Ont.
- Longspell**; point, near Kingsport, Kings county, N.S. (Not Indian.)
- Longue-Pointe**; village, Hochelaga county, Que. (Not Long Point.)
- Lookout**; mountain, in the Selkirks, Kootenay district, B.C.
- Lookout**; river, emptying into Smoothrock lake, Thunder Bay district, Ont.
- Loon**; lake, between LaCroix and Little Vermilion lakes, international boundary, Rainy River district, Ont.
- Loon.* See Makwa.
- Loon.* See Mang.
- Loonhead**; lake, on Burntwood river, Manitoba. (Not Loon-head)
- Loop**; brook, tributary to Illecillewaet river, near "The Loop," Kootenay district, B.C.
- Lordmills**; post office, Grenville county, Ont. (Not Lord Mills.)
- Loirebec**; head and post settlement, about 2 miles east of Louisburg, Cape Breton county, N.S. (Not Big Loran nor Big Lorraine.)
- The original form of this name was Laurentbec (See page 175 of "Cape Breton and its Memorials." by Sir John Bourinot) which survives in the neighbouring "Lawrence head"; this successively became "Laurentbec"; "Loirebec"; and "Loirebee", evidently a typographical error; "Loran", probably a corruption of Laurent; and lastly "Lorraine", evidently adopted from the name of the Rhenish province under a misconception.
- Lorenzo.* See Pelletier.
- Loretta**; island, north of Hawkesbury island, Coast district, B.C.
- Lorette**; parish, railway station, and village, S.E. of Winnipeg, Man. (Not Loretto.)
- L'Original**; town, Prescott county, Ont. (Not L'Original.)
- Lorne**; lake, Rugby township, Kenora district, Ont.
- Lorne**; lake, Pembina river, southern Manitoba.
- Lorne**; mount, west of lake Marsh, Yukon.
- Lorneville**; village, on west side of entrance to St. John harbour, St. John county, N.B. (Not Pizarinco.)
- Lorrain**; lake, east of Casels township, Timiskaming district, Ont. (Not Bear.)
- Loscombe**; reef, north of Macpherson point, Bruce county, Ont.
- Lost**; lake, northwest of Minnitaki lake, Kenora district, Ont.
- Loucks**; lake, Burleigh township, Peterborough county, Ont. (Not Louck's.)
- Loughheed**; bay, point and reef, east of Dominion point, Manitoulin island, Ont.
- Louis**; mount, northwest of Banff, Alta.
- Louis**; point, south end of Coste island, Kitimat arm, Coast district, B.C.
- Louis**; port, Graham island, Coast district, B.C. (Not Ingraham nor Lewis.)
- Louisa**; lake, Lawrence township, Haliburton county, Ont.
- Louise**; lake, west of Laggan station, Alta. (Not Emerald.)
- Louise**; lake, Pembina river, also railway station, southern Manitoba.
- Lount**; lake, English river, Kenora district, Ont.
- Loup** (banc du); bank, below Pilgrim Is., St. Lawrence R., Temiscouata Co., Que.
- Loup** (pointe du); (rivière du); point, also river tributary to the St. Lawrence. Temiscouata county, Que.
- Loutre**; Harbour de, harbour, W. side of Campobello I., N.B. (Not Harbour de Lute.)

Loutres. See Glaises.

Low; lake, southeast of Silver lake, Kenora district, Ont.

Low; point, and Low Point post office, east side of George bay, Inverness county, N.S.

Low. See Clark.

Low. See Flat

Lower Arrow; lake, an expansion of Columbia river, Kootenay district, B.C.

Lower Bow. See Hector.

Lower Clearwater. See Washagomish.

Lower Savage; islands, Gabriel strait, N.W.T.

Lower White Fish. See Gregg.

Lowes; lake, southwest of Yorkton, Sask. (Not Long, Pebble, nor Silver.)

Lubbock, bay, west of Markham bay, Hudson strait, N.W.T.

Lubbock; river, flowing into Atlin lake from Little Atlin lake, Yukon.

Lucas; channel, island, and reef, at entrance to Georgian bay, Manitoulin district, Ont

Lucky; creek, branch of Allgold creek, Klondike river, Yukon.

Luke; creek, tributary to St. Mary river, Kootenay district, B.C.

Luke Fox. See Fox.

Lumley. See Frobisher.

Lusk; creek, tributary to Kananaskis river, Alta.

Lussier; river, tributary to Kootenay river, Kootenay district, B.C.

Lutz. post settlement, Westmorland county, N.B. (Not Lutes nor Lutes Mountain.)

Lyal; island and reef, southeast of Greenough point, Bruce county, Ont.

Lychnis; mountain, south of Mt. Douglas, Rocky mountains, Alberta.

Lyell; mount, also creek and snowfield, summit range of the Rockies, Alta. and Kootenay district, B.C.

Lynch; island, in the Ste. Genevieve group, east of Ste. Anne-de-Bellevue, Jacques Cartier county, Que. (Not Dowker's nor Lynch's.)

Lyndeman. See Lindeman.

Lynedoch; island, west of Hill island, St. Lawrence river, Leeds county, Ont. (Not Ash, Lindoe, nor Lynedoch.)

Lynn; point, Manitoulin I., N.W. of Greene I., Manitoulin dist., Ont. (Not Black.)

Lynx. See Selby.

Lyster; lake, Barnston township, Stanstead county, Que. (Not Baldwin's pond nor Barnston pond.)

M

Mabee; village, Norfolk county, Ont. (Not Maybee.)

Mabel; lake and mountain, Yale district, B.C.

Macabee; creek, tributary to Sheep river, also mountain, southern Alberta.

McAdam; Ry. sta. and village, York Co., N.B. (Not Macadam nor McAdam Junction.)

McAlpine; P.O. and Ry. station, Prescott Co., Ont. (Not McAlpine's nor McAlpin.)

Macan. See Maccan.

McArthur; creek, lake, and pass, west of Columbia river; also mountain, at head of upper Yoho valley, Rocky mountains, Kootenay district, B.C.

Macaulay; lake, Airy township, Nipissing district, Ont.

SESSIONAL PAPER No. 25d

- Macaulay**; spit, off the southeastern end of Inner Duck island, Manitoulin district, Ont. (Not McCauley's.)
- McBean**; mount, west of Mt. Purity, Selkirk mountains, Kootenay district, B.C.
- McCallum**; island, southeast of Beament island, Bruce county, Ont. (Not Snake.)
- McCallum**; mountains, east of Atlin lake, Cassiar district, B.C.
- Maccan**; railway station, river, and village, Cumberland county, N.S. (Not Macan.)
- McCarthy**; point, southeast side of Fitzwilliam island, Manitoulin district, Ont.
- McClintock**; peak and river, between lake Marsh and Teslin river, Yukon. (Not McClintock.)
- McConnell**; peak and river, Nisutlin river, Yukon.
- Macoostigan*. See Makustigan.
- McCormick**; creek and landing, near foot of Lower Arrow lake, Kootenay district, B.C. (Not McCormack.)
- McCoy**; head, east of Thompson cove, St. John county, N.B. (Not McCoy's.)
- McCoy**; island, Brock group, St. Lawrence R., Leeds Co., Ont. (Not Montgomery.)
- McCreary**; island, N. of Turnagain point, L. Winnipeg, Man. (Not Outer Sturgeon.)
- McDame**; creek, tributary to Dease river, Cassiar district, B.C.
- McDonald**; bay and point, west of Brockville, Leeds county, Ont. (Not Donald, Macdonald, nor McDonald's.)
- McDonald**; creek, flowing into Upper Arrow lake, Kootenay district, B.C.
- McDonald**; island, Admiralty group, St. Lawrence R., Leeds county, Ont. (Not Hog.)
- McDonald**; lake, east of Atlin lake, Cassiar district, B.C.
- McDonald**; lake, Haycock township, Kenora district, Ont.
- McDonald**; mount, west of Esquimalt, Vancouver island, B.C.
- Macdonald**; island, N.W. of the islands of God's Mercie, Hudson strait. (Not Egypt.)
- Macdonald**; lake, Havelock township, Haliburton county, Ont. (Not Macdonald's.)
- Macdonald**; mount, in the Selkirks, Kootenay district, B.C. (Not Carroll.)
- Macdonald**; range of mountains, east of Wigwam river, Kootenay district, B.C.
- McDonald's*. See Prince Regent.
- McDougal**; brook, trib. to Incomappleux R., Kootenay dist., B.C. (Not McDougall.)
- McDougall**; mount, east of Kananaskis river, Rocky Mountains park, Alta.
- Macdougall**; settlement, Kent county, N.B. (Not Macdougall nor Macdougall's.)
- Macdougall's*. See Marion.
- Mace**; bay, Charlotte county, N.B. (Not Mace's.)
- McElhinney**; shoal, N. of Flowerpot I., Georgian bay, Ont. (Not McElhinney's.)
- McEwen**; lake, east of Kawaweogama lake, Thunder Bay district, Ont.
- McFadden**; lake, McClintock township, Haliburton county, Ont. (Not McFadden's.)
- McFarlane**; river, emptying into the S. side of Athabaska lake, Sask. (Not Beaver.)
- McGaw**; point, entrance to S. Baymouth, Manitoulin island, Manitoulin district, Ont.
- McGillivray**; creek, flowing southeasterly into Anderson lake, also mountain and pass at the head of the creek, Lillooet district, B.C. (Not McGillivray.)
- McGillivray**; post office, Middlesex county, Ont. (Not West McGillivray.)
- McGillivray*. See McGillivray.
- McGrath**; mount, near lower Stikine R., north of Iskut R., Cassiar district, B.C.
- MacGregor**; point, west of Port Elgin, Bruce county, Ont.

- McGregor**; settlement, east shore of Kootenay lake, south of Lockhart creek, Kootenay district, B.C. (Not McGregor's.)
- Macha*. See Hatchau.
- Machawaian**; lake, southwest of Attawapiskat lake, Patricia district, Ont.
- McHugh**; brook, flowing into Dinorwic L., Kenora dist., Ont. (Not McHugh's creek.)
- McInnes**; post office, Middlesex county, Ont. (Not McInness.)
- McInness*. See McInnes.
- McIntosh**; mount, east of Atlin lake, Cassiar district, B.C.
- McIntosh**; post village, Leeds county, Ont. (Not MacIntosh Mills.)
- McIntyre**; bay, south shore of L. Suel, Kenora district, Ont.
- McIntyre**; bay, south shore of lake Nipigon, Thunder Bay district, Ont.
- Mackay**; lake, Gloucester township, Carleton county, Ont. (Not Hemlock.)
- Mackey**; point, Sheen township, Pontiac county, Que. (Not Mackay.)
- McKay**; H. B. Co. post, also settlement on Athabaska R., Alta. (Not Fort McKay.)
- McKay**; lake, south of Nanaimo river, Vancouver island, B.C.
- McKay**; mount, S.W. of Fort William, Thunder Bay district, Ont. (Not McKay's.)
- McKay**; reach, between Princess Royal and Gribbell islands, Coast district, B.C.
- McKay**; rock, S.W. from Pulpwood point, Cockburn I., Manitoulin district, Ont.
- McKay**; river, flowing northeasterly into Athabaska R. at McKay, Alta. (Not Red.)
- McKee**; creek, north of O'Donnel river, Cassiar district, B.C.
- McKellar**; channel (middle) of Kaministikwia river, Thunder Bay district, Ont. (Not McKellar river.)
- McKellar**; island, south of Pie island, Thunder Bay district, Ont.
- McKellar**; point, southwest of Victoria island, Thunder Bay district, Ont.
- McKenzie**; creek, flowing into Grand river, Brant and Haldimand counties, Ont. (Not Mackenzie.)
- McKenzie**; lake, Nightingale township, Haliburton county, Ont. (Not McKenzie's.)
- Mackenzie**; lake, S. of N. T. Ry., N.W. of L. Nipigon, Thunder Bay district, Ont.
- Mackenzie**; mount, southeast of Revelstoke, Kootenay district, B.C. (Not McKenzie.)
- McKim**; bay, west shore South bay, Manitoulin island, Ont. (Not McKimm.)
- McLaren*. See McLaurin.
- McLaughlin*. See McLoughlin.
- McLaurin**; bay, east of East Templeton, Ottawa county, Que. (Not MacLaren.)
- McLaurin**; lake, northwest of lake Nipigon, Thunder Bay district, Ont.
- McLay**; mount, east of Surprise lake, Cassiar district, B.C.
- McLean**; canyon, below the Grand falls of Hamilton river, Ashuanipi and New Quebec. (Not Bowdoin.) Named after John McLean, an officer of the H. B. Co. who discovered the falls and canyon in 1829.
- McLean**; mountain, north of mouth of Cayoosh creek, Lillooet district, B.C.
- McLean**; rock in Fitzwilliam channel, Manitoulin district, Ont.
- McLean*. See McLelan.
- McLelan**; strait, northeast shore Ungava bay, New Quebec. (Not McLean.)
- McLennan**; lake, Haycock township, Kenora district, Ont.
- Macleod**; lake, Tp 51, R. 16, W. 3 M., Saskatchewan.
- Macleod**; town and railway station, southern Alberta. (Not Fort Macleod.)

SESSIONAL PAPER No. 25d

- McLeod**; mount, west of Dease lake, Cassiar district, B.C.
- McLeod**; river, tributary to Athabaska river, central Alberta.
- McLoughlin**; bay, Lama passage, Coast district; also point in Victoria harbour; B.C. (Not M'Laughlin, Maclaughlin, nor McLaughlin.)
- McMahon**; island, off the southeast side of Grenadier island, St. Lawrence river, Leeds county, Ont. (Not Shantee nor Shanty.)
- McMaster**; lake, Jones township, Renfrew county, Ont. (Not McMaster's.)
- McMaster**; mount, east of O'Donnel river, Cassiar district, B.C.
- Macmillan**; range of mountains, and river tributary to Pelly river, Yukon.
- MacMillan**; railway station, Kenora district, Ont.
- McMullen*. See Carnarvon.
- McMurray**; H. B. Co. post, also settlement on Athabaska river, northeastern Alberta. (Not Fort McMurray.)
- McNab**; point, south of Chantry island, Bruce county, Ont.
- McNair**; island, St. Lawrence river, below Brockville, Leeds county, Ont.
- McNeil**; mount, between Watson and Wheaton rivers, southern Yukon.
- McNevin**; lake, Murchison township, Nipissing district, Ont. (Not McNevin's.)
- McNicoll**; mount, southeast of Sixmile Creek station, Kootenay district, B.C.

- Maitland**; island, Douglas channel, north of Hawkesbury island, Coast district, B.C.
- Maitland**; river, emptying into lake Huron at Goderich, Huron county, Ont.
- Maitland**. See Port Maitland.
- Makamik**; lake, Royal Rouissillon township, Timiskaming, Que. (Not Mekamic.)
- Makokibatan**; lake, Albany river, Patricia and Thunder Bay districts, Ont.
- Makustigan**; lake, S. of Wetetnagami L., Pontiac county, Que. (Not Macoostigan.)
- Makwa**; lake and river, trib. to Beaver R., from the southwest, Sask. (Not Loon.)
- Malahat**; ridge, west of Saanich inlet, Vancouver island, B.C. (Not Beddingfield.)
- Malaspina's**. See Galiano.
- Malbaie (rivière)**; river, tributary to the St. Lawrence, Charlevoix county, Que. (Not Malbay.) English usage: Murray river, which see.
- Malbaie**; See also **Murray Bay**.
- Malcolm**; reef, between Boyer reef and Port Elgin, Bruce county, Ont.
- Malcolm**; river, flowing northeasterly into Arctic ocean, international boundary, Alaska and Yukon.
- Mâle (lac du)**; lake, at headwaters of St. Maurice river, Champlain county, Que.
- Maligne**; lake and river, emptying into the Athabaska at 'Henry House,' also mountain east of the lake, Rocky mountains, western Alberta.
- Mallon**; lake, in Rattray township, Timiskaming district, Ont.
- Maloney**; mount, northwest of Aishihik lake, Yukon.
- Malpeque**; bay, Prince county, P. E. I. (Not Richmond.)
- Mamakwash**; lake, at headwaters of Berens R., Patricia district, Ont. (Not Fairy.)
- Mameigwess**; lake, north of Attawapiskat lake, Patricia district, Ont.
- Mami**; creek, tributary to Belly river, southern Alberta. (Not Buffalo, Fish, nor Mahmee.)

SESSIONAL PAPER No. 25d

Mamozekel; river, tributary to Tobique river, Northumberland and Victoria counties, N.B. (Not Mamoxekel nor Momozekel.)

Manasan; river, tributary to Burntwood river, Manitoba. (Not Munosahn.)

Manawagonish; island, in St. John harbour, St. John county, N.B. (Not Mahogany. Manawoganish, nor Meogenes.)

Manawan; lake, on Churchill river, below Reindeer river, central Saskatchewan.

Mance; lake, La Sarre township, Timiskaming county, Que. (Not Mnd.)

Mandamin; post village and railway station, Lambton Co., Ont. (Not Mandaumin.)

Mang; lake, west of Kawawia lake, Kenora district, Ont. (Not Loon.)

Manganese; mountain, east of Ice river, Rocky mountains, Kootenay district, B.C.

Manicouagan. See Manikuagan.

Manicuagan. See Manikuagan.

Manigotagan; lake and river, east of lake Winnipeg, Man. (Not Bad Throat river, Muskrat lake, nor Rat Portage lake.)

Manikuagan; point and river, Saguenay Co., Q. (Not Manicouagan nor Manicuagan.)

Manito; lake, south of Battle river, Saskatchewan.

Manitoba; large lake of Manitoba.

Manitoba; ledge, off W. side of Yeo I., entrance to Georgian bay, Manitoulin dis., Ont.

Manitoba; reef, north of Great Duck island, Manitoulin district, Ont.

Manitou; creek, flowing into Michael bay, Manitoulin island, Manitoulin district, Ont.

Manitou; lake, northwest of lake Nipigon, Thunder Bay district, Ont.

Manitou; rapid, Rainy river, international boundary, Rainy River district, Ont.

Manitou. See Silver.

Manitoulin; island, Manitoulin district, Ont. (Not Grand Manitoulin.)

Manitoulin gulf. See South bay.

Manitounuk; sound, north of Great Whale river, New Quebec. (Not Manitounuck.)

Manitowaning; bay and village, Manitoulin district, Ont. (Not Manitouaning.)

Manitumeig; lake, west of Anzhekumming lake, Kenora district, Ont.

Manitush; lake, southwest of Attawapiskat lake, Patricia district, Ont.

Mann; island, in upper part of lake Timiskaming, Que.

Mann; island, east of Bigsby island, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.

Manomin; lake, west of Winnange lake, Kenora district, Ont. (Not Unaminlikan.)

Manquart. See Monquart.

Mansel; island, Hudson bay, N.W.T. (Not Mansfield.)

Mansfield; creek, tributary to Tatshenshini river, Cassiar district, B.C. (Not Bear.)

Mansfield. See Mansel.

Mantagao; river, flowing northerly into Sturgeon bay, L. Winnipeg, Man.

Manuan; lake, and river tributary to the upper St. Maurice, Champlain county, Que. (Not Manouan.)

Manuminan. See Paint.

Many Island; lake, east of Medicine Hat, Alta. and Sask.

Maple; bay and mountain, W. Sansum narrows, Stuart channel, Vancouver I., B.C.

Maple; creek flowing into Bigstick lake, also Maple Creek town, southwestern Sask.

Maple; island, St. Lawrence R, Soulanges county, Que. (Not D'Alogmy nor Thorn.)

- Maple**; point, at the northeast end of Gil island, Coast district, B.C.
Maple. See Goosehunting.
- Maplegrove**; post office, Middlesex county, Ont. (Not Maple Grove.)
- Maquereau**; point, Gaspé county, Que. (Not Macquereau.)
- Mara**; lake, east of Salmon arm of Shuswap lake, Yale district, B.C. (Not Mara arm of Shuswap lake.)
- Marble**; canyon, a very narrow deep pass through the range of mountains between Bonaparte and Fraser rivers, Lillooet district, B.C.
- Marble Dome**; mountain, S. of Gladys lake, Cassiar dist., B.C. (Not Brown Dome.)
- Margaree**; town, Inverness county, N.S. (Not Margaree Harbour.)
- Margaret**; lake, northeast of Turquoise lake, Alta.
- Margaret**; lake, at headwaters of Wenasaga R., Patricia, Ont. (Not Kakinookama.)
- Marguerite**; bay, point, and river, north shore of lower St. Lawrence, Saguenay county, Que. (Not Ste. Marguerite.) To avoid duplication, see Ste. Marguerite river, Chicoutimi county.
- Maria**; lake, northwest of Tuya lake, Cassiar district, B.C.
- Maria**; lake, Purdom township, Thunder Bay district, Ont.
- Marieville**; railway station and village, Rouville county, Que.
Marieville creek. See Huron river.
- Marina**; island, S.W. of Cortes I., Sutil channel, Coast district, B.C. (Not Mary.)
- Marion**; lake, west of Glacier station, Kootenay district, B.C.
- Marion**; point, near Dorval, Jacques Cartier county, Que. (Not Macdougall's.)
Marion. See Allan.
- Marjorie**; island, westward of Sandys point, St. Peters inlet, Richmond county, N.S. (Not Gooseberry.)
- Mark**; creek, tributary to St. Mary river, Kootenay district, B.C.
- Mark**; lake, northeast of Silver lake, Kenora district, Ont.
- Markham**; bay, northeast shore of Hudson strait, N.W.T.
- Marksville*. See Hilton.
- Marmen**; rock, east of Brandypot channel, St. Lawrence R., Teniscouata Co., Que.
- Marmot**; mountain, north of Observation peak, Rocky mountains, Alta.
- Marpole**; mount, also lakes, at headwaters of Yoho river, Kootenay district, B.C.
- Marsh**; lake, in the southern portion of Yukon, near Bennett and Tagish lakes.
Marshall Cove. See Port Lorne.
- Marshall**; lake, northeast of lake Nipigon, Thunder Bay district, Ont.
- Mars Hill**; post settlement, Carleton county, N.B. (Not Mar's Hill.)
- Martel**; post office, Russell county, Ont. (Not Martel Corners.)
Martel Corners. See Martel.
- Marten**; river, tributary to Rupert river, Mistassini territory, Que.
- Marten Drinking**; river, emptying into Attawapiskat lake, Patricia, Ont.
- Martimoki**; lake, Saguenay county, Que. (Not Martimokinipau.)
- Martin**. lake, northeast of Lost lake, Kenora district, Ont.
- Martin**; lake, southeast of Humboldt bay, L. Nipigon, Thunder Bay district, Ont.
- Martin**; mountain, east of Lesser Slave lake, Alta.
Martin. See Martre.

SESSIONAL PAPER No. 25d

- Martineau**; bay, Lorrain township, Timiskaming district, Ont.
- Martineau**; river, flowing southwesterly into Cold lake, central Alberta.
- Martini**; island, west of Moore point, southern coast of Digby I., Coast district, B.C.
- Martins**; valley, east of Chancellor peak, Rocky mountains, Kootenay district, B.C.
- Martre** (rivière à la); river, Christie township, Gaspé county, Que. (Not Martin river nor Rivière à la Marte.)
- Mary**; creek, tributary to Teslin river, near M'Clintock peak, Yukon.
- Mary**; point, Boxer reach, Coast district, B.C.
- Mary**; shoal, south of Great Duck island, Manitoulin district, Ont.
- Mary.* See Marina.
- Mary Vaux**; mount, south of southeast end of Maligne lake, Rocky mountains, western Alberta.
- Mascabin**; point, N. entrance Passamaquoddy B., Charlotte Co., N.B. (Not Mascarin.)
- Mascareen**; peninsula and village, Charlotte, N.B. (Not Mascarene nor Mascarren.)
- Mascarin.* See Mascabin.
- Mashamengoose.* See Mitchinamekus.
- Masinabik**; lake, S.E. of L. Nipigon, Thunder Bay dist., Ont. (Not Masinabikaigan.)
- Maskwa**; hill, on Battle river, west of Cutknife creek, central Saskatchewan.
- Maskwa**; river, tributary to Winnipeg river, Man. (Not Bear.)
- Maspeck.* See Mispeck.
- Massasauga**; point, west of Horse point, Ameliasburg Tp., Prince Edward Co., Ont.
- Masstown**; lightstation, fishing and post settlement, Cobequid bay, Colchester county, N.S. (Not Debert nor Mass Town.)
- Matabechawan.* See Matabitchuan.
- Matabitchuan**; river, flowing into L. Timiskaming below the mouth of Montreal R., Timiskaming district, Ont. (Not Matabechawan nor Matabitehouan.)
- Matamik.* See Lois.
- Matapedia**; lake, river and village, Matane and Bonaventure Cos., Q. (Not Metapedia.)
- Matashi**; river, headwaters of Gatineau river, Berthier county, Que.
- Matawa.* See Shamattawa.
- Matchimanito**; lake, southwest of Millie lake, Pontiac county, Que.
- Matheson**; island, W. of N. entrance to narrows of lake Winnipeg, Man. (Not Snake.)
- Matheson**; mount, also lake, north of Bocher bay, Vancouver island, B.C.
- Matheson**; mount, on east side of Bennett lake, Yukon.
- Matilda**; lake, Redditt township, Kenora district, Ont.
- Matinatinda.* See Tendinenda.
- Matsatu**; river, tributary to Nahlin river, Cassiar district, B.C.
- Mattagami**; lake, Abitibi territory, Que.
- Mattagami**; river, tributary to Moose river, Timiskaming district, Ont. (Not South Branch of Moose river.)
- Mattawagosik.* See Dassrat.
- Matthew**; creek, tributary to St. Mary river, Kootenay district, B.C.
- Matthews**; point, Active pass, strait of Georgia, New Westminster district, B.C.
- Mattice**; lake, south of N.T. Ry., northwest of L. Nipigon, Thunder Bay district, Ont.
- Mauger**; beach, at entrance to Halifax harbour, Halifax county, N.S. (Not Meagher.)

Maunoir; butte, near confluence of Lewes and Teslin rivers, Yukon.

Maurelle; island, between "Hole in the wall" and Surge narrows, Coast district, B.C.

The eastern portion of what was formerly Valdes island.

Maus; creek, E. of Kootenay R., south of Steele, Kootenay district, B.C. (Not Mouse.)

Maxwell; mount, Saltspring island, S.E. coast of Vancouver I., B.C. (Not Baynes.)

Maybank; post office, Huntingdon county, Que. (Not May Bank.)

Maybee. See Mabee.

Mayes; point, at N. end of Read I., Sutil channel, Coast district, B.C. (Not Mayor.)

Mayflower; island, at entrance to Thomas bay, Manitoulin island, Ont.

Maynard; lake, English river, Kenora district, Ont. (Not Maynard's.)

Mayne; island and post village, in the southern portion of the strait of Georgia, New Westminster district, B.C.

Mayo; brook and lake, tributary to Stewart river, Yukon.

Mayor. See Mayes.

Mazokama. See Kama.

Meacham; creek, tributary to St. Mary river, Kootenay district, B.C. (Not Caribou nor Whitefish.)

Meadow; creek, branch of Sulphur creek, Indian river, Yukon.

Meadow; creek and lake, tributary to Beaver river, central Saskatchewan.

Meadow. See Hawkins.

Meadow. See Linklater.

Meagher. See Mauger.

Meander; brook, south of Eagle lake, Kenora district, Ont.

Mecatina. See Mekattina.

Medicine; river, tributary to Red Deer river, southern Alberta.

Medicine-lodge; hills, in Tp. 40, R. 2, W. 3 M., southern Alta. (Not Medicine Lodge.)

Medicine Lodge. See Lodge.

Medicine-stone; lake, south of Red lake, Patricia, Ont. (Not Medicine Stone.)

Meduxnekeag; river, tributary to St. John river, Carleton county, N.B. (Not Maduxnekeag nor Meduxnekeag.)

Medway; river, trib. to N. branch of Thames R., Middlesex Co., Ont. (Not Arva creek.)

Medway; seaport town, Queens county, N.S. (Not Port Medway nor Port Metway.)

Meehin; brook, flowing into Minas channel, Kings county, N.S. (Not Meehins.)

Meeting; lake, in the Thickwood hills, central Saskatchewan.

Megantic; county, lake, and village, Que. (Not Lake Megantic village.)

Meggisi; brook, tributary to upper Winisk R., below Tabasokwia R., Patricia, Ont.

Meggisi; lake, east of Manitou lake, Kenora district, Ont. (Not Small Trout.)

Megiskun. See Migiskan.

Mehollan. See Mulholland.

Meholland. See Mulholland.

Meig; post office, Missisquoi county, Que. (Not Meig's Corners.)

Meig's Corners. See Meig.

Meisner; point, E. side Mahone bay, Lunenburg Co., N.S. (Not Meisener nor Misener.)

Mejomanguse. See Mitchinamekus.

Mekamic. See Makamik.

SESSIONAL PAPER No. 25d

- Mekattina**; cape, islands, and river, Saguenay county, Que. (Not Mecatina, nor Little Mecattina river.)
- Mekinak**; lake, river, and township, Champlain county, Que. (Not Mekinac.)
- Mekiscan*. See Migiskan.
- Meldrum**; point, northwestern end of Manitoulin island, Manitoulin district, Ont. (Not Mildram nor Mildrum.)
- Melfort**; creek, post office, and railway station, central Sask. (Not Stony creek.)
- Melon**; lake, between Knife and Carp lakes, Int. boundary, Rainy River district, Ont.
- Melville**; arm, on northerly side of Prince Rupert harbour, Coast district, B.C.
- Melville**; island, Admiralty group, St. Lawrence river, Leeds county, Ont. (Not Hay.)
- Melville**; lake, expansion of Hamilton inlet, Ashuanipi, Que. (Not Groswater bay.)
- Melville**; point, south of Srigley bay, Manitoulin district, Ont.
- Melville**; shoal, E. of N.E. end of Amherst I., Frontenac Co., Ont. (Not Seven Acre.)
- Menadou*. See Mainadiou.
- Menan*. See Grand Manan.
- Mendenhall**; river, tributary to Takhini river, Yukon.
- Menesatung**; park, north of Goderich, Huron county, Ont.
- Menikwesi**; lake, west of Kawawia lake, Kenora district, Ont.
- Menjobaguse*. See Mitchinamekus.
- Mennin**; lake, S.E. of Dinorwic L., Kenora district, Ont. (Not Blueberry nor Shallow.)
- Meogenes*. See Manawagonish.
- Merigomish**; island and village, Pictou Co., N.S. (Not Big I. nor Merigomishe village)
- Merion*. See Mirond.
- Merlin**; lake, north of mount Richardson, Rocky mountains, Alta.
- Mermaid**; island, Admiralty group, St. Lawrence R., Leeds county, Ont. (Not Pine.)
- Merriam**; bay, west of Bayley bay, Basswood L., Int. boundary, Rainy R. district, Ont.
- Merrill*. See Fréchette.
- Mescoh*. See Misko.
- Meskwatessi**; lake, east of Atikwa lake, Kenora district, Ont.
- Mestowana**; lake, northwest of Lost lake, Kenora district, Ont.
- Metabetchouan**; post office, river, and township, Chicoutimi county, Que. (Not Metabechouan.)
- Metaghan*. See Meteghan.
- Metapedia*. See Matapedia.
- Metchiskan*. See Migiskan.
- Metchosin**; mountain, west of Parry bay, Vancouver I., B.C. (Not Metchosin hill.)
- Meteghan**; river and village, Digby county, N.S. (Not Metaghan.)
- Meteghan Station**; post office, Digby county, N.S. (Not Metaghan.)
- Metford**; island, midway between Lima and Miller points, southern coast of Digby island, Coast district, B.C.
- Methuen**; reef, south shore Manitoulin island, Manitoulin district, Ont.
- Methy**; lake, south of File lake, Manitoba. (Not Long.)
- Methye**; lake, portage, and river, northern Sask. (Not La Loche nor Methy.)
- Metis**; lake, point, river, and village, Mataue Co., Que. (Not Mitis nor Great Metis.)
- Metiscan*. See Migiskan.

- Metlakatla**; bay and village, Chatham sound, Coast district, B.C. (Not Melta Catla, Metla Catlah, Metlah Catlah, Metla-kathla, Methlakahtla, nor Metla-Katla.)
- Meule (pointe à la)**; point with 2 range lights thereon, west shore of Richelieu river, St. John county, Que. (Not North of Halfway nor Pointe à la Mule.)
- Michael**; bay and point, south shore of Manitoulin island, Manitoulin district, Ont.
- Michael**; lake, northwest of Kulleet bay, Vancouver island, B.C.
- Michael**; peak, President range, Rocky Mts., Kootenay district, B.C. (Not Michael's.)
- Michagama*. See Kitchigama.
- Michaud**; creek, tributary to Klondike river, Yukon.
- Michaud**; creek, west of Lower Arrow lake, Kootenay district, B.C.
- Michepasque*. See Mispek.
- Michie**; mount, east of lake Marsh, Yukon.
- Michikamog**; lake, northeast of Attawapiskat lake, Patricia district, Ont.
- Michikenis**; river, east of Wunnummin lake, upper waters of Winisk R., Patricia, Ont.
- Michikenopik**; brook, tributary to Pizustigwan river, upper Winisk R., Patricia, Ont.
- Michipicoten**; harbour, island, river, and village, Manitoulin district, Ont. (Not Michipicoton.)
- Middle**; creek, tributary to Tahltan river, Cassiar district, B.C.
- Middle**; mountain, near lower Stikine R., S. of Porcupine creek, Cassiar dist., B.C.
- Middle**; river, Pictou county, N.S. (Not Middle river of Pictou.)
- Middle Br. Highwood R.* See Pekisko creek.
- Middle Br. West R.* See Dalesville R.
- Middlebrun**; bay, channel, and island, S. entrance to Black B., Thunder Bay dist., Ont.
- Middle Caledonia*. See Caledonia.
- Middle Duck**; island, south of Inner Duck island, Manitoulin district, Ont.
- Middleport*. See Tuscarora.
- Middle Savage**; islands, northwest of Pritzler harbour, Hudson strait, N.W.T. (Not islands of God's Mercie (eastern).)
- Middleton**; island, at the mouth of Broadbaek river, Abitibi territory, Que.
- Middleton**; mount, southeast of lake Evans, Abitibi territory, Que.
- Middletons*. See Reesor.
- Midjik**; point, on east side of Passamaquoddy bay, Charlotte county, N.B. (Not Midgie, Midjie, nor Mijie bluff.)
- Midnight**; lake, Tp. 52, R. 16, W. 3 M., Saskatchewan.
- Midway**; mining town and railway station near Int. boundary, Yale district, B.C.
- Migiskan**; river, flowing westerly from the height of land near sources of St. Maurice river into Shabogama lake, Pontiac county, Que. (Not Megiskun, Mekisean, Metchiskan, nor Metiscan.)
- Migoacha*. See Maguasha.
- Miguasha*. See Maguasha.
- Mijic*. See Midjik.
- Mikwasach**; lake, west of Opemiska lake, Abitibi territory, Que. (Not Wikwasash.)
- Mildram*. See Meldrum.
- Mildrum*. See Meldrum.
- Mile**; island, Brock group, St. Lawrence R. Leeds county, Ont. (Not Huckleberry.)

SESSIONAL PAPER No. 25d

Mile. See *Victoria.*

Miles; canyon, on Lewes river, above Whitehorse rapid, Yukon.

Miles; point, Gabriola island, strait of Georgia, B.C. (Not Schooner.)

Milk; river, rises in Montana, and crossing the international boundary flows easterly through Alberta, thence southwesterly, recrossing the boundary, into Montana.

Mill. See *Galt.*

Millar; post office, Grenville county, Ont. (Not Millar's Corners.)

Millar's. See *Riall.*

Millar's Corners. See *Millar.*

Miller; creek, tributary to Sixtymile river, Yukon.

Miller; lake, southwest of Williams bay, L. Seul, Kenora district, Ont.

Miller; mount, west of Lewes river, Yukon.

Miller; point, western entrance point of Robinson cove, Big island, bay of Quinte, Prince Edward county, Ont. (Not Miller's.)

Miller; point, southeast coast of Digby island, Coast district, B.C.

Mille-Roches; post village, Stormont county, Ont.

Mille-Vaches; bay, point, and river, Saguenay Co., Que. (Not Saut de Mouton river.)

Millie; lake, northeast of Matchimanito lake, Pontiac county, Que.

Milliken; post village and railway station, Markham township, York county, Ont. (Not Millikens.)

Millstream; river, flowing easterly into Nipisiguit bay, Gloucester county, N.B. (Not Little Nipisiguit nor Nipisiguit Millstream.)

Milton; bank, southeast of Wells shoal, Bruce county, Ont.

Milton; island, N. of Wolfe I., St. Lawrence R., Frontenac Co., Ont. (Not Amazon.)

Milton; mount, east of Lewes river, Yukon.

Milton; point, between Lonely and Loughheed bays, Manitoulin island, Ont.

Milton; post office, Shefford county, Que. (Not Milton East.)

Milton; town and railway station, Halton county, Ont. (Not Milton West.)

Miltonbrae; post office, Gloucester county, N.B. (Not Milton Brae.)

Milton East. See *Milton.*

Milton West. See *Milton.*

Miminegash; river and village, Prince county, Prince Edward Island. (Not Big or North Miminigash, nor Minimegash.)

Miminiska; lake, Albany river, Patricia and Thunder Bay districts, Ont.

Mimominatik; brook, emptying into Kapkichi lake, upper Winisk R., Patricia, Ont.

Minago; river, emptying into Cross lake, Manitoba. (Not Pine.)

Minaret; col. and peak, Sir Sandford range, Selkirk Mts., Kootenay district, B.C.

Minas; basin, east arm of the bay of Fundy, Colechester, Cumberland, Hants, and Kings counties, N.S. (Not Basin of Mines nor Mines Basin.)

Mindemoya; river, emptying into Providence bay, Manitoulin I., Manitoulin dist., Ont.

Mineral; creek and town, north of Caribou creek, Kootenay district, B.C.

Mineronte. See *Mirond.*

Miners; range of mountains, near lake Laberge, Yukon.

Mines basin. See *Minas basin.*

Minette; bay, Kitimat arm, Coast district, B.C.

Minimegash. See Miminegash.

Minimegash. See Roseville.

Ministik; lake, in Tp. 50, R. 21, W. 4th M., Alberta.

Ministikwan; lake, west of Makwa lake, central Sask. (Not Little Island lake.)

Minitonas; creek, hill, post office, and railway station, western Manitoba.

Mink; reef, Manitoulin island, northwest of Steevens island, Manitoulin district, Ont.

Mink. See Ninette.

Minnaweiskag; lake, N. Manitou L., Kenora dist., Ont. (Not Kaminnaweiskagwok.)

Minnedosa; river, tributary to Assiniboine river, western Manitoba (Not Little Saskatchewan nor Rapid.)

Minnehaha; lake, north of Peak lake, Kenora district, Ont. (Not Kiskopkechewans.)

Minnesabik; lake, south of Separation lake, Kenora district, Ont.

Minnewakan; post village, Posen municipality, Manitoba.

Minnewanka; lake, in the Rocky Mountains park, Alberta. (Not Devil's Head.)

Minnie Bell; creek, tributary to Flat creek, Klondike river, Yukon.

Minnikau; river, east of Minnitaki lake, Kenora district, Ont.

Minnitaki; lake and railway station, Kenora district, Ont. (Not Minnietakie.)

Mint; creek, branch of Hunker creek, Klondike river, Yukon.

Minto; mount, west of Atlin lake, near north end, Cassiar district, B.C.

Miquelon; lake, in Tp. 49, Rs. 20 and 21, W. 4th M., Alberta.

Miramichi; bay and river, Northumberland county, N.B. (Not Mirimichi.)

Mire. See Shunda.

Mirimichi. See Miramichi.

Miron; lake, headwaters of Sturgeon-weir river, eastern Saskatchewan. (Not Heron, Merion, Mineronte, nor Stone.)

Mirror; lake, west of lake Louise, Alberta.

Misamikwash; lake, west of Wunnummin lake, upper waters of Winisk river, Patricia district, Ont.

Miscou; island, harbour, point, Gloucester Co., N.B. (Not Miscow, Mya, nor N. Mya.)

Misener. See Meisner.

Misery; bay and point, south shore Manitoulin island, Manitoulin district, Ont.

Mishagomish; lake, east of lake Evans, Abitibi territory, Que.

Mishomis; lake, southwest of Grand lake Victoria, Timiskaming county, Que.

Misinabi. See Missinaibi.

Miskatla; Indian village, Douglas channel, opposite Maitland island, Coast district, B.C. (Not Mis-ka-tla.)

Miskittenau; lake, at headwaters of Rupert river, Mistassini territory, Que.

Misko; creek, tributary to Ottertail R., Rocky Mts., Kootenay dist., B.C. (Not Mescoh.)

Miskwabi; lake, Dudley township, Haliburton county, Ont. (Not Mis-quah-be-nish.)

Mispec. See Mispek.

Mispeck. See Mispek.

Mispek; post settlement and river, St. John county, N.B. (Not Maspeck, Michepasque, Mispec, Mispeck, Misshapec nor Mizpeck.) Jeffery's map of 1755 has 'Mispek.'

Mis-quah-be-nish. See Miskwabi.

SESSIONAL PAPER No. 25d

Missaguash; river, emptying into Cumberland bay, Westmorland county, N.B. (Not Misseguash, Missiguash, nor Missiquash.)

Missanabie. See Missinaibi.

Missawawi; lake, south of L. LaBiche, central Alberta. (Not Big Egg.)

Misseguash. See Missaguash.

Misshapec. See Mispek.

Missiguash. See Missaguash.

Missinaibi; lake and railway station, Algoma district, also river flowing from the lake into Moose river, Algoma and Timiskaming districts, Ont. (Not Misinabi nor Missanabie.)

Missinnippi. See Churchill

Mission; bay, and channel (southern) of Kaministikwia river, Thunder Bay district, Ont. (Not Mission river.)

Mission; mountain, Tsimpsean peninsula, W. of Prince Rupert har., Coast dist., B.C.

Mission; pass, between Bridge river and Seton lake, Lillooet district, B.C.

Missipisew; river, tributary to Grass river, Manitoba.

Missiquash. See Missaguash.

Mississagi; bay, island, river, and strait, at north end of lake Huron, Algoma and Manitoulin districts, Ont. (Not Mississauga.)

Mississagua; brook and lake, Peterborough county, Ont. (Not Gull lake.)

Mist; creek and mountain, Misty range, southern Alberta.

Mista; a peak of the Valkyr mountains, Kootenay district, B.C.

Mistake; mountain, northwest of L. Laberge, Yukon.

Mistassibi; river, tributary to Mistassini river, Lake St. John county, Que. (Not Muskosibi.) Reversal of previous decision.

Mistassini; lake, Mistassini territory, Que.

Mistassinis. See Albabel.

Mistawak; lake, W. of Harricanaw R., Abitibi, Que. (Not Mistewak nor Mistowak.)

Mistaya; river, at headwaters of Saskatchewan river, Alta. (Not Little Fork of the Saskatchewan nor Bear creek.)

Mistigouche. See Mistikus.

Mistigougèche. See Mistikus.

Mistikus; lake, Rimouski county, Que. (Not Mistigouche nor Mistigougèche.)

Misty; range of mountains, northwest of Highwood range, southern Alberta.

Mitchell; bay and point, L. St. Clair, Kent county, Ont. (Not Mitchell's.)

Mitchell Bay; post village, Kent county, Ont. (Not Mitchell's Bay.)

Mitchell; range of mountains, east of Kootenay river, Kootenay district, B.C.

Mitchinamekus; lake and river, headwaters of Lièvre river, Berthier, Champlain, Maskinonge, and St. Maurice counties, Que. (Not Mashamengoose, Mejomanguse, nor Menjobaguse.)

Mitis. See Metis.

Mitishto; river, tributary to Grass river, below Wekusko lake, Manitoba.

Mizpeck. See Mispek.

Moberly; creek, west of Lower Arrow lake, Kootenay district, B.C.

Moberly; lake and river, tributary to Peace R., Cariboo, B.C. (Not Moberley.)

- Moberly**; mount, east of Athabaska river, 17 miles above mouth of Whirlpool river, western Alberta.
- Moberly**; peak, and railway station, Rocky mountains, Kootenay district, B.C.
- Mohawk**; post settlement and railway station, Brant Co., Ont. (Not Mt. Pleasant.)
- Moir**; river, emptying into the bay of Quinte, near Belleville, Hastings county, Ont.
- Moisie**; bay, point, river, rock, and shoal, Saguenay Co., Que. (Not Moisi nor Moisie.)
- Mokowan**; butte, east of Belly river, southern Alberta. (Not Belly.)
- Mokwawastuk**; lake, at headwaters of Marten river, Mistassini territory, Que. (Not Mokwawastuk.)
- Molar**; mountain, northeast of mount Hector, Rocky mountains, Alberta.
- Molesworth*. See Lois.
- Moloch**; mount, southeast of Mt. Holway, Selkirk Mts., Kootenay district, B.C.
- Molus**; river, tributary to Richibucto river, Kent county, N.B. (Not Moulie's.)
- Momozekel*. See Mamozekel.
- Monckland**; post village and railway station, Stormont county, Ont. (Not Moncklands, Monklands, nor Moncklands Station P.O.)
- Mondonak**; lake and river, upper waters of Manuan river, Champlain county, Que.
- Monell**; reef, at entrance to Wood bay, Manitoulin island, Manitoulin district, Ont.
- Money**; point, on the southerly portion of Hawkesbury island, Coast district, B.C.
- Mongus**; lake, near Manitou lake, Kenora district, Ont.
- Monk**; lake, Cardiff township, Haliburton county, Ont.
- Monklands*. See Monckland.
- Monmouth**; lake, Monmouth township, Haliburton county, Ont.
- Monquart**; river, tributary to St. John river, Carleton county, N.B. (Not Manquart nor Munquart.)
- Monroe**; creek and lake, near Moyie lake, Kootenay district, B.C.
- Monson**; mount, west of Lewes river, Yukon.
- Montague**; lake, Tp. 6, R. 29, W. 2 M., Saskatchewan.
- Monté**; creek, hills, and lake, south of Duck's station, Yale district, B.C.
- Monts** (pointe des); point, Saguenay county, Que. See also Pointe-des-Monts.
- Monsomshi**; lake, on Severn river, Patricia, Ont. (Not Mon-som-shi-pin-net.)
- Montague**; lake, Skead township, Timiskaming district, Ont.
- Montague**; village, Kings county, Prince Edward Island. (Not Montague Bridge.)
- Montana**; creek, tributary to Yukon river, above Dawson, Yukon.
- Montebello**; railway station and village, Ottawa county, Que. (Not Monte Bello.)
- Montée-du-Lac**; cove and landing, on the St. Lawrence, west of Cap Brulé, also road leading from thence to St. Joachim lakes, Montmorency county, Que.
- Montée du Lac*. See Cap Brulé.
- Montgomery*. See McCoy.
- Montgomery*. See Young.
- Montreal**; channel, west of Edward island and south of entrance to Black bay, Thunder Bay district, Ont.
- Montreal**; lake and river, south of Churchill river, central Sask. (Not Rapid river.)
- Montreal**; river, flowing southeasterly into L. Timiskaming, Ont.
- Montrose**; cape, Markham bay, Hudson strait, N.W.T.

SESSIONAL PAPER No. 25d

- Monumental**; island, southeast of Clements Land, N.W.T.
- Moody**; point, Boxer reach, Coast district, B.C.
- Moonshine*. See Uphill.
- Moore**; lake, Lutterworth township, Haliburton county, Ont. (Not Moore's.)
- Moore**; point, southerly coast of Digby island, Coast district, B.C.
- Moore**; post village, Lambton county, Ont. (Not Mooretown.)
- Moore**; rock, Blunden harbour, Queen Charlotte sound, Coast district, B.C.
- Moose**; creek, tributary to Fortymile river, near international boundary, Yukon.
- Moose**; island, Fisher bay, L. Winnipeg, Man.
- Moose**; lake, north of Cedar lake, Manitoba.
- Moose**; lake and portage, on international boundary, Thunder Bay district, Ont.
- Moose**; mountain, also Moose Mountain creek and post office, southeastern Sask.
- Moose*. See Bonald.
- Moose*. See Fawcett.
- Moosehorn**; bay and lakes, east shore of L. Manitoba, Man. (Not Moose Horn.)
- Moosehorn**; lake, west of Grand lake Victoria, Timiskaming county, Que.
- Moosejaw**; creek and town, Sask. (Not Moose Jaw.)
- Moosehide**; creek and mountains, near mouth of Klondike river, Yukon.
- Mooshaulagan*. See Mushalagan.
- Mooyie*. See Moyie.
- Moraine**; lake, south of mount Temple, Alta.
- Moran*. See Moras.
- Moras**; island, at mouth of Nicolet river, Nicolet county, Que. (Not Moran.)
- Moreau**; islet, southern of 3 rocky islets in the St. Lawrence, off St. Germain, Kamouraska county, Que.
- Morgan**; lake, south of Silver lake, Kenora district, Ont.
- Morice**; lake and river, tributary to Bulkley river, Coast district, B.C. (Not Morrice.)
- Moricetown**; village, on Bulkley river, Coast district, B.C. (Not Morricetown.)
- Morin**; creek, flowing northeasterly into Meadow creek, central Sask. (Not Bear.)
- Morin**; shoal, centre of channel about 8 miles above Hare island, St. Lawrence river, Que.
- Morley**; river, emptying into Teslin lake, Yukon.
- Morrice*. See Morice.
- Morricetown*. See Moricetown.
- Morris**; river, tributary to Red river, Man. (Not Boyne, Ile de Bois nor Scratching.)
- Morris**; town, in southern Manitoba.
- Morrison**; mount, on Yukon river, near international boundary, Yukon.
- Morse**; basin, east of Kaien island, Coast district, B.C.
- Morse**; creek, Prince Rupert, Coast district, B.C.
- Morse**; mount, south of Tuck inlet, Coast district, B.C.
- Moresby**; island and passage, in the north end of Haro strait, B.C.
- Moses Oates**; cape, Charles island, Hudson strait, New Quebec.
- Mosher**; creek and ridge, west of Beaverhill creek, Yale district, B.C.
- Mosher**; island and point, E. side St. Margaret bay, Halifax Co., N.S. (Not Grampus.)
- Mosquito**; creek, tributary to Columbia river, Kootenay district, B.C.

Mosquito; creek, tributary to Bonanza creek, Yukon.

Mossy; river, flowing from Dauphin lake to L. Winnipegosis, Man.

Mouat; channel and reef, off southeast point of Vancouver island, B.C. (Not Mouatt.)

Mouat; islands, off S.W. coast of Texada I., New Westminster dist., B.C. (Not Mouatt.)

Mouat; point, W. point of Pender I., New Westminster dist., B.C. (Not Mouatt.)

Mouat; rock, in Golias channel, northern coast of Vancouver I., B.C. (Not Mouatt.)

Mouatt. See *Mouat*.

Mouchalagan. See *Mushalagan*.

Mouile. See *Mouillée*.

Mouille. See *Mouillée*.

Moulié's. See *Molus*.

Mouillée; point, in St. Lawrence R., Glengarry Co., Ont. (Not *Mouile* nor *Mouille*.)

Mountain; lake, southwest of lake Lindeman, Cassiar district, B.C. (Not Long lake.)

Mountain; lake on international boundary, Thunder bay district, Ont.

Mountain. See *Cliff*.

Mountain. See *Liard*.

Mountain. See *Watchi*.

Mount Johnson; post office and railway station, Iberville Co., Que. (Not St. Grégoire.)

Mt. Pleasant. See *Mohawk*.

Mourier; lake, Desroberts township, Timiskaming, Que. (Not Wikwaskapauk.)

Mouse. See *Maus*.

Mowat; mount. about three miles north of Grant Brook station G.T.P.R., Cariboo district, B.C.

Moyie; lake, river, and town, in S.W. portion of Kootenay dist., B.C. (Not *Mooyie*.)

Muchuya; creek, tributary to Kakuchuya river, Cassiar district, B.C.

Mud; glacier, northeast of mount Purity, Selkirk mountains, Kootenay district, B.C.

Mud. See *Chilako*.

Mud. See *Gillies*.

Mud. See *Kabagukski*.

Mud. See *Mance*.

Mud. See *Rose*.

Muddy. See *Pikitigushi*.

Muddy Water. See *Apeganau*.

Mudge; island, between Gabriola and Vancouver islands, B.C.

Mudie; lake, south of Beaver river and north of Ministikwan lake, central Sask.

Mudjatic; river, tributary to Churchill river, north of Ile à la Crosse, Sask. (Not Caribou nor *Mudjatic*.)

Muhigan; river, emptying into Sipiwesk lake, Man. (Not *Wolf* nor *Wolf Rand*.)

Muirkirk; railway station and village, Oxford Tp., Kent Co., O. (Not *Muir Kirk*.)

Muir; creek, flowing into Juan de Fuca strait, also mountain, Vancouver island, B.C.

Mukoman; river, tributary to Churchill river, Saskatchewan.

Mulcaster; island, Navy group, St. Lawrence river, Leeds county, Ont. (Not *Sugar*.)

Mulholland; point, Campobello island, Charlotte county, N.B. (Not *Mulholland's*, *Meholland*, nor *Mehollan*.)

Mulvey; creek, tributary to Slocan river, Kootenay district, B.C.

SESSIONAL PAPER No. 25d

- Mumm**; peak, north of Robson pass, Rocky mountains, Cariboo district, B.C.
- Mummery**; mountain, west of Blaeberry river, Rocky Mts., Kootenay district, B.C.
- Munosahn**. See Manasan.
- Munquart**. See Monquart.
- Munro**; creek, emptying into Gladys lake, Cassiar district, B.C.
- Munro**; mount, east of Atlin lake, Cassiar district, B.C.
- Munro**; point, St. Ann harbour, Victoria county, N.S. (Not Munroe nor Munro's.)
- Munroe Mills**; post office, Glengarry Co., Ont. (Not Munro's Mills nor Munroe's Mills.)
- Murchison**; cape, southeast end of Brevoort island, N.W.T.
- Murchison**; island, L. Nipigon, Thunder Bay district, Ont. (Not Murchison's.)
- Murchison**; mount, also icefield, east of Mistaya river, Rocky mountains, Alta.
- Muriel**; lake, Tps. 59 and 60, R. 5, W. 4 M., eastern Alberta.
- Murphy**; harbour and point, south shore of Manitoulin I., Manitoulin district, Ont.
- Murphy**; lakes, north of Tulameen river, Yale district, B.C. (Not Eagle nor Fish.)
- Murray Bay** (Eng. usage), **Malbaie** (Fr. usage); village, Charlevoix county, Que. (Not Mal Bay, Malbay, nor Malbaye.)
- Murray**; canal, in Murray and Brighton townships, connecting the bay of Quinte with Presqu'île bay, Northumberland county, Ont.
- Murray**; creek, tributary to Sutherland river, south of Lesser Slave lake, central Alta.
- Murray**; island, St. Lawrence river, below Brockville, Leeds county, Ont.
- Murray**; island, Cold lake, central Alberta and Saskatchewan.
- Murray**; lake, east of Jackfish lake, central Saskatchewan.
- Murray**; point, Markham bay, Hudson strait, N.W.T.
- Murray**; reef, southwest of Dead island, also rocks south of Dead island, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.
- Murray**; river, tributary to the St. Lawrence, Charlevoix county, Que. French usage: Malbaie (rivière), which see.
- Muscote**; bay, off Big bay, S.W. side of the bay of Quinte, Prince Edward Co., Ont.
- Mushalagan**; lake, Saguenay county, Que. (Not Mooshaulagan nor Mouchalagan.)
- Muskiki**; lake, north of Dana, Sask. (Not Houghton.)
- Muskoka**; lake and river, Muskoka district, Ont.
- Muskosibi**. See Mistassibi.
- Muskrat**. See Manigotagan.
- Muskwaro**; point and river, Saguenay county, Que. (Not Musquarro.)
- Muskwesi**; river, flowing into north end of Southern Indian lake, Sask.
- Mussen**; mount, near southern end of Atlin lake, Cassiar district, B.C.
- Mutchmore**; point, south shore Manitoulin island, Manitoulin district, Ont.
- Mya**; point, Shippigan island, Gloucester county, N.B. (Not South Mya.)
- Mya**. See Miscou.
- Myers**; island, southwest of Lynedoch island, St. Lawrence river, Leeds county, Ont.
- Myers**; point, Sidney township, Hastings county, Ont.
- Myles**; shoal, opposite Kingston, Frontenac county, Ont. (Not Royal George.)
- Myra**; cove and island, Blind bay, Halifax county, N.S. (Not Myra's.)
- Mystery**; lake, southwest of Cliff lake, Kenora district, Ont.

N

Na-a-ma. See Nemaia.

Naas. See Nass.

Nabesipi. See Nabisipi.

Nabesippi. See Nabisipi.

Nabisipi; river, north shore gulf of St. Lawrence, Saguenay county, Que. (Not Nabesipi nor Nabesippi.)

Nacawicac. See Nackawic.

Nackawic; river and village, York county, N.B. (Not Nacawicac nor Nackawick.)

Nadahini; river, tributary to Chilkat river, Cassiar district, B.C.

Nadina; mountain, and river flowing into Francois lake from the west, Coast district, B.C. (Not Nadinaka river nor Nadinako river.)

Nahlin; river, tributary to Inklin river, Cassair district, B.C.

Nahoni; mountains, also lakes (upper, lower and middle), at headwaters of Porcupine river, Yukon. (Not Nahone.)

Nainlin; brook, tributary to lower Gravel river, Mackenzie, N.W.T.

Najan; river, tributary to St. Maurice river, above Manuan river, Champlain Co., Que.

Najualand. See Najwalwank.

Najwalwank; lake, Quebec county, Que. (Not Kajoualwang nor Najualand.)

Nakimu; caves, in valley of Cougar creek, Selkirk mountains, Kootenay district, B.C.

Nakina; river, tributary to Taku river, Cassiar district, B.C.

Nakonake; river, tributary to Sloko river, Cassiar district, B.C.

Nakusp; creek, railway terminus, and town, east side of Upper Arrow lake, Kootenay district, B.C. (Not Na-Kusp.)

Nalta. See Fraser

Naltesby; lake, on telegraph trail, N. of Chilako R., Cariboo dist., B.C. (Not Bobtail.)

Namaka; lake, post office, and railway station, southern Alberta.

Namakan; lake, S.E. of Rainy L. Int. boundary, Rainy R. dist., Ont. (Not Nameukan.)

Namawash; lake, upper Ottawa R., N.W. of Grand L. Victoria, Timiskaming, Que.

Namego; lake, south of Separation lake, Kenora district, Ont.

Namegos; lake, south of Matchimanito lake, Montcalm Co., Que. (Not Nemegos.)

Namegosis; lake, south of Matchimanito lake, Montcalm Co., Que. (Not Nemegosis.)

Nameiben; lake, north of Kagianagami lake, Thunder Bay district, Ont.

Nameins; rapids, upper Winisk river, Patricia district, Ont.

Nameukan. See Namakan.

Namew; lake, northeast of Cumberland lake, Sask. (Not Sturgeon.)

Namiska. See Nemiskau.

Namoukan. See LaCroix.

Nanaimo; harbour, river, and town, Vancouver island, B.C.

Nankika; lake, northwest of Attawapiskat lake, Patricia district, Ont.

Nankivell; islands, Blunden harbour, Queen Charlotte sound, Coast district, B.C.

Nankivell; point in Nanoose harbour, east coast of Vancouver island, B.C.

Napetipi; river, north shore gulf of St. Lawrence, Saguenay county, Que.

Nares; lakes between Bennett and Tagish lakes, Yukon.

Nares; mount, east of north end of Bennett lake, Yukon.

SESSIONAL PAPER No. 25d

- Nares**; point, Departure bay, east coast of Vancouver island, B.C. (Not Boulder.)
- Narchilla**; brook, emptying into McPherson lake, Yukon.
- Narrow*. See Bagot.
- Narrow*. See Wallace.
- Nasoga**; gulf, eastern side of Portland inlet, Coast district, B.C. (Not Nasoka.)
- Nass**; bay and river, north of Skeena river, Cassiar district, B.C. (Not Naas, Nasse, nor Naas harbour.)
- Natashkwan**; harbour, point, and river, Saguenay county, Que. (Not Englishman's nor Natashquan nor Little Natashquan harbour.)
- Natchipotchi**; lake, at head of Etchipotchi R., Abitibi, Que. (Not Natchipoishi.)
- Nation*. See Petite Nation.
- Nation*. See South Nation.
- Natla**; river, tributary to Gravel river, N.W.T.
- Naumulten**; mountain, east of head of Lower Arrow lake, Kootenay district, B.C.
- Nauyats**; island, southeast shore Ungava bay, New Quebec.
- Navy**; group of islands, St. Lawrence river, below Gananoque, Leeds county, Ont.
- Navy**; island, Bedford basin, Halifax harbour, Halifax county, N.S. (Not Stephens nor Stevens.)
- Nawapitechin*. See Villemontel.
- Neal*. See Neil.
- Neale**; lake, northeast of Lloydminster, Sask.
- Nechako**; river, tributary to Fraser river, Cariboo and Coast districts, B.C. (Not Nechaco nor Nechacco.)
- Nechigona**; lake, at headwaters of Berens river, Patricia district, Ont. (Not Hair.)
- Neck**; point, north entrance to Hammond bay, S.E. coast of Vancouver island, B.C.
- Nedluk**; lake, west of Koksoak river, New Quebec.
- Needle**; mountain, between the "big bends" of Watson and Wheaton rivers, Yukon
- Needles Eye**; island, Brock group, St. Lawrence river, Leeds county, Ont.
- Negik**; lake, south of Churchill river and east of Pelican narrows, Sask.
- Neil**; harbour, Cape Breton county, N.S. (Not Neal, Neals, nor Neil's.)
- Neilson**; island, southeast of Stone island, Clayoquot sound, Vancouver island, B.C.
- Nelles**; post office, Haldimand county, Ont. (Not Nelles Corners nor Nelles' Corner.)
- Nelles Corners*. See Nelles.
- Nello**; river, headwaters Klondike river, Yukon.
- Nelly**; point, on the northwest portion of Princess Royal island, Coast district, B.C.
- Nelson**; lake, on Churchill river, Manitoba.
- Nelson**; lake, west of Edgar lake, Cassiar district, B.C.
- Nelson**; mount, at head of Clearwater and Hammond creeks, west of Windermere lake, Kootenay district, B.C. (Not Hammond.)
- Nelson**; river, flowing from lake Winnipeg into Hudson bay, Manitoba. The two channels by which it drains the lake are East channel and West channel. (Not East river and West river.)
- Nelson*. See Fort Nelson.
- Nemaia**; lake and valley, northeast of Chilko lake, Coast and Lillooet districts, B.C. (Not Na-a-ma.)

Nemegos. See Namegos.

Nepisiguit. See Nipisiguit.

Nemei; river, tributary to Churchill R., below Reindeer R., Sask. (Not Sturgeon.)

Nemeiben; bay, lake, and river, L. LaRonge, Saskatchewan.

Nemeibennuk; lake, W. of Anzhekumming L., Kenora district, Ont. (Not Sucker.)

Nemeigusabins; lake, near the upper waters of Winisk river, Patricia, Ont.

Nemikachi; lake, near the upper waters of Lièvre river, Maskinongé county, Que.
(Not Nemicachingue.)

Nemiskau; lake, expansion of Rupert river, Mistassini, Que. (Not Namiska.)

Nemo; creek, west of Slocan lake, Kootenay district, B.C.

Ne-na-tik-go. See Ninatigo.

Nepigon. See Nipigon.

Nepihjee. See Leaf.

Nepisiguit. See Nipisiguit.

Nepopekum; creek, tributary to Skagit river, Yale district, B.C.

Neptuak; mountain, northwest of Deltaform Mt., Rocky Mts., Alta. and Kootenay, B.C.

Neptune Head; point, at entrance to Stupart bay, Hudson strait, New Quebec.

Nequaçon. See LaCroix.

Nesto. See Hippa.

Neston; lake, west of lake Devizes, Thunder Bay district, Ont.

Net; lake, Cassels and Strathy townships, Nipissing district, Ont.

Net Setting. See Setting.

Netley; creek and lake, south of lake Winnipeg, Man. (Not Nettly nor Nipuwin.)

Netley; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.

Neutral; hills, west of Sounding lake, southeastern Alberta.

Nevin; mount, west of Hendon river, Cassiar district, B.C. and Yukon.

Newagama; lake, southeast of Abitibi lake, Timiskaming county, Que.

Newburg; post village and Ry. station, Carleton Co., N.B. (Not Newburg Junction.)

Newburg Junction. See Newburg.

New Canaan; post office, Kings county, N.S. (Not Canaan.)

Newell; sound, southwest shore of Frobisher bay, N.W.T. (Not Kangerflung.)

New Galloway. See Galloway.

New Galway. See Galloway.

New Liskeard. See Liskeard.

Newman; peak, Tp. 3, R. 1, W. 5 M., southern Alberta. (Not Newman's.)

Newmarket; post village, York county, N.B. (Not New Market.)

New Richmond; lightstation, township, and village, Bonaventure county, Que. (Not Richmond.)

Newross; post office, Dundas county, Ont. (Not New Ross.)

Newton; fiord, Frobisher bay, N.W.T. (Not Tornait.)

Newton. See Newtown.

Newtown; village, Kings county, N.B.

Newtown; village, Guysborough county, N.S. (Not Newton nor New Town.)

New Wiltshire. See Wiltshire.

New Zealand; creek, tributary to Indian river, Yukon.

SESSIONAL PAPER No. 25d

Niagara; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.

Niagara. See Crossman.

Nibinamik; lake, southwest of Wapikopa lake, upper Winisk river, Patricia, Ont.

Niblock; mount, also pass, northeast of Popes peak, Alta.

Nicholas; islets, northeast of Vansittart island. Queen Charlotte sound, Coast district, B.C. (Not Nicolas.)

Nickadow. See Nigadu.

Nicoamen; plateau and river, Yale district, B.C. (Not Nicomen.)

Nicol; lake, Lorrain township, Timiskaming district, Ont.

Nicola; lake, mountain, plateau, post office, railway station, valley, and river, Yale district, B.C. "Upper Nicola" applied to that portion of the river east of Nicola lake, to be dropped.

Nicolas. See Nicholas.

Nictau; village, at the forks of Tobique river, Victoria county, N.B.

Nictor; lake, headwaters of Tobique river, Restigouche county, N.B.

Nictor. See Tobique.

Niddyry; islands, northeast of Lynedoch island, St. Lawrence river, Leeds county, Ont.

Nidhe; brook, tributary to Gravel river, above Ekwi river, N.W.T.

Nigadu; river and village, Gloucester Co., N.B. (Not Nickadow, Nigado nor Nigadoo.)

Niganishe. See Ingonish.

Nigei; island, near northwest end of Vancouver island, B.C. (Not Galiano.) To avoid duplication. See Galiano island, strait of Georgia.

Nigger; island, between Belleville and Trenton; Hastings county, Ont.

Nigger; narrows, bay of Quinte, Hastings county, Ont. (Not Nigger island narrows.)

Nikabau; lake and river, headwaters of Ashuapmuchuan river, Chicoutimi county, Que.

Nikanassin; range of mountains, extending from the upper end of Brulé lake on Athabaska river to the north branch of Brazeau river, Alta.

Niles; mount, southeast of mount Balfour, Kootenay district, B.C.

Nimpkish; lake and river, in northwest portion of Vancouver island, B.C. (Not Kar-mutsen lake nor Kla-anch river.)

Nimrod; lake, southwest of Bakado lake, Kenora district, Ont.

Ninatigo; lake, Stanhope township, Haliburton county, Ont. (Not Nę-na-tik-go.)

Ninemile; point, also Ninemile Point lightstation, southwest end of Simcoe island Frontenac county, Ont. (Not Gage.)

Ninette; island, Navy group, St. Lawrence river, Leeds county, Ont. (Not Mink.)

Niord; mountain, west of Slocan lake, Kootenay district, B.C.

Nipigon; bay, lake, river, and railway station, Thunder Bay district, Ont. (Not Nepigon nor Neepigon.)

Nipisiquit Millstream. See Millstream river.

Nipisiquit; lake and river, emptying into the bay of same name, Gloucester county, N.B. (Not Nepisiquit, Nipisiquit, nor Nipisghit.)

Nipmenanni; river, a tributary of Shoshokwan river, upper Ottawa, Pontiac county, Que. (Not Nipmenane.)

Nipple; mountain, east of Frances lake, Yukon.

- Nipukatasi**; river, emptying into Kenoniska lake, southeast of lake Evans, Abitibi, territory, Que. (Not Nipukatase.)
- Nipuwini**. See Netley.
- Nisconlith**. See Niskonlith.
- Niskainlith**. See Niskonlith.
- Niskitogisew**. See Kiskittogisu.
- Niskonlith**; Indian reserve, lake, and river, southwest of Little Shuswap lake, Yale district, B.C. (Not Nisconlith nor Niskainlith.)
- Nisling**; river, tributary to White river, east of Wellesley lake, Yukon. (Not Tahte.)
- Nistowasis**. See Threepoint.
- Nisutlin**; river, emptying into Teslin lake, Yukon.
- Nith**; river, flowing into Grand river, Brant, Oxford and Waterloo counties, Ont. (Not Smith's creek.)
- Niut**; range of mountains, on the western side of Tatlayoko lake, Coast district, B.C.
- Nixon**. See Towincut.
- Noddawai**. See Nottaway.
- Nodway**. See Nottaway.
- Noel**; harbour, Crooks inlet, Hudson strait, N.W.T.
- Noel**. See Nowell.
- Nogold**; creek, tributary to Stewart river, Yukon.
- Nohomin**; creek and Indian reserve, near Lytton, Yale district, B.C. (Not No-ho-meen.)
- Noire (rivière)**; river, flowing into the St. Lawrence below St. Siméon, Charlevoix Co., Que.
- Noix (île aux)**; island, Richelieu river, St. Johns county, Que. (Not Fort Lennox.)
- Nolin**; island, at junction of Attawapiskat and Boulder rivers, Patricia, Ont.
- Nomining**; lake, post office, and railway station, Ottawa Co., Que. (Not Nominingue.)
- Nonwatin**; lake and river, tributary to Black Sturgeon river, south of L. Nipigon, Thunder Bay district, Ont. (Not Nonwatan.)
- Nonwatinose**; lake, on Black Sturgeon R., S. of L. Nipigon, Thunder B. district, Ont.
- Noolki**. See Nulki.
- Noores**. See Bath.
- Norbury**; lakes, east of Kootenay R., S. of Steele, Kootenay district, B.C. (Not Fish.)
- Nordeg**; river, tributary to Brazeau river, central Alberta. (Not Little Brazeau.)
- Nordenskiöld**; river, tributary to Lewes river, Yukon.
- Norns**; mountains, southeast of Airy mountain, Kootenay district, B.C.
- Norquay**; mount, northwest of Banff, Alta.
- Norse**; lake, north of Rosamond lake, Kenora district, Ont. (Not Nurse.)
- North**; bay, north shore of Hudson strait, N.W.T.
- North**; channel, between Manitoulin I. and N. shore of L. Huron, Manitoulin dist., Ont.
- North**; lake, on international boundary, Thunder Bay district, Ont.
- North**; lake, Harburn township, Haliburton county, Ont.
- North**. See Gladys.
- North**. See Hall.
- North**. See Langara.

SESSIONAL PAPER No. 25d

North. See Old Factory.

North Albert; peak, northwest of Albert peak, Selkirk Mts. Kootenay district, B.C.

North Antler. See Gainsborough.

North Corner. See Norths.

North Cornwall. See Cornwall.

North Devon. See Devon.

North Duck; river, flowing easterly and northerly to Duck bay, lake Winnipegosis, Man. (Not Duck River North.)

North Branch (Kicking Horse R.) See Amiskwi.

Northeast; bay, Shabogama lake, Abitibi territory, Que.

Northfield. See Hennigar.

North Foreland. See Long.

North Foreland. See Queen Elizabeth.

North Fork. See Yoho.

North Fowl; lake, on international boundary, Thunder Bay district, Ont. (Not Hen.)

North Heart; river, tributary to Peace river, below Smoky river, Alberta.

North Lincoln. See Ellesmere.

North Lizard. See Rowe.

North Mya. See Miscou.

North Nation. See Petite Nation.

North of Halfway. See Meule.

North Peak. See Garibaldi hill.

North Porpoise. See Ridley.

Northport; shoal and village, Sophiasburg township, Prince Edward county, Ont.

North Rustico; lightstation and post village, Queens Co., P.E.I. (Not Grand Rustico)

Norths; post village, Kings county, N.S. (Not North Corner.)

North Skeena. See Inverness.

North Somerset. See Somerset.

North Star; hill, north of St. Mary river, Kootenay district, B.C.

Northumberland; channel, between Gabriola and Vancouver islands, B.C.

Northumberland. See Cumberland.

North Vermilion; settlement, on north side of Peace river, Alta.

Northwest Angle; also Northwest Angle inlet, Lake of the Woods, international boundary, Man., Ont. and U.S.

North Wiltshire. See Wiltshire.

North Wind; lake, southeast of Humboldt bay, L. Nipigon, Thunder Bay district, Ont. (Not North Wing.)

Norway; island, northeast of Kuper island, southeast coast of Vancouver I., B.C.

Notre-Dame-du-Portage; post village, Temiscouata county, Que.

Nose. See Ribstone.

Nottaway; river, flowing from Mattagami lake into James bay, Abitibi territory, Que. (Not Noddawai nor Nodway.)

Notukeu; creek, flowing easterly into Wood river, southern Saskatchewan.

Novelist. See Palmer.

Nowell; channel, in easterly portion of Queen Charlotte sound, B.C. (Not Noel.)

- Noyes**; mount, southeast of Waterfowl lakes, Rocky mountains, Alta.
Nozheiatik; lake, east of Anzhekumming lake, Kenora district, Ont.
Nubble; mount, Goschen island, Hecate strait, Coast district, B.C.
Nulki; lake, on telegraph trail, south of Nechako R., Coast dist., B.C. (Not Noolki.)
Numnekaning. See Nunikani.
Nunikani; lake, Sherborne township, Haliburton county, Ont. (Not Numnekaning.)
Nuns; island, in the St. Lawrence, near Montreal, Hochelaga county, Que. (Not Nun nor St. Paul.)
Nurse. See Norse.
Nut; lake and mountain, also Nut Mountain, post office, eastern Saskatchewan.
Nutt; post office, Missisquoi county, Que. (Not Nutt's Corners.)
Nutt's Corners. See Nutt.
Nyarling; river, tributary to Little Buffalo river, south of Great Slave lake, N.W.T.

- Oak**; lake, English river, above Maynard lake, Kenora district, Ont.
Oak; lake, Methuen township, Peterborough county, Ont.
Oak; point, also Oak Point village, west shore of lake Manitoba, Man.
Oakbank; post village, east of Winnipeg, Man. (Not Oak Bank.)
Oakland. See Slaughenwhite.
Oakville; creek, railway station, and town, Halton Co., Ont. (Not Sixteen Mile creek.)
Obadowagashing. See Dasserat.
Obalski; lake, Bearn, Castagnier, Dalquier and Duvernoy Tps., Timiskaming, Que.
Obashi; lake, northwest of Attawapiskat lake, Patricia district, Ont.
Obashing; lake, Timiskaming county, Que. (Not Big Obashing.)
Obashkong; lake, Cassels township, Nipissing district, Ont.
Obaska; lake, north of Grand L. Victoria, Timiskaming county, Que. (Not Obiska.)
Obatawagush; lake, west of Harricanaw river, Abitibi territory, Que.
Obatogamau; lake, at height of land south of Chibougamau L., Abitibi territory, Que.
Obiduan; lake, at headwaters of St. Maurice river, Champlain county, Que.
Obikoba; lake, northeast of lake Timiskaming, Timiskaming county, Que.
Obiska. See Obaska.
Obonga; lake, west of lake Nipigon, Thunder Bay district, Ont.
Oboshkegan; lake, S. of N. T. Ry. and N. of Onaman lake, Thunder Bay dist., Ont.
Obowanga; river, northwest of Obonga lake, Thunder Bay district, Ont.
O'Brien; creek, at international boundary, west of Cudahy, Yukon.
Observation; butte, near Gun lake, north of Nahlin river, Cassiar district, B.C.
Observation; peak, east of Peyto lake, Alta. (Not Moun^t Observation.)
Observation. See Jupiter.
Ochig; lakes, north of L. St. Joseph, Patricia district, Ont.
O'Connor; island, Navy group, St. Lawrence river, Leeds Co., Ont. (Not O'Connor.)
O'Connor. See Kaskawulsh.
Octave; river, flowing northeasterly from Chikobi lake to Harricanaw river, Abitibi territory, Que. (Not Shi-shi-shi.)

SESSIONAL PAPER No. 25d

- Octopus**; islands at the entrance to Waiatt bay, Okisollo channel, Coast district, B.C.
- Odaray**; mount, south of Cathedral mountain, Kootenay district, B.C.
- Odaray**; pass, between Mts. Duchesnay and Odaray, Yoho park, Rocky Mts., Kootenay district, B.C.
- Odei**; river, tributary to Burntwood river, Manitoba. (Not Sahpoochaway.)
- Odellach**; river, tributary to Tobique river, Victoria county, N.B. (Not Otelloch.)
- Odin**; mount, west of Upper Arrow lake, Kootenay district, B.C.
- O'Donnel**; river, emptying into E. side of Atlin L. Cassiar, B.C. (Not Dixie creek.)
- Oesa**; lake, southwest of mount Lefroy, Kootenay district, B.C.
- Ogani**; lake, on Wenasaga river, northwest of lac Seul, Patricia district, Ont. (Not Oganie nor Powingow.)
- Ogden**; mount, northwest of Hector station, Rocky mountains, Kootenay district, B.C.
- Ogilvie**; creek, emptying into the north end of lake Laberge, Yukon.
- Ogilvie**; post on Yukon river, near the mouth of Sixtymile river, Yukon.
- Ogilvie**; range of mountains, central Yukon.
- Ogilvie**; valley, north of lake Laberge, Yukon.
- Ogoki**; lake and river, tributary to Albany R., Thunder Bay dist., Ont. (Not Tiernan.)
- Ogre**; peak, near headwaters of Amiskwi river, Rocky Mts., Kootenay district, B.C.
- O'Hara**; lake, west of mount Lefroy, Rocky Mts., Kootenay dist., B.C. (Not Cascade.)
- Oies** (cap aux); cape, below Coudres island, St. Lawrence river, Charlevoix county, Que. English usage Goose cape, which see.
- Oiseau**; lake and river, southeast of lake Winnipeg, Man. (Not Bird.)
- Oke**; mount, south of Misko pass, Yoho park, Rocky Mts., Kootenay district, B.C.
- O'Keefe**; mount, between Sloko and Silver Salmon rivers, Cassiar district, B.C.
- Okemasis**; lake, east of Carlton, central Saskatchewan. (Not Stony.)
- Okikodosik**; river, flowing southwesterly into Abitibi lake, Timiskaming, Ont. and Que. (Not Okikodosec.)
- Okisollo**; channel, between Quadra and Sonora Is., Coast dist., B.C. (Not Okishollow.)
- Okotoks**; mountain, post office, and railway station, southern Alberta.
- Old Bluff.* See Yeo.
- Old Factory**; river, emptying into James bay, New Quebec. (Not North.)
- Oldfield.* See Hays.
- Old Fort**; bay and point, in southwestern portion of Athabaska lake, also river flowing into the bay, Alta.
- Oldman**; river, tributary to Belly river, Alta. (Not Old Man's.)
- Oldman**; rock, Yukon river, between Cudahy and international boundary, Yukon.
- Old Wives.* See Chaplin.
- Oldwoman**; rock, Yukon river, near Oldman rock, Yukon.
- Olga**; lake, southeast of Mattagami lake, Abitibi territory, Que.
- Olga**; river, north shore of Hudson strait, N.W.T.
- Olive**; mountain, northeast of mount Gordon, Rocky mountains, Alta.
- Oliver**; mount, southwest of Mount Bonney, Selkirk mountains, Kootenay district, B.C.
- Olivine**; mountain, south of Tulameen river, Yale district, B.C.
- Olomanoshibo**; river, Saguenay Co., Que. (Not Olomanosheebo nor Olomonasheebou.)
- Omanek**; island, east shore Ungava bay, New Quebec.

- Omatuwi**; lake, north of Split lake, Nelson river, Manitoba. (Not O-Ma-Tou-Wi.)
- Ombabika**; bay, island, and river, N. shore of L. Nipigon, Thunder Bay district, Ont.
- Omenica**. See Omineca.
- Omineca**; mountains and river, Cassiar, B.C. (Not Omenica, Ominica, nor Omeneca.)
- Onamakawash**; lake, southwest of Smoothrock lake, Thunder Bay district, Ont.
- Onaman**; lake and river, emptying into Humboldt bay, Nipigon lake, Thunder Bay district, Ont. (Not Onamanisagi.)
- Onamanisagi**. See Onaman.
- Onatamini**; brook, flowing into Wekusko lake, Manitoba.
- Onderdonk**; point, Ameliasburg township, Prince Edward county, Ont.
- O'Neil**; island, west of Grenadier island, St. Lawrence river, Leeds county, Ont. (Not Bluff nor Hog.)
- O'Neil**; post office, Huntingdon Co., Que. (Not O'Neil's Corners nor O'Neil Corners.)
- O'Neill's Corners*. See O'Neil.
- Oneman**; lake, English R., Kenora district, Ont. (Not Lone Man's nor One Man's.)
- Onkamis**; lake, at headwaters of St. Maurice river, Champlain county, Que.
- Ooskootim*. See Wuskwatim.
- Ootsa**; lake, southwest from Francois lake, Coast district, B.C. (Not Ootsabunket.)
- Opabin**; creek, tributary to Brazeau river, central Alberta. (Not Boulder nor Rocky.)
- Opachuanau**; lake, on Churchill river, below Nemei river, Sask. (Not Pachewanow.)
- Opal**; mountains, east of Kananaskis river, Rocky Mountains park, Alta.
- Opamiska*. See Opemiska.
- Opasatika**; lake, south of Abitibi lake, Timiskaming county, Que.
- Opatawaga**; lake, northwest of Mattagami lake, Abitibi, Que. (Not Opiwatakan.)
- Opawika**; river, tributary to Waswanipi river, Abitibi territory, Que.
- Opegano**; lake, on Burntwood river, Manitoba.
- Opemiska**; lake, west of Chibougamau lake, Abitibi territory, Que. (Not Opamiska.)
- Opeongo**; railway station and river, in southeastern portion of Algonquin National park, Nipissing district, Ont. (Not Great Opeongo lake.)
- Opequanne*. See Opikwan.
- Opequon*. See Opikwan.
- Ophir**; creek, tributary to Indian river, Yukon.
- Opichuan**; river, flowing to Nameiben L., Thunder Bay dist., O. (Not Opichewan.)
- Opikeigen**; lake, northwest of Eabemet lake, Patricia district, Ont.
- Opikwan**; lake, upper waters of Ottawa river, Pontiac county, Que. (Not Opequanne nor Opequon.)
- Opinaca*. See Opinaka.
- Opinaka**; river, tributary to Eastman river, New Quebec. (Not Opinaca nor Straight.)
- Opinnagau**; river, north of Ekwan river, Patricia district, Ont. (Not Upinnakaw.)
- Opitsat**; Indian village, southwest end of Meares island, Clayoquot sound, Vancouver island, B.C. (Not Clayoquot.)
- Opiwatakan*. See Opatawaga.
- Oponask**; lake, northeast of Sachigo lake, Patricia, Ont. (Not Little Sachigo.)
- Opuntia**; lake, southeast of Tramping lake, Sask.

SESSIONAL PAPER No. 25d

- Orchard**; point, opposite Atherley, at northern end of lake Simcoe, Simcoe county, Ont.

- Otelloch*. See Odellach.
- Otoskwin**; lake and river, tributary to Badesdawa L., upper Winisk R., Patricia, Ont.
- O-Tow-Wow*. See Otauwau.
- Ottawa**; city, Carleton county, Ont.
- Ottawa**; creek, tributary to Dominion creek, Yukon.
- Ottawa**; lake, in Joliette county, Que.
- Ottawa**; river, which in lower portion forms the boundary between Ont. and Que.
- Otter**; point, west of Sooke bay, Vancouver island, B.C.
- Otter*. See Big Otter.
- Otter*. See Fantail.

- Otterhead**; river, tributary to Kicking Horse river, Kootenay district, B.C.
- Ottertail**; falls, in Ottertail river, above Goodsir creek, Yoho park. Rocky Mts., Kootenay district, B.C.
- Ottertail**; river, mountain range, and railway station, Kootenay district, B.C.
- Otty**; island, Navy group, St. Lawrence river, Leeds county, Ont.
- Ouasiemska*. See Washimeska.
- Oulac*. See Aulac.
- Outer Bay of Long Pt.* See Long Point bay.
- Outer Duck**; island, east of Great Duck island, the most southerly of the Duck islands, Manitoulin district, Ont.
- Outer Sturgeon*. See McCreary.
- Oval*. See Kawawia.
- Overflow**; lake, on Olga river, north shore of Hudson strait, N.W.T.
- Overflowing**; river, emptying into northwest end of L. Winnipegosis, Man.
- Owen**; bay, north shore of Okisollo channel, Coast district, B.C.
- Owen**; channel and island, between Manitoulin and Fitzwilliam islands, Manitoulin district, Ont.
- Owen**; island, Navy group, St. Lawrence river, Leeds county, Ont.
- Owen**; mount, south of Cathedral mountain, Kootenay district, B.C.
- Owen**; point, between Athol and Wellington bays, Pr. Edward Co., Ont. (Not West.)
- Owl**; river, flowing from Heart lake to L. LaBiche, central Alberta.
- Ox**; point, the western extremity of point Anne, Thurlow township, Hastings Co., Ont.
- Oxdrift**; railway station, Kenora district, Ont.
- Oxstall*. See Ecstall.
- Oxtongue**; lake and river, Haliburton county, Ont. (Not Ox Tongue.)
- Oyster* (harbour). See Ladysmith.
- Oyster**; peak, west of mount Douglas, Rocky mountains, Alta.
- Oznabruck*. See Osnabruck.
- Ozhiski**; lake, southwest of Attawapiskat lake, Patricia district, Ont.
- Ozhuskans**; rapids, upper Winisk river, Patricia district, Ont.

P

- Pachena**; point, south of Pachena bay, west coast of Vancouver island, B.C. (Not Beegadoss nor Beeghadoss.)
- Pachewanow*. See Opachuanau.
- Packhoon*. See Pakhoan.
- Paddle**; river, tributary to Pembina river, Alta.
- Paddle*. See Boyer.
- Paddling**; lake, north of Blaine lake, central Saskatchewan.
- Pagaonga*. See Papaonga.
- Pagato**; lake and river, tributary to Churchill R., east of Reindeer R. central Sask.
- Page**; lagoon, south of Hammond bay, southeast coast of Vancouver island, B.C.
- Page**; point, Ladysmith harbour, east coast of Vancouver island, B.C.
- Paget**; peak, northwest of Hector station, Rocky mountains, Kootenay district, B.C.

SESSIONAL PAPER No. 25d

- Pagwachuan**; lake, and river tributary to Kenogami river, Algoma and Thunder Bay districts, Ont. (Not Bagutchuan river, Pawgutchewan river, Powgulchuan lake, nor Pawghtchewan lake.)
- Paincourt**; post village, Kent county, Ont. (Not Dover South nor Pain Cour.)
- Painkiller*. See Gamskagamik.
- Painsec**; post village and Ry. station, Westmorland Co., N.B. (Not Painsec Junction.)
- Paint**; lake and river, tributary to Grass river, Manitoba. (Not Manuminan.)
- Paisley**; point, Douglas channel, west of Maitland island, Coast district, B.C.
- Pakhoan**; lake, on Severn river, Patricia, Ont. (Not Little Cedar nor Packhoon.)
- Pakitanika*. See Blouin.
- Pak-oghkee*. See Pakowki.
- Pakonsigane**; river, upper waters of Manuan river, St. Maurice county, Que.
- Pakowagaming*. See Pakowkami.
- Pakowcaming*. See Pakowkami.
- Pakowkami**; lake, in Gladstone township, Algoma district, Ont. (Not Pakowagaming nor Pakowcaming.)
- Pakowki**; lake, southeastern Alberta. (Not Pakokee, Pak-oghkee, nor Peekopee.)
- Pakwa**; lake, on Grass river, Manitoba. (Not Pakwahigan, Paquehigan nor Sandy.)
- Pakwahigan*. See Pakwa.
- Pakwash**; lakes, northwest of lac Seul, Patricia district, Ont. (Not Little Shallow, Paquash nor Shallow.)
- Palisade**; mountain, northwest of Sir Sandford range, Selkirk mts., Kootenay, B.C.
- Palliser**; mountain range, pass and river, Rocky mountains, Kootenay, B.C.
- Palmer**; mount, easterly termination of Sir Sandford range, creek tributary to Gold river, also glaciers in the Selkirk mountains, Kootenay district, B.C. (Not Novelist creek and mountain, nor west branch of Gold river.)
- Palmer Bar**; creek, tributary to Moyie river, Kootenay district, B.C.
- Pantage**; lake, on telegraph trail, south of Blackwater river, Cariboo district, B.C. (Not Pelican.)
- Panther**; river, flowing northeasterly into Red Deer river, Rocky mountains, Alta.
- Papaonga**; river, tributary to Wenasaga river, above Slate lake, Patricia district, Ont. (Not Papagonga.)

- Pass*. See Blakiston.
- Patauquin*. See Petauguin.
- Patience**; lake, Tp. 36, R. 3, W. of 3 M., southern Saskatchewan.
- Patterson**; bay and point, St. Lawrence river, Yonge township, Leeds county, Ont. (Not Chimney Island point.)
- Paudash**; brook, lake, and post office, Cardiff township, Haliburton county, Ont.
- Paugh**; lake, Sherwood township, Renfrew county, Ont.
- Pauktorvik**; island, southwest shore Ungava bay, New Quebec.
- Paul**; creek and lake, tributary to N. Thompson river, north of Kamloops, Yale district B.C. (Not Reservation.)
- Paul**; mount, near southeast end of Maligne lake, Rocky Mts., western Alberta.
- Pawghtchewan*. See Pagwachuan.
- Pawgutchewan*. See Pagwachuan.
- Payoonan*. See Peonan.
- Payne**; lake, and river emptying into Ungava bay, New Quebec. (Not Tasurak.)
- Peace**; hills, west of Wetaskiwin, central Alberta.
- Peace**; large river, Cariboo district, B.C. and northern Alberta.
- Peach**; island, at outlet of lake St. Clair, Essex county, Ont. (Not Isle aux Pêches.)
- Peak**; lake, southwest of Dinorwic lake, Kenora district, Ont.
- Pear*. See Dromedary.

SESSIONAL PAPER No. 25d

- Pearce**; mount, northwest of Mt. McNicoll, Selkirk Mts., Kootenay district, B.C.
- Pearson**; island, west of Belanger point and east of Greene island, Manitoulin district, Ont. (Not Little Grant.)
- Peashteebee.* See Piashti.
- Peavine**; creek, tributary to Moyie river, Kootenay district, B.C.
- Pebble.* See Lowes.
- Peck**; lake, south of Ministikwan lake, central Saskatchewan. (Not Little Fishing.)
- Peckagomique.* See Becaguimec.
- Pedder**; bay and inlet, south of Parry bay, Vancouver island, B.C.
- Peechee**; mount, south of Mt. Girouard, Rocky mountains, Alberta.
- Peekopee.* See Pakowki.
- Peel**; island, northeast of Grenadier island, St. Lawrence river, Leeds county, Ont. (Not Prince Edward nor Tent.)
- Peel**; shoal, off Peel island, northeast of Grenadier island, St. Lawrence river, Leeds county, Ont. (Not Tent Island shoal.)
- Pee-pee-ke-wah-be-kung.* See Pipikwabi.
- Peerless**; lake, Tps. 87 and 88, Rges. 4 and 5, W. 5th M., Alta. (Not Trout.)
- Peeshabo.* See Pishabo.
- Pegamasai**; lake, in Montgomery township, Algoma district, Ont. (Not Pegamasay.)
- Peggy Cove**; village, Halifax county, N.S. (Not Peggy's Cove.)
- Pe-kange-kum.* See Pikangikum.
- Pekangikum.* See Pikangikum.
- Pekisko**; creek, tributary to Highwood R., Alta. (Not Middle Branch of Highwood R.)
- Pelee**; island and point, and Pelee Island post office, Essex county, Ont. (Not Pele nor Pointe Pelee.)
- Pelerin**; post settlement, Kent county, N.B. (Not Pelering nor Puellering.)
- Pelerins (Les)**; islands, St. Lawrence river, Kamouraska county, Que. English usage: Pilgrim islands, which see.
- Pelican**; lake, north of Minnitaki lake, Kenora district, Ont.
- Pelican.* See Chitek.
- Pelican.* See Lavallée.
- Pelican.* See Pantage.
- Pelican.* See Primeau.
- Pelletier**; lake, Rouyn township, also creek flowing from the lake to Kekeko lake, Timiskaming county, Que. (Not Lorenzo.)
- Pelly**; mountains, lakes, and river, Yukon.
- Pemberton**; meadows, on Lillooet river, above Lillooet lake, also pass, portage, and post office, between Anderson and Lillooet lakes, B.C.
- Pembina**; mountain and river, southern Manitoba.
- Pembina**; river, tributary to Athabaska river, central Alberta.
- Pembina.* See Christina.
- Pembroke.* See Allumette.
- Pen**; lake, Nightingale township, Haliburton county, Ont.
- Penassi**; lake and river, west of Maniton lake, Kenora district, Ont.
- Pencil**; lake, Cavendish township, Peterborough county, Ont.

Pender; island, in southern portion of the strait of Georgia, B.C.

Pender. See Brabant.

Pender. See Walkem.

Pend d'Oreille; river, flowing into Columbia river, near the international boundary, Kootenay district, B.C.

Penetangore; river, emptying into lake Huron at Kincardine, Bruce county, Ont.

Penetanguishene; town, Simcoe county, Ont. (Not Penetang.)

Penitentiary; shoal, southwest of Kingston, Frontenac Co., Ont. (Not Prince Regent.)

Penny. See Cumberland.

Penrose; mount, in forks of Bridge river, Lillooet district, B.C.

Pentamerus; point, Crane bay, lake Manitoba, Man.

Pentecôte; river, Saguenay county, Que. (Not Pentecost.)

Peonan; creek, tributary to Saskatchewan river, near Ft.-à-la-Corne, Sask.

Peonan; point, in northerly part of lake Manitoba, Man. (Not Payoonan.)

Pepechekau. See Pipishikau.

Pepin; point, east entrance Tuck narrows, Prince Rupert harbour, Coast dist., B.C.

Pepisquew. See Weibikwei.

Pequaket. See Pikwaket.

Perrault. See Perrault.

Perch; island, northeast of Gordon I., St. Lawrence R., Leeds Co., Ont. (Not Reed.)

Percy; lake, Harburn township, Haliburton county, Ont.

Pereault. See Perrault.

Pereleshin; mountain, near Stikine R., between Anuk and Scud Rs., Cassiar dist., B.C.

Peribonka; river, emptying into lake St. John, Que. (Not Peribonca.)

Perkins; creek and peak, north of Pugh peak, southern Yukon.

Perkins; rock, S.W. of Ruel shoal, entrance to Key harbour, Parry Sound dist., O.

Perley rock; mountain spur, near Terminal peak, Selkirk Mts., Kootenay district, B.C.

Perpisawick. See Petpeswick.

Perrang; cove, east shore of St. Margaret bay, Halifax county, N.S. (Not Perrin.)

Petitcodiac; river, Albert and Westmorland counties, N.B. (Not *Petcoudiac* nor *Petit Coudiac*.)

Petitdegrat; inlet, island, and post office, Richmond county, N.S. (Not *Petit Degrat* nor *Petit de Grat*.)

Petite. See *Walton*.

Petite Ile aux Cygnes. See *Sévigny*.

Petite-Nation; river, tributary to the Ottawa, from the north. (Not *Nation* nor *North Nation*.)

Petite Nation. See *South Nation*.

Petit-Rocher; post village and railway station, Gloucester county, N.B. (Not *Petite Roche* nor *Petite Rocher*.)

Petitsikapau; lake, north of Ashuanipi river, New Quebec. (Not *Petatstekupau*, *Petshikupan*, nor *Petshikupau*.)

Petpeswick; harbour, inlet, lake, and post office, Halifax county, N.S. (Not *Perpisa-wick* nor *Petpiswick*.)

Petrie; reef, at east entrance to Sydney harbour, Cape Breton county, N.S. (Not *Peter's*, *Petre*, nor *Petrie's*.)

Petrolia; town, Lambton county, Ont. (Not *Petrolea*.)

Petshikupau. See *Petitsikapau*.

Peveril; mountain peaks, southwest of Goodwin creek, Cassiar district, B.C.

Peyto; glacier and lake, northwest of Bow lake, Alta. (Not *Peyto's* nor *Glacier lake*.)

Pheasant; creek and hill, north of Qu'Appelle river, southeastern Saskatchewan.

Phelan; railway station, north shore of Skeena river, Coast district, B.C.

Philip; river, emptying into Northumberland strait, N.S. (Not *Phillip*.)

Philips; cove, east of Pillsbury cove, Prince Rupert harbour, Coast district, B.C.

Philips; point, east coast of Digby I., Prince Rupert harbour, Coast district, B.C.

Phillip. See *Philip*.

Phillips; shoal, northeast of Main island, entrance to Key harbour, Georgian bay, Parry Sound district, Ont.

Philmonro; settlement, Kings county, N.B. (Not *Philmaro* nor *Philomaro*.)

Phœbe; point, northwesterly point of Fitzwilliam island, Manitoulin district, Ont.

Photograph; mountain, Kitimat arm, Coast district, B.C.

Piapot; creek, flowing into Crane lake, southwestern Saskatchewan.

Piashti; bay and river, Saguenay county, Que. (Not *Peashte-bai*, *Piastre bay*, nor *Peashteebee river*.)

Piastre. See *Piashti*.

- Piché**; lake, Dubuisson and Fournière townships, Timiskaming county, Que. (Not High Water nor Kamoukakwiti.)
- Pichenninnis**; brook, flowing into Butler lake, Kenora district, Ont.
- Pichinamei**; lake, south of Attawapiskat lake, Patricia district, Ont.
- Pickering*. See Frenchman.
- Pickitigouching*. See Pikitigushi.
- Pickle**; lake, east of Kapkichi lake, upper Winisk river, Patricia district, Ont.
- Pickwaket*. See Pikwaket.
- Picnic*. See Cockburn.
- Picnic*. See Stovin.
- Picture Narrows**; lake, west of Manitou lake, Kenora district, Ont.
- Piegan**; creek, flowing into Sevenpersons coulée, southeastern Alberta.
- Pieromonta**; river, emptying into Kempt lake, St. Maurice county, Que.
- Piers**; island, Satellite channel, southeast coast of Vancouver I., B.C. (Not Pier.)
- Pigeon**; bay, falls and point, also river flowing into the bay and forming part of the international boundary, Thunder Bay district, Ont.
- Pigeon**; mountain, south of Bow river, Rocky Mountains park, Alta.
- Pijitawabekong*. See Pijitawabik.
- Pijitawabik**; bay, east of mouth of Nipigon river, L. Nipigon, Thunder Bay district, Ont. (Not Orient, Pijitawabekong, Pijitawabikong, nor Pittiwabikong.)
- Pijitawabekong*. . See Pijitawabik.
- Pijuwan**; lake, and river tributary to Waswanipi river, Abitibi territory, Que.
- Pika**; peak, northeast of Laggan, Rocky mountains, Alta.
- Pikangikum**; Indian reserve and lake, on Berens river, Patricia district, Ont. (Not Pe-kange-kum nor Pekangikum.)
- Pikapao**; river, tributary to Moisie river, Saguenay county, Que. (Not Pikopao.)
- Pike**; lake, mountain, and river, south of Atlin lake, Cassiar district, B.C.
- Pikitigushi**; river, emptying into the northern end of Nipigon lake, Thunder Bay district, Ont. (Not Pickitigouching nor Muddy.)
- Pikopao*. See Pikapao.
- Pikwaket**; brook and mountain, Kings county, N.3. (Not Pequaket nor Pickwaket.)
- Pilgrim**; islands ('The Pilgrims'), also shoal, St. Lawrence river, Kamouraska county, Que. French usage: Les Pélerins, which see.
- Pilkington**; mount, north of Blaeberry river, Rocky Mts., Kootenay district, B.C.
- Pillsbury**; cove, east of Venn passage, Prince Rupert harbour, Coast district, B.C.
- Pilot**; bay, Gabriola island, southeast coast of Vancouver island, B.C.
- Pilot**; bay and point, and Pilot Bay settlement, Kootenay lake, Kootenay district, B.C. (Not Cape Horn nor Pirate bay.)
- Pilot**; island, northeast of Grenadier island, St. Lawrence river, Leeds county, Ont.
- Pilot**; lake, Burleigh township, Peterborough county, Ont.
- Pilot**; point, southeast corner of Gribbell island, Coast district, B.C.
- Pimbury**; point, Departure bay, Vancouver island, B.C. (Not Pinbury.) Previous decision revised.
- Pinbury*. See Pimbury.

SESSIONAL PAPER No. 25d

- Pinched-neck**; lake, at headwaters of Rupert river, north of Mistassini lake, Mistassini territory, Que.
- Pine**; island, near Key harbour, Georgian bay, Parry Sound district, Ont.
- Pine**; lake, northwest of Gunflint lake, international boundary, Thunder Bay district, Ont. (Not Island Portage lake.)
- Pine**; point, Weller bay, Ameliasburg township, Prince Edward county, Ont.
- Pine.* See Clark.
- Pine.* See Mermaid.
- Pine.* See Minago.
- Pine.* See Shingwak.
- Pine channel.* See Kapikik lake.
- Pine Island lake.* See Cumberland lake.
- Pineimuta**; lake, west of L. St. Martin, Manitoba. (Not Partridge Crop.)
- Pineroot**; river, emptying into Athapapuskow lake, Manitoba.
- Pine Tree**; harbour and point, southeast of Johnston harbour, Bruce county, Ont.
- Pine Wood.* See Frederick.
- Pingston**; creek, west of Upper Arrow lake, Kootenay district, B.C.

- Pinnacle**; mountain, southwest of mount Temple, Alta.
- Pinnacle.* See Cathedral.
- Pinto**; butte, also creek tributary to Wood river, Sask. (Not Pinto Horse.)
- Pipe.* See Oswagan.
- Pipestone**; lake, south of Cross lake, Nelson river, Manitoba.
- Pipestone**; pass and river, Rocky mountains, Alta. (Not Pipe creek.)
- Pipestone.* See Oswagan.
- Pipikwabi**; lake, Stanhope Tp., Haliburton Co., Ont. (Not Pee-pee-ke-wah-be-kung.)
- Pipishikau**; river, Saguenay county, Que. (Not Pepechekau.)
- Pipmakan**; lake, Chicoutimi county, Que. (Not Pipmaukin nor Pitmuakan.)
- Pirate.* See Pilot.
- Pisarinco.* See Lorneville.
- Pishabo**; lake, Cassels township, Nipissing district, Ont. (Not Peeshabo.)
- Pishidgi**; lake, west of lake Nipigon, Thunder Bay district, Ont.
- Piskahegan**; river, tributary to Magaguadavic river, Charlotte county, N.B. (Not Paskekegan nor Piskehagan.)
- Pita**; lake, on Churchill river, below Reindeer river, Saskatchewan.
- Pitchpine**; island, Admiralty group, St. Lawrence river, Leeds county, Ont.
- Pitmuakan.* See Pipmakan.
- Pitopiko**; lake, an expansion of Manuan river, upper St. Maurice river, Champlain county, Que. (Not Pitopieco.)
- Pitt**; creek, tributary to St. Mary river, Kootenay district, B.C.
- Pittiwabikong.* See Pijitawabik.
- Pitts**; mount, southwest of the junction of Yukon, Lewes and Pelly rivers, Yukon.
- Pizustigwan**; river, northwest of Attawapiskat lake, Patricia district, Ont.
- Plateau**; creek, flowing into Torres channel, Atlin lake, Cassiar district, B.C.
- Pleasant**; point, the eastern extreme of Prince Edward county, Ont. (Not Indian.)

- Plover**; island, west coast Ungava bay, New Quebec.
- Plum**; creek and lake, tributary to Souris river, southwestern Manitoba.
- Plumper**; passage, channel between Discovery and Chain islands, Haro strait, New Westminster district, B.C. (Not Discovery.)
- Plumper's*. See Active.
- Poboktan**; creek, flowing northwesterly into Sunwapta river, also pass at head of the creek, Alberta.
- Pockmouche*. See Pokemouche.
- Pocmouche*. See Pokemouche.
- Pocowagamis*. See Pokowagamis.
- Pohenagamuk**; lake and post office, Pohenegamook township, Kamouraska county, Que. (Not Pohenagamooke nor Pohenegamook.)
- Point**; river, flowing into Sagemace bay, lake Winnipegosis, Manitoba.
- Point Brulé*. See Brulé.
- Point de Bute*. See Pont-à-Buot.
- Pointe-à-la-Garde**; village, Bonaventure county, Que. (Not Pointe la Garde.)
Reversal of previous decision.
- Pointe-au-Pic**; village, Charlevoix county, Que.
- Pointe-des-Monts**; post office, Saguenay county, Que. (Not Pointe de Monts.) See also Monts.
- Point Edward**; town, Lambton county, Ont.
- Point Fortune**; post village, Vaudreuil county, Que.
- Pointe Pelee*. See Pelee.
- Pointe-Platon**; post settlement, Lotbinière county, Que. (Not Point Platon.)
- Point-no-point*. See Glacier.
- Point Sapin**; post village, Kent county, N.B.
- Point Wolf**; town, Albert county, N.B. (Not Point Wolfe.)
- Pokemouche**; river, Gloucester county, N.B. (Not Pockmouche nor Poemouche.)
- Poker**; creek, branch of Walker creek, near international boundary, Yukon.
- Pokesudi**; island, at west entrance to Shippigan harbour, Gloucester county, N.B.
(Not Poc Sudie, Poksudi, Pokesudie, Pokesuedie, nor Pokesoudie.)
- Pokiok**; river and village, York county, N.B. (Not Pokiock nor Poquiock.)
- Pokkattawagan*. See Pukkatawagan.
- Pokowagamis**; lake, and river tributary to Eel river, York county, N.B. (Not Pocowagamis nor Pocowogamis.)
- Pollinger**; mount, northeast of Kiwetinok peak, Rocky Mts., Kootenay district, B.C.
- Ponass**; lake, Tp. 38, R. 14, W. 2 M., Sask.
- Ponhook**; lake, in western portions of Halifax and Hants Cos., N.S. (Not St. Croix.)
- Pont-à-Buot**; village, Westmorland Co., N.B. (Not Point de Bute nor Pointe de Bute.)
- Pontax**; river, emptying into James bay, north of Rupert river, Mistassini territory, Que. (Not Pontiac.)
- Pontiac*. See Pontax.
- Pontleroy**; lake, Pontleroy township, Timiskaming county, Que. (Not Eel.)
- Pooh-bah**; lake, Hunter island, Rainy River district, Ont. (Not Pooh-Bah.)
- Pool*. See Poole.

SESSIONAL PAPER No. 25d

- Poole**; creek, tributary to Birkenhead river, Lillooet district, B.C. (Not Pool.)
- Poole**; island, N. of Grenadier I. St. Lawrence R., Leeds Co., Ont. (Not Pool.)
- Pooles Resort**; post office and summer resort, Leeds county, Ont. (Not Poole's Resort.)
- Popes**; peak, Bow range, Rocky Mts., Alta. and Kootenay dist., B.C. (Not Pope's.)
- Popham**; island, Navy group, St. Lawrence river, Leeds county, Ont.
- Poplar**; point, near the mouth of Rupert river, Mistassini territory, Que.
- Poplar Point**; parish and post settlement, on Assiniboine river, Man.
- Poquiok*. See Pokiok.
- Porcupine**; creek, tributary to Stikine R., south of Anuk R., Cassiar dist., B.C.
- Porcupine**; hills, southern Alberta.
- Porcupine**; mountain, northwestern Manitoba and Saskatchewan.
- Porcupine**; point and reef, southeast of cape Hurd, Bruce county, Ont.
- Porcupine**; river, tributary to Yukon river, northwestern Yukon.
- Porlier**; pass, between Galiano and Valdes islands, strait of Georgia, New Westminster district, B.C. (Not Portier.)
- Porphyry**; creek, flowing to Bulkley R., opp. Sharpe creek, Cassiar district, B.C.
- Porphyry**; island, point, and reef, south of Edward island, Manitoulin district, Ont.
- Porpoise**; channel, between Lelu and Ridley islands, also harbour in south side of Kaien island, Coast district, B.C.
- Portage**; bay, east of Peonan point, in northern portion of L. Manitoba, Man.
- Portage**; bay and point, east of Gatacre point, Manitoulin I., Manitoulin dist., Ont.
- Portage**; lake, west of Knife lake, international boundary, Rainy River district, Ont.
- Portage-la-Prairie**; parish and city, on Assiniboine river, Man.
- Portal**; peak, east of mount Baker, Alta. (Not Mount Portal.)
- Portapique**; river and village, Colchester county, N.S. (Not Partipique nor Port au Pique.)
- Port Arthur**; lakeport city, Thunder Bay district, Ont.
Named Prince Arthur's Landing, in honour of H. R. H. Prince Arthur (Duke of Connaught), by Col. Wolseley, on the occasion of the landing of the troops of the Red River Expedition there, May 25th 1870. Incorporated as the town of Port Arthur, by statute of Ontario, March 25th, 1884.

- Port-au-Saumon**; post village, Charlevoix county, Que. (Not Port Salmon.)
- Port Bickerton**; village, Guysborough county, N.S. (Not Port Beckerton.)
- Port Burwell**; lightstation and village, Elgin county, Ont. (Not Big Otter Creek lightstation.)
- Port Daniel**; harbour and village, Bonaventure county, Que. (Not Port Daniel East nor St. George Port Daniel.)
- Port Daniel East*. See Port Daniel.
- Port Ebert*. See Port Hebert.
- Port Elgin**; town, Bruce county, Ont.
- Port Essington*. See Essington.
- Porter**; creek, tributary to Indian river, Yukon.
- Porter**; lake, between Atlin and Gladys lakes, Cassiar district, B.C.
- Porter**; landing, at N. end of Dease L., Cassiar district, B.C. (Not Porter's landing.)

Porter's Landing. See Porter.

Port Hebert; village, Shelburne county, N.S. (Not Port Ebert, Big Port le Bear, Big Port l'Hebert nor Port L'Hebert.)

Portland; island, west of Moresby island, southeast coast of Vancouver island, B.C.

Portier. See Porlier.

Port Joli; village, Queens county, N.S. (Not Port Jolie.)

Port Latour; village, Shelburne county, N.S. (Not Port la Tour nor Port Letour.)

Port L'Hebert. See Port Hebert.

Port Lewis; post office, Huntingdon county, Que. (Not Port Louis.)

Port Lorne; post office and lighthouse station, Annapolis county, N.S. (Not Marshall Cove nor Port Williams.)

Port Louis. See Port Lewis.

Port Maitland; lightstation and village, bay of Fundy, Yarmouth county, N.S. (Not Green Cove nor Maitland.)

Port Matoon. See Port Mouton.

Port Medway. See Medway.

Port Metway. See Medway.

Port Mouton; village, Queens county, N.S. (Not Port Matoon.)

Portobello; stream, emptying into French lake, Sunbury county, N.B. (Not Porto Bello nor Portobella.)

Port Williams. See Port Lorne.

Possession; point, east of Sooke inlet, Vancouver island, B.C.

Pot-à-l'eau-de-vie. See Brandypot.

Potato; lake and river, emptying into south side of L. LaRonge, Sask.

Pothole; creek, tributary to St. Mary river, southern Alberta. (Not Pot Hole.)

Potter; point, Ameliasburg township, Prince Edward county, Ont.

Pottersburg; railway station and village, Middlesex Co., Ont. (Not London Junction.)

Pouce-Coupé; river, tributary to Peace river, Alta. (Not Echafaud.)

Poulamon; bay, Richmond county, N.S. (Not Poulament nor Poulamond.)

Poverty; lake, Monmouth township, Haliburton county, Ont.

Povoas; mountain, east of the north end of lake Laberge, Yukon.

Power; lake, east of Anzhekumming lake, Kenora district, Ont.

Powgulchuan. See Pagwachuan.

Powingow. See Ogani.

Prairies (rivière des); river, separating, Laval county from Hochelaga and Jacques Cartier counties, Que. (Not Back river.) See also Rivière-des-Prairies.

Pratt; island and reef, southeast of Dead island, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.

Prejevalsky; point, Bennett lake, Yukon. (Not Prejevalski.)

Presbyterian; river, tributary to Leather river, eastern Saskatchewan.

Present. See Larder.

President; range of mountains and pass, west of Yoho valley, Rocky mountains, Kootenay district, B.C. (Not Emerald.) So named for the president of the Canadian Pacific Railway Company. See also 'The President.'

President. See Larder.

SESSIONAL PAPER No. 25d

- Presqu'île**; bay, peninsula and point, near S.E. corner of Northumberland Co., Ont.
- Presquile**; river, tributary to St. John river, Carleton county, N.B. (Not Presqu'île.)
- Prevest**; canyon, also river tributary to Ross river, Yukon.
- Prevost**; island, off the west end of Active pass, strait of Georgia, B.C.
- Prevost**; mount, east of Carboro bay, southeast coast of Vancouver island, B.C.
- Prevost.* See Kungbit.
- Priam**; lake, west of Manitou lake, Kenora district, Ont.

- Prince Albert Land.* See Victoria island.
- Prince Alfred**; island, Brock group, St. Lawrence river, Leeds county, Ont.
- Prince Patrick**; island, north of Banks island, N.W.T.
- Prince Arthur Land.* See Prince Albert peninsula.
- Prince Edward**; bay and point, Pr. Edw. Co., Ont. (Not S. bay nor S. Bay point.)
- Prince Edward.* See Peel.
- Prince Henry Foreland.* See Hopes Advance.
- Prince of Wales.* See Wales.
- Prince of Wales**; island, northwest of Boothia peninsula, Franklin.
- Prince Patrick**; island, north of Banks island, N.W.T.
- Prince Regent**; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont. (Not Little Stave nor McDonald's.)
- Prince Regent.* See Penitentiary.
- Prince Rupert**; harbour, and Trans. Ry. terminus, Kaien island, Coast district, B.C.
- Princess Charlotte**; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.
- Princetown**; village, Prince county, P.E.I. (Not Prince Town.)
- Pritzler**; harbour, N. shore Hudson strait, N.W.T. (Not Pritzler's nor Jackman sound.)
- Privateer**; mountain, N.E. of Blackwater range of the Rockies, Kootenay dist., B.C.
- Procter**; creek and settlement, south of Balfour, Kootenay dist., B.C. (Not Proctor.)
- Promise**; island, at the entrance to Douglas channel, Coast district, B.C.
- Protection**; island, east of Nanaimo harbour, Vancouver island, B.C. (Not Douglas.)
- Protection**; mountain, east of Baker creek, Rocky mountains, Alta.
- Proud-sitting**; lake, at headwaters of St. Maurice river, Champlain county, Que.
- Providence**; bay and point, south shore Manitoulin island, Manitoulin district, Ont.
- Provoking**; lake, in Algonquin National park, Nipissing district, Ont.
- Pruden**; bay, in south end of lake Winnipeg, Manitoba. (Not Pruden's.)
- Prud'homme**; lake, northeast of Rib lake, Timiskaming district, Ont.
- Psyche**; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.
- Ptarmigan**; creek, flowing into a large lake of the Pelly group, Yukon.
- Ptarmigan**; lake and peak, northeast of Laggan, Rocky mountains, Alta.
- Ptarmigan.* See Titkana.

- Puce**; post village, also rivière aux Puces, Essex county, Ont.
- Pudding**; burn, tributary to St. Mary river, Kootenay district, B.C.
- Puellering*. See Pelerin.
- Pugh**; peak, northwest of the "big bend" of Wheaton river, southern Yukon.
- Puke-lowogein*. See Setting.
- Pukkatawagan**; lake and river, Churchill river, Manitoba. (Not Pokkattawagan. nor Puk-a-ta-wa-gan.)
- Pulpit**; peak, south of Turquoise lake, Rocky mountains, Alta.
- Pulpwood**; point, southwestern side of Cockburn island, Manitoulin district, Ont.
- Pulsatilla**; mountain, southeast of Mt. Avens, Rocky mountains, Alta.
- Pulteney**; point, southwestern extreme of Malcolm island, at entrance to Broughton strait, Coast district, B.C. (Not Graeme.) This is the point on which stands the lighthouse established in 1905.
- Pulton**; bay and point, south shore of Okisollo channel, Coast district, B.C.
- Punichuan**; bay, in the southern end of Mistassini lake, Mistassini territory, Que.
- Punk**; island, 3 m. S.E. Grindstone Pt., L. Winnipeg, Man. (Not Deer nor Reindeer.)
- Punk*. See Deer.
- Purity**; glacier and mountain, Selkirk mountains, B.C. (Not Lardo glacier.)
- Purvis**; bank, northwest of Greene island, Manitoulin district, Ont.
- Puskitamika**; lake, south of Waswanipi lake, Abitibi territory, Que.
- Puslinch**; lake, post village, Ry. sta., and Tp. Wellington Co., Ont. (Not Schaw sta.)
- Pyramid**; creek, tributary to St. Mary river, Kootenay district, B.C.
- Pyramid**; mountain, north of mount Grey, southern Yukon.

Q

- Quadacha*. See Kwadacha.
- Quadra**; hill, Galiano island, strait of Georgia, B.C.
- Quadrà**; island, between Discovery passage and Okisollo channel, Coast district, B.C.
The southern portion of what was formerly Valdes island.
- Quamichan**; lake and river, tributary to Cowichan river, Vancouver island, B.C.
- Quaneca*. See Kwadacha.
- Qu'Appelle**; river, flowing easterly into the Assiniboine, southern Manitoba and Saskatchewan, also town in southern Saskatchewan.
- Quarry**; point, Manitoulin island, Manitoulin district, Ont.
- Quarry*. See Forsyth.
- Quartet**; lakes, near international boundary, Yale district, B.C.
- Quartz**; creek, branch of McDame creek, Dease river, Cassiar district, B.C.
- Quartz**; creek, tributary to Indian river, Yukon.
- Quatawamkedgewick*. See Kedgwick.
- Quebec**; creek, tributary to Yukon river, below Dawson, Yukon.
- Quebec**; head, eastern end of Wolfe island, Frontenac county, Ont. (Not East point.)
- Queen**; point, forms the western boundary of Walkhouse bay, Manitoulin island, Ont.
- Queen Elizabeth**; foreland, S.E. point of Loks Land, N.W.T. (Not North Foreland.)
- Queensport**; harbour, Guysborough Co., N.S. (Not Queen's Port nor Crow harbour.)

SESSIONAL PAPER No. 25d

- Queenston**; village, and Queenston heights, Lincoln county, Ont. (Not Queenstown.)
- Quesnel**; lake, mining division, river, and village, Cariboo, B.C. (Not Quesnelle.)
- Quetachu**; bay, Saguenay county, Que. (Not Quetachoo.)
- Quiet**; lake, northeast of Teslin lake, Yukon.
- Quill**; lakes, southern Saskatchewan. (Not Big Quill and Little Quill.)
- Quinitsa**. See Kwinitsa.
- Quinn**; creek, branch of Sulphur creek, Indian river, Yukon. (Not Quin.)
- Quinte**; bay of, in L. Ontario, almost separating Prince Edward county from the mainland of Ontario. (Not Quinté.)
- Quinze** (lac des); lake, an expansion of the upper Ottawa river, Timiskaming, Que.
- Quio**; river, tributary to the Ottawa, Pontiac county, Que.
- Quispamsis**; post village, Kings county, N.B. (Not Quispansis.)
- Quoieek**. See Kwoieck.
- Quyong**; railway station and village, Pontiac county, Que. (Not Quio.) Reversal of previous decision.

R

- Rabbit**; mountain, Paipoonge township, Thunder Bay district, Ont.
- Rabbit**; mountain and river, east of lake Evans, Abitibi territory, Que.
- Rabbitt**; mount, also creek, northwest of Tulameen, Yale district, B.C.
- Race**; passage and rocks, off S. point of Vancouver island, B.C. (Not Race islands.)
- Rae**; mount, Misty range, southern Alberta.
- Raft**; narrows, north of Hill island, St. Lawrence river, Leeds county, Ont.

Reeder. See Reader.

Reef. See Bonnet.

Reesor; lake, Whitchurch township, York county, Ont. (Not Middletons.)

Reeves; harbour, Big island, Hudson strait, N.W.T.

Refugee. See Conran.

Refugee. See Stovin.

Reid; island, south of Valdes island, southeast coast of Vancouver island, B.C.

Reid; mount, between Watson and Wheaton rivers, southern Yukon.

Reid; mount, southeast of lake Evans, Abitibi territory, Que.

Reid; point, south of Red bay, Bruce county, Ont.

Reid; rock, south of George island, Halifax harbour, Halifax Co., N.S. (Not Reed.)

Reid Mills; post office, Dundas county, Ont. (Not Reid's Mills.)

Reindeer; creek, tributary to Yukon river, south of Indian river, Yukon.

Reindeer; lake and river, emptying into Churchill river, Manitoba and Sask.

Reindeer. See Punk.

Remic; rapids, in Ottawa river, about two miles west of Ottawa city. (Not Remicks, Remix, nor Remous.)

Remington; creek, tributary to Indian river, Yukon.

Remous. See Remic.

Renny; island, south of Whitney point, St. Lawrence R. Leeds Co., Ont. (Not Bush.)

Reservation. See Paul.

Reserve; point, Active pass, strait of Georgia, Westminster district, B.C.

Resolution; island, at entrance to Frobisher bay, N.W.T. (Not Tudjakdjuan.)

Resolution. See Warwick.

Rest. See Dufay.

Restigouche; county and river, northern New Brunswick. (Not Ristigouche.)

Restigouche. See Ristigouche.

Retreat; cove, southwest of Galiano island, strait of Georgia, B.C.

Revelstoke; mount, railway station, and town, Kootenay district, B.C.

Rexton; town, Kent county, N.B. (Not Kingston.)

Riall; island, Brock group, St. Lawrence R. Leeds Co., Ont. (Not Millar's nor Smith's.)

Rib; lake, north of Cassels township, Timiskaming district, Ont.

Ribbon; river, tributary to Manuan river, upper St. Maurice, Champlain county, Que. (Not Rivière au Ruban.)

Ribstone; creek, tributary to Battle river, eastern Alberta. (Not Nose.)

Rich; island, Navy group, St. Lawrence river, Leeds county, Ont.

Richard; point, Nanoose harbour, east coast of Vancouver island, B.C.

Richard; point, north of "The Narrows," L. Manitoba, Man.

Richards; mount, southwest of Osborn bay, Stuart channel, Vancouver island, B.C.

Richardson; lake and river emptying into the Athabaska near its mouth, Alta.

Richardson; mount, northeast of Laggan, Rocky mountains, Alta.

Richelieu; village, on Richelieu river, Rouville county, Que. (Not Village Richelieu.)

Richmond; gulf, north of Little Whale river, New Quebec. (Not Richmond lake.)

- Richmond**; village, Carleton county, N.B. (Not Richmond Corner.)
Richmond. See Malpeque.
- Richmond.* See New Richmond.
- Richmond Corner.* See Richmond.
- Richthofen**; island and valley, lake Laberge, Yukon. (Not Richtofen.)
- Rickett**; harbour, eastern side of Cockburn island and southwesterly from Cinder point, Manitoulin district, Ont.
- Rickle**; harbour, W. of Burnt I., and N. of Western Duck I., Manitoulin dist., Ont.
- Riddell**; mount, also creek, northwest of Tulameen, Yale district, B.C.
- Riddell**; mount, between Macmillan and Ross rivers, also river tributary to the Macmillan, Yukon.
- Ridgeway**; creek, tributary to Moyie river, Kootenay district, B.C.
- Riding**; mountain, western Manitoba.
- Ridley**; island, south of Kaien island, Chatham sound, Coast district, B.C. (Not Flat nor North Porpoise.)
- Rigaud**; river, a small tributary of the Ottawa river, Glengarry and Prescott counties, Ont. and Vaudreuil county, Que. (Not rivière à la Graisse.)
- Right Hand Branch,* (Tobique R). See Campbell.
- Rigolet**; settlement, at narrows of Hamilton inlet. Ashuanipi territory. Que. (Not Rigoulette.)
- Riley**; brook, tributary to Tobique river, Victoria county, N.B.
- Rinda**; a spur of the Valhalla mountains, Kootenay district, B.C.
- Ringnes**; islands, southwest of Axel Heiberg island, N.W.T.
- Rink**; rapid, in Lewes river, below Tatchun river, Yukon.
- Riordon**; point, Boxer reach, Coast district, B.C.
- Rip**; point, Active pass, strait of Georgia, New Westminster district, B.C.
- Ripple.* See Hawkins.
- Ripple**; reef, west of Lyal island, Bruce county, Ont.
- Riske**; creek, trib. to Fraser R., above Chilcotin R., Cariboo and Lillooet dists., B.C.
- Ristigouche**; township, Bonaventure county, Que. (Not Restigouche.)
- Ristigouche.* See Restigouche.
- Ritchie**; point, north extreme of Kaien island, Coast district, B.C. (Not Hays.)
- River Beaudette.* See Beaudet.
- River Denys.* See Denys.
- River (mt.)* See Lewes.
- Rivers**; lake of the, southern Saskatchewan.
- Rivière-à-la-Martre**; post village, also Light, Signal and Telegraph station, Christie township, Gaspé county, Que. (Not Martin River nor Rivière à la Martre.)
- Rivière-des-Caches**; village, Northumberland county, N.B. (Not River de Cache nor Rivière du Cache.)
- Rivière-des-Chûtes**; village, Carleton county, N.B. (Not River de Chute.)
- Rivière-des-Fèves**; post office, Chateauguay county, Que. (Not Rivières des Fèves.)
- Rivière-des-Prairies**; village, Hochelaga county, Que. (Not Rivière des Prairies.)
 See also Prairies.
- Rivière-du-Loup**; post office and railway station, Temiscouata county, Que.

SESSIONAL PAPER No. 25d

- Rixon**; rock, near North point, at entrance to Georgian bay, Manitoulin district, Ont.
Roach. See Roche.
- Roaring**; river, tributary to Swan river, western Manitoba. (Not Rolling.)
- Roberson**; point, northeast coast of Digby island, Coast district, B.C.
- Robert**; island, northeast of Grenadier island, St. Lawrence river, Leeds county, Ont.
 (Not Cherry nor Sumac.)
- Robert**; lake, Martin river, above Tesekau lake, Mistassini territory, Que.
- Robert**; point, Markham bay, Hudson strait, N.W.T.
- Roberts**; bay, in South bay, Manitoulin island, Manitoulin district, Ont.
- Robertson**; cove, north of Lizard islands, Manitoulin district, Ont. (Not Jackson.)
- Robertson**; creek, tributary to Little Sloecan river, Kootenay district, B.C.
- Robertson**; lakes, Privat township, Timiskaming county, Que.
- Robertson**; mount, near Stikine river, north of Iskut river, Cassiar district, B.C.
- Robertson**; post office and railway station, Megantic county, Que. (Not Robertson Station post office.)
Robertson Station. See Robertson.
- Robinson**; cove, Big island, bay of Quinte, Prince Edward county, Ont.
- Robinson**; island, S. of Whitney Pt., St. Lawrence R., Leeds Co., Ont. (Not Raspberry.)
- Robinson**; lake and river, S. of N. T. Ry., N.E. of L. Nipigon, Thunder Bay dist., Ont.
- Robinson**; sound, northeast of Cornell Grinnell bay, N.W.T. (Not Robinson's.)
- Rob Roy**; creek, tributary to Dominion creek, Indian river, Yukon.
- Robson**; mount, north of the east fork of Fraser river, Cariboo district, B.C.
- Robson**; pass, north of mount Robson, Rocky mountains, Cariboo district, B.C.
- Robson**; town and railway station, on Columbia river, Kootenay district, B.C.
- Roche**; lake, Tp. 17. R. 16. W. 6 M., Yale district, B.C. (Not Roach.)
Roche à Veillons. See Algernon.
- Roche de Smet**; west of Jasper lake, western Alberta. (Not Roche Suette.)
- Rochelle**; post office, Shefford county, Que. (Not Ste. Anne-de-Stukely.)
- Roche Percée**; railway station, southeastern Saskatchewan. (Not Roche Percé.)
- Roche-Percée**; reef, St. Lawrence river, opposite Cacouna, Temiscouata county, Que.
- Rocher Déboulé**; mountains, south of Hazelton, Cassiar district, B.C. (Not Rochers Déboulés.) Previous decision revised.
- Rochers (pointe des)**; point, below cape Salmon, Charlevoix county, Que.
Roche Suette. See Roche de Smet.
- Rock**; lake, Nightingale township, Haliburton county, Ont.
Rock. See Lazy.
- Rockcliffe**; police village, Carleton county, Ont. (Not Rockcliffe.)
Rockliffe. See Stonecliff.
- Rocksprings**; post office, Leeds county, Ont. (Not Rock Springs.)
Rocky. See Descanso.
- Rocky*. See Opabin.
- Rocky*. See Tinson.
- Roes Welcome**; sound, in the northwestern portion of Hudson bay, N.W.T. (Not Rowe's Welcome nor Sir Thomas Rowe's Welcome.)
- Roger**; lake, northwest of Expanse lake, Timiskaming county, Que. (Not Rogers.)

- Rogers**; glacier, pass, and peak, and Rogers Pass railway station, Selkirk mountains, Kootenay district, B.C.
- Rogers.* See Prim.
- Rogersville**; parish, Northumberland county, N.B. (Not Rogerville.)
- Roggan**; river, emptying into James bay, New Quebec. (Not Bishop Roggan nor Great Bishop Roggan.)
- Rogue**; river, tributary to Hess river, Yukon.
- Rolleston**; island, northwest of Grenadier I., St. Lawrence river, Leeds county, Ont. *Rolling.* See Roaring.
- Rollingdam**; post village, Charlotte county, N.B. (Not Rolling Dam.)
- Rolph**; creek, tributary to St. Mary river, southern Alberta.
- Romaine**; river, lower St. Lawrence, opposite Mingan islands, Saguenay Co., Que.
- Rondeau**; harbour, park, and Ry. station, on L. Erie, Kent Co., Ont. (Not Rond Eau.)
- Root**; river, flowing southwesterly into L. Seul, Patricia district, Ont. *Root.* See Carrot.
- Rosamond**; lake, N.W. of Rugby township, Kenora district, Ont. (Not Rosamund.)
- Rose**; island, between Broughton and Robert islands, St. Lawrence river, Leeds county, Ont. (Not Grape nor Grass.)
- Rose**; lake, on international boundary, Thunder Bay district, Ont. (Not Mud.)
- Rose**; lake and river, at headwaters of Nisutlin river, Yukon.
- Rose**; pass, at head of St. Mary river, Kootenay district, B.C.
- Roseau**; river, flowing westerly into Red river, southeastern Manitoba.
- Rosebud**; creek, tributary to Stewart river, Yukon.
- Rosebud**; river, tributary to Red Deer river, Alta. (Not Arrowhead.)
- Rosenfeld**; rock, northeasterly from the east point of Saturna island, strait of Georgia, New Westminster district, B.C. (Not Rosenfelt.)
- Roseville**; village, Prince Co., P.E.I. (Not Little or S. Mimingash nor Minimegash.)
- Ross**; creek, flowing into the S. Saskatchewan at Medicine Hat, Alta.
- Ross**; island, between the east and west channels of Nelson river, Manitoba.
- Ross**; isthmus and peninsula, northwesterly portion of Franklin isthmus, N.W.T. (Not James Ross.)
- Ross**; lake, south of Stephen station, Kootenay district, B.C.
- Ross**; lake, northwest of Affleck lake, Kenora district, Ont.
- Ross**; peak, Selkirk mountains, Kootenay district, B.C.
- Ross**; river, tributary to Pelly river, Yukon.
- Rossmore**; village, Ameliasburg township, Prince Edward county, Ont.
- Rouge**; lake, Wolfe township, Terrebonne county, Que. (Not lac de la Rouge.)
- Rouge**; river, flowing into lake Ontario, Ontario and York counties, Ont. (Not Rouge creek nor Big Rouge creek.)
- Rough**; island, northeast of Grenadier island, St. Lawrence river, Leeds county, Ont. (Not Hamilton nor Little.)
- Rougie.* See Salisbury.
- Round**; lake, on Qu'appelle river, southeastern Saskatchewan.
- Round.* See Campbell.
- Round.* See Felice.

SESSIONAL PAPER No. 25d

Round. See Francis.

Round. See Ghost.

Round. See Joubert.

Round. See Lacroix.

Round. See Skelton.

Rousseau. See Arosen.

Rousselet; island, at the north end of lake Timiskaming, Ont.

Roussin. See Arosen.

Route; lake, west of Asheigamo lake, Kenora district, Ont.

Routhier; lake, Rouyn township, Timiskaming county, Que. (Not Rush.)

Rouville. See St. Hilaire.

Rouyn; lake, Rouyn township, Timiskaming county, Que. (Not Stewart.)

Rove. See Watap.

Rowan; lake, northeast of Kakagi lake, Kenora district, Ont.

Rowe; island, northerly one of Lizard group, Algoma district, Ont. (Not N. Lizard.)

Rowes. See Roes.

Rowley; island, Navy group, St. Lawrence river, Leeds county, Ont.

Roxburg; post settlement, Albert county, N.B. (Not Roxborough.)

Roxton East; post office, Shefford county, Que.

Royal; island, Brock group, St. Lawrence river, Leeds county, Ont. (Not Bathing.)

Royal; roads, south of Esquimalt harbour, Vancouver island, B.C. (Not Royal bay.)

Royal George. See Myles.

Ruban. See Ribbon.

Ruby; creek, tributary to Indian river, Yukon.

Ruby; creek and mountain, west of Surprise lake, Cassiar district, B.C.

Ruby; mountain, E. of Columbia R., between the Arrow lakes, Kootenay district, B.C.

Rudyard; reef, west of Queen point, Manitoulin island, Manitoulin district, Ont.

Ruel; shoal, southwest of Dead island, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.

Rugged. See Locke.

Rugged Island (harbour). See Lockeport.

Rundle; mount, between Bow and Spray rivers, Rocky Mountains park, Alta.

Rupert; bay and river, Mistassini, Que. Rupert House, H. B. Co., at mouth of river.

Rusagonis; river and village, Sunbury Co., N.B. (Not Rusagornis nor Rushagornis.)

Ruscom; post village, railway station, and river, Essex county, Ont. (Not Ruscomb river and village, nor Ruscom Station.)

Rush. See Routhier.

Rushagornis. See Rusagonis.

Russell; arm and point, northwest side of Prince Rupert harbour, Coast district, B.C.

Russel; creek, tributary to Little Slocan river, Kootenay district, B.C.

Russel; island and reef, S.E. of Cove I., at entrance to Georgian Bay, Bruce Co., Ont.

Ruth; island, Nanoose harbour, east coast of Vancouver island, B.C.

Ruth; lake and river, W. of Nakina R., and S. of Chikoida Mt., Cassiar district, B.C.

Ryckman; post village, Wentworth county, Ont. (Not Ryckman's Corners.)

Ryckerts. See Bedlington.

S

Saanich; inlet, southeast coast of Vancouver island, B.C.

Saanichton; bay and Ry. station, S.E. coast of Vancouver I. B.C. (Not Cordova bay.)

To avoid duplication of "Cordova" applied to a large bay to the south.

Sable; river, southeast of Chiefs point, Bruce county, Ont.

Sabl^e. See Ausable.

Sachigo; lake, and river tributary to Severn river, Patricia, Ont. (Not Achigo.)

Sackawatisi. See Sassawatisi.

Sacré-Cœur-de-Marie; post village, Thetford township, Megantic county, Que. (Not Sacré-Cœur de Marie.)

Saddle; hill, south of Satellite channel, Vancouver island, B.C. (Not Arbutus.)

Saddle; lake, also Saddle Lake post office, eastern Alberta.

Saddle; mountain, near confluence of Stikine and Anuk rivers, Cassiar district, B.C.

Saddle; mountain, southeast of Fairview mountain, Alta. (Not 'The Saddle.')

Saddle. See Ragged.

Saddleback; island, northwest of Pritzler harbour, Hudson strait, N.W.T.

Sagaminnis; lake, southwest of Wapikopa lake, upper Winisk river, Patricia, Ont.

Saganaga; lake, on international boundary, Rainy River and Thunder Bay districts, Ont. (Not Seiganagah, Seiganagan, nor Seiganagaw.)

Saganaga. See Boyer.

Sagemace; bay, in southern portion of L. Winnipegosis, Man

Sahpoochaway. See Odei.

Sah-wah-mish-she. See Sawamishe.

Sain; cape, above Pointe-au-Pic, Charlevoix county, Que.

Ste. Agnes-de-Dundee; post office, Huntingdon county, Que. (Not Ste. Agnès nor Ste. Agnès de Dundee.)

St. Alexandre; parish and railway station, also St. Alexandre Station post office, Iberville county, Que. (Not St. Alexander.)

St. Alphonse-de-Granby; village, Shefford Co., Que. (Not St. Alphonse de Granby.)

St. Andre; bank, parish, point, and village, Kamouraska county, Que.

St. Andre-de-Ristigouche; post office, Ristigouche township, Bonaventure county, Que. (Not St. André de Restigouche.)

St. Andrew; channel, southeast of Boularderie island, Cape Breton and Victoria counties, N.S.

St. Andrew; lake, in Tps. 31 and 32, R. 1 E.P.M., Manitoba. (Not Long.)

St. Andrews; post village, Stormont county, Ont. (Not St. Andrews West.)

St. Andrews; town, Charlotte county, N.B. (Not St. Andrew's.)

St. Andrews; village, Argenteuil county, Que. (Not St. Andrews East.)

Ste. Angèle-de-Rimouski; village, Matane county, Que. (Not Ste. Angele de Mercie.)

St. Ann; bay, harbour, and village, Victoria county, N.S.

St. Ann; lake, central Alberta.

St. Ann; village, Lincoln county, Ont. (Not St. Anne nor St. Ann's.)

St. Anne; island, at the mouth of St. Clair river, Lambton county, Ont. (Not St. Anne's nor St. Ann's.)

SESSIONAL PAPER No. 25d

- Ste. Anne-de-Bellevue**; village, Jacques Cartier county, Que. (Not *Ste Anne de Bellevue* nor *Ste. Anne du bout de L'Ile*.)

St. Roch-des-Aulnaies; village, L'Islet county, Que. (Not St. Roch des Aulnets.)

Ste. Rosalie; island, in Ottawa river, near Montebello, Ottawa county, Que.

St. Siméon; parish and village, Charlevoix county, Que.

St. Simon-de-Yamaska; post village and railway station, Bagot county, Que. (Not St. Simon d'Yamaska.)

- St. Sixte**; lake, and river trib. to Petite Nation R. Ottawa Co., Que. (Not Sincique.)
- St. Stanislas-de-Kostka**; post village, Beauharnois county, Que. (Not St. Stanislas.)
- St. Stephen**; town, Charlotte county, N.B. (Not St. Stephens.)
- St. Théodore-d'Acton**; post village, Bagot county, Que.
- Ste. Thérèse-de-Blainville**; village and railway station, Terrebonne county, Que. (Not Ste. Thérèse nor Ste. Thérèse de Blainville.)
- St. Urbain-de-Chateauguay**; parish and post village, Chateauguay county, Que. (Not St. Urbain de Chateauguay nor St. Urbain en haut.)
- St. Valentin**; parish and post village, St. Johns county, Que. (Not St. Valentine.)
- Sakwatamau**; river, tributary to Athabaska R., Alta. (Not Eagle nor Sa-kwa-ta-mow.)
- Salem**; post village, Cumberland county, N.S. (Not Salent.)
- Salent*. See Salem.
- Salisbury**; bay, Albert county, N.B. (Not Rougie.)
- Salmon**; arm, southerly portion of Shuswap lake, also river emptying into the arm from the south, Yale district, B.C.
- Salmon Arm**; post settlement and railway station, on Salmon arm of Shuswap lake, Yale district, B.C.
- Salmon**; cape, above Pte. des Rochers, Charlevoix county, Que. French usage Saumon (cap au), which see.
- Salmon**; island, north side of Big bay, Hastings county, Ont.
- Salmon**; river flowing into Big bay, Hastings and Lennox counties, Ont.
- Salmon*. See Kinonge.
- Salmon*. See Wicked.
- Salt**; point, Presqu'île peninsula, Brighton township, Northumberland county, Ont.
- Salt*. See Way.
- Saltspring**; island, southeast coast of Vancouver I., B.C. (Not Admiral nor Chuan.)
- Salvus**; railway station, north shore of Skeena river, Coast district, B.C.
- Samson**; peak, north of the narrows of Maligne lake, Rocky Mts., western Alberta.
- Sand**; bay, outlet of Rainy lake, international boundary, Rainy River district, Ont.
- Sand*. See Desert.
- Sand*. See Hyndman.
- Sanderson**; point, west side of Lower Arrow lake, Kootenay district, B.C.
- Sanderson*. See Iononoaklin.
- Sand Point**; lake, southeast of Namakan L., Int. boundary, Rainy River district, Ont.
- Sandy*. See Pakwa.
- Sandy-beach**; lake, at headwaters of St. Maurice river, Champlain county, Que.
- Sanford**; mount, southwest of Snowdon range, Cassiar district, B.C.
- Sangrida**; peak, Valkyr mountains, Kootenay district, B.C.
- San Josef**; bay, near N.W. end Vancouver I., B.C. (Not San Joseph nor St. Patrick's.)
- San Juan**; river, flowing into Juan de Fuca strait, Vancouver island, B.C.
- San Miguel**; group of islands, off the entrance to Friendly cove, Nootka sound, Vancouver island, B.C.
- Sansum**; narrows, between Saltspring and Vancouver islands, B.C.
- Sapasook*. See Sapasuk.
- Sapasoose*. See Sapasuk.

SESSIONAL PAPER No. 25d

- Sapasuk**; lake on N. T. Ry. northeast of L. Nipigon, Thunder Bay district, Ont.
(Not Sapasook nor Sapasoose.)
- Sapphire**; col, between, "The Dome" and "Castor," Selkirk Mts., Kootenay dist., B.C.
- Sarbach**; mount, north of Howse pass, Rocky mountains, Kootenay district, B.C.
- Sarcee**; butte and Indian reserve, on Elbow river, Alta.
- Sasaginaga**; lake, northwest of Cobalt, Timiskaming district, Ont. (Not Clear.)
- Sasakwei**; lake, southwest of Peake lake, Kenora district, Ont. (Not Summit.)
- Saskatchewan**; mount, south of Mt. Athabaska, Rocky mountains, Alta.
Sashatchewan. See Turnagain.
- Saskeram**; lake, west of Pas, Manitoba. (Not Indian Pear Island lake.)
- Sass**; river, trib. to Little Buffalo R., S. of Great Slave L., N.W.T. (Not Sass-tessi.)
- Sassaganaga**; lake, northeast of Kipawa lake, Pontiac county, Que.
- Sassawatisi**; lake, at headwaters of Manuan river, Champlain county, Que. (Not Sackawatesie nor Chisaouataisi.)
Sass-tessi. See Sass.
- Satasha**; lake, west of Nordenskiöld river, Yukon.
- Satellite**; channel, between Saltspring I. and Saanich peninsula, Vancouver I., B.C.
- Saturn**; rock, southwest of Greenough point, Bruce county, Ont.
- Saugeen**; peninsula, the northwestern portion of Bruce county, Ont.
- Saugeen**; river, flowing into L. Huron at Southampton, Bruce Co., Ont. (Not Saugink.)
- Saugum**; creek, E. of Kootenay R., N. of Steele, Kootenay dist., B.C. (Not Six-mile.)
- Sault-au-Cochon**; river, Saguenay county, Que. (Not Saut de Cochon.)
- Saulteux**; river, tributary to Lesser Slave R., Alta. (Not Sauteur nor Sauteux.)
- Saumon** (cap au); cape, above Pte. des Rochers, Charlevoix county, Que. English usage (cape) Salmon, which see.
- Saunders**; reef, near Misery bay, Manitoulin island, Manitoulin district, Ont.
Saut de Cochon. See Sault-au-Cochon.
Saut de Mouton. See Mille Vaches.
Sauteur. See Saulteux.
Sauteux. See Saulteux.
- Savant**; lake, south of L. St. Joseph, Thunder Bay district, Ont.
- Savage**; island, northeast of Whitney point, St. Lawrence river, Leeds county, Ont.
- Savage**; post office, Shefford county, Que. (Not Savage's Mills.)
Savage. See Upper Savage.
Savasse Berry. See Serviceberry.
- Sawamisshi**; lake, Stanhope township, Haliburton Co., Ont. (Not Sah-wah-mish-she.)
- Sawback**; range of mountains, north of Bow river, Rocky mountains, Alta.
- Sawback**; range of mountains, west of Stikine river, Cassiar district, B.C.
Sawbill. See Sheldrake.
- Sawyer**; pass, at head of St. Mary river, Kootenay district, B.C.
- Saxon**; island, south of Shute point, Bruce county, Ont.
Sayia. See Sayyea.
- Sayunei**; range of mountains, Gravel river, N.W.T. (Not Sayunne.)
- Sayyea**; creek, tributary to upper Liard river, Yukon. (Not Sayia.)
- Scalping Knife**; mountain, east of Columbia river, Kootenay district, B.C.

Scatari; island, off the coast of Cape Breton I., N.S. (Not Scattarie, nor Scatary.)
Scentgrass; lake, southeast of Jackfish lake, central Saskatchewan. (Not Scent Grass.)
Schaffner; mount, northwest of Mt. Biddle, Rocky mountains, Kootenay district, B.C.
Schaw. See Puslinch.

Schist; lake, northwest of Tawatinaw lake, Kenora district, Ont.

Schley Land. See Ellesmere.

Schnabel; creek, flowing into Annie lake, southern Yukon.

Schnare; point, north shore of St. Margaret bay, Halifax county, N.S. (Not Snares.)

Schnarr; lake, Melick and Redditt townships, Kenora district, Ont.

Schooner. See Miles.

Schreiber; point, north of Kaien island, Prince Rupert harbour, Coast district, B.C.

Schwatka; river, tributary to Nordenskiöld river, southern Yukon.

Scorpion; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.

Scotch Bonnet; island and lightstation, west of Wellington (Big Sandy) bay, Prince Edward county, Ont. (Not Egg island.)

Scotchie; reef, at South Baymouth, Manitoulin island, Manitoulin district, Ont.

Scotsman; bay, Kings county, N.S. (Not Scots, Scot's nor Scotsman's.)

Scott; inlet, Metlakatla bay, Coast district, B.C.

Scott; mount, east of Rabbit mountain, Abitibi territory, Que.

Scott; point, on north side of entrance to Baie du Doré, Bruce county, Ont.

Scougall; bank, southwest of Macgregor point, Bruce county, Ont.

Scout; reef and spit, southwest of Burke island, Bruce county, Ont.

Scratching. See Morris.

Scroggie; creek, tributary to Stewart river, Yukon.

Scud; river, tributary to Stikine river, Cassiar district, B.C.

Sea; lake, Murchison township, Nipissing district, Ont.

Seagram; lake, southwest of Manito lake, central Saskatchewan.

Seal; cove, at north end of Kaien island, Coast district, B.C.

Seal. See Dog.

Seal. See Tisiriuk.

Sealion; mountain, northeast of Moberly, Rocky mountains, Kootenay district, B.C.

Seals Home. See LaMotte

Seaman; reef, entrance to Wood bay, S. shore Manitoulin I., Manitoulin dist., Ont.

Seashell; rock, west of Lyal island, Bruce county, Ont.

Seaton. See Seton.

Secretary; islands, north of Saltspring island, S.E. coast of Vancouver I., B.C.

Secretary. See Donaldson.

Sechelt; inlet, north of the strait of Georgia, B.C. (Not Sechelt.)

Seed; lake, east of Carp lake, international boundary, Rainy River district, Ont.

Seeley; village, Leeds county, Ont. (Not Seeley's Bay nor Seely's Bay.)

Seepanock. See Sipanok.

Segatiga; brook, tributary to Burntwood river, Manitoba.

Seggemak; lake, southeast of Boyer lake, Kenora district, Ont. (Not Black Bird.)

Segum Segs. See Kejimkujik.

Seiganagah. See Saganaga.

SESSIONAL PAPER No. 25d

Seiganagan. See Saganaga.

Seiganagaw. See Saganaga.

Sekulumun; lake, west of Aishihik lake, Yukon.

Sekwi; brook, canyon, and mountain, Gravel R., above Natla R., N.W.T.

Selby; lake, east of Anzhekumming lake, Kenora district, Ont. (Not Lynx.)

Selkirk; mount, Mitchell range, Kootenay district, B.C.

Selkirk; N. W. Mounted Police post, at the mouth of Lewis river, Yukon. The site of the old fort of the H. B. Co. is on the opposite bank. (Not Fort Selkirk.)

Selous; mount, between the forks of Macmillan river, Yukon.

Selwyn; island, west of Humboldt bay, L. Nipigon, Thunder Bay district, Ont.

Selwyn; mount, east of mount Dawson, Selkirk mountains, Kootenay district, B.C.

Selwyn; river, tributary to Yukon river, west of Lewes river, Yukon.

Semenof; hills, at confluence of Lewes and Big Salmon Rs., Yukon. (Not Semenow.)

Semiamu; bay, E. of Boundary bay, New Westminster dist., B.C. (Not Semiahmoo.)

Sentinel; mountain, Tp. 15, R. 4, W. 5 M., southern Alberta.

Sentinel; mountain, above the junction of Cline and Saskatchewan rivers, Rocky mountains, Alberta.

Separation; lake, English river, Kenora district, Ont.

Separation; point, entrance Cowichan harbour, Vancouver I., B.C. (Not Cowichan.)

Sepewesk. See Sipiwesk.

Sept-Iles. See also **Seven Islands.**

Seraph; mountain, Selkirk range, Kootenay district, B.C.

Serpentine; lake, Anstruther township, Peterborough county, Ont.

Serviceberry; creek, tributary to Rosebud river, Alta. (Not Savasse Berry.)

Seseganaga; lake, east of Sturgeon lake, Thunder Bay district, Ont.

Sesikinaga; lake and river, at headwaters of Wenesaga river, Patricia, Ont.

Setidgi. See Sitidgi.

Seton; creek and lake, west of Lillooet, Lillooet district, B.C. (Not Seaton.)

Setting; lake and river, Grass river, Manitoba. (Not Net Setting nor Puke-lowogcin.)

Soul (lac); lake, Kenora and Patricia districts, Ont.

Seven Acre. See Melville.

Seven Islands (Eng. usage) **Sept Iles** (Fr. usage); group of islands, bay, and H. B. Co. post, north shore of St. Lawrence river, Saguenay county, Que.

Sevenpersons; coulée and river, southwest of Medicine Hat, Alta. (Not Seven Persons.)

Seven Pines. See Bass.

Severn; lake and river, emptying into the southerly side of Hudson bay, also H. B. Co.'s post at mouth of river, Patricia district, Ont. (Not Fort Severn Post.)

Sévigny; island, in St. Lawrence river, near Valleyfield, Soulanges county, Que. (Not Petite Ile aux Cygnes.)

Seymour; arm, northerly portion of Shuswap lake, Yale district, B.C.

Shabogama; lake and river, Pontiac county, Que. (Not Shabokama.)

Shabumeni; lake and river, S.W. of Cat L., Patricia district, Ont. (Not Shaboomene.)

Shad. See Shag.

Shaft; point, Departure bay, east coast of Vancouver island, B.C.

- Shag**; bay and head, also Shag Bay post office, Halifax county, N.S. (Not Shad.)
- Shagamu**; lake and river, west of Winisk river, Patricia district, Ont. (Not Shagamew nor Shakeneh.)
- Shaganash**; island, northeast of Pt. Magnet, Thunder Bay district, Ont.
- Shakes**; creek, tributary to Stikine river, south of Glenora, Cassiar district B.C.
- Shakespeare**; island, in Nipigon lake, Thunder Bay district, Ont.
- Shakwak**; valley, west of Dezadeash lake, Yukon.
- Shakaneh*. See Shagamu.
- Shallop**; creek, south side of Anticosti island, Saguenay county, Que. (Not Chaloupe river nor Jupiter creek.)
- Shallow**; lake, between Bernard and Tutshi lakes, Cassiar district, B.C.
- Shallow*. See Mennin.
- Shallow*. See Pakwash.
- Shamattawa**; river, tributary to Winisk river, Patricia district, Ont. (Not Matawa nor Sha-mat-tay-wah.)
- Shames**; railway station, also river tributary to Skeena river, Coast district, B.C.
- Shamrock**; bank, southeast of Gatacre point, Manitoulin I., Manitoulin district, Ont.
- Shamus**; river, emptying into Matchimanito lake, Pontiac county, Que.
- Shangoina**; island, east of Thunder cape, Thunder Bay district, Ont.
- Shanks**; lake, Tp. 1, Rge. 21, W. 4th M., southern Alberta.
- Shannonville**; village, Tyendinaga township, Hastings county, Ont.
- Shanly**; post office, Grenville county, Ont. (Not Shanley.)
- Shantee*. See McMahan.
- Shanty*. See McMahan.
- Sharbau**; island, at southeasterly entrance to Rivers inlet, Coast district, B.C. (Not Sharban.) Reversal of previous decision.
- Sharp**; lake, northwest of Cobalt, Timiskaming district, Ont.
- Sharp**; mount, east of mount Goodsir, Rocky mountains, Kootenay district, B.C.
- Sharp*. See Jack.
- Sharpe**; creek, flowing westerly into Bulkley river, below Moricetown, Cassiar district, B.C. (Not Boulder.)
- Sharp Mountain* (lake). See Elizabeth.
- Shaughnessy**; mount, N. of Hermit mountain, Selkirk Mts., Kootenay district, B.C.
- Shaver**; river, flowing easterly into Primrose lake, central Alberta and Saskatchewan.
- Shawanaga**; inlet, river, and township, Parry Sound district, Ont. (Not Franklin inlet nor Shawanaga bay.)
- Shawatlan**; lake and passage, northeast of Kaien island, Coast district, B.C. (Not Shawatlans nor Shoo-wah-tlans.)
- Shawatum**; mountain, north of Nepopekum creek, Yale dist., B.C. (Not Steamboat.)
- Shawenegan**; falls, lake, rivers, township, and village, St. Maurice county, Que. (Not Shawinigan nor Shawanegan.)
- Shawnigan**; creek and lake, also Shawnigan Lake, P.O. and railway station, Vancouver island, B.C.
- Sheaffe**; island, Brock group, St. Lawrence river, Leeds county, Ont. (Not Black Charlie nor Brush.)

SESSIONAL PAPER No. 25d

Sheak. See Sheek.

Sheba; a two-peaked mountain, at forks of Gun creek, Lillooet district, B.C.

Shebeshekong; bay, also channel between Franklin island and the mainland, Parry Sound district. Ont.

Shecake; island, South bay, Manitoulin district. Ont.

Shecatica. See Shekatika.

Shedlui. See Deception.

Sheehan; lake, Halifax county, N.S. (Not Shehea.)

Sheek; island, St. Lawrence river, west of Cornwall, Stormont county, Ont. (Not Sheak, Sheek's Sheik's, Shieck, nor Shieck's.)

Sheep; lake and mountain, east of Tatonduk river, Yukon.

Sheep; river, tributary to Highwood river, southern Alberta. (Not Sheep creek.)

Sheepshank. See Shesheeb

Sheesheeb. See Shesheeb.

Sheffield Vault; brook, flowing into Minas channel, Kings county, N.S.

Shegunia; river, flowing westerly into Skeena river, above Hazelton, Cassiar district, B.C. (Not She-gun-ya.)

Shehea. See Sheehan.

Sheik's. See Sheek.

Shekatika; bay, west of the strait of Belleisle, Saguenay Co., Que. (Not Shecatica.)

Shelburne; bay, harbour, and town, Shelburne Co., N.S. (Not Shelburne Harbour.)

Shelburne Harbour. See Shelburne.

Sheldon; lake, Lutterworth township, Haliburton county, Ont. (Not Sheldon's.)

Sheldon; lake, on Ross R., also mountain between Macmillan and Ross Rivers, Yukon.

Sheldrake; river, Saguenay county, Que. (Not Sawbill.)

Shell; brook, tributary to Shell river, north of Prince Albert, Sask.

Shellbrook; post office, Sec. 16, Tp. 49, R. 3, W. 3 M., Sask. (Not Shell Brook.)

Shell; lake and river, tributary to the Saskatchewan, central Saskatchewan.

Shell; river, tributary to Assiniboine river, western Manitoba.

Shemogue; harbour and town, Westmorland Co., N.B. (Not Gr. Shemogue nor Bristol.)

Shemong. See Chemung.

Sheogomoc. See Shogomoc.

Sheol; mountain, east of mount Aberdeen, Alberta.

Shepherd; mount, north of Sooke basin, Vancouver island, B.C.

Sherbrooke; city and county, Que. (Not Sherbrook.)

Sherbrooke; creek and lake, northwest of Hector station, Kootenay district, B.C.

Sherbrooke; islands, between Garret and Lynedoch Is., St. Lawrence R., Leeds Co., Ont.

Sherbrooke; township, in Haldimand county, Ont. (Not Sherbrook.)

Sherbrooke; village in Guysborough county, N.S. (Not Sherbrook.)

Sherringham; point, west of Sooke inlet, Vancouver island, B.C. (Not Sherringham.)

Sherwood; point, Presqu'île bay, Northumberland county, Ont. (Not Sherwood's.)

Sherwood Spring; post village, Leeds county, Ont. (Not Sherwood Springs.)

Shesheeb; bay and point, east of Black bay, Thunder Bay district, Ont. (Not Sheesheeb, Shesheep, nor Sheepshank.)

Shesheinquann. See Shoshokwan.

Sheslay; river, tributary to Inklin river, Cassiar district, B.C.

Shezal; canyon, Gravel river, below Natla river, N.W.T.

Shictahawk. See Shiktahawk.

Shieck. See Sheek.

Shields; landing, on west side of Lower Arrow lake, Kootenay district, B.C.

Shiktahawk; river, tributary to St. John river, Carleton county, N.B. (Not Shictahawk, Shikatehawk, nor Shikitihawk.)

Shingwak; lake, north of Cameron lake, Kenora district, Ont. (Not Pine.)

Ship; bank, in Owen channel, Manitoulin district, Ont.

Ship; island, N.E. from Horse point, Ameliasburg township, Prince Edward Co., Ont.

Shippigan; harbour, island and village, Gloucester county, N.B. (Not Shippegan.)

Shi-shi-shi. See Octave.

Shoal; point, in Presqu'île bay, Brighton township, Northumberland county, Ont.

Shoe; island, northwest of Grenadier island, St. Lawrence river, Leeds county, Ont.

Shoemaker. See Ingall.

Shogomoc; lakes, and river tributary to St. John river, York county, N.B. (Not Shegomoc nor Shogamoc.)

Sholiaban; creek and fishing station, west of Mekattina cape, Saguenay county, Que. (Not Choniaban, Souriban, nor Sourilaban.)

Shongwashu; lake, E. of Boyer L., Kenora dist., Ont. (Not Shongwashoucheneibwin.)

Shookum. See Skookum.

Shoo-wah-tlans. See Shawatlan.

Shoshokwan; lake, and river tributary to upper Ottawa river, Montcalm and Pontiac counties, Que. (Not Shoshoquon nor Shesheinquann.)

Shotbolts. See Gonzales.

Shoulie. See Shulie.

Shouswap. See Shuswap.

Shubenacadie; lake, Halifax and Hants counties, N.S. (Not Grand nor Shubenacadie Grand.)

Shulaps; mountain, between the forks of Bridge river, Lillooet district, B.C.

Shulie; river and village, Cumberland county, N.S. (Not Shoulie.)

Shunda; creek, flowing southeasterly enters the Saskatchewan in Tp. 40-13-5, Alta. (Not Mire.)

Shuswap; lake, river, and railway station, Yale district, B.C. (Not Shouswap lake, nor Spalumcheen river.)

Shuswap; mountains, east of Shuswap lake, Yale district, B.C.

Shute; passage, southwest of Portland island, southeast coast of Vancouver I., B.C.

Shute; point, on east shore of Stokes bay, Bruce county, Ont.

Sibbald; creek, tributary to Jumpingpound creek, southern Alberta.

Sibell; bay, Ladysmith harbour, Vancouver island, B.C.

Sibert; point, at southeast entrance to Pine Tree harbour, Bruce county, Ont.

Sicannie Chief. See Sikanni Chief.

Sidney; channel, island, and town, S.E. coast of Vancouver I., B.C. (Not Sydney.)

Sidney; township, in Hastings county, Ont.

SESSIONAL PAPER No. 25d

- Siffleur**; mountain, south of the junction of Saskatchewan and Siffleur rivers, Rocky mountains, Alberta.
- Siffleur**; river, tributary to Saskatchewan river, Alta.
- Sifton**; lake, south of Shabogama lake, Pontiac county, Que.
- Sifton**; mount, Hermit range, Selkirk mountains, Kootenay district, B.C.
- Sifton**; mountains, west of lake Laberge, Yukon.
- Siggia*. See Haven.
- Sikanni Chief**; river, tributary to Fort Nelson river, Cariboo and Cassiar districts, B.C. (Not Sicannie Chief.)
- Silver**; creek, flowing northerly into Fraser river, below Hope, Yale district, B.C.
- Silver**; islet, in L. Superior, 6 miles east of Thunder cape; also Silver Islet landing, wharf and settlement, on north shore of L. Superior, $\frac{2}{3}$ of a mile from Silver islet, Thunder bay district, Ont.

- Simcoe**; county and lake, southeast of Georgian bay, Ont.
- Simcoe**; island, west of Wolfe I., St. Lawrence R., Frontenac Co., Ont. (Not Gage.)
- Similkameen**; river, Yale district, B.C. (Not South Similkameen.)
- Simmons**; creek, tributary to Stewart river, below Scroggie creek, Yukon.
- Simms*. See Sims.
- Simon**; bay and point, entrance to Greenough harbour, Bruce county, Ont.
- Simon**; lake, south of Obaska lake, Timiskaming county, Que.
- Simonette**; river, tributary to Smoky river, Alta.
- Simpson**; lake and mountains, between Liard and Frances rivers, Yukon.
- Simpson**; pass and river, N.W. of Mt. Assiniboine, Alta. and Kootenay district, B.C.
- Simpson**; rock, Southgate group, Queen Charlotte sound, Coast district, B.C.
- Simpson Tower**; mountain, west of Frances lake, Yukon. (Not Simpson's.)
- Sims**; bay and island, South bay, Manitoulin district, Ont. (Not Simms.)
- Sincique*. See St. Sixte.
- Singoosh*. See Singush.
- Singush**; lake, in Duck Mountain Forest reserve, western Manitoba. (Not Singoosh.)
- Sinking**; lake, Tps. 59 & 60, R. 6, 4 M., eastern Alberta.
- Sinkut**; creek and lake, south of Nechako river, Cariboo, B.C. (Not Tsinkut.)
- Sipanok**; channel, between Carrot and Saskatchewan rivers, Sask. (Not Seepanok nor Seepanock.)
- Sipiwesk**; lake, north of Cross lake, Nelson river, Manitoba. (Not Sepewesk.)
- Sir Donald**; mount, also glacier and range of mountains in the Selkirks, B.C.

- Sir Sandford**; mount, also range of mountains and glacier, Selkirk mountains, Kootenay district, B.C.
- Sir William**; island, west of Lynedoch island, St. Lawrence river, Leeds county, Ont.
- Sisipuk**; lake on Churchill river, Manitoba and Saskatchewan. (Not Duck.)
- Sisson**; lake and river, tributary to Tobique river, Victoria county, N.B. (Not Little Tobique nor West Branch of Tobique river.)
- Sisters**; islands, east of Fair point and northwest of Gordon island, St. Lawrence river, Leeds county, Ont.
- Sitidgi**; lake, north of Great Bear lake, N.W.T. (Not Setidgi.)
- Siwiti**; rock, Blunden harbour, Queen Charlotte sound, Coast district, B.C.
- Six-mile*. See Saugum.
- Sixteen mile*. See Oakville.
- Sixty**; creek, branch of Henderson creek, Yukon.
- Sixtymile**; river, tributary to Yukon river, Yukon.
- Skagit**; range of mountains and river, in southwestern portion of Yale district, B.C.
- Skaloo*. See Skelu.
- Skeena**; river, emptying into the Pacific, Cassiar and Coast dists., B.C. (Nöt Skena.)
- Skelton**; island, Brock group, St. Lawrence R., Leeds Co., Ont. (Not Big nor Round.)
- Skelu**; inlet, Graham island, Queen Charlotte Is., Coast district, B.C. (Not Skaloo.)
- Skena*. See Skeena.
- Skidegate**; inlet, also channel between Graham and Moresby islands, Queen Charlotte islands, Coast district, B.C.
- Skinner**; bluff, north of Cowichan harbour, Vancouver island, B.C.
- Skinner Pond**; village, Prince county, P.E.I. (Not Skinner's Pond.)
- Skirmish*. See Wild Horse.
- Skirt**; mountain, west of Esquimalt, Vancouver island, B.C. (Not Skirt hill.)
- Skoki**; mountain and valley, northwest of Fossil mountain, Rocky Mts., Alta.
- Skookum**; lake, Galbraith township, Algoma district, Ont. (Not Shookum.)
- Slate**; creek, tributary to Klondike river, Yukon.
- Slate**; lake, on Wenasaga river, northwest of L. Seul, Patricia district, Ont.
- Slate**; pass, between headwaters of Klondike and McQuesten rivers, Yukon.
- Slaughenwhite**; point, northeast of Head harbour, St. Margaret bay, Halifax county, N.S. (Not Oakland.)
- Slave*. See Lesser Slave.
- Slave*. See Sleeve.
- Sleepy**; river, emptying into Obaska lake, Timiskaming county, Que.
- Sleeve**; lake, Tps. 59 & 60, R. 6, W. 4 M., eastern Alberta. (Not Slave.)
- Slocan**; lake, river, and town, Kootenay district, B.C. (Not Slocan City.)
- Slocoh*. See Sloko.
- Sloko**; inlet, lake, mountain, and river, Cassiar district, B.C. (Not Slocoh.)
- Small*. See Little Bow.
- Small Duck**; creek, tributary to Rock creek, Klondike river, Yukon.
- Small Trout*. See Meggisi.
- Smart**; mount, west of mount Bonney, Selkirk mountains, Kootenay district, B.C.
- Smith**; creek, tributary to the south branch of Brazeau river, central Alberta.

SESSIONAL PAPER No. 25d

- Smith**; point, southwestern point of Cockburn island, Manitoulin district, Ont.
- Smith**; rock, in Fitzwilliam channel, Manitoulin district, Ont.
- Smith*. See Wynott.
- Smith's*. See Riall.
- Smith's creek*. See Nith river.
- Smiths Falls**; railway station and town, Lanark county, Ont. (Not Smith's Falls.)
- Smoke**; lake, in Algonquin National park, Nipissing district, Ont.
- Smoke**; point, in Weller bay, Ameliasburg township, Prince Edward county, Ont.
- Smoke*. See Aubrey.
- Smoke*. See Hickey.
- Smokehouse**; island, north of Chiefs point, Bruce county, Ont.
- Smoky**; lake, northwest of Victoria settlement, Alta.
- Smoky**; river, tributary to Peace river, Alta. (Not Smoking.)
- Smoothrock**; lake, northwest of L. Nipigon, Thunder Bay district, Ont. (Not Smooth Rock Island lake.)
- Smoothrock**; lake, south of Manitou lake, Kenora district, Ont. (Not Smooth Rock.)
- Snake**; island, north of Cedar island, bay of Quinte, Hastings county, Ont.
- Snake**; island, off Departure bay, east coast of Vancouver I., B.C. (Not Lighthouse.)
- Snake*. See Bloomfield.
- Snake*. See Fox.
- Snake*. See McCallum.
- Snake*. See Matheson.
- Snake*. See Sylvan.
- Snares*. See Schnare.
- Snider**; post office, Halton county, Ont. (Not Snider's Corners.)
- Snider**; rock, northwest of Martini I., S.W. coast of Digby I., Coast district, B.C.
- Snider's Corners*. See Snider.
- Snowcap**; mountain, west of lower part of Stikine river, Cassiar district, B.C.
- Snowdon**; range of mountains, southeast of Gladys lake, Cassiar district, B.C.
- Snowslide**; creek, tributary to Cariboo creek, Kootenay district, B.C.
- Snowy**; mountain, east of Stikine river, near the elbow, Cassiar district, B.C.
- Sockeye**; railway station, north shore of Skeena river, Coast district, B.C.
- Soda**; creek, flowing into upper branch of Hunker creek, Yukon.
- Sodalite**; valley, east of Ice river, Rocky mountains, Kootenay district, B.C.
- Sogakwa**; portage, at head of Pizustigwan river, upper Winisk river, Patricia, Ont.
- Solitude**; mountain, east of Columbia river, Rocky mountains, Kootenay district, B.C.
- Solmes**; island, east of Telegraph island, bay of Quinte, Prince Edward county, Ont.
- Solmesville**; post village, Sophiasburg township, Prince Edward county, Ont.
- Solomons Temples**; islands, north of Charlton island, James bay, New Quebec. (Not Solomon Temple.)
- Somass**; river, flowing into the head of Alberni canal, Vancouver island, B.C. (Not Somas, Somos, Sumas, nor Sumass.)
- Somenos**; lake and post settlement, north of Cowichan river, Vancouver island, B.C.
- Somerset**; island, north of Boothia peninsula, N.W.T. (Not North Somerset.)
- Sonata**; mountain and névé, Selkirk mountains, Kootenay district, B.C.

- Sonora**; island, between Nodales and Okisollo channels, Coast district, B.C. The northern portion of what was formerly Valdes island.
- Sooke**; basin, bay, harbour, inlet, lake, and river, Vancouver island, B.C.
- Sophia**; mountain, near international boundary, Kootenay and Yale districts, B.C.
- Sophiasburg**; township, Prince Edward county, Ont. (Not Sophiasburgh.)
- Sorcerer**; glacier and mountain, Selkirk mountains, Kootenay district, B.C.
- Soskumika**; lake, an expansion of Nottaway river, Abitibi territory, Que.
- Soulanges*. See Dondaine.
- Sounding**; creek and lake, southeastern Alberta.
- Source**; lake, in Algonquin National park, Nipissing district, Ont.
- Souriban*. See Sholiaban.
- Sourilban*. See Sholiaban.
- Souris**; river, tributary to the Assiniboine, Manitoba and Saskatchewan.
- Souris**; town, Kings county, P.E.I. (Not East Souris.)
- South**; bay, S.E. end of Manitoulin I., Manitoulin dist., Ont. (Not Manitoulin Gulf.)
- South**; lake, on international boundary, Thunder Bay district, Ont.
- South*. See Algernon.
- South*. See Koksoak.
- South*. See Prince Edward.
- Southampton**; village, at the mouth of Saugeen river, Bruce county, Ont.
- South Antler*. See Antler.
- South Bay*. See Prince Edward.
- South Baymouth**; town site, Manitoulin island, Manitoulin district, Ont.
- South Br. Highwood R.* See Stimson creek.
- South Br. Little river*. See Flemming brook.
- South Branch, Moose (river)*. See Mattagami.
- South Duck**; river, flowing easterly and northerly to Duck bay, lake Winnipegosis, Man. (Not Duck River South.)
- Southern Indian**; lake, on Churchill R., Manitoba. (Not Indian nor South Indian.)
- Southesk**; river, tributary to Brazeau river, Alta. (Not Southesk Branch.)
- South fork of Beaver (creek)*. See Crystal.
- South Fowl**; lake, on Int. boundary, Thunder Bay district, Ont. (Not Cock.)
- Southgate**; river, flowing southwesterly into Bute inlet, Coast district, B.C.
- South Heart**; river, flowing into the northwest end of Lesser Slave lake, Alta.
- South Joggins*. See Joggins.
- South Joggings*. See Joggins.
- South Mya*. See Mya.
- South Nation**; river, flowing through the counties of Grenville, Dundas, Stormont, Russell, and Prescott, and emptying into the Ottawa. (Not Little Nation, Nation, nor Petite Nation.)
- South Petawawa*. See Petawawa.
- South Porpoise*. See Lelu.
- South Rideau river*. See Kemptville creek.
- South Similkamcen*. See Similkameen.

SESSIONAL PAPER No. 25d

South Thompson; river, flowing from the Shuswap lakes to Kamloops lake, Yale district, B.C.

South Wellington; post settlement, west of Nanaimo river, Vancouver island, B.C.

Southwest; bay, in lake Evans, Abitibi territory, Que.

Southwest; point, Anticosti island, Saguenay county, Que. (Not South West.)

Soyers; lake, Minden township, Haliburton county, Ont.

Spallumcheen. See Shuswap.

Spar; lake, south of Separation lake, Kenora district, Ont.

Sparrow; island, southwest of Stovin I., Brock group, St. Lawrence R., Leeds Co., Ont.

Spearing; mount, north of Tulameen river, Yale district, B.C.

Spectacles; rocks, 1½ miles west of Gananoque, St. Lawrence river, Leeds county, Ont.

Spectacles; islands (2) north of Wolfe I., St. Lawrence R., Frontenac Co., Ont.)

Spence; lake, south of L. Winnipegosis, Man.

Spencer; creek, tributary to Bow river, Alta.

Spicer; harbour and island, north shore of Hudson strait, N.W.T.

Spike; peak, northeast of Moberly, Rocky mountains, Kootenay district, B.C.

Spillimacheen; mountain, and river tributary to Columbia river, Kootenay district, B.C. (Not Spill En Mee Chene nor Spillimichene.)

Spilsbury; island, Navy group, St. Lawrence river, Leeds county, Ont.

Spire; island and ledge, S. of Frederick Pt., Prince Rupert harbour, Coast dist., B.C.

Spirit; creek, tributary to Wild Horse river, Kootenay district, B.C.

Spirit; river, also Spirit River, post settlement, central Alberta.

Spirit. See Beauchamp.

Spit; head, westerly extreme of Howe island, St. Lawrence river, Frontenac Co., Ont.

Split; cape, Kings county, N.S. (Not Splitt.)

Split; lake, on Nelson river, Manitoba.

Spong; island, northeast of Whitney point, St. Lawrence river, Leeds county, Ont.

Spray; mountains and river, south of Bow river, Rocky Mountains park, Alta

Spring; cove, southwest side of entrance to Ucluelet arm, Barkley sound, Vancouver island, B.C.

Springer; point, on the south side of Sonora island, Coast district, B.C.

Springhill; post settlement, west of Fredericton, York county, Ont.

Springhill; village, Frontenac county, Que. (Not Spring Hill.)

Sproat; mount, north of Upper Arrow lake, Kootenay district, B.C.

Spruce; river, flowing southerly into the Saskatchewan at Prince Albert, Sask. (Not Little Red.)

Sprucegrove; post office, west of Edmonton, Alta. (Not Spruce Grove.)

Squamish; pass and post office, also river entering the head of Howe sound, B.C.

Squally; reach, in southern portion of Saanich inlet, Vancouver island, B.C.

Square; bay, east of Dominion point, Manitoulin island, Manitoulin district, Ont.

Square; brook, flowing into Minas channel, Kings Co., N.S. (Not Square Cove brook.)

Square; lake, northeast of L. LaBiche, central Alberta.

Square. See Squire.

Squaw. See Brock.

- Squire**; point, on Call creek, between Johnstone strait and Knight inlet, Coast district, B.C. (Not Square.)
- Squirrel*. See Footprint.
- Strigley**; bay, south shore of Manitoulin island, Manitoulin district, Ont.
- Stafford**; rock, north of Western Duck island, Manitoulin district, Ont.
- Stainforth*. See Staniforth.
- Stake**; creek, flowing into Quiet lake, Yukon.
- Stanawan**; lake, S.W. of Dinorwic L., Kenora district, Ont. (Not Grassy River lake.)
- Stanford**; range of mountains, between Columbia and Kootenay rivers, B.C.
- Staniforth**; point, entrance to Gardner canal, Coast district, B.C. (Not Stainforth.)
- Stanley**; a spur of the Valkyr mountains, Kootenay district, B.C.
- Stanley**; island, near Summerstown, Glengarry county, Ont. (Not Craigs.)
- Stanley**; river, tributary to Tatsshenshini river, Cassiar district, B.C.
- Stanley**; village, York county, N.B. (Not Stanley Village.)
- Stanley Corners**; post office, Carleton county, Ont. (Not Stanley's Corners.)
- Stanley Mills**; post office, Peel county, Ont. (Not Stanley's Mills.)
- Stanley Village*. See Stanley.
- Stanzhikimi**; lake, west of Tawatinaw lake, Kenora district, B.C.
- Stapledon**; island, E. of Lelu I., near entrance Inverness passage, Coast district, B.C.
- Star**; creek, branch of Hunker creek, Yukon.
- Starnesboro**; post office, Huntingdon county, Que. (Not Starnesborough.)
- Starr**; creek, tributary to Pelly river, between Hoole and Ketza rivers, Yukon.
- Starvation**; creek, on the international boundary, Kootenay, B.C. (Not Akamina.)
- Starvation*. See Strawberry.
- Stave**; island, Navy group, St. Lawrence river, Leeds county, Ont. (Not Big Stave.)
- Steamboat*. See Shawatum.
- Steel*. See Hayes.
- Steele**; town, Kootenay district, B.C. Railway station of same name 7 miles south of town. (Not Fort Steele.)
- Steep**; creek, tributary to Beaverfoot river, Rocky mountains, Kootenay district, B.C.
- Steepbank**; river, emptying into lake Claire, Alta. (Not Steep Bank nor Steep-bank.)
- Steeprock**; lake, west of Crane bay, also point east of Peonan point, L. Manitoba. (Not Steep Rock.)
- Steeprock**; river, flowing to northerly end of L. Winnipegosis, Man. (Not Steep Rock.)
- Steevens**; island, north of Greene island, Manitoulin district, Ont. (Not Cariboo nor Little Green.)
- Stelako*. See Stellako.
- Stella**; village, on telegraph trail near mouth of Stellako river, Coast district, B.C.
- Stellako**; river, connecting Francois and Fraser lakes, B.C. (Not Stelako.)
- Stephen**; lake, north of Kakagi lake, Kenora district, Ont.
- Stephen**; mount, and railway station, Kootenay district, B.C.
- Stephens*. See Navy.
- Sterling*. See Stirling.
- Stevens**; creek, north of Whatshan lake, Kootenay district, B.C.
- Stevens**; island, Southgate group, Queen Charlotte sound, Coast district, B.C.

SESSIONAL PAPER No. 25d

Stevens; mount, south of Wheaton river, southern Yukon.

Stevens. See Navy.

Stewart; canyon, Cascade river, Rocky Mountains park, Alta.

Stewart; lake, west of Parrywood station, Kenora district, Ont.

Stewart; river, tributary to Yukon river, Yukon. *

Stewart; rock, in Owen channel, Manitoulin district, Ont.

Stewart. See Rouyn.

Stewart. See Stuart.

Stick-ah-din. See Stikyardin.

Stickelahn. See Stikela.

Stikela; creek, flowing into Tatlayoko lake, Coast district, B.C. (Not Stickelahn.)

Stikine; river, Cassiar district, B.C. (Not Stickeen nor Stikeen, etc.)

Stikyadin; lake and mountains, at junction of Bulkley and Skeena rivers, Cassiar district, B.C. (Not Stick-ah-din.)

Stimson; creek, tributary to Highwood river, Alta. (Not S. Branch of Highwood R.)

Stimukoktok; cape, east shore Ungava bay, New Quebec.

Stirling; lake and village, southwestern Alta. (Not Sterling nor Eighteen Mile lake.)

Stittville; post village and railway station, Carleton county, Ont. (Not Stittsville.)

Stockham; island, east of Opitsat, Clayoquot sound, Vancouver island, B.C.

Stockmer; mount, north of Howard creek, Selkirk Mts., Kootenay district, B.C.

Stockwell; lake, Tp. 27, R. 8 and Tps. 27 and 28, R. 9, W. 3 M., Sask. (Not Red Deer.)

Stokes; bay and river, in Bruce county, Ont.

Stone; island, southeast of Stockham island, Clayoquot sound, Vancouver I., B.C.

Stone. See Mirond.

Stoneberg; cove, Weller bay, Prince Edward county, Ont.

Stoneburgh; cove, Weller B., Ameliasburg Tp., Pr. Edw. Co., Ont. (Not Stoneburgh's.)

Stonecliff; railway station and village, Renfrew county, Ont. (Not Rockcliffe.)

Previous decision revised, P.O. Dept. and Ry. Co. having changed the name to avoid confusion with the well known 'Rockcliffe' at Ottawa.

Stonehouse. See Glengarry.

Stoney; creek and Stoney Creek village, Wentworth county, Ont. (Not Stony.)

Stony; creek, tributary to M'Clintock river, Yukon.

Stony; islet, north of Kincardine, Bruce county, Ont.

Stony; lake, Burleigh township, Peterborough county, Ont.

Stony; point, north of Corbay point, Manitoulin district, Ont.

Stony; point, Presque'ile bay, Brighton Tp., Northumberland Co., Ont. (Not Stoney.)

Stony. See Barrie.

Stony. See Blake.

Stony. See Melfort.

Stony. See Okemasis.

Stony. See Stoney.

Stonyplain; post office, west of Edmonton, Alta. (Not Stony Plain.)

Stoplog; lake, Burleigh township, Peterborough county, Ont. (Not Stop Log.)

Storm; creek, tributary to Highwood river, Alta.

- Storm**; mountain, north of mount Ball, Alta. and Kootenay district, B.C.
- Stormy**; lake, Glamorgan township, Haliburton county, Ont.
- Stouffville**; village and railway station, Whitechurch township, York county, Ont.
(Not Stouffville Junction.)
- Stovel**; peak, south of Talaha bay, Tagish lake, Cassiar district, B.C.
- Stovin**; island, Brock group, St. Lawrence R., Leeds, Ont. (Not Picnic nor Refugee.)
- Straggle**; lake, Harcourt township, Haliburton county, Ont.
- Straight*. See Opinaka.
- Stranger**; lake, southwest of Kimmewin lake, Kenora district, Ont.
- Stratford**; township, Wolfe county, Que.
- Stratharbo**; settlement, Northumberland county, N.B. (Not Strathabo.)
- Strathcona**; island, west of Crooks inlet, north shore of Hudson strait, N.W.T.
- Strawberry**; island, in lake Simcoe, Ontario county, Ont. (Not Starvation.)
- Stuart**; channel, southeast coast of Vancouver island, B.C.
- Stuart**; lake and river, tributary to Nechako river, Coast district, B.C. (Not Stewart.)
- Stupart**; bay, south shore of Hudson strait, New Quebec.
- Sturgeon*. See Chalk.
- Sturgeon*. See Crémazie.
- Sturgeon*. See Namew.
- Sturgeon*. See Nemei.
- Sturgeon-weir**; river, flowing into Cumberland lake, Sask. (Not Sturgeon Weir.)
- Stutfield**; peak, southeast of mount Alberta, Rocky mountains, Alta.
- Stutzer**; mount, east of Nordenskiöld river, Yukon.
- Sucker*. See Garden.
- Sucker*. See Gladys.
- Sucker*. See Nemeibennuk.
- Sugar*. See Mulcaster.
- Sugarbush**; lake, Addington township, Ottawa county, Que. (Not Sugar Bush.)
- Sugarloaf**; mountain, northwest of Beaver mountain, Selkirk mountains, Kootenay district, B.C.
- Sugarloaf**; mountain, near Stikine river, north of Iskut river, Cassiar district, B.C.
- Suggi**; lake, on Grassberry river, central Saskatchewan. (Not Little Pelican.)
- Sullivan**; hill, north of St. Mary river, Kootenay district, B.C.
- Sullivan**; lake, south of Battle river, Alta. (Not Sullivan's.)
- Sullivan**; mount, east of mount Lyell, Rocky mountains, Alta.
- Sullivan**; mount, west of Dease lake, Cassiar district, B.C.
- Sulphur**; creek, tributary to Indian river, Yukon.
- Sulphur**; mountain, south of Banff, Alta.
- Sumac*. See Robert.
- Sumach*. See Everest.
- Sumallo**; river, tributary to Skagit river, Yale district, B.C. (Not Sumallow.)
- Sumas**; lake, post office, railway junction, and river, south of Fraser river, New Westminster district, B.C. (Not Sumass.)
- Sumass*. See Somass.
- Sumass*. See Sumas.

SESSIONAL PAPER No. 25d

- Summit**; lake, south of Bernard lake, Cassiar district, B.C.
- Summit**; railway station, Kenora district, Ont.
- Summit.* See Sasakwei.
- Sunday**; lake, Rowell township, Kenora district, Ont.
- Sunday**; mountain, west of the north end of lake Laberge, Yukon.
- Sunday**; peak, east of Tagish lake, Cassiar district, B.C.
- Sunny Brae**; post office and railway station, Westmorland county, N.B.
- Sunshine**; creek, east of Lower Arrow lake, Kootenay district, B.C.
- Sunshine**; lake, northeast of Manitou lake, Kenora district, Ont.
- Sunwapta**; river, flowing from Wilcox pass northwesterly into Athabaska river, Alberta.
- Superior, Lake**; (Fr. Lac Supérieur). The largest body of fresh water in the world and highest of the five great lakes of the St. Lawrence system.

- Sutherland**; river, tributary to Inverness river, south of Lesser Slave lake, Alta.
- Sutil**; cape, at westerly entrance to Goletas channel, northerly coast of Vancouver island, B.C. (Not Commerell.)
- Sutton**; bay, at north end of lake Timiskaming, Ont. (Not Sutton's.)
- Sutton**; lake, north of Ekwan river, Patricia, Ont. (Not Sutton Mill lake.)
- Sutton Junction**; post office and railway station, Brome county, Que. (Not Drummondville Junction.)
- Swamp**; lake and portage, southwest of Saganaga lake, international boundary, Rainy River district, Ont.
- Swan**; island, in Columbia river, between Upper and Lower Arrow lakes, B.C.
- Swan**; lake and river, also Swan River, post office and railway station, Manitoba.
- Swan**; river, flowing northerly into Lesser Slave lake, central Alberta.
- Swan.* See Garson.
- Swanson**; channel, between Moresby and Pender Is., S.E. coast of Vancouver I., B.C.
- Swanzy**; mount, also glacier, east of Mt. Bonney, Selkirk Mts., Kootenay district, B.C.
- Sweathouse**; creek, tributary to Little Smoky river, Alta. (Not Sweat House.)
- Swede**; creek, tributary to Yukon river, above Dawson, Yukon.
- Swede**; island, southeast of Sturgeon bay, Thunder Bay district, Ont.
- Sweet Herb.* See Wekusko.
- Swehl-tcha.* See Cultus.
- Swiss**; peaks, Selkirk mountains, Kootenay district, B.C.
- Sydney.* See Sidney.

Sylvan; lake, east of Medicine river, southern Alberta. (Not Snake.)

Sylvia Grinnell; river, emptying into Frobisher bay, N.W.T.

Syndicate; lake, west of Manitou lake, Kenora district, Ont.

Syringa; creek, tributary to Columbia R., S. of Lower Arrow L., Kootenay dist., B.C.

T

Tabasintac. See Tabusintac.

Tabasokwia; river, tributary to upper Winisk river, Patricia district, Ont.

Tabernacle; mountain, Selkirk range, Kootenay district, B.C.

Tabisintac. See Tabusintac.

Table; mountain, Tp. 4, R. 2, W. 5 M., southern Alberta.

Tabusintac; river and village, Northumberland county, N.B. (Not Tabasintac nor Tabisintac.)

Tache; railway station, Kenora district, Ont.

Tachick; lake, on telegraph trail, south of Nechako river, Coast district, B.C.

Tacho. See Tatsho.

Tackle; creek, tributary to Wild Horse river, Kootenay district, B.C.

Tadoussac; township and village, Saguenay county, Que. (Not Tadousac.)

Taggart; creek and lake, tributary to Cowan river, central Sask. (Not Rat.)

Tagish; lake and post office, east of Bennett lake, Cassiar district, B.C., and Yukon.

Tahltan; lake, and river tributary to Stikine river, Cassiar district, B.C.

Tahtaloo. See Campbell.

Tahte. See Nisling.

Taibi; lake, south of Mattagami lake, Abitibi territory, Que.

Takakkaw; falls, Yoho river, Rocky mountains, Kootenay district, B.C.

Takipy. See Kississing.

Takhini; river, tributary to Lewes river, Yukon.

Taku; arm of Tagish lake, Cassiar district, B.C. and Yukon.

Taku; river, Cassiar district, B.C.

Taku. See Graham.

Talaha; bay, in Taku arm of Tagish lake, Cassiar district, B.C.

Talbot; lake, Redditt township, Kenora district, Ont.

Tallan; lake, Chandos township, Peterborough county, Ont. (Not Tallan's.)

Tallon; creek, tributary to Beaverfoot R., S.E. of Leancoil, Kootenay district, B.C.

Taltmain; lake, south of lower Pelly river, Yukon.

Tamagaming. See Timagami.

Tamihî; creek, New Westminster and Yale districts, B.C. (Not Tamihî nor Tam-meahai.)

Tangamong; lake, Lake township, Hastings county, Ont. (Not Tangamongue.)

Tangier; harbour, island, lake, and town, Halifax Co., N.S. (Not Tangier Grand lake.)

Tantalus; butte, near confluence of Lewes and Nordenskiöld rivers, Yukon.

Tanzilla; river, tributary to Stikine river, Cassiar district, B.C.

Taouagadec. See Tawagadik.

Tapani; lake and river, tributary to Lièvre river, Montcalm county, Que. (Not Tapanee nor Tepanee.)

SESSIONAL PAPER No. 25d

- Tar**; island, east of Rockport, St. Lawrence river, Leeds county, Ont.
- Tarte**; bay, in Kitimat arm, Coast district, B.C.
- Taseco*. See Taseko.
- Taseko**; lakes (2) and river, tributary to Chilko river, Lillooet district, B.C. (Not Taseco nor Whitewater.)
- Tasheigama*. See Asheigamo.
- Tashka**; rapids, upper Winisk river, above Tabasokwia R., Patricia district, Ont.
- Tasin**; mountains, upper Stewart river, Yukon.
- Tasso**; lake, Finlayson township, Nipissing district, Ont.

- Thorn**. See Maple.
- Threefork**; river, flowing into Wabigoon lake, Kenora district, Ont. (Not Three Fork.)
- Threehills**; creek, north of Kneehills creek, Alta. (Not Three Hills.)
- Threemile Plains**; post village, Hants county, N.S. (Not Three Mile Plains.)
- Threemount**; bay and point, east of McIntyre bay, L. Nipigon, Thunder Bay district, Ont. (Not Three Mount nor Three Mountain.)
- Threepoint**; creek, tributary to Sheep river, also mountain, southern Alberta.
- Threepoint**; lake, on Burntwood river, Manitoba. (Not Nistowasis.)
- Three Sisters**; mountain peaks, south of Canmore, Rocky Mountains park, Alta.
- Thron-diuck**. See Klondike.
- Thrumcap**; shoal, at entrance to Halifax harbour, Halifax county, N.S.
- Thumb**. See Galena.
- Thunder**; bay, and cape at east entrance to the bay, Thunder Bay district, Ont.
- Thunder**; creek, flowing into Pelican lake, southern Saskatchewan.
- Thunder**; lake, north of Wabigoon lake, Kenora district, Ont.
- Thurlow**; township, Hastings county, Ont.
- Thwartway**; island, Admiralty group, St. Lawrence river, Leeds county, Ont. (Not Leak or Leek.)
- Tiahn**. See Tian.
- Tian**; point, Graham island, Queen Charlotte Is., Coast district, B.C. (Not Tiahn.)
- Ticouabi**. See Tikuape.
- Tidds**; island, Admiralty group, St. Lawrence river, Leeds county, Ont.
- Tide**; lake, English river, below Maynard lake, Kenora district, Ont.
- Tide**; rock, Southgate group, Queen Charlotte sound, Coast district, B.C.
- Tiernan**. See Ogoki.
- Tiger**; brook, tributary to rivière des Quinze, Timiskaming county, Que.
- Tigonankweine**; range of mountains, Gravel R. N.W.T. (Not Tigenankwene.)
- Tikonabi**. See Tikuape.
- Tikuape**; post office and river, Lake St. John county, Que. (Not Ticouabi, Tikonabe, Tikouabi, Tikouape, nor Tikouapee.)
- Til-e-i-tsho**. See Tillei.
- Tillei**; lake, north of Frances lake, Yukon. (Not Til-e-i-tsho.)
- Tilley**; mount, east of Mt. Mackenzie, Kootenay district, B.C.
- Tillsonburg**; town, Oxford county, Ont. (Not Tilsonburg.)
- Tilted**; mountain, west of Lychnis mountain, Rocky mountains, Alta.
- Timagami**; lake, Nipissing district, Ont. (Not Tamagaming nor Temagami.)
- Timber**; bay, and Timber Bay shoal, S. shore of Manitoulin I., Manitoulin dist., Ont.
- Timiskaming**; lake, Timiskaming, Ontario and Quebec. (Not Temiscaming, Temiscamingue, nor Temiskaming.)
- Tinson**; point, Gabriola island, strait of Georgia, B.C. (Not Rocky.)
- Tintina**; valley, central Yukon. A great depression occupied successively by Felly, Kalzas, Stewart, and Klondike rivers, and extending to the Yukon.
- Tisiriuk**; lake, emptying into Leaf river, New Quebec. (Not Seal.)

SESSIONAL PAPER No. 25d

- Titkana**; peak, northeast of Mount Robson, Rocky mountains, Cariboo district, B.C.
(Not Ptarmigan.)
- Tlet-tilan-a-tsoots*. See Finlayson.
- Tobermory**; harbour and village, at N.W. extreme of Saugeen peninsula, Bruce Co., O.
- Tobey**; point, west side of Prince Rupert harbour, Coast district, B.C.
- Tobique**; river, tributary to St. John river, from Nictor lake, Restigouche and Victoria counties, N.B. The names 'Nictor' and 'Little Tobique,' applied to that portion of the river above 'the forks,' to be dropped.
- Tobique*. See Trousers.
- Toby**; creek, flowing easterly into Columbia river, at Athalmer, Kootenay district, B.C. (Not Toba.)
- Tod**; creek and inlet, Saanich inlet, Vancouver island, B.C.
- Todman**; reef, at mouth of Thomas bay, Manitoulin island, Manitoulin district, Ont.
- Todnustook*. See Tuhnustuk.
- Tofino**; inlet, also townsite on Low peninsula, Clayoquot sound, Vancouver I., B.C.
- Tokumm**; creek, south of Deltaform mountain, Kootenay district, B.C.
- Tolmie**; reef, between Kincardine, and Clark point, Bruce county, Ont.
- Tom*. See Thom.
- Tomasine**; river, Pontiac county, Que. (Not Thomasine nor Tomassino.)
- Tombstone**; mountain, northeast of Kananaskis lakes, southern Alberta.
- Tomkinson**; point, Ursula channel, Coast district B.C. (Not Tomkinsin.)
- Tomlinson**. point, Blunden harbour, Queen Charlotte sound, Coast district, B.C.
- Tonkawatla**; river, tributary to Columbia R., Kootenay dist., B.C. (Not Tonca Watla.)
- Toochi*. See Tutshi.
- Too-flat**; creek, tributary to Klondike river, Yukon.
- Toohoolitas*. See Tuhulitas.
- Toolnustook*. See Tuhnustuk.
- Too-much-gold**; creek, tributary to Klondike river, Yukon.
- Toonkwa*. See Tunkwa.
- Too-tlas*. See Thomas.
- Tooya*. See Tuya.
- Topham**; mount, southeast of Mt. Macoun, Selkirk mountains, Kootenay district, B.C.
- Torch**; lake, southwest of Candle lake, central Sask. (Not Little Candle.)
- Torch**; river, emptying into Cumberland lake, eastern Sask. (Not Big Sturgeon.)
- Tornait*. See Newton.
- Torrent*. See St. Mary.
- Torres**; channel, between Tercsa and Copper islands and west shore of Atlin lake, Cassiar district, B.C. (Not West channel, Torres straits, nor Tory inlet.)
- Tortue**; river, Saguenay county, Que. (Not Fall.)
- Tortue*. See Orme.
- Tory*. See Torres.
- Totogan**; lake, north of Kanuchuan river, upper Winisk R., Patricia district, Ont.
- Touchwood**; hill, southern Saskatchewan.
- Toussaint**; island, above Iroquois point, St. Lawrence river, Dundas county, Ont.
(Not Tousaint's, Toussaint's, nor Toussons.)

Toussons. See Toussaint.

Towagodi. See Tawagadik.

Tower; creek, tributary to St. Mary river, Kootenay district, B.C.

Tower; peak, north of Quiet lake, Yukon.

Tower of Babel; mountain, east of Moraine lake, southern Alberta

Towinout; creek and mountain, S. of Cowichan L., Vancouver I., B.C. (Not Nixon.)

Toyehill; post office, Dundas county, Ont. (Not Toy's Hill.)

Tracy; creek and post office, east of Kootenay river, north of Steele, Kootenay, B.C.

Trade; lake, on Churchill river, above Reindeer river, Sask. (Not Island lake.)

Trading; lake, Ridout township, Muskoka district, Ont.

Traffic; mountain, north of Pelly lakes, Yukon.

Trail. See Chungo.

Tramping; lake, southwest of Battleford, Sask.

Trap; mountain, west of Sooke river, Vancouver island, B.C.

Trapper; creek, tributary to W. fork of Kettle river, Yale district, B.C. (Not E. Fork of W. Fork of Kettle River.)

Travers (lac de); lake, at headwaters of St. Maurice river, Champlain county, Que.

Traverse; bay, mouth of Winnipeg river, Manitoba.

Tremayne; bay, in southern portion of Digby island, Coast district, B.C.

Trent; river, flowing into the bay of Quinte at Trenton, Hastings and Northumberland counties, Ont.

Trenton; town, at western end of the bay of Quinte, Hastings county, Ont.

Trepanege; plateau and river, west of Okanagan lake, Yale district, B.C. (Not Deep creek nor Trepanier river.)

Trepanier. See Trepanege.

Triangle; lake, southeast of lake Nipigon, Thunder Bay district, Ont.

Trident; mountain, southwest of Kinbasket lake, Kootenay district, B.C.

Trident; point, on north shore of the bay of Quinte, Hastings Co., Ont. (Not Long.)

Trincomali; channel, between Galiano and Saltspring islands, southeast coast of Vancouver island, B.C. (Not Trincomalee nor Trincomalie.)

Trivet; point, on the northerly portion of Princess Royal island, Coast district, B.C.

Trodely; island, north of Charlton island, James bay, Que. (Not Little Charlton.)

Trois Bras. See Holden.

Trolltinder; mountain, south of mount Balfour, Kootenay district, B.C.

Troughton; island, Lake Fleet group, St. Lawrence river, Leeds county, Ont.

Trousers; lake, Lorne parish, Victoria county, N.B. (Not Tobique.)

Trout; creek, branch of McDame creek, Dease river, Cassiar district, B.C.

Trout. See Buntzen.

Trout. See Crean.

Trout. See Hayes.

Trout. See Peerless.

Truda; peaks, Hermit range, Selkirk mountains, Kootenay district, B.C.

Tsetelui; lake, at headwaters of Kakuchuya R., Cassiar district, B.C. (Not Tseteloui.)

Tshensagi. See Chensagi.

Tsichu; river, tributary to Gravel river, N.W.T. (Not Tsi-Choo.)

SESSIONAL PAPER No. 25d

Tsinkut. See Sinkut.

Tuck; inlet, narrows, and point, north of Prince Rupert harbour, B.C. (Not Tuck's.)

Tucker; creek and lake, emptying into Allumette bay, Renfrew county, Ont.

Tudjakdjuan. See Resolution.

Tudjakdjudusirn. See Gabriel.

Tugwell; creek, west of Otter point, Juan de Fuca strait, Vancouver island, B.C.

Tuhulitas; inlet, north of Cyrus Field bay, N.W.T. (Not Toohoolitas.)

Tulameen; mountain, river, and village, Yale district, B.C. (Not Tulameen city.)

Tulip; creek, east of Lower Arrow lake, Kootenay district, B.C.

Tullin; mountain, west of outlet of Chilko L., Coast district, B.C. (Not Tull-in.)

Tulnustuk; river, Saguenay county, Que. (Not Todnustook nor Toolnustook.)

Tummeahai. See Tamihi.

Tummel; river, tributary to Pelly river, Yukon.

Tun; island, Blind bay, Halifax county, N.S. (Not Tuns.)

Tunagamik; lake, at headwaters of Ottawa river, Joliette county, Que.

Tunkwa; lake, Tp. 19, R. 21, W. 6 M., Yale district, B.C. (Not Toenkwa.)

Tunnussaksuk; point, east shore of Ungava bay, New Quebec.

Tupper; mount, also glacier in the Selkirks, Kootenay district, B.C.

Turn. See Dryad.

Turnagain; point, at entrance to Lynx bay, L. Winnipeg, Man. (Not Saskatchewan.)

Turner; mount, east of Stikine river and north of Iskut river, Cassiar district, B.C.

Turner. See Terence.

Turner. See Whitehorn.

Turnerville. See Ennett.

Turning; island, near S. point of Cove I., entrance to Georgian bay, Bruce Co., Ont.

Turquoise; lake, east of mount Balfour, Alberta.

Turtle; mountain, southwestern Manitoba.

Turtle; point, on northerly portion of Gil island, Coast district, B.C.

Turtle. See Jarvis.

Tuscarora; post settlement and railway station, Brant Co., Ont. (Not Middleport.)

Tusket; island and village, Yarmouth county, N.S. (Not Great Tusket island.)

Tustles; lake, north of Frances lake, Yukon. (Not Tus-tles-tu.)

Tutchi. See Tutshi.

Tutesheta; creek, tributary to Tahltan river, Cassiar district, B.C. (Not Tuteshita.)

Tutshi; lake and river, S.E. of Bennett L. Cassiar dist., B.C. (Not Toochoi nor Tutchi.)

Tuttle; point, at entrance to Stupart bay, Hudson strait, New Quebec.

Tuvalik; Indian village, west coast of Ungava bay, New Quebec.

Tuya; lake, and river tributary to Stikine river, Cassiar district, B.C. (Not Tooya.)

Tuzo; mount, east of Deltaform mountain, Bow range of the Rockies, Alta. and B.C.

Twelve Mile. See Bronte.

Twelve o'clock; point, at the eastern entrance to Murray canal, Murray township, Northumberland county, Ont.

Twilight; lake, southwest of Cliff lake, Kenora district, Ont.

Twin; butte and creek, near Twin Butte railway station, Kootenay district, B.C.

Twin; falls, on the upper part of Yoho river, Kootenay district, B.C.

- Twin**; peaks, north of Columbia glacier, Rocky Mts., Alta. (Not The Twins.)
Twin. See Dunsmuir.
Twin. See Vrooman.
- Twin Sisters**; islands, Brock group, St. Lawrence river, Leeds county, Ont.
- Twitya**; river, tributary to Gravel river, N.W.T. (Not Twityeh.)
- Two-bit**; creek, east of Lower Arrow lake, Kootenay district, B.C.
- Two Rivers**; lake of, in Algonquin National park, Nipissing district, Ont.
- Tyaughton**; mountains, also river flowing into Bridge river, Lillooet district, B.C.
- Tyee**; lake and telegraph station, on trail near Bulkley river, Cassiar and Coast districts, B.C. (Not Long.)
- Tyendinaga**; township, Hastings county, Ont.
- Tyers**; river, tributary to Frances river, near Frances lake, Yukon.
- Tyne**; point, Departure bay, east coast of Vancouver island, B.C.
- Tyrrell**; lake, Tp. 5, Rs. 17 and 18, W. 4th M., southern Alberta. (Not Tyrrell's.)
- Tzuhalem**; mountain and post settlement, north of Cowichan river, Vancouver island, B.C. Not Tzouhalem.)

U

- Uibvaksoak*. See Uinaksoak.
- Uinaksoak**; cape, east shore Ungava bay, New Quebec. (Not Uibvaksoak.)
- Unahini**; river, tributary to Tatshenshini river, Yukon.
- Unaminnikan*. See Manomin.
- Ungava**; bay, in northern portion of the province of Quebec.
- Unger**; island, bay of Quinte, mouth of Napanee R., Lennox Co., Ont. (Not Unger's.)
- Union**; bay, east side of Saanich inlet, Vancouver island, B.C.
- Unwin**; mount, southwest of the narrows of Maligne lake, Rocky Mts., western Alta.
- Uphill**; lake, northeast of Manitou lake, Kenora district, Ont. (Not Moonshine nor Kasakachewewak.)
- Upinnakaw*. See Opinnagau.
- Upper Arrow**; lake, an expansion of Columbia river, Kootenay district, B.C.
- Upper Bow*. See Bow.
- Upper Emerald*. See Yoho.
- Upper Kootanie*. See Duncan.
- Upper Lahave**; village, Lunenburg county, N.S. (Not Upper La Have.)
- Upper Manitou*. See Anzhekumming.
- Upper Nicola*. See Nicola.
- Upper Savage**; islands, east of Big island, Hudson strait, N.W.T. (Not Savage.)
- Upper White Fish*. See Jarvis.
- Urd**; a peak of the Valhalla mountains, Kootenay district, B.C.
- Ursula**; channel, east of Gribbell island, Coast district, B.C.
- Ursus Major**; mountain, Hermit range, Selkirk mountains, Kootenay district, B.C.
- Ursus Minor**; mountain, Hermit range, Selkirk mountains, Kootenay district, B.C.
- Usatzes**; point, N.E. point of Low peninsula, Clayoquot sound, Vancouver I., B.C.
- Uto**; peak, near mount Sir Donald, Selkirk mountains, Kootenay district, B.C.
- Uztlius**; river, tributary to Anderson river, Yale district, B.C. (Not Uz-tli-hoos nor Uzvioos.)

SESSIONAL PAPER No. 25d

V

- Vadso**; rock, off the southwest point of Larcom island. Observatory inlet, Cassiar district, B.C.
- Valdes**; island, in the southern portion of the strait of Georgia, B.C.
- Valdes*. See Maurelle, Quadra, and Sonora. Recent surveys proved that the name Valdes covered three islands, which have been named separately as above, and the former name has been discarded to avoid duplication.
- Valhalla**; mountains, west of Slocan lake, Kootenay district, B.C. (Not Val Halla.)
- Valkyr**; mountains, east of Lower Arrow lake, Kootenay, B.C. (Not Valkyriur.)
- Valley**; river, flowing easterly into Dauphin lake, Manitoba.
- Valleyview**; post office, north of Wapella, Sask. (Not Valley View.)
- Valois**; village, Jacques Cartier county, Que. (Not Valoisville.)
- Valoisville*. See Valois.
- Vananda**; cove and post settlement, Texada island, strait of Georgia, B.C. (Not Van Anda.)
- Van Buren**; island, northeast of Tar island, St. Lawrence river, Leeds county, Ont.
- Vancouver**; creek, tributary to McQuesten river, Yukon.
- Van Hooven*. See Van Houten.
- Van Horne**; brook, glacier, névé, and range of mountains, Kootenay district, B.C.
- Van Houten**; creek, E. of Lower Arrow L., Kootenay district, B.C. (Not Van Hooven.)
- Vankoughnet**; bay, east of The Narrows, L. Manitoba, Man.
- Vansittart**; island, northeast of Grenadier island, St. Lawrence river, Leeds Co., Ont.
- Vaudray**; lake, Vaudray township, Timiskaming county, Que. (Not Long.)
- Vaudreuil**; bay, railway station, rapids, and post village, also Vaudreuil Station post office, Vaudreuil county, Que. (Not Dorion.)
- Vaux**; mount, also glacier, northeast of Leancoil station, Kootenay district, B.C.
- Vedder**; mountain, international boundary, New Westminster district, B.C.
- Venn**; passage between Metlakatla bay and Prince Rupert harbour, B.C.
- Ventego**; mountain, Selkirk range, Kootenay district, B.C.
- Verdigris**; coulée and lake, north of Milk river, southern Alberta.
- Vermilion**; bay and railway station, Eagle L., Kenora district, Ont. (Not Vermillion.)
- Vermilion*... See Little Vermilion.
- Vermilion*. See Pink.
- Vermilion*. See Red.
- Verney**; passage, between Hawkesbury and Gribbell islands, Coast district, B.C.
- Vertebrae**; mountain, north of Bush river, Rocky Mts., Kootenay district, B.C.
- Verte-Vallée**; post office, Vaudreuil county, Que. (Not Green Valley.)
- Vertical**; mountain, east of Kootenay river, Kootenay district, B.C.
- Vesuvius**; bay, Saltspring island, southeast coast of Vancouver island, B.C.
- Vesuvius**; hill, north of Wheaton river, southern Yukon.
- Victoria**; mount, also glacier, in the Bow range of the Rockies, Alta., and Kootenay district, B.C. (Not Mt. Green.)
- Victoria**; island, N.W.T. Portions of this island have been known as "Victoria Land," "Prince Albert Land," and "Wollaston Land."
- Victoria**; island, Brock group, St. Lawrence river, Leeds county, Ont. (Not Mile.)

Victoria. See Broadback.

Vidette; peak, Sir Sandford range, Selkirk mountains, Kootenay district, B.C.

Vigilant; island, on north side of Prince Rupert harbour, B.C. (Not Bacon.)

Vigilant; rock, east of Grantham shoals, Manitoulin island, Manitoulin district, Ont.

Village Bélanger. See Bélanger.

Village Richelieu. See Richelieu.

Villanova; post office, Norfolk county, Ont. (Not Villa Nova.)

Villemontel; river tributary to Kinojevis river, Timiskaming county, Que. (Not Nawapitechin.)

Vingolf; mount, west of Slocan lake, Kootenay district, B.C.

Violadale; post village, Marquette electoral district, Man. (Not Viola Dale.)

Voisin (Iac); lake, northeast of Taggart lake, central Saskatchewan.

Volcano; creek, tributary to Sheep river, southern Alberta.

Volunteer; spit, between Birch and Walker points, Manitoulin I., Manitoulin dist., Ont.

Von Wilczek; valley, on Lewes river, above Pelly river, Yukon.

Vowle; mount, west of Schwatka river, southern Yukon.

Vrooman; islands, McGregor cove, Bruce county, Ont. (Not Twin.)

Vulture; col, between mounts Gordon and Olive, Rocky mountains, Alta.

Vulture. See Winnange.

W

Waagan. See Wagan.

Waagoosh. See Waugush.

Wabakimi; lake, northwest of Smoothrock lake, Thunder Bay district, Ont.

Wabamun; lake, south of St. Ann, central Alberta. (Not White Whale.)

Wabanoni; river, emptying into Obaska lake, Timiskaming, Que. (Not Wabinoni.)

Wabasca. See Wabiskaw.

Wabaskoutyunk. See Kempt.

Wabaskus; lake, southeast of Abitibi lake, Timiskaming county, Que.

Wabassi; brook, Templeton township, Ottawa county, Que.

Wabi; bay and creek, at the head of lake Timiskaming, Ont.

Wabigoon; lake, river, and railway station, Kenora district, Ont. (Not Wabigwunn.)

Wabigwunn. See Wabigoon.

Wabinoni. See Wabanoni.

Wabinosh; bay, lake, and river, on west side of L. Nipigon, Thunder Bay district, Ont.

Wabishkok; lakes, south of Kisseynew lake, Manitoba.

Wabiskaw; lakes and river, tributary to Peace river, northern Alberta. (Not Wabasca nor Wabiscaw.)

Waddell; bay, Frobisher bay, N.W.T. (Not Dyer sound.)

Wadopi; brook, tributary to upper Winisk river, Patricia district, Ont.

Wadsworth; lake, Tudor township, Hastings county, Ont.

Wagabkedei; lake, northwest of Attawapiskat lake, Patricia district, Ont.

Wagan; river, tributary to Restigouche R., Madawaska Co., N.B. (Not Waagan.)

Wagosh; bay and reef, Cockburn island, Manitoulin district, Ont. (Not Wahgoosh.)

Wagwabeya. See Wagwabika.

SESSIONAL PAPER No. 25d

- Wagwabika**; lake, headwaters of Lièvre R., St. Maurice Co., Que. (Not Wagwabeya.)
- Wahbiquekobing**. See Wakwekobi.
- Wahcomatagaming**. See Wakomata.
- Wahgoosh**. See Wagosh.
- Wahnapiatae**. See Wanapitei.
- Wahquekobing**. See Wakwekobi.
- Wahwanichi**. See Wakonichi.
- Waiatt**; bay, Okisollo channel, Coast district, B.C. (Not Wi-yat nor Wyatt.)
- Wai-nusk**. See Winisk.
- Wainwright**; basin, between S.E. end of Kaien I. and mainland, Coast district, B.C.
- Waitabit**; creek, flowing into Columbia river below Donald, Kootenay district, B.C.
- Wajabakoute**. See Chartier.
- Wakamagaming**. See Wakami.
- Wakami**; lake, river, and Ry. station, Sudbury district, Ont. (Not Wakamagaming.)
- Wakaw**; lake, northwest of Basin lake, central Saskatchewan. (Not Crooked.)
- Wakeham**; bay, southwest of Wales sound, Hudson strait, New Quebec.
- Wakinichi**. See Wakonichi.
- Wakomata**; lake, north of Gould township, Algoma district, Ont. (Not Clear nor Wahcomatagaming.)
- Wakonichi**; lake, south of Mistassini lake, Mistassini territory, Que. (Not Wahwanichi nor Wakinichi.)
- Wakwekobi**; lake, Day township, Algoma district, Ont. (Not Wahbiquekobing nor Wahquekobing.)
- Walbran**; point, north end of Loretta island, Devastation channel, Coast district, B.C.
- Wales**; cape, island, and sound, south shore of Hudson strait, New Quebec. (Not Prince of Wales.)
- Walkem**; islands, Johnstone strait, Coast district, B.C. (Not Pender.) This name adopted to avoid duplication, there being a Pender island further south.
- Walker**; creek, north of Sixtymile river, near international boundary, Yukon.
- Walker**; mount, north of Blaeberry, river, Rocky mountains, Kootenay district, B.C.
- Walker**; point, south shore Manitoulin island, Manitoulin district, Ont.
- Walker**; post office, Middlesex county, Ont. (Not Walker's.)
- Walkhouse**; bay and point, northeast of Inner Duck island, Manitoulin district, Ont.
- Wallace**; island, east of Lynedoch island, St. Lawrence river, Leeds county, Ont.
- Wallace**; island, N. of Saltspring I., S.E. coast of Vancouver I., B.C. (Not Narrow.)
- Wallace**; mount, southeast of Beaverdell, Yale district, B.C.
- Wallace**; mount, also river, south of Lesser Slave lake, central Alberta.
- Wallace**; rock, near South Baymouth, Manitoulin district, Ont.
- Wallbridge**; point, Ameliasburg township, Prince Edward county, Ont.
- Wallenger**; creek, tributary to Wild Horse river, Kootenay district, B.C.
- Wall-eye**; lake, south of Eagle lake, Kenora district, Ont.
- Wallis**; point, Nanoose harbour, east coast of Vancouver island, B.C.
- Walsh**; lake, north of Rosamond lake, Kenora district, Ont.
- Walters**; point, north shore of Okisollo channel, Coast district, B.C.
- Walton**; river and village, Hants county, N.S. (Not La Tete nor Petite.)

- Wanapitei**; lake, Ry. station, and river, Sudbury district, Ont. (Not Wahnapitae.)
- Wanderer**; shoal, southwest of Lyal island, Bruce county, Ont.
- Wanipigow**; river, emptying into the east side of lake Winnipeg, Man. (Not Hole.)
- Wanogu**; lake, Ledger township, Thunder Bay district, Ont. (Not Wanogoo.)
- Wapageisi**; lake, east of Anzhekumming lake, Kenora district, Ont.
- Wapateehk**. See Waputik.
- Wapawekka**; lake and range of hills, southeast of L. La Ronge, central Saskatchewan. (Not Bear lake nor Great Bear Sand hills.)
- Wapiabi**; creek, tributary to south branch of Brazeau river, Alta. (Not Grave.)
- Wapichtigow**. See Wapishtigau.
- Wapikik**. See Kapikik.
- Wapikopa**; lake and river, upper waters of Winisk river, Patricia district, Ont.
- Wapishtigau**; brook, tributary to Burntwood river, Manitoba. (Not Wapichtigow.)
- Wapiti**; river, tributary to Smoky river, central Alberta.
- Wapitotem**; river, between Attawapiskat and Weibikwei lakes, Patricia district, Ont.
- Wapoos**. See Wapus.
- Wapoose**. See Wapus.
- Wapta**; glacier, lake, and mountain, Rocky mountains, Kootenay district, B.C.
- Wapta**. See Cataract.
- Wapta**. See Kicking Horse.
- Wapta**. See Yoho.
- Wapus**; lake and river, N.W. of Kakagi lake, Kenora district, Ont. (Not Wapoose.)
- Wapus**; lake and river, east side of Reindeer lake, central Sask. (Not Wapoos.)
- Wapusanan**; lake, north of Grand L. Victoria, Timiskaming county, Que.
- Wapustagamou**; lake, on west branch of St. Augustin river, Saguenay county, Que. (Not Wapustagamoo.)
- Waputik**; mountains and snowfield, Rocky mountains, Kootenay district, B.C. (Not Wapateehk, Wap-ut-teehk, Waputehk, nor Waputehk.)
- Ward**; bay, in Aylmer lake, Wolfe county, Que. (Not Ward's.)
- Ward**; inlet, Frobisher bay, N.W.T. (Not A. H. Ward.)
- Ward**; lake, Rattray township, Timiskaming district, Ont.
- Ward**; mount, south of Wheaton river, southern Yukon.
- Wardner**; village, on Kootenay river, south of Bull river, Kootenay district, B.C.
- Ware**; creek, tributary to Sheep river, southern Alberta.
- Ware**; mount, northwest of mount Hoffman, southern Alberta.
- Wark**; channel, northeast side of Tsimpsean peninsula, also island at entrance to the channel, Coast district, B.C. (Not Work.)
- Wark**; island, northeast of Princess Royal island, Coast district, B.C.
- Wark**; mount, near head of Saanich inlet, Vancouver island, B.C. (Not Big Saanich, nor Work.)
- Wark**; point, in Victoria harbour, B.C. (Not Warke nor Work.)
- Warner**; bay and point, east of Hopkins point, Bruce county, Ont.
- Warpath**; river, emptying into the west side of L. Winnipeg, Man. (Not War Path.)
- Warren**; island, south of Beament island, Bruce county, Ont.
- Warren**; mount, south of southeast end of Maligne lake, Rocky Mts., western Alta.

SESSIONAL PAPER No. 25d

- Warwick**; cape, east of Resolution island, N.W.T. (Not Resolution.)
- Wasawakasik**; lake, on Churchill river, below Nemei river, Sask.
- Wascana*. See Waskana.
- Washademoak**; river, tributary to St. John river, Queens county, N.B. (Not Washademoac nor Washedemoak.)
- Washagami**; river, tributary to Ekwan river, Patricia, Ont. (Not Washegummy.)
- Washagomis**; lake, south of Shabumeni lake, Patricia district, Ont. (Not Lower Clearwater.)
- Washedemoak*. See Washademoak.
- Washegummy*. See Washagami.
- Washeibemaga**; lake, southeast of Boyer lake, Kenora district, Ont. (Not Kawasheibemagagamak.)
- Washeka**; lake, upper Ottawa river, Pontiac county, Que. (Not Waskega.)
- Washi**; lake, on Albany river, east of Makokibatan lake, Patricia district, Ont. (Not Lake of the Narrows.)
- Washikuti**; bay and river, Saguenay county, Que. (Not Washsheecootai.)
- Washimeska**; river, Lake St. John county, Que. (Not Ouasiemska nor Wassienska.)
- Washmawapta**; glacier, E. of Helmet mountain, Rocky Mts., Kootenay district, B.C.
- Washow**; bay, in southern portion of L. Winnipeg, Man.
- Washsheecootai*. See Washikuti.
- Washahigan**; river, tributary to Little Smoky river, Alberta.
- Waskaiowaka*. See Waskatowaka.
- Waskana**; creek, flowing N.W. past Regina into Qu'Appelle R., Sask. (Not Wascana.)
- Waskatowaka**; lake, at headwaters of Little Churchill R., Man. (Not Waskaiowaka.)
- Washeka*. See Washeka.
- Wakesiu**; creek and lake, tributary to Montreal L., central Sask. (Not Red Deer.)
- Waskik**; lake, southwest of Sipiwesk lake, Manitoba. (Not Waskiktepigo.)
- Waskiktepigo*. See Waskik.
- Waskwatim*. See Wuskwatim.
- Wasp**; lake, Redditt township, Kenora district, Ont.
- Wassienska*. See Washimeska.
- Waswanipi**; H. B. Co.'s post, lake, also river tributary to Nottaway R., Abitibi, Que.
- Watap**; lake, west of Mountain lake, Int. boundary, Thunder Bay district, Ont. (Not Rove.)
- Watch**; island, north of Hill island, St. Lawrence river, Leeds county, Ont.
- Watcheshoo*. See Watshishu.
- Watchi**; lake, northeast of Reader lake, Manitoba. (Not Mountain.)
- Waterfall**; valley, at the head of Yoho river, Rocky Mts., Kootenay district, B.C.
- Waterfowl**; lakes, on Mistaya river, Rocky mountains, Alberta.
- Waterhen**; lake and river, between Manitoba and Winnipegosis lakes, Manitoba.
- Waterton**; lake and river, southern Alta. (Not Chief Mt. lake nor Kootenai river.)
- Watsheeshoo*. See Watshishu.
- Watshishu**; river, Saguenay county, Que. (Not Watcheshoo nor Watsheeshoo.)
- Watson**; island, between S. end of Kaien I. and mainland, Coast district, B.C.
- Watson**; railway station, ridge, river, and valley, north of Bennett lake, Yukon.

- Watt**; railway station, Charlotte county, N.B. (Not Watt Junction.)
Watt Junction. See Watt.
- Waugh**; creek, tributary to Goldstream river, Vancouver island, B.C.
- Waugh's**; river, Colchester county, N.S. (Not Wough's.)
- Waugwash.* See Kaniapiskau.
- Waugush**; lake, Spragge township, Algoma district, Ont. (Not Waagoosh.)
- Wave.* See Wavy.
- Wavy**; lake, north of Battle river, Alberta. (Not Wave.)
- Wawagosik**; lake, west of Harricanaw river, Abitibi territory, Que. (Not Wawagosic nor Wawagosie.)
- Waweig**; lake, northwest of Wabinoosh lake, Thunder Bay district, Ont.
- Wawiag**; river, Rainy River and Thunder Bay districts, Ont. (Not Kawawagamak.)
- Wawong**; lake, near Windigokan L., E. of L. Nipigon, Thunder Bay district, Ont.
- Way**; point S.W. of Potter point, Ameliasburg Tp., Prince Edw. Co., Ont. (Not Salt.)
- Wayagamak**; lake, Champlain county, Que. (Not Wayagamack.)
- Weaver**; creek, tributary to Moyie river, Kootenay district, B.C.
- Wedding**; river, tributary to Bell river, Abitibi territory, Que.
- Wedge**; island, east of Dokis island, at entrance to Key harbour, Georgian bay, Parry Sound district, Ont.
- Wedge**; point, Ladysmith harbour, east coast of Vancouver island, B.C.
- Wedgwood**; mount, northeast of mount Assiniboine, Rocky mountains, Kootenay district, B.C.
- Wedlock**; island, Admiralty group, St. Lawrence river, Leeds county, Ont.
- Weed**; hills, southeastern Saskatchewan.
- Weenisk.* See Winisk.
- Weese**; creek, Brighton township, Northumberland county, Ont. (Not Weese's.)
- Weggs**; cape, south shore of Hudson strait, New Quebec.
- Weibikwei**; lake, at head of Winisk river, Patricia district, Ont. (Not Pepisquew nor Winisk.)
- Weir.* See Footprint.
- Weir.* See Hennigar.
- Weiseieno**; lake, near Manitou lake, Kenora district, Ont.
- Wekusko**; lake, Grass river, east of Reed lake, Man. (Not Herb nor Sweet Herb.)
- Welcome**; lake, Lawrence township, Haliburton county, Ont.
- Welland**; river, Welland county, Ont. (Not Chippewa.)
- Wellandport**; post office, Lincoln county, Ont. (Not Welland Port.)
- Weller**; bay, near west end of bay of Quinte, Prince Edward Co., Ont. (Not Weller's.)
- Wellesley**; lake, west of White river, Yukon.
- Wellington**; bay and village, Prince Edward county, Ont. (Not Big Sandy bay.)
- Wells**; shoal, southeast of Lyal reef, Bruce county, Ont.
- Welsh**; bank, north of Scott point, Bruce county, Ont.
- Welshpool**; village, on Friar bay, Campbello island, Charlotte county, N.B. (Not Campo Bello, Welchpool, nor Welsh-Pool.)
- Wemistagosew**; river, upper waters of Waswanipi river, Abitibi territory, Que.
- Wenasaga**; river, flowing into L. Seul, Patricia district, Ont.

SESSIONAL PAPER No. 25d

Wendigokan. See Windigokan.

Wenkchemna; peaks, in the Bow range of the Rockies, Alta. and Kootenay district, B.C. (Not Desolation range nor "The Stragglers.")

Wepiskow. See Burntwood.

Wesketahin; village, near the mouth of Unahini river, Yukon.

Weslemkoon; lake, Addington county, Ont.

West; bay, the western extremity of lake Evans, Abitibi territory, Que.

West; river, Bonaventure county, Que. (Not West Port Daniel river.)

West; river, Pictou county, N.S. (Not West river of Pictou.)

West; river, tributary to Fraser river, above Quesnel, Cariboo district, B.C.

West. See Nelson.

West. See Owen.

West. See Torres.

West Arrowwood; creek, tributary to Bow R., S. Alberta. (Not West Arrow-wood.)

West Belanger. See Belanger.

Westboro; post office and summer resort, Carleton county, Ont. (Not Westborough.)

Westbourne; bay, north shore of Hudson strait, N.W.T.

Westbourne; post settlement, on Whitemud river, south of L. Manitoba, Man.

West Branch of Don (river). See Don.

West Branch of Tobique (river). See Sisson.

West Dog Head. See Whiteway.

West Duck; reef, northwest of Western Duck island, Manitoulin district, Ont.

Western; river, emptying into Coronation gulf, N.W.T. (Not Back's Western.)

Western Duck; island, of the Duck group, Manitoulin district, Ont.

West Flamboro. See Flamboro West.

West Flamborough. See Flamboro West.

West Fox. See Fox.

Westholme; post settlement, south of Chemainus river, Vancouver island, B.C.

West McGillivray. See McGillivray.

West Niskitogisew. See Kiskitto.

West Port Daniel. See West.

West river of Pictou. See West.

West Road (river). See Blackwater.

West Sister; shoal, S. of Yeo I., entrance to Georgian bay, Manitoulin district, Ont.

West Winisk. See Asheweig.

Wetetnagami; lake, and river tributary to Opawika river, Abitibi and Pontiac, Que.

Wettigo; lake, south of Nemiskau lake, Mistassini territory, Que.

Weymontachi; Inlian village, at the mouth of Manuan river, upper St. Maurice river, Champlain county, Que. (Not Weymontachingue.)

Whale; river, emptying into Ungava bay, New Quebec.

Whaleback; mountain, at the headwaters of Yoho river, Rocky mountains, Kootenay district, B.C. (Not Whalesback.)

Whaler; bay, Active pass, strait of Georgia, New Westminster district, B.C.

Wharton; harbour, north shore of Hudson strait, N.W.T.

- Whatshan**; lakes and river, west of Lower Arrow lake, Kootenay district, B.C.
- Wheaton**; mount, in the "big bend" of Wheaton river, southern Yukon.
- Wheaton**; river, emptying into the west side of Bennett lake, Yukon.
- Wheaton Vault**; brook, flowing into Minas channel, Kings county, N.S.
- Wheeler**; mount, Purity range, Selkirk mountains, Kootenay district B.C.
- Wheeler**; reef, southwest of Kitchener island, Manitoulin district, Ont.
- Whetstone**; lake, Lake township, Hastings county, Ont.
- Whiffen**; spit, Sooke inlet, Vancouver island, B.C.
- Whipple**; mount, east of the elbow of Stikine river, Cassiar district, B.C.
- Whipsaw**; creek, flowing northeasterly into Similkameen river, Yale district, B.C.
- Whirlpool**; river, flowing from Athabaska pass northerly into Athabaska river, Alta.
- Whirlpool.* See Sunwapta.
- White**; cliff, northeast of Hungerford point, Manitoulin I., Manitoulin district, Ont.
- White**; mount, north of Atlin lake, Yukon.
- White**; pass, at head of Skagway river, Cassiar district, B.C.
- White**; river, tributary to Yukon river, above Stewart river, Yukon.
- White**; strait, north shore of Hudson strait, N.W.T.
- White.* See Ketch.
- White Bear**; bay, northeast of Markham bay, Hudson strait, N.W.T.
- Whitebear**; lake, north of Saskatchewan Landing, southern Sask. (Not White Bear.)
- White Bear**; lake and river, at headwaters of Gatineau river, Champlain county, Que.
- White Bear.* See Cassels.
- Whiteclay**; lake, Ogoki river, east of Whitewater lake, Thunder Bay district, Ont.
- White Douglas**; the southerly peak of mount Douglas, Rocky mountains, Alberta.
- Whitefish.* See Garson.
- Whitefish.* See LaSarre.
- Whitefish.* See Meacham.
- Whitefish Spawning.* See Chukuni.
- Whitefox**; river, tributary to Torch river, central Saskatchewan. (Not White Fox.)
- White Goat.* See Cline.
- Whitegoose**; river, tributary to Migiskan river, below Paskagama lake, Pontiac county, Que. (Not White Goose.)
- White Grouse**; creek, east of Whatshan lake, Kootenay district, B.C.
- Whitehorn**; mountain, northwest of Mount Robson, Cariboo district, B.C. (Not Turner nor White Horn.)
- Whitehorse**; town and rapid, Lewes river, below Miles canyon, Yukon. (Not White Horse.)
- White Man**; pass, Rocky Mts., Alta. and Kootenay district, B.C. (Not White Man's.)
- Whitemouth**; lake and river, tributary to Winnipeg river, also village, Manitoba. (Not White Mouth.)
- Whitemud**; river, flowing into the southerly end of L. Manitoba, Man. (Not White Mud nor White-mud.)
- White Mud.* See Frenchman.
- Whiterock**; post office, Kings county, N.S. (Not White Rock Mills.)
- White Rock Mills.* See Whiterock.

SESSIONAL PAPER No. 25d

- Whites**; post office, Kings county, N.S. (Not White's Corner.)
- Whites**; post office and railway station, Huntingdon county, Que. (Not White's nor White's Station post office.)
- White's*. See Geikie.
- Whitesand**; lake and river, emptying into the northerly end of L. Nipigon, Thunder Bay district, Ont.
- Whitesand**; post office and river, southeastern Saskatchewan. (Not White Sand.)
- White's Corner*. See Whites.
- Whiteshell**; lake and river, emptying into Winnipeg river, Manitoba.
- Whiteshore**; lake, east of Tramping lake, Sask. (Not White Shore.)
- White's Station*. See Whites.
- Whitestone**; lake, north of Cat lake, Patricia district, Ont.
- Whitestone**; river, tributary to Tatsbenshini river, southwestern Yukon.
- Whiteswan**; river, emptying into Teslin L., Cassiar district, B.C. (Not White Swan.)
- Whitewater**; lake, southwestern Manitoba.
- Whitewater*. See Taseko.
- Whiteway**; point, at west side of north entrance to the narrows of lake Winnipeg. Man. (Not Dog's Head nor West Dog Head.)
- White Whale*. See Wabamun.
- Whitewood**; lake, Tp. 29, R. 17, W. 2 M., southeastern Saskatchewan.
- Whitewood*. See Basswood.
- Whitford**; lake, in Tp. 56, Rs. 15 and 16, W. 4th M., Alberta.
- Whitley**; bay, northwest of Burgoyne bay, Hudson strait, New Quebec.
- Whitney**; lake, Smellie township, Kenora district, Ont.
- Wholdaia**; lake, an expansion of Dubawnt river, N.W.T. (Not Wholdiah.)
- Whymper**; mount, northwest of Storm mountain, Rocky mountains, Alta.
- Whymper**; mount, near head of Chemainus river, Vancouver island, B.C.
- Whymper*. See Kiwetinok.
- Whyte**; mount, west of lake Louise, Alberta.
- Wiachuan**; river, Richmond gulf, New Quebec. (Not Wiachewan nor Wiachouan.)
- Wicked**; point, Athol township, Prince Edward county, Ont. (Not Salmon.)
- Wickens**; lake, Britton township, Kenora district, Ont.
- Wickham**; post office and railway station, Drummond Co., Que. (Not Wickham West.)
- Wickham West*. See Wickham.
- Wicksteed**; rock S.E. of Dead I., entrance to Key har., Georgian B., Parry S. dist, Ont.
- Wigwam**; river, tributary to Elk river, Kootenay district, B.C.
- Wigwas*. See Eva.
- Wigwasan**; lake, west of Bukemiga lake, Thunder Bay district, Ont.
- Wigwasikak**; lake, northwest of Cat lake, Patricia district, Ont. (Not Birch.)
- Wikwaskapauk*. See Mourier.
- Wilcocks**; lake, Whitechurch township, York Co., Ont. (Not Wilcox nor Willcocks.)
- Wilcox**; lake, English river, Kenora district, Ont.
- Wilcox**; pass and peak, north of Mt. Athabaska, Rocky mountains, Alberta.
- Wild**; bight, in west side of Fitzwilliam island, Manitoulin district, Ont.
- Wild Horse**; river, tributary to Kootenay R., Kootenay district, B.C. (Not Skirmish.)

- Wilkinson**; creek, tributary to W. fork of Kettle R., above Carmi, Yale district, B.C.
- Willard**; lake, north of Hawk lake, Kenora district, Ont.
- Wilcocks**. See Wilcocks.
- William**; head, at north entrance to Pedder bay, Vancouver island, B.C.
- Williams**; bay, south shore of L. Seul, Kenora district, Ont.
- Williams**; lake, east of Fraser river, in the southern portion of Cariboo district, B.C.
- Williams**; lake, east of Cat lake, Patricia district, Ont.
- William Smith**; cape, northeast shore of Ungava bay, New Quebec.
- Willoughby**; island, northeast of Grenadier island, St. Lawrence river, Leeds Co., Ont.
- Willowbank**; creek and mountain, W. of Blaeberry R., Rocky Mts., Kootenay, B.C.
- Willowbunch**; lake and post office, southern Saskatchewan. (Not Willow Bunch.)
- Willowgrove**; post office, Haldimand county, Ont. (Not Willow Grove.)
- Wilson**; mount, also glacier, north of Mt. Murchison, Rocky mountains, Alta.
- Wilson**; mount, also lake, Ross river, Yukon.
- Wilson**; post office, Grenville county, Ont. (Not Wilson's Bay.)
- Wilson**; post office, northwest of Chemainus river, Vancouver island, B.C. (Not Wilson's Crossing.)
- Wilson**; river, flowing easterly into Dauphin lake, Manitoba.
- Wilson**. See Kiwetinok.
- Wilson Corners**; post office, Wakefield Tp., Ottawa Co., Que. (Not Wilson's Corners.)
- Wilson's Bay**. See Wilson.
- Wilson's Crossing**. See Wilson.
- Wiltshire**; village, Queens county, P.E.I. (Not New Wiltshire nor North Wiltshire.)
- Wiltse**; lake, Leeds county, Ont. (Not Wiltz nor Wiltze.)
- Wimapedi**; brook, tributary to Burntwood river, Manitoba.
- Winawiash**; lake, southwest of Grand lake Victoria, Timiskaming county, Que.
- Wind**; mountain, west of Kananaskis river, Rocky Mts. park, Alta. (Not Windy.)
- Windermere**; lake and town, at headwaters of Columbia river, Kootenay district, B.C. (Not Lower Columbia lake.)
- Windigo**; bay and islands, north shore of L. Nipigon, Thunder Bay district, Ont.
- Windigo**; lake and river, tributary to Severn river, Patricia district, Ont.
- Windigokan**; lake, E. of L. Nipigon, Thunder Bay district, Ont. (Not Wendigokan.)
- Windy**; arm, Tagish lake, Yukon.
- Windy**; lake, southwest of Oxford lake, Manitoba.
- Winging**; point, east headland of Fourchu bay, opposite Guyon island, Cape Breton county, N.S. (Not Wining nor Winning.)
- Wining**. See Winging.
- Winisk**; lake and river, Patricia district, Ont. (Not Wai-nusk nor Weenisk.)
- Winiskisis**; river, tributary to upper Winisk river, Patricia district, Ont.
- Winnange**; lake, north of Dryberry lake, Kenora district, Ont. (Not Vulture.)
- Winning**. See Winging.
- Winnipegosis**; a large lake in Manitoba. (Not Winnipegosis nor Winnipegosis.)
- Winonitikameg**; lake, northwest of Attawapiskat lake, Patricia district, Ont.
- Wintawan**; lake, southwest of Attawapiskat lake, Patricia district, Ont.
- Wintego**; lake, an expansion of Churchill river, below Reindeer river, Sask.

SESSIONAL PAPER No. 25d

- Wintering**; lake, west of Landing lake, Manitoba.
- Witchai**; lake, on lower Grass river, Manitoba.
- Witchekan**; lake, in the Thickwood hills, central Saskatchewan.
- Wiwa**; creek, flowing easterly into Wood river, southern Saskatchewan.
- Wiwaxy**; peaks, southwest of mount Victoria, Rocky mountains, Kootenay, B.C.
- Wi-yat.* See Waiatt.
- Wizida**; lake, at headwaters of Attawapiskat river, Patricia district, Ont.
- Wizidans**; lake, at headwaters of Attawapiskat river, Patricia district, Ont.
- Woden**; a peak of the Valhalla mountains, Kootenay district, B.C.
- Wolf**; canyon, on Pelly river, above Woodside river, Yukon.
- Wolf**; creek, tributary to Klondike river, Yukon.
- Wolf.* See Grimsthorpe.
- Wolf.* See Muhigan.
- Wolf Rand.* See Muhigan.
- Wolfe**; island, St. Lawrence river, Frontenac county, Ont. (Not Long.)
- Wolfe**; island, south of De Stein point, Prince Rupert harbour, Coast district, B.C.
- Wolfestown**; township and village, Wolfe county, Que. (Not Wolfstown.)
- Wollaston**; peninsula, S.W. portion of Victoria I., N.W.T. (Not Wollaston Land.)
- Woman**; lake and river, south of Shabumeni lake, Patricia district, Ont. (Not Woman Lake river.)
- Wollaston Land.* See Victoria island.
- Wood**; brook, tributary to Grass river, Manitoba.
- Wood**; mount, west of Saanich inlet, Vancouver island, B.C.
- Wood**; mountain and river, also Wood Mountain post office and R.N.W.M. Police station, southern Saskatchewan. (Not Wood Mountain river.)
- Wood.* See Jacob.
- Woodley**; range of mountains, west of Kulleet bay, Vancouver island, B.C.
- Wood Mountain river.* See Wood river.
- Woodroffe**; post office and summer resort, Carleton county, Ont. (Not Woodroffe nor Woodruff.)
- Woods**; lake of the, on international boundary, Kenora and Rainy River districts, Ont.
- Woodside**; river, tributary to Upper Pelly river, Yukon.
- Woods**; island, Ladysmith harbour, Vancouver island, B.C. (Not Long.)
- Woods.* See Carroll Wood.
- Woodtick**; island, St. Clair river, Lambton county, Ont. (Not Fawn.)
- Woody**; river, flowing northeasterly into Swan lake, Man. and Sask.
- Work.* See Wark.
- Worthington**; creek, west of Lower Arrow lake, Kootenay district, B.C.
- Wotan**; mount, Adamant range, Selkirk mountains, Kootenay district, B.C.
- Wotnimata**; lake, east of Shabogama lake, Pontiac county, Que.
- Wreck**; point, southwest of Tobermory harbour, Bruce county, Ont.
- Wright**; creek, west end of Surprise lake, Cassiar district, B.C.
- Wrench**; lake, northeast of Carlton, central Saskatchewan.
- Wright**; creek, tributary to Blanche river, Timiskaming district, Ont.
- Wright**; point, north of Goderich, Huron county, Ont.

- Wright**; sound, between Gil and Gribbell islands, Coast district, B.C.
Wunnummin; lake, upper waters of Winisk river, Patricia district, Ont.
Wuskatasko; brook, tributary to Grass river, Manitoba.
Wuskwatim; brook and lake, on Burntwood river, Manitoba. (Not Beaver-dam, Ooskootim, nor Waskwatim.)
Wyatt. See *Waiatt*.
Wynott; point, N.E. of Head harb., St. Margaret bay, Halifax Co., N.S. (Not Smith.)

X

- Xschwan*. See Granby

Y

- Yahk**; mountain, river, and railway station, in S.W. portion of Kootenay district, B.C.
Yalakom; game reserve, between north fork of Bridge river and the Fraser, Lillooet district, B.C.
Yarrell; mount, in southeastern portion of Kootenay district, B.C.
Yawningstone; lake, north of Cormorant lake, Manitoba.
Yellow; point, northeast of Kulleet bay, Vancouver island, B.C.
Yeo; channel, island, and spit, at entrance to Georgian bay, Manitoulin district, Ont.
Yeo; island, southwest of Grenadier island, St. Lawrence river, Leeds county, Ont. (Not Bluff nor Old Bluff.)
Yeth; creek, tributary to Inklin river, Cassiar district, B.C.
Yoho; glacier, lake, park, pass, peak, and river, Rocky mountains, Kootenay district, B.C. (Not Collie glacier, Glacier creek, North Fork river, Upper Emerald lake, nor Wapta lake and pass.)
York; river, trib. to Madawaska R., Hastings and Renfrew Cos, Ont. (Not York Brch.)
York; sound, in southwest portion of Frobisher bay, N.W.T.
Yorke; island, Admiralty group, St. Lawrence river, Leeds Co., Ont. (Not Boss Dick.)
Youell; island, east of Hopkins point, Bruce county, Ont.
Young; lake, in S.W. portion of Dalton Tp., Victoria Co., Ont. (Not Montgomery.)
Youngs; point, Weller bay, Ameliasburg township, Prince Edward county, Ont.
Young's. See *Limestone*.
Yukness; mount, southwest of mount Lefroy, Kootenay district, B.C.
Yukon; river and territory, N.W. Canada. (Not Youcon, Youkon, Kwichpak, &c.)

Z

- Zachariah**; point, near Dodd narrows, east coast of Vancouver island, B.C.
Zanardi; rapids, at S.W. end of Wainwright basin and S. of Kaieen I., Coast dist, B.C.
Zemawdza; Indian village, Kitimat arm, Coast district, B.C. (Not Ze-mawd-za.)
Zenazie; creek, south of Gladys lake, Cassiar district, B.C.
Zero; rock, in Haro strait, N.E. of Gordon head, S.E. coast of Vancouver I., B.C.
Zinc; mountain and valley, east of Ice river, Rocky mountains, Kootenay district, B.C.
Zinkan; island, Pine Tree harbour, Bruce county, Ont.
Zwick; island, in the bay of Quinte, Hastings county, Ontario. (Not Zwick's.)
Zymoetz; river, tributary to Skeena river, Coast district, B.C. (Not Copper.)
